Governed by: Asheville-Buncombe Technical Community College Board of Trustees

Asheville-Buncombe Technical Community College is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate degrees, diplomas and certificates. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Asheville-Buncombe Technical Community College.

Recognized and approved by:

- North Carolina State Board of Community Colleges
- N.C. State Approving Agency for the Use of Veterans Military and Educational Benefits

Program Accreditors/Approvals:

- American Association of Medical Assistants
- American Culinary Federation
- American Dental Association, Commission on Dental Accreditation
- American Veterinary Medical Association Committee on Veterinary Technician Education and Activities
- Commission on the Accreditation of Allied Health Education Programs
- Joint Review Committee on Education in Radiologic Technology
- National Accrediting Agency for Clinical Laboratory Sciences
- National Association for the Education of Young Children
- National Automotive Technicians Education Foundation, Inc.
- National Security Agency, National Information Assurance Education and Training Program
- North Carolina Board of Nursing
- North Carolina Office of Emergency Medical Services
- North Carolina State Board of Cosmetic Art Examiners

For information about graduation rates, the median debt of students who completed the program, and other important information on federally-designated gainful employment programs, visit abtech.edu/gainful-employment.

Catalog changes:

The official and most current version of the Asheville-Buncombe Technical Community College catalog is posted on the College website at abtech.edu. Neither the online version nor the print version of the catalog should be considered a contract between Asheville-Buncombe Technical Community College and the student. Adjustments in program or course content, sequence, schedule, and faculty may be made as necessary. A minimum enrollment may be required to offer a course or continue a program. Charges for tuition and fees are subject to change. The College Calendar dates or events may change because of inclement weather or for other reasons.

|--|--------------|--|
| 1. Passing Rates for Licensure and Certification Exams for First-Time Test Takers <i>Standard: 80% aggregate passing rate</i> | YES | 95% aggregate passing rate |
| 2. Performance of College Transfer Students <i>Standard: 83% with a GPA of 2.0 or higher after two semesters</i> | YES | 92% of college transfer students had a GPA of 2.0 or above |
| 3. Passing Rates of Students in Developmental Courses <i>Standard: 75% passing rate with a grade of "C" or better</i> | YES | 87% passing rate |
| 4. Success of Developmental Students in Subsequent College Courses <i>Standard: 80% of students who took developmental courses will pass the "gatekeeper" English and/or mathematics course for which the developmental course serves as a prerequisite</i> | YES | 89% passing rate |
| 5. Satisfaction of Completers and Non-Completers <i>Standard: 90% satisfied with the quality of college programs and services</i> | YES | 97% satisfaction rate |
| 6. Curriculum Student Retention, Graduation and Transfer <i>Standard: 65% of fall degree-seeking students will either re-enroll, transfer or graduate by the subsequent fall</i> | YES | 72% retention, graduation or transfer rate |
| 7. Business/Industry Satisfaction with Services Provided <i>Standard: 90% of respondents will rate services provided as "very good" or "excellent"</i> | YES | 95% satisfaction rate |

For each measure met, the college may retain and carry forward into the next fiscal year one-fourth of one percent (1/4 of 1%) of its final fiscal year General Fund appropriation. If a college meets all eight performance funding measures, and:

- 1) achieves a 70% or greater passing rate on all licensure/certification exams and
- 2) its college transfer performance equals or exceeds the performance of native UNC students, it is classified as an "Exceptional" institution and is eligible for additional funding, which is distributed equally among Exceptional colleges.

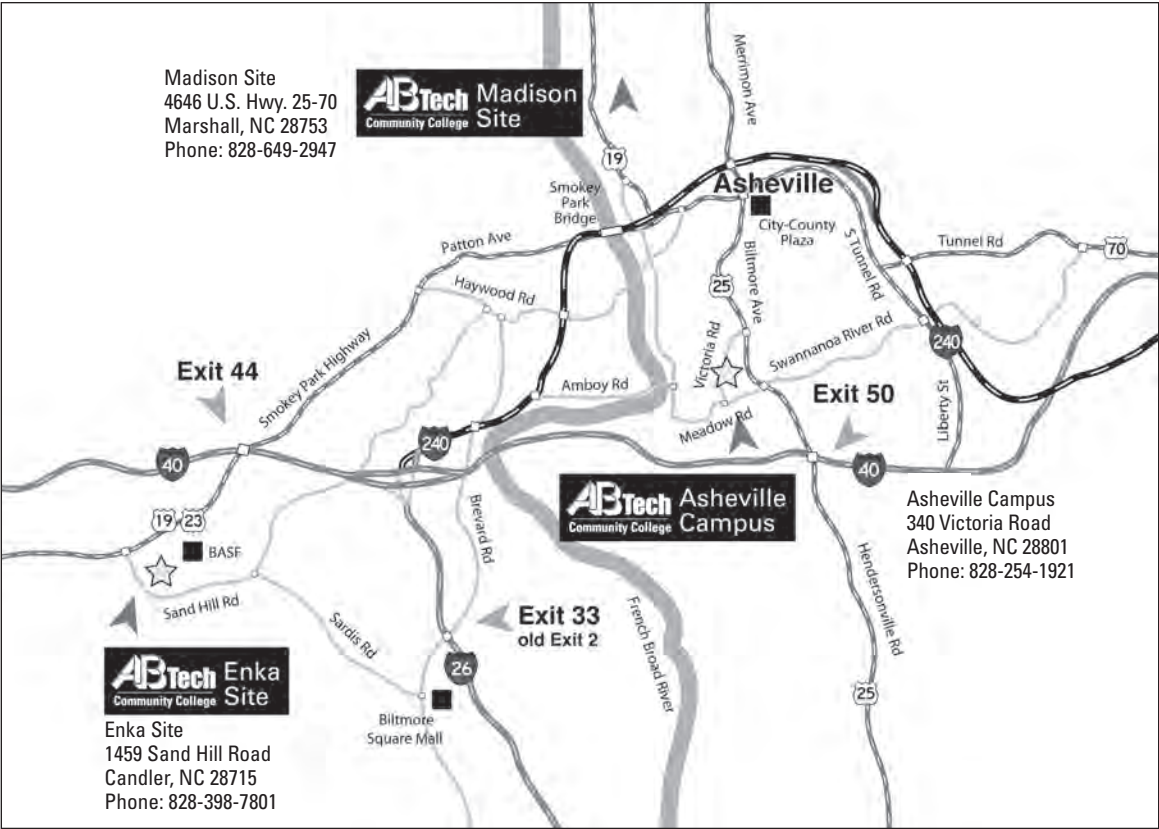

*Seven measures were reported by NCCCS in 2012 (Progress of Basic Skills Students was omitted).

"Exceptional" College Status

Must meet all of the above performance measures in addition to:

| | | |
|---|-----|--|
| 1a. Passing Rates for Licensure and Certification Exams for First-Time Test Takers <i>Standard: 70% minimum passing rate for all exams</i> | YES | All required exams achieved a 70% minimum passing rate |
| 2a. Performance of College Transfer Students <i>Standard: 88% equivalent to or greater than native UNC sophomores and juniors</i> | YES | 92% of college transfer students had a GPA of 2.0 or above |

Organization

History

Asheville-Buncombe Technical Community College has served as the community's premier technical educator for many years. Originally funded by a bond election, the institution was established September 1, 1959 and named the Asheville Industrial Education Center.

Following legislation creating the North Carolina System of Community Colleges that was enacted in 1963 by the General Assembly, the name was changed on January 9, 1964 to Asheville-Buncombe Technical Institute. This legislation enabled the College to confer the Associate in Applied Science degree for the first time at graduation ceremonies in August 1964.

The Board of Trustees approved a third name change to Asheville-Buncombe Technical College on August 6, 1979. A final name change occurred November 2, 1987 when the Board of Trustees approved Asheville-Buncombe Technical Community College, an action that became official when endorsed by the Buncombe County Commissioners on November 3, 1987.

In October 1988, the College received approval to offer associate degree programs. In September 1989, the College enrolled its first class for the Associate in Science degree. The Associate in Arts degree was first offered during summer quarter 1990-91.

On January 18, 1990, A-B Tech officially opened a site in Madison County. The College had served the county out of temporary quarters at the Marshall Elementary School since December 12, 1984.

By the fall term of 1997, the College had reengineered all programs and converted to the semester system.

On October 23, 2000, BASF Corporation donated nearly 37 acres and three buildings to A-B Tech to establish a satellite site in Enka that includes a Business Development and Incubation Program, a Small Business Center, pro bono professional services, a student incubation program, a technology training and conference center, a bio-business center, an institute for sustainability and technology, and a commercial kitchen.

On November 8, 2011, voters approved a quarter of one cent sales tax increase to fund a \$129 million construction campaign to provide 21st century facilities to train students for 21st century jobs.

Administration

The College was initially administered by the Asheville City Board of Education. Following the establishment of the North Carolina System of Community Colleges, control passed to an independent board of trustees.

From the beginning, prominent Asheville and Buncombe County business and community leaders have helped to guide the College. In addition, each academic program has an advisory committee made up of local professionals. Several hundred local citizens provide guidance for the educational programs of the College.

Curricula

The first program offered by the College was Practical Nursing. Electronics Engineering Technology and the Machinist programs were started in 1960. These three curricula are still offered along with many other career and college transfer programs.

The College offers the Associate in Arts, the Associate in Science, the Associate in Fine Arts, and the Associate in Applied Science degrees, diplomas, and certificates.

The Associate in Arts, Associate in Science, and Associate in Fine Arts degree programs are offered in the Division of Arts and Sciences. All career curricula and courses are offered through four divisions: Allied Health and Public Service Education, Business and Hospitality Education, Emergency Services and Engineering and Applied Technology.

Economic & Workforce Development/Continuing Education courses are generally offered on demand, with sufficient enrollment. The Division of Economic & Workforce Development/Continuing Education offers short-term workforce training options for business, industry and the general public. Courses in healthcare, business, hospitality, technology, industry, trades and employability skills are available. Training can be customized to meet the unique needs of small, mid-sized, and large businesses and can be tailored for delivery on demand. Community enrichment classes, such as art, languages and practical skills, are offered year round at each campus location throughout the College's service area.

Curriculum courses are usually offered on planned schedules in both the day and evening/weekend programs. Many curriculum classes are also offered in clusters for unclassified students.

Both curriculum and Economic & Workforce Development/Continuing Education programs are supported through the activities of the GED program, Developmental Studies, the Academic Learning Center, and Holly Library. Classes meet on campus and at various off-campus sites. Course requirements are the same without regard to meeting times, formats, or locations.

Campus Facilities

On March 15, 1961 the Industrial Education Center moved into two new buildings off Victoria Road in Asheville. Over the years, the Board of Trustees has acquired land that today totals 144 acres.

Located on the Asheville Campus is the Smith-McDowell House, the oldest brick house in Buncombe County, which is leased to the Western North Carolina Historical Association.

On January 18, 1990 the College established a site in Madison County. The satellite operation provides adult education and college credit courses for the people of Madison County.

Over the years, a combination of special funding has provided for campus expansion. Since 1985, the North Carolina General Assembly has approved \$5 million in special legislation for campus construction.

Since 1987, Buncombe County voters have approved \$13.5 million in bonds to be used for campus additions and renovations. In statewide bond referendums, voters approved \$5 million in 1993 and \$14 million in 2000 for capital projects at A-B Tech.

Buncombe County Commissioners purchased property for A-B Tech belonging to St. Genevieve Gibbons Hall, a private school that merged with Asheville Country Day School to form Carolina Day School. The Board of Trustees acquired the title to these 12.77 acres and four buildings on September 23, 1987. In 1990, the Commissioners purchased 16.75 acres contiguous to the west boundaries of the campus. This purchase included Sunnicrest, the only remaining lodge constructed by George Vanderbilt. The lodge has been renovated to house College offices.

On October 21, 1987, A-B Tech in cooperation with Buncombe Child Development opened a Child Care Center, which offers day service to students and faculty.

On October 23, 2000, BASF Corporation donated nearly 37 acres and three buildings to A-B Tech to establish a satellite site in Enka that includes a Business Development and Incubation Program, a Small Business Center, pro bono professional services, a student incubation program, a technology training and conference center, a bio-business center, an institute for sustainability and technology, and a commercial kitchen.

Asheville-Buncombe Technical Community College Foundation

The Asheville-Buncombe Technical Community College Foundation was established in 1996 as a separate 501(c)(3) non-profit corporation. Its sole purpose is to provide financial support for the students and programs of A-B Tech. The A-B Tech Foundation meets critical needs that cannot be addressed in the College's normal operating budget. All gifts are tax deductible as allowed by law.

Current Status

A-B Tech, with strong local support, has grown in facilities and land acquisition, in enrollment, in curricula, and in expanded services to the community. The College has the largest total headcount enrollment of any institution of higher education in Western North Carolina, serving more than 27,000 students annually.

Location

The Asheville campus is located on Victoria Road in Asheville, North Carolina, a city repeatedly named one of the most livable towns in America. Situated near major interstates and on local bus routes, the College is convenient to the citizens it serves.

The Madison Site is located in Marshall, NC. The Enka Site is located in the Enka community near Asheville, NC.

College Vision, Mission and Values

Vision

Locally Committed • Regionally Dynamic •
World-Class Focused

Mission

A-B Tech inspires, nurtures and empowers students and the community toward a better quality of life through progressive teaching, bold innovation and supportive collaboration.

Values

A-B Tech's core beliefs guide behaviors, decisions and interactions toward accomplishing the mission and achieving the vision. A-B Tech is dedicated to student and community success through:

Excellence: To practice the highest levels of professionalism and performance in providing a quality education for our diverse community. We commit to superior personal, academic and professional standards as we strive for distinction in all aspects of our learning and work.

Learning: To foster a love of learning and to empower individuals to succeed in our local and global community. To be the #1 resource for college and career readiness, transfer education, enrichment, workforce development and life-long learning.

Supportive Environment: To create a safe, nurturing, appreciative, compassionate atmosphere of mutual respect and collaborative partnerships among all individuals.

Innovation: To actively seek creative solutions and cutting-edge initiatives that lead to best practices.

Inclusiveness: To embrace the diversity of cultures, ideas, wisdom and points of view that makes people unique and adds quality to our lives and vitality to the College.

Continuous Improvement: To continually assess the effectiveness of our programs, services and processes to assure that we are doing our best every day and that over time our best gets better.

