Associate in Science: Math Pathway

All Pathways are designed to transfer to a four-year institution for eventual completion of a BA/BS degree.

The field of mathematics forms the foundation of many other disciplines, including business, science, medicine, and economics. Mathematicians are taught skills such as data analysis, modeling, problem solving, and analytical thinking. A career in mathematics can also interface with other disciplines, such as biology and engineering, to generate new fields of study. Mathematicians usually end up in careers as diverse as industry, academia, or government.