Non-Discrimination Policy

The Board of Trustees and the administration of Asheville-Buncombe Technical Community College are fully committed to encouraging and sustaining a learning and work environment that is free from prohibited discrimination. The College does not practice or condone discrimination on the grounds of race, national origin, religion, sex, pregnancy, disability, age, veterans' status or genetic information in the administration of its employment policies, educational policies, admission policies, scholarship and loan programs or other school-administered programs.

Inquiries or complaints concerning the application of Title IX, the ADA, and other Federal non-discrimination legislation to Asheville-Buncombe Technical Community College should be referred to:

Applicants or current employees:

Director of Human Resources/ADA Coordinator
340 Victoria Road
Asheville, NC 28801
398-7170

Prospective or current students:

Disability Services Office
340 Victoria Road
Asheville, NC 28801
398-7141, 398-7581, or 398-7587

Individuals with Disabilities

Individuals with disabilities (as defined in the Americans with Disabilities Act of 1990, "ADA") wishing to make a request for reasonable accommodation, auxiliary communication aids or services, or materials in alternative accessible formats should contact the Disability Services Counselor in the K. Ray Bailey Student Services Center. A person who wish to file a complaint of alleged discrimination on the basis of disability should contact the Director of Human Resources listed above.

Individuals with Communicable Diseases

Asheville-Buncombe Technical Community College shall not discriminate against applicants, employees, students, or persons utilizing A-B Tech services who have or are suspected of having a communicable disease. As long as employees are able to perform satisfactorily the essential functions of the job, and there is no medical evidence indicating that the employee's condition is a threat to the health or safety of the individual, coworkers, students, or the public, an employee shall not be denied continued employment. Applicants shall not be denied employment, nor shall students be denied admission to the campus or classes, nor shall persons utilizing A-B Tech services be denied services based on whether they are suspected of having a communicable disease so long as there is no threat to the health and safety of students, staff, or others involved. A-B Tech will consider the educational or employment status of individuals with a com-

municable disease or suspected of a communicable disease on an individual, case-by-case basis following any procedures outlined by the President.

Internet and Campus Network Acceptable Use Policy

Asheville-Buncombe Technical Community College provides campus network and computing facilities including Internet access for the use of faculty, staff, students, and other authorized individuals in support of the research, educational, and administrative purposes of the College.

The College has extensive information technology resources and systems available for both instruction and administrative applications. Faculty, staff, and students are encouraged to become familiar with College technology resources and systems and to use them on a regular basis. Users are expected to exercise responsible, ethical behavior when using these resources and to adhere to the following guidelines:

1. The Internet and associated resources contain a wide variety of material and information. Information available on the Internet is not generated or selected by Asheville-Buncombe Technical Community College. The College is not responsible for the accuracy or quality of the information obtained through or stored on the campus network.
2. The creation, display, or transmittal of illegal, malicious, or obscene material is prohibited.
3. Asheville-Buncombe Technical Community College will not be liable for the actions of anyone connecting to the Internet through College facilities. All users shall assume full liability (legal, financial, or otherwise) for their actions.
4. The user is responsible for complying with laws protecting software or other accessed information. Downloading programs and files may violate United States copyright laws that protect information and software. Although the Internet provides easy access to software distributed by companies on a trial basis, this does not mean that the software is free or that it may be distributed freely. All files downloaded from a source external to the campus must be scanned for viruses.
5. Because of the insecure nature of transmitting files electronically, no right of privacy exists with regard to email, Internet sessions, or electronic file storage and transmission. When sending or forwarding email over the campus network or the Internet, users shall identify themselves clearly and accurately. Anonymous or pseudonymous posting is expressly forbidden.
6. Asheville-Buncombe Technical Community College computing and telephone facilities maintain usage statistics in archived log files for the purpose of monitoring system performance and usage patterns. Users must not perform tasks they would not want logged.

7. College employees may make reasonable personal use of the campus network, email, and the Internet as long as the direct measurable cost to the public is none or is negligible, and there is no negative impact on employee's performance of duties.
8. All users of the Internet by way of College facilities must comply with all relevant policies and procedures of the College.
9. Use of the Internet for commercial gain or profit is not allowed from a College site.

Failure to comply with any of these provisions will result in disciplinary action as provided for under the disciplinary policies and procedures of the College.

A-B Tech provides access to the Internet by way of the State of North Carolina Wide Area Network. As such, all users are subject to the governing policies established by the North Carolina State Chief Information Officer in addition to the above A-B Tech Internet and Campus Network Acceptable Use Policy. The current policy governing use of the North Carolina Wide Area Network and the Internet can be reviewed at: www.scio.state.nc.us/sitPolicies.asp.

Economic & Workforce Development/ Continuing Education

The Economic & Workforce Development/Continuing Education Division offers classes and training to support the economic development of the community and its citizens. Needs for higher academic education, employment skills, job training and retraining, personal growth and development, and business and economic development are continually identified through a variety of assessments.

Different learning approaches to meet community needs involve traditional classroom instruction, individualized instruction, computer-assisted learning, community-based learning centers, on-site classes and training for business and industry, and apprenticeships. Also available is assessment, consultation, and technical assistance for individuals, businesses, industries, and public and private sector agencies.

The educational offerings of the Economic & Workforce Development/Continuing Education Division are built on the concept of lifelong learning. Classes and training are provided in different formats, at a variety of times, and at locations where the needs of students can conveniently be met.

Some programs are coordinated with the Workforce Investment Act (WIA) or the WorkFirst programs of other agencies. These and other similar programs represent joint efforts to bring education and training services to the community.

Training and course work may earn Continuing Education Unit (CEU) credit applicable to certain professions.

The Economic & Workforce Development/Continuing Education Division provides programs for adults age 18 or older. Minors, ages 16 and 17, can enroll for some classes with special permission and if space allows.

Costs

Costs for Economic & Workforce Development/Continuing Education classes vary. Fees may be charged for books, materials, supplies, and accident insurance. For some classes, North Carolina residents ages 65 or older are exempt from registration fees.

Course Repetition

There is a limit to the number of times a student may enroll in a particular Economic & Workforce Development/Continuing Education class. The Course Repetition policy guides enrollment in selected types of classes.

Certain courses may not be taken more than twice within a five-year period without the student paying the full cost of the course as determined by the College. Students may repeat certain courses more than once if the repetitions are required for certification, licensure, or recertification.

The College reserves the right to modify this policy in general or relative to a given course as necessary to meet the needs of the College and its students.

Services

Economic & Workforce Development/Continuing Education needs are addressed in four domains:

1. Community Enrichment Programs
2. Emergency Services Academy
3. Workforce Programs
4. Economic & Workforce Development

Community Enrichment Programs

Community Enrichment Programs provide courses, seminars and activities that contribute to the community's overall cultural, civic, and intellectual growth. Courses are designed to assist adults in the development of new skills, or upgrading of existing ones. With hundreds of classes and events every year, these programs provide lifelong learning opportunities to community members of Buncombe and Madison counties. The Program provides a variety of art classes, from culinary arts to visual arts. The language component includes Mandarin Chinese, French, Italian, German, and Spanish. Wellness classes such as pilates, yoga, and stress management as well as financial wellness classes attract hundreds of adult learners to the campus each year. Practical skills classes such as upholstery, sewing, and quilting add to the diversity of the courses offered.

Emergency Services Programs

Emergency Services Programs were created to establish a single point of contact for students, College personnel, and the community in the fields of fire services, law enforcement, and emergency medical services. These programs provide training in both curriculum and continuing education. A significant number of these courses are offered to meet licensure or certification requirements for employment in fire and rescue, criminal justice and law enforcement, and emergency medical services. Emergency Services Programs also offer numerous specialized classes that meet qualifications and standards required by governing agencies.

Workforce Programs

Workforce Programs provide education and training for individuals to prepare for new or different employment and to upgrade the skills of individuals in their current employment. These opportunities are available through single courses or a series of courses specifically designed for an occupation. A significant number of these courses are offered to meet licensure or certification requirements. Offerings include programs for many occupational areas including: computer training, health occupations, and technical and industrial training. Employability skills and life success skills are provided by Human Resources Development.

Business & Computer Training Department provides hundreds of offerings each year. A-B Tech works to meet the needs of those in the marketplace who want to master emerging technologies, gain the professional certifications that allow them to advance in their professions, or enter a field that promises continued growth. For administrative, technical, customer service and professional workers alike, computer skills are a constant. A-B Tech's programs provide training in a variety of disciplines to help North Carolina's workforce grow and learn. From basic courses to intensive

professional programs, A-B Tech provides critical and thorough instruction in areas of software, hardware, and peripherals. Designed for both beginning students and professionals seeking to update their skills, A-B Tech courses and programs cover such timely subjects as administrative and financial software, relational database technology, software-specific training programs, and operating systems. Courses are offered in traditional instructor-led, online, and hybrid formats.

Health Occupations Programs include training in healthcare professions such as Nurse Aide I, Nurse Aide II, Medication Aide, MEPAP Activity Professional, Ophthalmic Assisting, and Dental Radiology. Students successfully completing the Nurse Aide I program and state exam will appear on the North Carolina state registry for Nursing Assistants. Additional courses are offered to professionals for CEUs in the fields of dental hygiene and veterinary technology.

Human Resources Development (HRD) Program provides short-term, pre-vocational training and counseling designed to help unemployed and underemployed adults successfully enter the workforce with additional education. Instruction focuses on the following topics:

- Career assessment
- Development of a positive self-concept
- Development of employability skills
- Development of communication skills
- Development of problem-solving skills
- Awareness of the impact of information technology in the workplace

Occupational & Skilled Trades Programs provide education and training for individuals to prepare for new or different employment in industrial or technically challenging fields and to upgrade the skills of individuals in their current employment. These opportunities are available through single courses or a series of courses specifically designed for a business, industrial, or technical occupation. Some of these courses are offered as apprenticeships or to meet certification requirements for employment in careers such as electrical journeymen, building, electrical, mechanical or plumbing inspection and code updates. Additional course offerings include blacksmithing, cabinetmaking, carpentry, substitute teacher training and welding. Classroom and hands-on training in the sustainability arena are also a significant focus.

Economic & Workforce Development

The **Department of Economic & Workforce Development** provides customized training and services that support local business and industry. The Department links the College to the associated efforts of local, regional, and state agencies for economic and workforce development.

The **Customized Training Program** supports the economic development efforts of the State by providing education and training opportunities for eligible businesses and industries. The program was developed in recognition of the fact that one of the most important factors for a business or industry considering locating, expanding, or remaining in North Carolina is the ability of the State to ensure the presence of a well-trained workforce. The program is designed to react quickly to the needs of businesses and to respect the confidential nature of proprietary processes and information within those businesses.

PURPOSE

The purpose of the Customized Training Program is to provide customized training assistance in support of full-time production and direct customer service positions created in the State of North Carolina, thereby enhancing the growth potential of companies located in the state while simultaneously preparing North Carolina's workforce with the skills essential to successful employment in emerging industries.

ELIGIBILITY

Those businesses and industries eligible for support through the Customized Training Program include manufacturing, technology intensive (i.e., information technology, life sciences), regional or national warehousing and distribution centers, customer support centers, air courier services, national headquarters with operations outside North Carolina, and civil service employees providing technical support to United States military installations located in North Carolina.

In order to receive assistance, eligible businesses and industries must demonstrate two or more of the following criteria:

- The business is making an appreciable capital investment;
- The business is deploying new technology;
- The business is creating jobs, expanding an existing workforce, or enhancing the productivity and profitability of the operations with the State; and
- The skills of the workers will be enhanced by the assistance.

Resources may support training assessment, instructional design, instructional costs, and training delivery for personnel involved in the direct production of goods and services. Production and technology support positions are also eligible for training support.

Full-time probationary employees of qualified Customized Training companies are eligible for training delivered by the Community College.

The use of Customized Training funds requires that trainees are paid by the company for all time during training hours.

The College offers quality initiative classes that provide training and technical assistance in productivity improvement, total quality practices and international quality standards for businesses, healthcare providers, and public and private sector agencies. Offerings include Six Sigma, Lean, basic quality skills, statistical process control, and all phases of ISO 9001:2000 implementation. The College also partners with the American Society for Quality to provide quality course offerings. Additionally, specialized resources are available through a lending library for quality information.

Training opportunities include:

- Blueprint Reading
- Braising, Soldering, and Welding
- Forklift Operation and Safety
- CPR/First Aid/Blood Borne Pathogen
- Customer Service
- Leadership Development
- OSHA 10 Hr and 30 Hr General Industry Standards
- OSHA 10 Hr and 30 Hr Construction Standards
- APICS
- Building Operator Certification
- Fundamentals of Advanced Manufacturing
- Fundamentals of Automated Machining

Business Development, Incubation, and Small Business Center

Business development and incubation is a model that allows entrepreneurs a “jump start” for their business and involves a dynamic process that provides physical space, virtual programming, consulting and technical assistance, access to business services and equipment, technology support, guidance in obtaining financing, conference rooms with videoconferencing feature and computers, etc.

The Small Business Center (SBC) provides free one-on-one counseling and advising services to existing and potential small business owners. In addition, a variety of seminars and special events are sponsored

by the SBC to assist entrepreneurs with all aspects of operating a business. A professional services office is also available in which experts from legal, accounting, marketing, management and technology fields provide advice to business clients on a pro bono basis. The SBC also offers a student incubator program similar to the regular business incubator program.

The SBC has partnered with the BioBusiness Center, including the Natural Products Laboratory; the Blue Ridge Food Ventures; the Technology Commercialization Center; and the Global Institute for Sustainability Technologies.

General Admission

Admissions Policy

1. A-B Tech is an open-door institution, which accepts all applicants who have graduated from high school, hold a GED or adult high school diploma, are at least 18 years of age or older, are an emancipated minor, or a dual enrollment student.
2. Some programs in the Allied Health and Public Services Division are selective and typically require the high school credential. Admission to these programs is competitive.
3. Undocumented immigrants are eligible for admission based on the qualifications and limitations listed below:
 - a. Attended and graduated from a United States public high school, private high school, home school and/or adult high school that operate in compliance with state or local laws.
 - b. Must be charged out-of-state tuition and are not considered a North Carolina resident for tuition purposes.
 - c. Will be counseled that federal and state laws prohibit states from granting professional licenses to undocumented students.
 - d. Students lawfully present in the United States shall have priority over any undocumented immigrant in any program of study when capacity limitations exist.
 - e. Must comply with all federal and state laws concerning financial aid.

Admissions Procedure

1. Submit an application for admission to the College. Applications are available online at **abtech.edu** or in paper format on campus. The preferred method of submission is electronic.
2. Upon receipt of a completed College Foundation of North Carolina (CFNC) application for admission, staff verifies all data for the applicant in the student file in the NCCCS Colleague computer system. Applicants select their program(s) of choice from available academic programs on the CFNC application that are not competitive or limited admission. Students may not register within programs for which they do not meet placement or program prerequisites.
3. Inactive students, who have not attended for two consecutive semesters, excluding summer, will be reverted to the unclassified status, unless they otherwise indicate a program of choice.
4. An electronic file is made for each applicant and all additional supporting documents are linked to this file.
5. Students who want to declare an academic program (classified students) must do the following:
 - a. Submit transcripts from other colleges attended if transfer credit is desired. Applicants with prior college credit may not need to take the placement assessment.
 - OR
 - b. Submit satisfactory SAT or ACT test results (if less than three years old).
 - OR

- c. Take the Accuplacer Computerized Placement Test or submit placement test scores for Accuplacer from testing at another college. Students who have earned college credit that is three (3) years or older are strongly recommended to take the Accuplacer placement test at A-B Tech.
 - OR
 - d. Submit Compass and/or Asset scores from testing at another college.
 - e. Meet with the faculty, program, or transfer advisor for course selection and program assistance. General Occupational Technology students must meet with Bailey academic advisors for course selection and program assistance.
 - f. Register at designated time.
6. New unclassified (non-degree or non-diploma seeking) applicants will:
 - a. Complete the Accuplacer placement test, if needed. Applicants who plan to enroll in English and mathematics classes or in classes for which English or math prerequisites exist must:
 - 1) Complete Accuplacer or
 - 2) Bring in satisfactory SAT or ACT test reports which are less than three years old or
 - 3) Submit appropriate transfer credit prior to registering for courses or
 - 4) Submit Compass or Asset scores from another College.
 - b. Register at designated time.
 7. Some allied health programs are selective in nature, due to the high volume of applicants and the limited number of students who can be enrolled in the programs. Selective programs have an application period, which is typically in the fall.
 - Applicants must take the Accuplacer placement test and show college level skills on all sections of the test. Other standardized tests used for placement purposes in North Carolina or appropriate transfer credits may be used to show college level skills.
 - Applicants who perform acceptably on Accuplacer, another acceptable assessment instrument, or have appropriate transfer credit then schedule themselves at their expense to take the Test of Essential Academic Skills (TEAS) in the designated application period.
 - Ultimate selection in the program occurs in the spring semester, and is based upon the student's TEAS composite score, a number of points earned for successful completion of a group of specified courses and residency in Buncombe or Madison County.
 8. A smaller number of allied health programs use a modified selective process. Those programs are available on the web at abtech.edu/content/admissions/competitive-allied-health-programs.
 - Application for these programs occurs in the spring semester of each year.
 - Applicants must take the Accuplacer placement test and display college level skills on all sections. Other standardized tests used for placement purposes in North Carolina or appropriate transfer credits may be used to show college level skills.
 - Applicants who perform acceptably on Accuplacer, another approved instrument, or have appropriate transfer credit then schedule themselves at their expense to take TEAS before a prescribed deadline. Ultimate selection into the program is based upon the student's composite TEAS score and residency in Buncombe or Madison County.

Concurrent High School Enrollment

The **Career and College Promise Program** offers structured opportunities for qualified high school juniors and seniors to accelerate completion of college certificates, diplomas, and associate degrees that lead to college transfer or provide entry-level job skills. Academic credits earned through Career and College Promise shall enable students who continue into postsecondary education, after graduating from high school, to complete a postsecondary credential in less time than would normally be required.

A-B Tech offers three pathways: College Transfer Pathway, Career Technical Education Pathway, and the Cooperative-Innovative High School Programs.

The College Transfer Pathway leads to a college transfer certificate requiring the successful completion of at least 30 semester hours of transfer courses, including English and mathematics, for qualified junior and senior high school students.

The Career Technical Education Pathway leads to a certificate or diploma aligned with a high school career cluster. This program is designed for accelerated high school juniors and seniors who are ready to get a head start on career and technical courses that will lead to a career.

The Cooperative-Innovative High Schools Pathway is designed for motivated students looking for a non-traditional high school experience. These small high schools partner with A-B Tech to provide local students with a comprehensive and accessible education.

Early colleges, statewide, are rigorous programs in which students can earn a high school diploma and associate degree simultaneously. Early college students

start in the ninth grade, and can complete the program in five years. A-B Tech has two partner early colleges:

- Buncombe County Early College, located on the main campus of A-B Tech in Asheville
- Madison Early College High School, located in Mars Hill

Buncombe County Middle College (BCMC) is also a cooperative-innovative high school. Located on the main A-B Tech campus in Asheville, it provides juniors and seniors with a non-traditional setting for completing a high school diploma and earning college credits.

For more information, contact advisors at 398-7484, 398-7587, or 398-7441.

New Student Orientation

In order to make the A-B Tech experience as successful as possible, all incoming curriculum students are required to attend a New Student Orientation session to register for classes. The program will include all the necessary tools and resources to help ensure student success. Students can schedule an orientation session on-line at newstudents.abtech.edu. New student orientation should be completed immediately after application.

Competitive Allied Health Programs

Admission to 11 of the Allied Health curricula is competitive among qualified applicants according to established criteria. There is a limited application period. Competitive Allied Health programs include Associate Degree Nursing, Dental Assisting, Dental Hygiene, Medical Assisting, Medical Laboratory Technology, Medical Sonography, Pharmacy Technology, Practical Nursing, Radiography, Surgical Technology, and Veterinary Technology. Applicants are selected for admission to these programs based upon special criteria. Selection criteria vary for each program. The exact admissions evaluation criteria for each competitive Allied Health program can be found in the Admissions section of the College website at abtech.edu. The printed version is available in the K. Ray Bailey Student Services Center and at the Madison Site. The criteria are revised and updated annually.

Placement Testing

The purpose of placement testing is to match the academic readiness of the incoming student with the academic requirements of the curriculum. Persons applying for admission into all degree and diploma programs are required to take the Accuplacer Test.* Students who are unclassified (not desiring to be enrolled in a program) will need to take the placement test if they desire to take a mathematics, English, reading course or any course for which math or English are prerequisites. Alternate testing formats will be made available to individuals with disabilities upon request to the Dis-

ability Services office. Documentation of disability will be required prior to the establishment of accommodations for placement testing.

All students may waive the placement testing requirement if they submit documentation of acceptable SAT, ACT, or other state-approved placement test scores which have been earned within the preceding three years. Transfer credit received from a regionally accredited institution for first-level English and math courses will also be accepted in lieu of placement testing. The student must submit an official transcript to receive transfer credit and to officially waive the need for placement testing. Students applying for admission to limited enrollment Allied Health programs should consult the program's admissions information in the admissions section of the College website at abtech.edu. This information is also available in the K. Ray Bailey Student Services Center.

Test Preparation and Re-Testing Procedure

It is incumbent upon students to prepare fully before taking Accuplacer, the college's placement assessment tool. Accuplacer tests have very high reliability and validity. To assist students in preparing, a study guide is available at placementtesting.abtech.edu. Students will find the sample questions helpful in understanding test formats.

Students may only take the placement test once in a three year period with the following exceptions:

- Applicants for competitive allied health curricula may take the test once each year during the competition period.
- Students who tested at local high schools may test when applying for admission to the College.
- Students granted approval to retake the test by the Chair of Developmental Studies, Director of Student Advising and Support Services, or Vice-President for Student Services.

Placement testing is a valuable tool in ensuring that students are enrolled in courses that support student success. Lack of preparation for the assessment may result in additional cost and time for classes.

Students may register for the placement test online at placementtesting.abtech.edu. Students must present a picture I.D. to take the placement test. Placement testing is available both day and evening hours and the results are provided to the student by an Academic Advisor immediately after the student completes the tests. Based on placement scores, a student will be placed directly into College English and math or into one of the developmental studies courses that are designed to prepare the student for entry into his or her chosen field of study. To support student success, students are required to take the courses into which they are placed.

*Accuplacer is a product of The College Board which also produces the SAT. Accuplacer tests have very high reliability and validity.

Adult Basic Education Placement

Students who place into Adult Basic Education reading will be allowed to enroll in College courses only after they have received appropriate remediation through the Adult Basic Education program. Students who test into both Adult Basic Education language and mathematics must also receive appropriate remediation prior to enrolling in college courses.

Students who place into Adult Basic Education level math only or Adult Basic Education language only will be allowed to take Developmental Studies and/or curriculum classes with approval of their academic advisor.

A-B Tech ID Cards

A-B Tech issues student ID cards to all curriculum students during the registration process at the K. Ray Bailey Student Services Center. ID Cards can be produced with a current application on file and a current government-issued photo ID card (driver's license, passport, military ID).

After receiving an A-B Tech ID card, please take it to the Holly Library to be activated in the Library's database. With their library-activated photo ID card, students can check out materials, use the research computers, and access reserve items. They must present the card each time they wish to check out library materials.

Transfer, Credit-by-Exam, Articulated, and Advanced Placement Credit**Transfer Credit from Other Institutions**

Asheville-Buncombe Technical Community College will accept credit for parallel work completed in other post-secondary institutions accredited by a regional accrediting agency. Transfer applicants should complete the standard College application. No transfer credit will be granted for work below a "C." Transfer credit will be awarded for course work without assigning grades or quality points. Computer information/technology and related courses must have been successfully completed within no more than five years prior to transfer. Proficiency credits from other institutions will not be accepted. No more than 75% of the credit hours required in a program may be earned by transfer credit. If any course is taken for credit after transfer credit has been awarded, and a grade of A, B, C, D, or F is earned, it will replace the transfer credit. A student who must repeat a course may take it at another institution and transfer it to A-B Tech according to the guidelines above. Credit may be awarded for appropriate military courses. Credit may be awarded for courses completed at a foreign university; students should contact the International Student Advisor for more information. Credits will be evaluated in the context of the current catalog.

Students transferring into the Associate in Arts (A.A.), Associate in Science (A.S.), or Associate in Fine Arts (A.F.A.) program who have transfer credit from colleges other than the North Carolina Community College System (NCCCS) or the institutions in the University of North Carolina System should speak with their advisor regarding eligibility for the Articulation Agreement between the universities and NCCCS.

Credit by Examination (Proficiency Testing)

Students who can provide tangible evidence of preparation to challenge a course, such as a transcript of similar College level credits, record of military study, certification or license, standardized test scores, or written statements from employers regarding training or directly related work experience indicating that they may be proficient in a subject, may request credit by examination. A written request must be made to the proper Department Chairperson on a form obtained from the Student Records and Registration Office or from the website. This test must be administered immediately after the 10 percent point in the semester.

Examinations are comprehensive and must be approved by the supervisor of the instructor administering the exam. The examination may be oral, performance, written, or a combination of these methods. To receive credit by examination, the score must be above average ("A" or "B"). A grade of "A" or "B" will be posted on the transcript of the student who successfully completes the examination. The decision of the examining instructor is final.

No student may request a second test for Credit by Examination in the same course or request Credit by Examination in a course after receiving any recorded grade for that course. Exceptions must have approval of the Vice President for Instructional Services.

Because of specific requirements, credit for certain courses may not be received through Credit by Examination. Students who request Credit by Examination must:

1. Enroll as a credit student in the course to be challenged and pay tuition. There is no extra charge for full-time students who are taking at least 16 credit hours.
2. Present evidence of proficiency, complete the written request form, and have the request approved prior to the 10 percent point of the semester.
3. Remain enrolled and attend class until the examination is administered. During this period, students who have written approval for the exam may attend class without purchasing textbooks and materials. If books are purchased and returned for refund, they must be in new condition.
4. Students who are very confident of passing the exam may request a course overload.

5. Students who perform on the exam at a level sufficient to get credit may leave the course and will be awarded a grade of "A" or "B" for the course. Receiving credit does not entitle the student to a tuition refund.
6. Students who do not receive credit by examination must remain in the class and complete all course requirements to earn credit at the end of the semester.
7. Students who receive financial assistance of any type are required to inform the director of their assistance program that they are seeking credit by exam. Assistance may be reduced and reimbursement will be required if the course load is reduced by receiving credit by examination.

Any exceptions to these procedures must have prior written approval by the appropriate Department Chairperson, Division Dean, and the Vice President for Instructional Services.

Articulated, Advanced Placement, and Continuing Education Credit

High School Articulation and RACE: College credit may be awarded for high school courses if conditions of the North Carolina High School to Community College Articulation Agreement or Regional Articulation in Career Education (RACE) are met. Students must see the Admissions Office in the K. Ray Bailey Student Services Center.

AP and CLEP: College credit may be awarded if appropriate conditions are met by Advanced Placement (AP) or College Level Examination Program (CLEP) test scores. A-B Tech academic credit will be granted to enrolled students who receive scores of 3 or higher on the AP tests offered by the College Board. CLEP is granted for scores of 50th percentile or higher. AP and CLEP credit accepted at other post-secondary institutions is not automatically transferred to A-B Tech but is reviewed when scores are received by the Student Records and Registration Office in the K. Ray Bailey Student Services Center.

Continuing Education: Continuing education credits that lead to a credential or certification may be considered for course equivalency. Department chair approval is required, and the student must be enrolled in the program for which he or she is seeking credit.

International Applicants

A-B Tech has been approved to issue I-20 forms for qualified international applicants seeking diplomas or associate degrees in F-1 or M-1 status. A-B Tech does not issue I-20 forms for continuing education programs, English as a Second Language classes, or curriculum certificate programs.

International applicants must show proficiency in the English language and graduate from a secondary school that is equivalent to secondary schools in the United States.

International applicants should submit all admission credentials together. A written admissions application, international application supplement, Test of English as a Foreign Language (TOEFL) scores, official high school transcripts and English translations (if applicable), college transcripts and English translations (if interested in transfer credit), and affidavits of financial support with supporting documentation are all necessary for an admission decision. Applications must be received by the following deadlines for consideration: June 1 for Fall semester; October 1 for Spring semester; March 1 for Summer semester.

To demonstrate English proficiency, international applicants whose native language is not English must take the TOEFL. The applicant must score at least 133 on the computer-based test, 450 on the paper-based test, or 60 on the internet-based test (with no less than 15 on any section). Applicants already in the Asheville area may substitute the Accuplacer Placement Assessment, which can be taken at A-B Tech. Applicants must score a minimum of 52 on the reading section and 53 on the sentence skills section to demonstrate English proficiency.

International applicants must also certify their ability to pay for out-of-state tuition, fees, books, supplies, transportation, and living expenses for at least one full year of study. Medical insurance is not required at this time but is highly recommended for all international applicants.

International applicants should contact the International Student Advisor in the K. Ray Bailey Student Services Center for further information about admission. Information, including all necessary application materials and estimated cost of attendance, are also available online at abtech.edu/content/student-services/admissions/International-Applicants. Email inquiries should be addressed to: rebeccabhowell@abtech.edu.

Tuition and Expenses

North Carolina Residency

In order to qualify for the resident tuition rate, North Carolina law (G.S. 116-143.1) requires that a legal resident must have maintained domicile in North Carolina for at least the 12 months immediately prior to classification as a resident for tuition purposes. The student cannot qualify for in-state tuition if he or she is claimed as a dependent by a parent or guardian who is not a N.C. resident.

Proof of residency includes being employed within the state of North Carolina, paying NC taxes, having a current NC driver's license, and voting in NC. Anyone having a question regarding resident status should contact the Admissions Office in the K. Ray Bailey Student Services Center.

Tuition

Fall, Spring, and Summer Semester:

| | |
|--|------------|
| N.C. residents per semester | \$1,104.00 |
| Nonresident of N.C. | \$4,176.00 |
| (16 or more credit hours) | |
| N.C. residents per credit hour per semester..... | \$69.00 |
| Nonresident of N.C. per credit hour per semester | \$261.00 |
| (fewer than 16 credit hours) | |
| Return Check Charge* | \$25.00 |
| North Carolina residents 65 years of age and older are exempted from the payment of curriculum tuition up to 6 credit hours and registration fees for some Continuing Education classes. | |

* Return Check Charge is subject to change.

Student Activity Fees

The student activity fee will be charged each semester based upon the number of credit hours taken during the day at the Asheville campus. Students enrolled for nine or more on-campus credit hours will be charged a student activity fee of \$19.00 for the fall and spring semesters. Students enrolled for eight or fewer on-campus credit hours will be charged a student activity fee of \$14.00 for the fall and spring semesters.

Computer Use and Technology Fee

The State Board of Community Colleges has established a computer use and technology fee to support the procurement, operations and repair of computer and other instructional technology, including the supplies and materials that support the technology. This fee is set annually by the Board of Trustees and is \$16 per semester for curriculum students and \$5 per course for occupational continuing education classes.

Printing Fees

Students are allowed 100 black-and-white copies at no charge per semester. Additional black-and-white copies are \$0.08 per page. Color copies are charged at a rate of \$0.15 per page.

Consumable Supply Fee

Certain courses have additional fees attached to them to pay for consumable supplies not covered by tuition. Consumable fees for academic programs will vary by class and are available online at abtech.edu/catalog/consumable-supply-fee.

Student Insurance

A group policy, providing insurance protection, is maintained by the College and all curriculum students are **required** to subscribe to such coverage. The only exception is for students taking only off-campus courses. The cost of accident insurance to the student is \$1.40 per semester.

Transcript Fee

The College charges a transcript fee of \$5 per transcript and a \$10 fee per transcript on-demand. This fee is approved annually by the Asheville-Buncombe Technical Community College Board of Trustees and is subject to change.

Additional Costs

Students should be prepared to incur additional estimated expenses during the academic year (two semesters and summer term) as follows:

Allied Health and Public Service Education

Books \$900-1,900

Supplies \$200-1,000

Arts and Sciences: A.A., A.S., A.F.A.

Books \$1,200-2,000

Supplies \$150-600

Business and Hospitality Education

Books \$1,000-2,500

Supplies \$200-1,000

Engineering and Applied Technology

Books \$700-1,000

Supplies \$200-1,100

The cost of books and supplies varies from year-to-year by curriculum due to price changes, curriculum changes, and instructor preferences. For purposes of definition, the following items may be classified as supplies: pen, pencils, paper, notebooks, instruments, student kits, uniforms and shoes, rental of uniforms, safety equipment, hand tools, calculators, lab coats, membership dues, and pins. Students will incur most of the supply costs for their curriculum during the first semester of study. Students are encouraged to consult with their department chairperson for actual costs of supplies for their curriculum. Prior to the purchase of a calculator for use in class, students should consult with their instructor.

Tuition and Fees Refunds

The tuition policy is set by the State of North Carolina and is subject to change. A 100% refund shall be made if a student drops the class(es) by completing the required paperwork prior to the first day of classes for the term as noted in the College Calendar on the website at abtech.edu/calendar. Also, a student is eligible for a 100% refund if the class in which the student is registered is canceled.

A 75% refund shall be made if the student officially drops the class(es) prior to or on the official 10% point of the term. Insurance, technology, and student activity fees are **not** refundable. Federal regulations, if different from above, will overrule this policy.

For classes that start a week or more into a term, a full refund will be provided if a student drops a class(es) prior to the beginning date of the class(es). A 75% refund will be provided for a class(es) dropped on the beginning date through the 10% point of the class(es).

Only hours dropped below a total of 16 credit hours are eligible for a refund.

Tuition Refund Process

To be eligible for a tuition refund the student must:

1. Register and pay tuition and fees.
2. Officially drop the class on or before the 10% point of the term in one of the following ways:
 - a. By submitting in person to any Registration Center (K. Ray Bailey Student Services Center, Madison Site Office) a Drop/Add Registration Change Notice during business hours.
 - b. By having an advisor process the drop. The student is responsible for ensuring this has been done.

Student Rights and Responsibilities

Code of Student Conduct

The Board of Trustees establishes and maintains a learning environment that supports the students, the values, vision, and mission of the institution. There are behavioral expectations that outline the responsibilities and proper practices for all students at the College. When the Code of Conduct is challenged, the following types of discipline include but are not limited to: verbal warning, written warning, a failing grade for an assignment or exam, probation, administrative withdrawal from a course, restitution for damages, consequences adapted to the specific violation, suspension, expulsion or actions recommended by a Threat Assessment Team.

The President shall have final approval in the expulsion of a student.

Academically-Related Violations

Academically-related violations include academic integrity and other matters that have a negative impact on the teaching and learning environment.

Faculty members are responsible for ensuring the academic integrity of the College. Violations of academic integrity are considered serious offenses. Students are forewarned that some acts of academic dishonesty may result in action being taken by outside individuals or entities.

The following matters will be referred to the Vice President for Instructional Services or his or her designee:

1. **Plagiarism:** The intentional theft or unacknowledged use of another's words or ideas. Plagiarism includes, but is not limited to paraphrasing or summarizing another's words or works without proper acknowledgement; using direct quotes of material without proper acknowledgement; or purchasing or using a paper or presentation written or produced by another. If a student is uncertain about what constitutes plagiarism, he or she should discuss this with the class instructor.
2. **Cheating:** Cheating includes using notes or other material without permission from the faculty on an exam; receiving information from another student during an exam; obtaining a copy of an exam or questions from an exam prior to taking the exam; submitting someone else's work as one's own; or having someone else take one's exam and submitting it as his or her own.
3. **Aiding Acts of Academic Dishonesty:** Providing information to another student with the awareness that the student intends to use it for deceptive purposes.

4. **Violations of Normal Classroom Behavior** such as, but not limited to, being disobedient, showing disrespect, causing disruption of the classroom or not abiding by professional conduct. These behaviors are also considered academically-related violations. The intent is to make sure that the learning environment is not compromised.

Non-Academic Related Violations

Non-Academically Related Violations of the Code of Student Conduct will be referred to the Vice President for Student Services or his or her designee. These violations include:

1. **Alcoholic Beverages:** Students may not possess or use alcoholic beverages on campus. Students may not be under the influence of alcoholic beverages on campus or at College-affiliated activities or events.
2. **Animals:** Students may not have an animal of any kind on campus. This includes animals left within a vehicle. Working dogs, such as police dogs and Seeing Eye dogs, are permitted.
3. **Assault and/or Battery:** Students may not strike or threaten to strike another person for any reason whatsoever. Threatening to strike another person is defined as assault, and striking another person is defined as battery.
4. **Bullying:** Students may not intimidate or threaten with harm any other individual. Bullying is defined as "any pattern of gestures or written, electronic or verbal communications, or any physical act or any threatening communication that takes place on College premises or at any College-sponsored function that: (a) places a person in actual and reasonable fear of harm to his or her person or damage to his or her property; or (b) creates or is certain to create a hostile environment by substantially interfering with or impairing a student's educational performance, opportunities or benefits, or a College employee's ability to perform the essential functions of his or her job."
5. **Damage to Property:** Students may not damage property of the College or of any other person working at or attending the College.
6. **Disobedience (Outside the classroom):** Students may not disobey the reasonable directions of College employees, including administrators, faculty members, security officers, and other staff employees.
7. **Disorderly Conduct (Outside the classroom):** Students may not conduct themselves in a way which will interrupt the academic mission of the College or which will disturb the peace of the College.

8. **Disrespect (Outside the classroom):** Students are expected to treat all College employees with respect and courtesy, particularly when and if disagreements arise.
9. **Disruption:** Students may not disrupt the normal activities of the College by physically or verbally interfering with instruction, meetings, traffic, or scheduled administrative functions.
10. **Drugs:** Students may not possess, use, or be under the influence of any narcotic or illegal drugs on campus or at any College-affiliated activities or event. This is in violation of the laws of the state of North Carolina or of the United States.
11. **False Information:** Students may not present to the College or its employees false information; neither may they knowingly withhold information which may have an effect on their enrollment or their status in the institution and which is properly and legally requested by the College.
12. **Gambling:** Students may not gamble on campus or at any College-affiliated activities or events.
13. **Possession of Weapons:** Students may not have a weapon of any kind, including a knife, stun gun, or any firearm in their possession on campus or at any College-affiliated activities or events. Law enforcement officers are exempt from this prohibition. This includes facsimiles of weapons.
14. **Public Laws:** Violations of any federal, state or local laws occurring while on campus may lead to legal actions as well as campus discipline. Violations of federal, state or local laws occurring off campus may result in disciplinary action if the student's continued presence on campus constitutes a threat to the safety and order of the campus.
15. **Sexual and Other Unlawful Harassment:** Students may not harass any member of the College community, including other students, employees, or other persons on the College campus. This prohibition includes sexual, verbal or physical harassment for any reason including race, color, religion, sex, national origin, disability, veteran's status, creed, sexual orientation, or political affiliation.
16. **Skate Boards and Roller Skates:** Skate boards and roller skates are not permitted to be used on campus.
17. **Stalking:** Students may not follow another individual in a threatening manner. Stalking is defined as the severe intrusions on a victim's personal privacy and autonomy. It includes, but is not limited to, a pattern of observing or monitoring the victim or committing violent or intimidating acts, regardless of the means, against the victim.
18. **Theft:** Students may not steal the property of another individual or of the College. Students who are caught stealing will be required to make restitution and may be eligible for civil or criminal prosecution as well as College discipline.
19. **Threats:** Students may not engage in any behavior that constitutes a clear and present danger to the physical and/or emotional well-being of the student and/or other students, faculty and staff.
20. **Tobacco:** Students may not use tobacco of any form on campus or at any College-affiliated activities or events.
21. **Unauthorized Access to Records:** Students may not access, view, copy or change official College records without official authorization to do so.
22. **Use of the Internet:** The College has an extensive policy for appropriate use of the Internet. Users of the College computers acknowledge the policy whenever they sign on. Students may not use the College's access to the Internet for access to sexually explicit material or for downloading music. Email accounts are provided for student use; however, no right of privacy exists for use of email.

Violations of the Code of Student Conduct

A student who violates the Code of Student Conduct may be referred to the Vice President for Instructional Services or his or her designee or to the Vice President for Student Services or his or her designee, depending on the nature of the violation. Students who have been charged with a violation of these regulations may be assigned consequences based upon the seriousness of the offense.

Violations of any federal, state or local laws occurring while on campus may lead to legal actions as well as campus discipline. Violations of federal, state or local laws occurring off campus may result in disciplinary action if the student's continued presence on campus constitutes a threat to the safety and order of the campus.

Sanctions for violations may include but not be limited to: verbal warnings, written warnings, a failing grade for an assignment or examination, administrative withdrawal from a course, restitution for damages, consequences adapted to the specific violation, suspensions, expulsions or actions recommended by a Threat Assessment Team.

The President shall have final approval in the expulsion of a student.

Threat Assessment

When a violation leads to a concern about the safety of a student or members of the College community, a Threat Assessment Team will review and make recommendations to the Vice President for Student Services or his or her designee prior to a hearing. If a student engages in criminal activity or demonstrates threatening behavior that constitutes a clear and present danger to the physical and/or emotional well-being of the student and/or other students, faculty and staff, the Vice President for Student Services or his or her designee may immediately suspend the student and remove him or her from campus for no more than 14 calendar days from the date the suspension is instituted, pending a hearing. In this situation, the Vice President for Student Services or his or her designee must convene a Threat Assessment Team. For a copy of this policy, see the Vice President for Student Services.

For violations that do not require the implementation of the Threat Assessment Policy, the appropriate College administrator will review initial disciplinary referrals and may suspend a student for up to 10 College business days while the review is conducted. Students are allowed to appeal any disciplinary action, unless they have waived this right, and will be informed of their rights of due process. (See Student Due Process)

Student Due Process

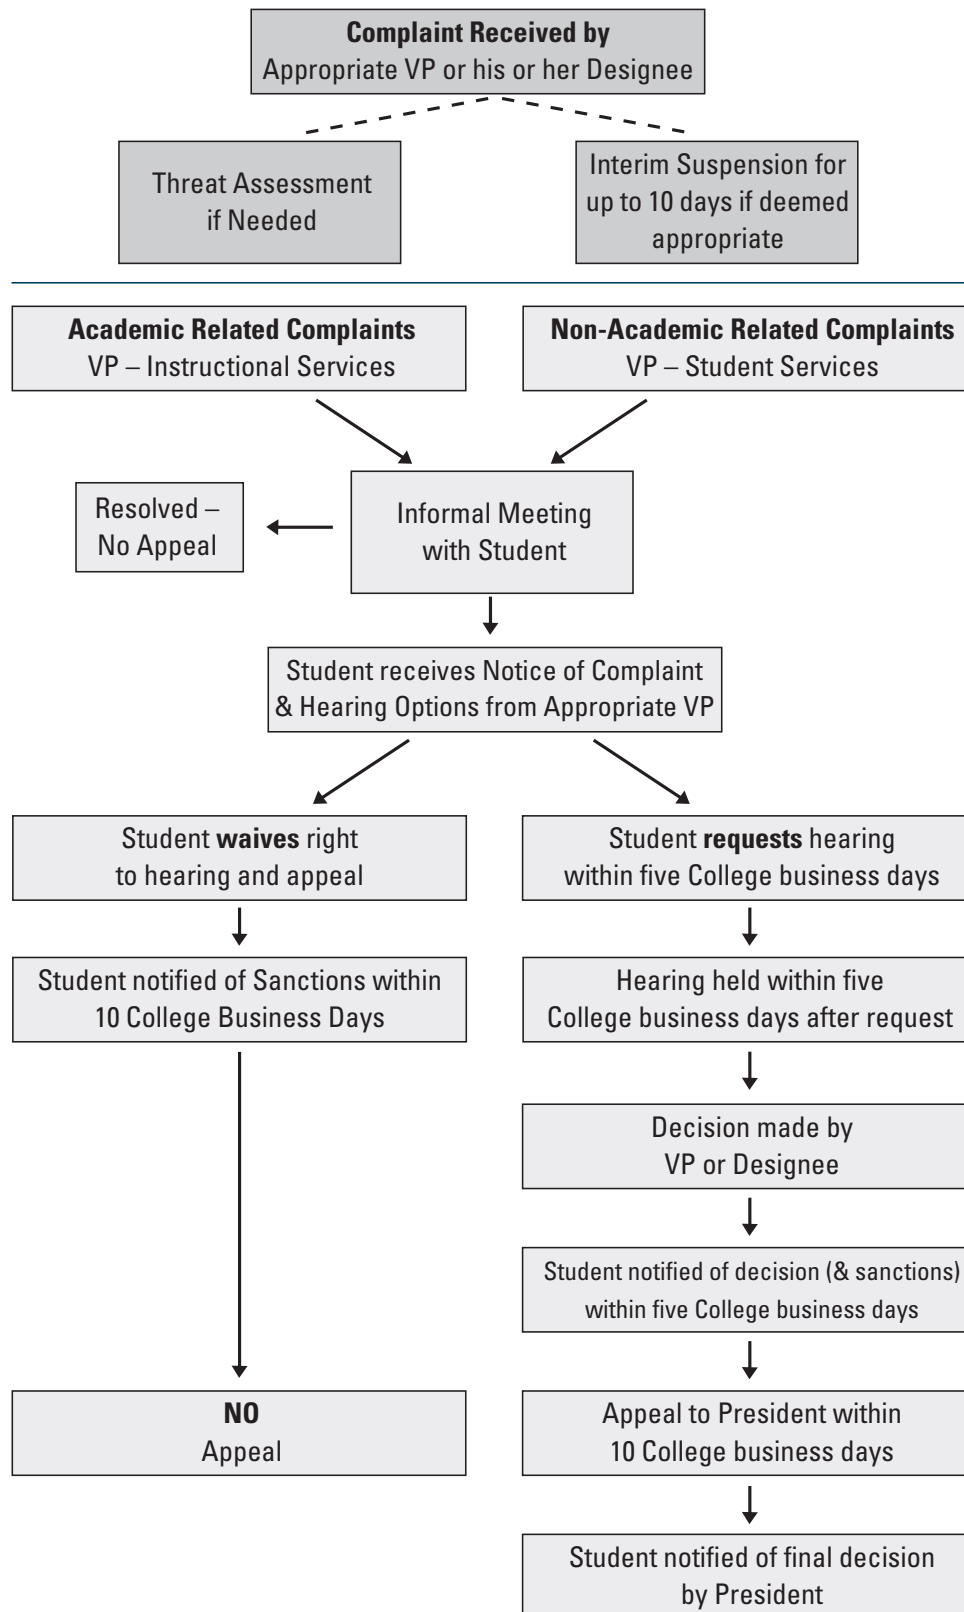

Students have the rights of due process when accused of a violation of the Code of Student Conduct:

1. The student may request to have an informal meeting with the appropriate vice president to attempt to discuss and resolve the issue.
2. If the violation of the Code of Student Conduct is not resolved, the student shall receive written notice of the provision of the Code of Student Conduct which he or she is accused of violating and a summary of the relevant facts. Students shall also be informed of their due process rights.
3. If a student's behavior is egregious or disruptive to the teaching and learning environment or to campus safety, the appropriate vice president or his or her designee may suspend the student on an interim basis for up to 10 College business days.
4. Within five business days after receipt of the notice of violation of the Code of Student Conduct, and suspension when warranted from the appropriate vice president, the student may request, in writing, a hearing before the Vice President for Instructional Services or his or her designee for academically-related violations or a hearing before the Vice President for Student Services or his or her designee for all other violations.
5. The students may waive his or her rights to a hearing immediately and accept the sanctions implemented by the appropriate vice president. Failure to request a hearing within five College business days will be considered a waiver of the right to a hearing and any subsequent appeal. If the student requests a hearing, the appropriate vice president shall inform the student of the date, time and place for the hearing. The hearing shall be scheduled within five College business days after receipt of the student's request for a hearing.
6. Prior to the hearing, the student has the right to review all evidence, including written statements made against him or her. Strict rules of evidence do not apply in the hearing.
7. At the hearing, the student may present witnesses and evidence. All pertinent parties have a right to speak and be questioned during the hearing. The student will be allowed to be accompanied by an advisor, who may not be an attorney.
8. The student has the right to a recording of the hearing.
9. The student has the right to a written notice of a decision as soon as possible but no later than five College business days after his or her hearing.

The student has the right to appeal to the President any action taken by the appropriate vice president or his or her designee. Any appeal must be in writing and be submitted to the President's office within ten College business days. The appropriate vice president will forward the appeal, along with all documentation concerning the matter, to the President whose decision will be final.

The procedure above is in effect for all students. All meetings and/or hearings for distance learners will be arranged using mail, fax, conference calls, or other agreed upon electronic means.

Student Due Process Flow Chart

Code of Classroom Conduct

A-B Tech is an institution for adult learning. It is a partnership between instructors with the desire to teach and students with the desire to learn. In order to create an appropriate environment for teaching and learning, there must be respect for the instructor and fellow students. Listed below are guidelines for classroom behavior, which the College has established to ensure that the learning environment is not compromised.

1. **Absences.** Students should inform the instructor in advance if they know they are going to miss class. They should also take responsibility for getting missed assignments from other students. Students should not expect to be allowed to make up work, such as unannounced quizzes or tests, after an absence. Instructors are not responsible for re-teaching the material missed because of absence.
2. **Attendance.** Students are expected to be in class the entire class time. Students should not enter late or leave early. Rare exceptions may be excused, particularly under emergency circumstances, but students should be prepared to explain tardiness to the instructor after class. Likewise, the need to leave early should be explained to the instructor before class.
3. **Attitude.** Students are expected to maintain a civil attitude in class. They may not use inappropriate or offensive commentary or body language to demonstrate attitude regarding the course, the instructor, assignments, or fellow students.
4. **Mobile Devices.** Students may not receive or send telephone calls or text messages, or use personal electronic devices during class. It is their responsibility for turning off mobile devices upon entering class.
5. **Conversation.** Students may not carry on side conversations in class.
6. **Food, Drink, and Tobacco.** Students may not have food or drink in class, or use tobacco of any form on campus.
7. **Guests.** Students may not bring guests, including children, to class.
8. **Internet.** Students may use the internet for valid, academic purposes only. Students may not use it for open access to other non-academic sites, which are unrelated to the course.
9. **Other Activities.** Students may not work on other activities while in class. This includes homework for other courses or other personal activities.
10. **Personal Business.** Students needing to transact personal business with the instructor should plan to do this before or after class.

11. **Profanity and Offensive Language.** Students may not use profanity or offensive language in class.
12. **Sleep.** Students should not sleep in class.
13. **Personal Protective Equipment.** Students must properly wear personal protective equipment at all times in any area of the College in which it is required.
14. **Fragrance.** Students should avoid wearing strong fragrances of any kind as other students may be allergic to or offended by them.

Typically, violations of the Code of Classroom Conduct will be dealt with as minor infractions. However, repetition of minor infractions or other more serious violations of the Code of Student Conduct may lead to removal from the classroom while the matter is resolved by referral to the Vice President for Student Services or his or her designee for disciplinary action.

Student Complaints

The College has two policies, one for student appeals and one for grade appeals. The following associated procedures need to be followed:

Grade Appeals

It is the responsibility of faculty and students to attempt, in good faith, to resolve disputes regarding course grades. If such discussions are unsuccessful, the student shall be entitled to initiate the grade appeals procedure if he or she has reason to believe that a course grade is inaccurate.

No student appealing any decision shall be subjected to harassment or intimidation or be in any way discouraged from filing an appeal pursuant to this procedure.

At any stage of the appeal process, all parties shall have the right to be accompanied another person of their choice, who may not be an attorney.

The Vice President for Instructional Services shall monitor the handling of grade appeals through this procedure to ensure correct and prompt compliance by all parties.

Appeals Procedure Regarding Course Grades

- A. Students are strongly encouraged to first discuss the course grade with the involved instructor as soon as possible.
- B. The student will submit the written grade appeal form within six weeks of the start of the next term. The form will clearly explain the student's complaint as well as the student's proposed resolution of the complaint. The instructor will be given the opportunity to read the student's written complaint and to meet with the student one more time. Alternately, the instructor may sign the appeal form indicating that he or she is unable to resolve

the problem. The student will then be directed to the department chair of the instructor, who will meet separately with the student to attempt to resolve the issue. If the department chair is unable to resolve the issue with the student, then the department chair will sign the appeal form and direct the student to the Vice President for Instructional Services. Completion of the form by the instructor and chair does not in any way indicate agreement with the complaint. Each party may propose solutions to the disagreement that, if accepted by both parties, results in resolution of the appeal. If either party refuses to accept a proposed solution, the matter is referred to the Grade Appeals Committee.

- C. If the student has difficulty contacting the department chair, he or she should contact the Vice President for Instructional Services, who is responsible for assisting with contacts.
- D. The Vice President for Instructional Services shall maintain files of all course grade appeal forms submitted to his or her office. Such forms, together with other records indicating final action on a problem, shall be maintained for a minimum of five years.
- E. Students enrolled in distance courses may find it difficult to come to campus in order to pursue an appeal. In these instances, the process may be handled by telephone with the instructor involved, the department chair, and the Vice President for Instructional Services, and by mail, fax, or other agreed upon electronic means for submission of the appeals document. As with other appeals, the Vice President for Instructional Services will closely monitor the progress, ensuring the contacts are made in a timely fashion and documents are submitted properly. If it becomes necessary for an appeal to go to the Grade Appeals Committee, conference calling or any other electronic means agreed upon by both parties will be used. When conference calling is employed for a hearing, no business can be conducted without the student being present on the telephone, with the exception of the deliberations of the Committee in executive session.

The Grade Appeals Committee

A. Composition of the Grade Appeals Committee

The Grade Appeals Committee will consist of no less than five voting members and will be composed as follows to ensure the representation of all constituent groups in the College community.

- Two student representatives
- Two faculty representatives
- One Student Services representative

- One non-faculty employee, and
- One non-teaching professional representative at the level of coordinator or higher who will serve as chairperson.

B. Grade Appeals Committee Hearing and Procedures

1. The Vice President for Instructional Services shall inform the instructor, the involved department chair, and the student of the date, time, and place of the appeals hearing. The Vice President for Instructional Services shall convene the Grade Appeals Committee no later than 15 days after receipt of the request for a hearing.
2. When an appeal is made by a student with a disability, the Committee, at its sole discretion, may consult with or include the Disability Services Coordinator in the hearing process for such person's knowledge of disability and Disability Services issues and requirements.
3. A quorum to conduct Committee business and vote is defined as a minimum of four members. In no case shall any business be conducted unless at least one student and one faculty member are present. There will be an audio recording of the appeal hearing.
4. The decision of the Grade Appeals Committee will be rendered within two business days of the hearing and conveyed to the student.
5. The decision of the Grade Appeals Committee may be appealed to the President whose decision will be final. The President's review does not include a new hearing, and his or her review shall consist of evidence presented at the hearing. The President will affirm, modify, or reject the decision of the Grade Appeals Committee within five business days of the hearing date.
6. In addition to the committee members, the following persons are permitted to attend the hearing:
 - a. Involved parties.
 - b. An advisor for the appealing individual. Advisors may not be attorneys.
 - c. Administrative officers of the College who may be directly concerned with the dispute.
7. If a student fails to attend the scheduled hearing, the appeal is considered to be dropped.
8. All steps of the appeal procedure for students shall be closed to the public, and all documents generated in the course of a complaint shall be confidential except to authorized College officials.

Availability of Information

The Grade Appeals Policy and Procedure are available on the College website.

Student Appeals

It is the responsibility of all employees and students to attempt, in good faith, to resolve disputes regarding actions taken by College employees that are perceived to be unfair or unjust. If such discussions are unsuccessful, the student shall be entitled to initiate the appeals procedure.

No student appealing any decision shall be subjected to harassment or intimidation or be in any way discouraged from filing an appeal pursuant to this procedure.

At any stage of the appeal process, all parties shall have the right to be accompanied another person of their choice, who may not be an attorney.

The Vice President for Student Services or his or her designee shall monitor the handling of appeals through this procedure to ensure correct and prompt compliance by all parties.

Appeal Procedure

- A. Students are strongly encouraged to first discuss the disputed matter with the involved employee as soon as possible.
- B. It is the responsibility of the student to complete and submit a written appeal form within two weeks of the date when the matter occurred. The form will clearly explain the student's complaint as well as the student's proposed resolution of the complaint. The employee will be given the opportunity to read the student's written complaint and to meet with the student one more time. Alternately, the employee may sign the appeal form indicating that he or she is unable to resolve the problem. The student will then be directed to the supervisor of the employee, who will meet separately with the student to attempt to resolve the issue. If the supervisor is unable to resolve the issue with the student, then the supervisor will sign the appeal form and direct the student back to the Vice President for Student Services. Completion of the form by the employee and supervisor does not in any way indicate agreement with the complaint. Each party may propose solutions to the disagreement that, if accepted by both parties, results in resolution of the appeal. If either party refuses to accept a proposed solution, the matter is referred to the Student Appeals Committee.
- C. If the student has difficulty contacting the supervisor, he or she should contact the Vice President for Student Services or his or her designee, who is responsible for assisting with contacts.
- D. The Vice President for Student Services or his or her designee shall maintain files of all appeal forms submitted to his or her office. Such forms, together with other records indicating final action on a problem, shall be maintained for a minimum of five years.
- E. Students enrolled in distance courses may find it difficult to come to campus in order to pursue an appeal. In these instances, the process may be handled by telephone with the employee involved, the employee's supervisor, and the Vice President for Student Services, and by mail, fax, or other agreed upon electronic means for submission of the appeals document. As with other appeals, the Vice President for Student Services will closely monitor the progress, ensuring the contacts are made in a timely fashion and documents are submitted properly. If it becomes necessary for an appeal to go to the Student Appeals Committee, conference calling or any other electronic means agreed upon by both parties will be used. When conference calling is employed for a hearing, no business can be conducted without the student being present on the telephone, with the exception of the deliberations of the Committee in executive session.

The Student Appeals Committee

A. Composition of the Student Appeals Committee

The Student Appeals Committee will be comprised of no less than seven members and will be composed as follows in an effort to ensure the representation of all constituent groups in the College community.

- Two student representatives
- Two faculty representatives
- One Student Services representative,
- One non-faculty employee, and
- One non-teaching professional representative at the level of coordinator or higher who will serve as chairperson.

B. Student Appeals Committee Hearing and Procedures

1. The Vice President for Student Services or his or her designee shall be responsible for informing the employees and supervisor involved and the students of the date, time, and place of the hearing. The Vice President for Student Services or his or her designee shall convene the Student Appeals Committee no later than 15 calendar days after receipt of the request for a hearing.
2. When an appeal is made by a disabled student, the Committee, at its sole discretion, may consult with or include the ADA Coordinator in the hearing process for such person's knowledge of disability and ADA issues and requirements.
3. A quorum to conduct Committee business and vote is defined as a minimum of four members. In no case shall any business be conducted unless at least one student and one faculty member are present. There will be an audio recording of the appeal hearing.

4. The decision of the Student Appeals Committee will be rendered within two business days of the hearing and conveyed to the student.
5. The decision of the Student Appeals Committee may be appealed to the President whose decision will be final. The President's review does not include a new hearing and his or her review shall consist of evidence presented at the hearing. The President will affirm, modify, or reject the decision of the Student Appeals Committee within five business days of the hearing date.
6. In addition to the committee members, the following persons are permitted to attend the hearing:
 - a. Involved parties
 - b. An advisor for the appealing individual. Advisors may not be attorneys.
 - c. Administrative officers of the College who may be directly concerned with the dispute.
7. If a student fails to attend the scheduled hearing, the appeal is considered to be dropped.
8. All steps of the appeal procedure for students shall be closed to the public, and all documents generated in the course of a complaint shall be confidential except to authorized College officials.

Availability of Information

The Student Appeal Policy and Procedure is available on the College website.

Exception for Disciplinary Appeals

When these procedures are used to appeal a disciplinary action taken by the Vice President for Student Services or his or her designee, in his or her capacity as the College discipline officer, the appeal will be forwarded directly to the President. An appeal of a disciplinary action taken by the Vice President for Student Services must be submitted in writing to the Vice President for Student Services or his or her designee within five business days of the action. He or she will forward the appeal, along with all documentation concerning the matter, to the President, whose decision will be final following an on-the-record review. The President may, in his or her discretion, allow the parties to supplement the record if additional information is needed for the fair disposition of the matter.

Privacy of Student Records

All student records, including records of distance learners, will be maintained with utmost confidentiality and in compliance with the federal Family Educational Rights and Privacy Act of 1974 (FERPA). All regulations pursuant to implementation of this policy must comply with FERPA.

1. Definitions:

- a. **Directory Information:** Information contained in an education record of a student that would not generally be considered harmful or an invasion of privacy if disclosed. For purposes of this section, directory information includes: name, address, telephone number, email address, date and place of birth, major field of study, dates of attendance and degrees received.
- b. **Education Record:** Records that are directly related to a student and maintained by an educational agency or institution or by a party action for the agency or institution.
- c. **Eligible Student:** A student who is eighteen years old (or starts attending any postsecondary institution) and has complete control of his or her education records.
- d. **Law Enforcement Purpose:** Enforcing state, local or federal law; referring possible violations of such law to law enforcement agencies or enforcement; or otherwise maintaining the physical security or safety of the school.
- e. **Law Enforcement Unit:** The A-B Tech Campus Police Force, which is officially authorized by A-B Tech to:
 - enforce any local, State or Federal law, or refer to appropriate authorities a matter for enforcement of any local, State or Federal law against any individual or organization other than the agency or institution itself; or
 - maintain the physical security and safety of the agency or institution.
- f. **Law Enforcement Unit Record:** Any records, files, documents and other materials that are:
 - created by a law enforcement unit;
 - created for a law enforcement purpose; and
 - maintained by the law enforcement unit.

Records created and maintained by a law enforcement unit exclusively for a non-law enforcement purpose, such as a student disciplinary action or proceeding conducted by the education agency or institution, are not law enforcement unit records, even if created and maintained by law enforcement unit personnel.

- g. **Legitimate Educational Interest:** The need for an individual to know the content of a student's education record for purposes of educational-related matters (including but not limited to academic and disciplinary issues). For purposes of this section, the personnel of the A-B Tech Campus Police are designated as school officials with a legitimate educational interest in student's education records.

2. In compliance with the Family Educational Rights and Privacy Act of 1974 ("FERPA"), commonly known as the Buckley Amendment, A-B Tech will not disclose education records concerning its students except for directory information and as otherwise stipulated herein.

Directory information may be released to anyone who requests it, unless the student specifies in writing to the Student Records and Registration office that his or her directory information be withheld. In such case, no directory information will be released.

3. A parent of an eligible student does not have access to the student's education records. In order for parents to have access to an eligible student's education records, beyond directory information and without written permission from the student, a parent must certify that the student is economically dependent as defined in Section 152 of the Internal Revenue Code of 1954. If a parent can prove dependency to the Student Records and Registration office by showing a copy of the parent's current tax report form or another acceptable report of current dependency, then the parent may have total access to the student's education records.
4. A-B Tech will release a student's educational records without his or her approval only under the following circumstances:
 - to A-B Tech officials who have legitimate educational interest in the records.
 - to officials of another college or university in which a student seeks to enroll.

- to certain federal and state educational authorities for purposes of enforcing legal requirements in federally-supported educational programs.
- to persons involved in granting financial aid for which the student has applied.
- to testing and research organizations conducting certain studies for or on behalf of the school.
- to accrediting organizations.
- in compliance with a court order or lawfully-issued subpoena.
- in very narrowly defined emergencies affecting the health and safety of the student or other persons.
- to state and local authorities, within a juvenile justice system, pursuant to specific state law.
- to parents of eligible students under the provision outlined in number 3 above.

5. Law enforcement unit records are not education records and may be disclosed by the A-B Tech Campus Police Force to College officials, other law enforcement personnel and court officials without parental consent. Parents do not have an automatic right to inspect law enforcement unit records. Public inspection of law enforcement unit records is subject to the Chapter 132 of the North Carolina General Statutes (the North Carolina Public Records Act). All public records requests for law enforcement unit records must be reviewed by the College Attorney for legal compliance.
6. Questions regarding student records should be directed to the College's Student Records and Registration Office, located in the K. Ray Bailey Student Services Center.

Academic Procedures

Classification of Students

Full-time student: A student enrolled for 12 or more credit hours during fall and spring semesters and 9 or more credit hours during the summer session.

Part-time student: A student enrolled for fewer than 12 hours during fall or spring semesters or fewer than 9 credit hours during summer session. (Please note that financial aid recipients registered during the summer will need 12 credit hours for full Pell awards.)

Declaring, Changing, or Adding Second Majors

In order to declare a major, change majors, or add a second major, the student needs to see an Academic Advisor in Student Services who will complete a change-of-major form indicating the new major or the second major. The catalog in effect at the time of this declaration will be the catalog recorded for this major.

Class Attendance

Regular and punctual class attendance is expected of all students for them to achieve their potential in class and to develop desirable personal traits necessary to succeed in employment. Instructional time missed is a serious deterrent to learning. Students are responsible for fulfilling the requirements of the course by attending and completing course assignments. An accurate record of class attendance will be kept.

It is mandatory that the student attend at least once during the first 10% of the course. For online classes, a graded activity must be submitted during the first 10% of the course. Failure to attend or submit an assignment during the first 10% of the course will cause the grade of "No Show" to be awarded. The student will not be allowed to continue with the course or to receive a refund.

If instructional time is missed for excusable reasons, the student will be permitted to make up work to the extent possible. Because of the nature of some learning experiences, especially clinics, labs and shops, it is difficult, if not impossible, to duplicate the work of the class. In some courses, absence or tardiness of an individual may be a major disruption to the performance of others in the class or an inconvenience to other organizations such as hospitals and clinics. The faculty may develop guidelines for advance notice of absences, makeup of work, etc. Students will be informed of guidelines at the beginning of the course.

A tardy is defined as arriving late for class, leaving early, or being away from class without permission during class hours. Three tardies may constitute one absence.

It is the joint responsibility of the student and instructor to discuss attendance patterns that will endanger the success of the student in the course. If it appears that a student will not be able to complete a course successfully, the instructor may advise the student to withdraw no later than the official withdrawal date at the 75% point of the class.

To receive course credit, a student should attend a minimum of 85% of the contact hours of the class. Upon accumulating absences exceeding 15% of the course contact hours, the student may be dropped from the class unless the student follows the official withdrawal procedure before the withdrawal deadline for the class.

Allied Health Students

To receive course credit when enrolled in an Allied Health program, a student should attend a minimum of 90% of the contact hours of all major area courses. Upon accumulating absences exceeding 10% of the contact hours, the student may be dropped from the class, unless the student follows the official withdrawal procedure before the withdrawal deadline. The 90% minimum attendance requirement applies to these major area course prefixes: NUR, DEN, EMS, MED, MLT, SON, PBT, PHM, RAD, SUR and VET.

Cosmetology Students

To receive course credit when enrolled in a Cosmetology program, a student should attend a minimum of 95% of the contact hours of all major area courses. Upon accumulating absences exceeding 5% of the contact hours, the student may be dropped from the class unless the student follows the official withdrawal procedure before the grade of "U" is recorded. The 95% minimum attendance requirement applies to the major area course prefix of COS.

Developmental Students

To receive course credit when enrolled in a developmental course, a student should attend a minimum of 90% of the contact hours. Upon accumulating absences exceeding 10% of the contact hours, the student may be dropped from the class unless the student follows the official withdrawal procedure before the withdrawal deadline.

Prerequisites and Corequisites

Before enrolling in a course with prerequisite requirements, students must satisfactorily complete the prerequisite course(s). Corequisite courses must be taken the same semester. Exceptions may be approved by the appropriate department chairperson and will be documented in the student's academic file.

Course Substitutions

Curriculum course substitutions must be approved by the program area dean and forwarded to the Registrar.

Introduction to College Courses for Degree-Seeking Students

Degree-seeking students who enroll in a college program requiring ACA 115, EGR 110, CUL 111, or any equivalent course, must enroll in and successfully complete the course with a grade of "C" or better in their first semester of enrollment. Students who do not meet this requirement will be prevented from registering for future semesters without enrolling in the course.

Any student who places into more than one developmental course must enroll concurrently in ACA 115, EGR 110 or CUL 111 as appropriate for his or her curriculum.

Students transferring a similar course or who transfer in 24 or more transfer credit hours of college-level work, will be permitted to substitute another course for ACA 115, EGR 110, or CUL 111 and will not be subject to the above requirement and subsequent restrictions.

Schedule Adjustments

Dropping a Class

In order to officially drop or withdraw from a course without academic penalty, the student must complete the Drop/Add Registration Change Notice and submit by the deadline.

The student may drop classes through the first 10% point of each term. Specific dates can be provided by the Student Records and Registration Office. A class may be dropped in one of the following ways:

- By submitting the Drop/Add Registration Change Notice electronically or to any registration center (K. Ray Bailey Student Services Center, Madison Site Office).
- Students may drop a course through WebAdvisor up to the first day of the term. After that day, students must drop the class in person. Distance students may receive assistance from the Distance Advisor.
- By having the program advisor or Academic Advisor process the drop. Students are responsible for ensuring this has been done.

In the case of drops, the course(s) will not be included on the transcript.

Withdrawing from a Class

After the 10% point of the term, a student wishing to withdraw from a class must complete a withdrawal form. A student receiving financial aid must obtain a signature of a financial aid officer and all instructors. Anyone receiving veteran's benefits must obtain signatures from the instructor(s) and the Veteran's Affairs Advisor. Any F-1 or M-1 international student must obtain signatures from the instructor(s) and the International Student Advisor. All withdrawal forms must be received by the K. Ray Bailey Student Services Center, or Madison Site Office during the first 75% of the term. Deadline dates will be published in the Student Handbook and Events Calendar each year. In the case of a withdrawal, the student will receive a grade of "W," which will not influence the quality point ratio, but will appear on the transcript.

Exceptions such as serious illness or job transfer requiring withdrawal from all classes after the 75% point of the term will be considered on an individual basis by the Vice President for Student Services or his or her designee. A student who has withdrawn from a class may no longer attend the class.

Adding a Class

A student may add a class to his or her schedule by submitting the Drop/Add Registration Change Notice electronically or to any registration center (K. Ray Bailey Student Services Center, Madison Site Office). A class may only be added prior to the first scheduled meeting and through the first day for online classes.

Final Examinations

Each instructor will schedule a comprehensive final course evaluation at some point during the last five days of the semester or the last two days of the class. The evaluation may consist of one or multiple components or methods. The course schedule will indicate the date(s) and method(s) of evaluation. If the final evaluation is given prior to the last day of class, the schedule will reflect the class activities to take place after the final evaluation.

Students are required to take their final examinations at the time(s) and place(s) scheduled. Conflicts may be resolved by arrangement with the faculty member. Three examinations scheduled for the same day is considered a conflict.

Auditing Courses

Students wishing to audit courses must register through regular registration procedures and pay standard tuition and fees. Students who register to take a course for credit and then choose to audit the course must submit a Request for an Audit Grade form to the Records and Registration Office within the first 15 days of the term for a full-term class. The instructor must sign the form to approve the change. A student may change from audit to credit status through the Records and Registration Office only during the first five days of the term. Audit work does not receive credit and cannot be used toward diploma or degree requirements. All prerequisites must be met before a course can be audited. Physical Education classes may not be audited. Audit work is not covered by financial assistance.

Curriculum Course Repetition

Students who need a course to graduate may take the course as many times as necessary to pass it, providing space is available. Any course that has been passed or audited may not be taken for credit or audited more than twice per academic year subject to space being available after registration. The twice-per-year regulation also applies to single or elective courses that are not required for graduation. No single Physical Education course may be attempted more than twice.

If a student has a failing grade in a required course, the course must be passed prior to graduation. If a student fails a prerequisite course, it must be repeated successfully before beginning the next course. This could result in the student being enrolled for a longer period than is normally required to complete requirements for graduation.

As courses are repeated, the higher grade becomes the official grade. Only a grade of "D" or above can replace an existing grade.

Grading System

Final grades will be issued to all students at the end of the term based on the criteria outlined in the course syllabus. A student who wants to contest a grade must do so within six weeks of the awarding of the grade. A grade cannot be changed after this period without approval by the department chair and the division dean.

Students will be graded by the following system:

| | | |
|---|----------------------------------|---|
| A | 90-100 | Excellent academic performance, consistent mastery of facts and concepts, and a thorough understanding of course content. |
| B | 80-89 | Good academic performance, high-level mastery of course content. |
| C | 70-79 | Average academic performance. |
| D | 60-69 | Marginal academic performance, poor mastery of course content. |
| F | Below 60 | Very poor performance, no demonstration of even minimal mastery of course content. |
| I | Incomplete | Assigned when a student is unable to complete work or take a final examination because of illness or other reasons over which the student has no control. An incomplete grade must be completed within the first six weeks of the next semester. Otherwise, the grade becomes an "F." |
| P | Proficiency | Does not affect quality point ratio. |
| R | Retake | Proficiency not demonstrated. Class must be retaken. Does not affect quality point ratio. |
| U | Unofficial Withdrawal (penalty) | Assigned when the student does not follow the College's official withdrawal policy by the course withdrawal deadline or is dropped for excessive absences. This is the equivalent of an "F" grade and will influence the quality point ratio. |
| W | Official Withdrawal (no penalty) | Assigned when the student OFFICIALLY WITHDRAWS. This will not influence the quality point ratio. Official withdrawals are not allowed after the 75% point of a semester or term, as identified in the official college calendar, except for exceptional and documented emergencies. In such circumstances, the student must withdraw from all courses. Approval for an emergency withdrawal must come from the Vice President for Student Services. |
| X | Continuing | Assigned when a student is unable to complete work during the current semester because of class scheduling over consecutive semesters or at the discretion of the instructor to allow additional time to complete work. A "contract" of conditions for completion and time limit, not to exceed 12 months, will be executed by the instructor and signed by both the instructor and student. If the terms to remove the grade of "X" are not fulfilled by the end of the contract period, the grade will revert to the average held at the beginning of the contract period including zeros for work not completed. |

Transcript Codes

Other codes that may appear on the college transcript include:

| | |
|----|--|
| AP | Advanced Placement course credit. |
| AR | North Carolina High School to Community College Articulation Agreement course credit. |
| CR | CLEP (College Level Examination Program) course credit, or other academic credit applied from non-course activity. |
| NS | No Show. Student enrolled but never attended the class. This will not influence the quality point ratio. |
| P | Proficiency. Does not affect quality point ratio. |
| R | Retake. Proficiency not demonstrated. Class must be retaken. Does not affect quality point ratio. |
| T | Transfer credit from other colleges, universities, and military credit. |
| TA | Transfer credit from other North Carolina colleges and universities that articulates under the Comprehensive Articulation Agreement. |
| TS | Transfer credit from other North Carolina community colleges, which can be used only for diploma or A.A.S. programs. |
| Y | Audit. |

The pound sign next to a grade indicates that the course has been excluded from the quality point average either through course repetition or Academic Fresh Start.

Quality Points

At the end of each semester quality points are assigned in accordance with the following formula. (The minimum program grade-point ratio for graduation is 2.00 or an average of grade “C.”)

| | | | |
|---|----------------------------------|---|---------------------------------|
| A | 4 quality points per credit hour | D | 1 quality point per credit hour |
| B | 3 quality points per credit hour | F | no quality points |
| C | 2 quality points per credit hour | U | no quality points |

Quality ratings are determined by dividing the total number of quality points by the number of hours attempted (excluding grades of “X”, “I” and “W”). A ratio of 2.00 indicates that a student has an average of “C.”

Independent Study

Selected courses may be available for independent study, with approval of the appropriate dean. A student requesting to take a course by independent study must complete the Request for Independent Study form and have it approved by the department chair and division dean prior to registration. The request to enroll in a course by independent study may be approved when the following conditions are met:

1. The course is not offered during the current semester or is in schedule conflict with another required course and is needed for the student to qualify for graduation or transfer.
2. The student has a cumulative grade point average of 2.0 or higher.
3. The student has completed 15 semester hours of study in his or her academic program at Asheville-Buncombe Technical Community College.
4. A full-time faculty member, with the approval of the department chair, agrees to serve as the instructor for the semester of independent study.

Any exceptions must be justified by special circumstances and approved by the Vice President for Instructional Services.

Maximum Course Load

Because of the amount of effort that is expected to be put forth in college-level courses, students are limited to a maximum of 20 hours of course work each semester. Exceptions to this rule may be granted by the Vice President for Instructional Services.

Cooperative Education

In selected programs, A-B Tech provides students with an opportunity to integrate classroom learning with supervised work experience in an employment situation directly related to the educational program of the student. The work experience component is an integral part of the total educational process. The primary objective of cooperative education is to prepare the student for employment.

To be eligible to participate in a cooperative work experience activity, a student must be 18 years of age, be enrolled in a curriculum program that provides a cooperative education option, have a minimum 2.0 cumulative program GPA, have completed required course prerequisites, and have completed a minimum of 9 semester credit hours within the appropriate program of study. Approval by the department chairperson is required for a student to participate in a cooperative education activity. Any exceptions to these requirements must be approved by the appropriate academic dean.

Standards for Academic Progress

The College has established this standard to:

- Provide students with a warning when they fail to meet satisfactory academic performance standards;
- Limit scheduling when a student's academic performance indicates the necessity for intervention; and
- Provides a means for preventing prolonged academic failure.

This policy applies to all curriculum students, classified and unclassified.

Students whose semester grade point average (GPA) falls below 2.0 are subject to academic warning, which may be followed by probation and suspension. GPA will be calculated using the current official grade for each course taken that semester at Asheville-Buncombe Technical Community College.

Academic Warning

Students failing to meet the minimum GPA during any semester will receive an academic warning. The warning is posted on the student grade report for that semester, and the student's Academic Program Dean, Department Chair, and Academic Advisor are notified by the Registrar. To assist students in improving their GPA, the following steps are recommended:

- a. Student meets with student's assigned Academic Advisor within the first eight days of the semester to develop strategies for academic success;
- b. Student completes the one-hour "What it Means to be a Successful Student at A-B Tech" session prior to next registration; and
- c. Student meets again with his or her assigned Academic Advisor to review student's academic progress prior to next term's registration.

Students whose semester GPA is:

- 2.0 and above will be considered in good academic standing.
- Below 2.0 will be moved to academic probation.

A student remains on academic warning until student's GPA in the next term of enrollment is 2.0 or above.

Academic Probation

Students whose semester GPA falls below 2.0 for two successive semesters will be placed on academic probation. Students on academic probation have restricted scheduling and must meet with their assigned Academic Advisor to complete an individualized Academic Probation/Suspension Success Contract which may include the following:

- A limitation on the number of hours attempted;
- Scheduling developmental courses as needed;
- Scheduling a repeat of courses;
- Referral to other College resources, such as the Financial Aid Office, to receive further guidance.

Academic Probation is posted to the student's official transcript. Students will be notified of their status by an Academic Advisor.

A student remains on Academic Probation until his or her GPA in the next term of enrollment is 2.0 or above.

Academic Suspension

Students whose semester GPA falls below 2.0 for three consecutive semesters will be placed on academic suspension for one semester. Students on academic suspension are not allowed to register for curriculum courses. Continuing Education courses may still be taken. Academic Suspension is posted to the student's official transcript.

Academic Appeal

Academic Suspension may only be appealed through the Vice President for Instructional Services or his or her designee. Appeals will be considered by the Academic Appeals Committee prior to the first day of class of each semester.

Registration after Academic Suspension

An individualized Academic Probation/Suspension Success Contract must be completed and may include the following:

- A limitation on the number of hours attempted;
- Scheduling developmental courses as needed;
- Scheduling a repeat of courses, and
- Referral to other College resources, such as the Financial Aid Office, to receive further guidance.

Students may re-register after one semester of academic suspension (excluding summer semester). They must meet with the chair of their program or their assigned academic advisor to develop strategies for academic success.

Academic Fresh Start

Any returning student who has not attended A-B Tech for three years and upon reenrolling maintains a 2.00 GPA for a minimum of 12 semester hours may petition to have grades on all prior course work more than three years old with a grade less than a "C" excluded in calculating the cumulative GPA. Grades below "C" disregarded in calculating the GPA will not count toward graduation but will remain on the transcript. The student should complete an application for Academic Fresh Start (obtained in the Records and Registration Office), after the end of the semester in which he or she has completed the 12 semester hours required. A student who plans to transfer to another College should contact that institution to determine the impact of Academic Fresh Start on transfer.

Honors and Achievements**Dean's List**

1. For the Dean's List, students must be enrolled in an academic program (degree, diploma or certificate), carrying a minimum of eight credit hours of curriculum courses numbered 100 or above.
2. Students must have a minimum 3.75 quality point average to qualify for the Dean's List for the semester under consideration.
3. Students who earn grades of F, I, U or X are not eligible for the Dean's List for that semester. Students receiving credit for a course by examination are not affected. Only courses numbered 100 and above will be considered.
4. The Dean's List will be compiled by the Registrar and the Executive Assistant of Instructional Services. The draft of candidates will be posted on major bulletin boards for students to review. The Vice President for Instructional Services will be responsible for final approval and publication.

President's List

1. For the President's List, students must be enrolled in an academic program (degree, diploma or certificate), carrying a minimum of twelve credit hours of curriculum courses numbered 100 or above.
2. Students must have a 4.0 quality point average to qualify for the President's List during the semester under consideration. Only courses numbered 100 and above will be considered.
3. Students who earn grades F, I, U or X are not eligible for the President's List for that semester. Students receiving credit for a course by examination are not affected.
4. The President's List will be compiled by the Registrar and the Executive Assistant for Instructional Services. The draft of candidates will be posted on major bulletin boards for students to review. The Vice President for Instructional Services will be responsible for final approval and publication.

Academic Programs and Graduation Requirements

Degree, Diploma, and Certificate Programs

Asheville-Buncombe Technical Community College confers the Associate in Arts, Associate in Applied Science, Associate in Science, and Associate in Fine Arts degrees. A diploma is awarded for completion of one-year applied curricula. Certificates are issued to students who successfully complete designated short-term programs or course sequences. Degrees, diplomas, and certificates are conferred, awarded, or issued by authority of the North Carolina State Board of Community Colleges when all requirements for graduation have been satisfied.

At least 25% of the credit hours in a program of study must be earned at this College.

Because of rapid changes in workplace technologies, certain technical courses will “time out” after five years and must be repeated for graduation. Exceptions must be approved by the department chairperson.

Requirements for Graduation

The College holds a graduation ceremony in May each year. To graduate with a diploma or degree, students must meet the following minimum requirements:

1. Declare an academic major and complete the requirements of a College-approved program of study according to the student's official catalog. The official catalog is determined by the program chair in consultation with the student and should be the catalog that is in effect at the time that the student declares a major. The official catalog may not be a catalog prior to the student's first date of enrollment and must be a College catalog dated no more than five years prior to the date of graduation (i.e., a student graduating in 2013 cannot use a catalog earlier than 2008-2009). Students should be aware that prerequisites for courses change frequently and that they will be required to meet the prerequisites in place at the time a course is taken.
2. Each course in the program of study must be completed by one of the following methods:
 - a. Take the course at A-B Tech.
 - b. Receive transfer credit.

To be eligible for graduation, at least 25% of the required program hours must be completed at A-B Tech. The following programs require that selected upper-level courses be completed in residency at A-B Tech: Associate Degree Nursing, Basic Law Enforcement Training, Dental Assisting, Dental Hygiene, Emergency Medical Science, Medical Assisting, Medical Laboratory Technology, Medical Sonography, Pharmacy Technology, Phlebotomy, Practical Nursing, Radiography, Surgical Technology, Veterinary Medical Technology,

Cosmetology, Therapeutic Massage. A student who desires to transfer credit into one of these programs should consult with the department chairperson. Exceptions may be approved by the Vice President for Instructional Services.

c. Earn Credit-by-Exam.

3. Earn a grade of at least “C” in each course identified in the catalog as a major course and a minimum average of 2.0 (“C”) quality points for the current program. Students completing their program of study with a program grade point average of 4.0 will be graduated with highest honors. Those who have a minimum program GPA of 3.75 will be graduated with high honors and those with a minimum program GPA of 3.50 will be graduated with honors. The student must assume primary responsibility for assuring that all requirements for graduation are met.
4. Apply for graduation in the K. Ray Bailey Student Services Center the semester before completing degree requirements. Purchase caps, gowns, and diplomas in March. Students who cannot attend graduation must still pay for the diploma.
5. Be in good standing; fulfill all financial obligations to the College; receive library clearance.
6. Fulfill programmatic related graduation requirements as defined by special accreditation compliance standards.

Transfer of Credit to Other Institutions

Asheville-Buncombe Technical Community College facilitates the transfer of credit to other institutions. The Associate in Arts and Associate in Science degree programs are designed to transfer to senior institutions at or near the junior level.

College transfer courses satisfactorily completed with a grade of “C” or better in the Associate in Arts, Associate in Science, and Associate in Fine Arts programs will transfer to senior institutions.

Associate in Applied Science graduates have the option of entering a career, continuing their education at a senior institution, or doing both.

Parallel work, including single courses completed at A-B Tech, will transfer to other institutions in the North Carolina Community College System and to most senior institutions in the state. Most public and private four-year institutions in North Carolina, and many that are out of state, regularly accept credits from A-B Tech and generally enroll the graduates at approximately the junior level. The details of these affiliations are available from the Transfer Advising Center in the K. Ray Bailey Student Services Center and the individual senior institutions.

Student Support Services

Counseling Services and the Career Center

A-B Tech provides free, confidential counseling and related services for students through the Counseling Center located in the K. Ray Bailey Student Services Center. Students are encouraged to use counseling services at any time if they have personal, academic, or career concerns. The professional counseling staff, after initial assessment, will refer students who need specialized or long-term services to appropriate resources within the community.

Career counseling and career exploration services are available to students who are undecided or confused about career plans. The Career Center, located in the K. Ray Bailey Student Services Center, houses a variety of career resources, both print and computerized, to assist students in career-related areas. Career development materials are available electronically on the College website. Career testing and career counseling sessions are available by appointment. An appointment may be made online at **careerscheduling.abtech.edu**.

Academic Advising

In order to ensure that every student receives quality academic advising, A-B Tech has established an academic advising system. Students who are admitted to an applied science degree, diploma, or certificate curriculum are advised by a faculty member from that curriculum. Students who are not admitted to a degree, diploma, or certificate program, or those admitted to the General Occupational Technology diploma or degree program, may be advised by academic advisors in Student Services or at the Madison Site.

Unclassified students may elect to register without meeting with an academic advisor. They may register online via WebAdvisor or at the Express Lane in the K. Ray Bailey Student Services Center. The following process outlines important steps for individuals choosing to self-advise:

1. Register at the appointed time, based on accumulated credit hours. Information will be sent via email and is available in WebAdvisor.
2. Prerequisites and corequisites for courses must be met.
3. High school students must see an advisor to register.
4. New students register during general registration.

Academic advisors initially determine the developmental courses for students based upon the results of placement testing. Faculty advisors use this information when advising students. Once an educational plan is

developed, students are welcome to receive assistance with scheduling in the Scheduling Office in the K. Ray Bailey Student Services Center. Students who desire to register for more than 20 credit hours in a semester will need the approval of the Vice President for Instructional Services or his or her designee.

Students in the college transfer program are assigned to the Transfer Advising Center (located in the K. Ray Bailey Student Services Center) for academic advising. They will be seen by transfer program advisors on a first-come, first-serve basis.

Services to Students with Disabilities

Asheville-Buncombe Technical Community College is invested in full compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. The Disability Services Office at the College ensures that the programs and facilities of the College are accessible to all students. The College focuses on the student as an individual and works toward equal opportunity, full integration into the campus environment, physical accessibility and the provision of reasonable accommodations, auxiliary aids, and services to students.

Student with disabilities who require the services of interpreters, readers, note-takers, or need other reasonable accommodations should request these services from the Disability Services Office since federal law prohibits the College from making pre-admission inquiries about disabilities. This office is located in the Counseling Center in the K. Ray Bailey Student Services Center. In order to accommodate each disabled student's needs and to provide the necessary support services, professional documentation of a disability or disabilities must be furnished to the Disability Services Office. Information provided by students is voluntary and appropriate confidentiality is maintained. For detailed information, refer to **abtech.edu/Student_Services/disability/**.

Students who need assistance for academic services should call the Office of Disability Services at 828-398-7581. Services are designed and developed on an individual-needs basis, and students may elect to use any or all of the services appropriate to their needs at no charge.

An appointment with the Disability Services staff is recommended in order to discuss any special concerns. Students who are not satisfied with the decisions of this office may utilize the College's Student Appeals Policy.

Developmental Studies

This department provides post-secondary students with instruction in basic math, English, and reading. As the point of entry for learners needing academic development, Developmental Studies is sensitive to the needs of students making the transition to a college environment. The objective of this department is to enable students to develop skills and behaviors that will lead to successful achievement in A-B Tech's curricula. In compliance with the state redesign of developmental mathematics, Developmental Studies mathematics courses have a minimum passing grade of 85%. Students achieving at or above this level of mastery will receive a grade of "P" and those who do not reach the 85% mastery will receive a grade of "R" and will be required to retake the module until mastery is demonstrated. The minimum passing grade for developmental reading and English is "C". The grades of "D" or "U" are not used for Developmental Studies courses. Developmental Studies faculty may officially withdraw a student from a course.

Students who test into three developmental disciplines will be assigned developmental academic advisors for a minimum of the first semester of enrollment. These students will be allowed to take no more than 13 credits of work during that first semester (i.e. three developmental courses of four credits each and a required student success course). A decision regarding the ability to take more than 13 credits in future semesters while still enrolled in developmental courses will be made with the permission of the developmental advisor.

Completion of Mathematics Sequence

National research and North Carolina Community College System data support a need for students to stay continuously enrolled in math until they finish the highest level math course required in their selected curricula. Students who take a semester off from math rarely complete their math sequence, and consequently do not finish the diploma or degree they seek. A-B Tech's Retention Plan calls for students to stay continuously enrolled in math until the sequence is finished.

Academic Learning Center

The Academic Learning Center (ALC) supports student success through tutorial assistance, a testing lab, and open computer labs.

The tutoring labs provide math, physics, chemistry, reading, and English tutorial assistance for students enrolled in any developmental studies or curriculum course. Students must have an instructor's referral to use the ALC's tutoring labs. Tutoring is accomplished through individual help, small groups, and computer-assisted instruction.

The open computer labs may be used by students to complete assignments using computers. The lab in

Ferguson 116 may be reserved by an instructor for occasional use by a class.

The testing lab facilitates on-line testing, re-testing, make-up testing, extra-time testing or other special needs testing. Non A-B Tech students may be proctored for a fee.

The Writing Center

The A-B Tech Writing Center is open to students in all curriculum programs. Staffed by full-time and adjunct English instructors and by peer tutors, the Center is dedicated to helping students improve their writing in all stages of development. The Writing Center requires no referral form, and walk-ins are welcome; however, scheduled appointments are given priority.

During conference sessions, emphasis is placed on clarity of expression, effective design and organization, refinement of thesis statements, persuasive support for ideas, smooth transitions, appropriate language, fluid integration of source material, and accurate documentation of sources. Writing Center tutors are asked not to proof-read or edit papers, but they can assist students in becoming more confident and effective self-editors by providing helpful strategies for deep-level revision and effective proofreading.

The Writing Center's online tutoring component is available to students enrolled in online and hybrid classes and may also be used by students in classroom sections on days when the on-campus Center is closed (for inclement weather, special campus activities, etc.) or when the Center's on-campus schedule is full. The online service, staffed by adjunct English instructors and the Center's coordinator, accepts submissions 24/7 with a 24- to 48-hour turnaround Monday through Thursday and a 48-72-hour turnaround Friday through Sunday.

Student Services for Distance Learners

Following is the list of Student Services available to distant students. Most of these resources are available from the College website at abtech.edu.

1. **Application:** Application to the College may be made on the College website.
2. **Student Orientation:** The New Student Orientation is available in Moodle for all students.
3. **Student Handbook:** A copy of the annual Student Handbook will be mailed upon request to distance learners. The Student Handbook is also available on the College website.
4. **Transcript Evaluation:** Transcripts from colleges previously attended may be mailed or faxed to A-B Tech by the originating college and can be evaluated for transfer credit, if transfer credit is desired. Students will receive a summary of transfer credits in WebAdvisor.

5. **Application for Graduation:** Applications for graduation may be mailed to the Registrar's Office for evaluation. The application is available on the College website. Applicants will receive an email response to their A-B Tech email account.
6. **Catalog:** The catalog is available on the College website.
7. **A-B Tech Transcripts:** Transcript request forms are available on the College website.
8. **Dropping Classes:** Distance learners may drop classes by calling or emailing the Distance Advisor (distanceadvising@abtech.edu), or online via WebAdvisor, if permitted.
9. **Schedule of Classes:** Curriculum schedules are available on the College website and in WebAdvisor.
10. **Financial Aid:** Applications for federal financial aid (FAFSA) are available at www.fafsa.gov and scholarship applications are available on the College website. Financial Aid information is available by emailing financialaidoffice@abtech.edu or calling 828-398-7520.
11. **Academic Advising:** Academic advice is available as follows: students classified into programs may receive academic advice by emailing their assigned program advisor at the College. Unclassified students who are not in any program may receive academic advice by contacting distanceadvising@abtech.edu
12. **Veterans' Services:** Veterans' services and advice are available by emailing the Veterans' advisor at marycalbert@abtech.edu
13. **Disability Services:** Students with disabilities as defined by the Americans with Disabilities Act may seek services by e-mailing the academic advisor for students with disabilities: judithkharris@abtech.edu for college transfer, basic skills, and continuing education students; or shannanthomasmough@abtech.edu for all other students.
14. **Career Counseling Services:** For those who need assistance in choosing a major/program, researching specifics of various occupations, writing resumes, and/or interviewing skills, counselors are available by appointment. Students may schedule an appointment at careerscheduling.abtech.edu. Career Services and a job and résumé posting service called Job Board are also available online at the College website.
15. **Placement Assessment:** Placement assessment may be accomplished at any college which offers the Accuplacer placement test. Scores can then be faxed by the originating college. Additionally, SAT or ACT scores may be used instead of taking the Accuplacer. The College will also accept Compass or ASSET scores. One of these tests is available at every community college in North Carolina as well as at other colleges throughout the country. For information, contact the Assessment Specialist at kareneedwards@abtech.edu. To schedule a placement assessment on the A-B Tech campus, visit placementtesting.abtech.edu.
16. **Payment of Tuition and Fees:** Tuition and fees may be paid online from the College website or by using WebAdvisor.
17. **Purchase of Books:** Books may be purchased online from the College Bookstore.
18. **Distance Learning:** Visit the Distance Learning web page at abtech.edu/vcampus for additional information.
19. **Online Technical Assistance:** The College provides a Help Desk for students who experience technical issues with Moodle, WebAdvisor and other college-related, online services. Contact helpdesk@abtech.edu.
20. **Library Services:** Students may access the resources of the Holly Library by visiting abtech.edu/holly-library.
21. **Academic Assistance:** Tutoring for distance learners in certain disciplines is available through smarththinking.com. For help with writing, contact the Writing Center at abtech.edu/writingcenter.
22. **College Events:** For an updated list of college-sponsored activities and events, check the calendar on the College website.

Financial Aid

The purpose of the financial aid program at Asheville-Buncombe Technical Community College is to provide assistance to students who, without such aid, would be unable to attend the College. The program is committed to the philosophy that no eligible student should be denied access to a higher education because of a lack of financial resources.

An application for financial aid will gain consideration for grants-in-aid, loans, scholarships, and student employment opportunities. In general, financial aid is awarded to students on the basis of need, academic potential, and future promise.

Students desiring financial aid for an academic year (August through May) are encouraged to apply early (January through March) to be given priority consideration for the funds available. Applications will be processed until all available funds are awarded.

Application Procedure

In order to be considered for financial aid, a student must complete a Free Application for Federal Student Aid (FAFSA) online at www.fafsa.gov. Alternative accessible application formats will be made available to

individuals with disabilities upon request to the ADA Coordinator or the Financial Aid Office.

For priority consideration, it is important that students complete the General Admissions Procedures for Classified Students.

Financial aid applications are required to be entered on the Department of Education website at www.fafsa.gov. However, prior to completing the online FAFSA, students must apply for a Personal Identification Number (PIN) at www.pin.ed.gov. This number will be entered as one's signature for the FAFSA.

If an applicant is a dependent and therefore required to provide his or her parents' financial and personal information on the FAFSA, at least one parent must also apply for a PIN at the address above, as it is required to have the parent sign the FAFSA as well. When visiting the website, students will be given explicit instructions. Assistance is also provided by the Department of Education at 1-800-433-3243. TTY users (hearing impaired) may call 1-800-730-8913.

There is a FAFSA worksheet that students may complete prior to completing the application online. Worksheets will be available at their local high school or college and in the Student Services Center on the A-B Tech main campus. They may also print the worksheet from the www.fafsa.gov website.

When students log onto www.fafsa.gov, they will be advised on all the documentation they must have to complete the FAFSA. A complete and accurate application will prevent delays in processing their financial aid. The college code for A-B Tech is 004033.

Students should make sure they receive and retain a copy of the confirmation number when their FAFSA is submitted. After the Department of Education processes the application, an electronic file with the information the College needs to process financial aid for the student will be transmitted to the A-B Tech Financial Aid Office. Also, when the FAFSA is processed, the student will receive the Student Aid Report (SAR) by email or a hard copy of the report may be mailed.

All correspondence from the Financial Aid Office is sent to students via their A-B Tech student email account. All students who apply for financial aid are automatically assigned a student email account. Information regarding how to access the student email account can be found online at abtech.edu/students/email. Students should check their student email regularly for information regarding missing financial aid documentation, class information, registration, billing status, etc.

After financial aid is completely processed, students can go to their WebAdvisor account to view their award notification, which tells them how much and what types of financial aid they will receive. Students can access their WebAdvisor account from the A-B Tech website at abtech.edu.

Students will find all the web links mentioned above, as well as other helpful sources of financial aid assistance, on the A-B Tech website. Students should visit abtech.edu, click on the student link, and scroll down to the financial aid link. Computers are available for student use in the K. Ray Bailey Student Services Center.

Students seeking additional information about the Financial Aid Program at A-B Tech are urged to contact the Financial Aid Office in the K. Ray Bailey Student Services Center.

Important Pell Grant Information. A new federal law shortens the length of time students will be eligible for Pell Grants from 18 semesters to 12, beginning with the 2012-13 school year. For more information, contact the Financial Aid Office at 398-7162.

Satisfactory Academic Progress (SAP) Policy for Financial Aid Recipients

According to federal and state regulations, students receiving financial aid must maintain Satisfactory Academic Progress (SAP). The Financial Aid Office at Asheville-Buncombe Technical Community College monitors a student's academic progress as a condition of eligibility when the student applies for financial aid and at the end of each enrollment period (semester). These requirements are applied to a student's entire academic history at A-B Tech, including transfer hours from other schools and including periods when financial aid was not received. A student is considered to be making satisfactory academic progress when the following three requirements are satisfied:

1. **Qualitative Standard (Cumulative Grade Point Average)** – A student must maintain a minimum cumulative grade point average of 2.0.
2. **Quantitative Standard (Completion Rate)** – A student must complete a minimum number of credit hours of the total credit hours attempted. (See chart below.)
3. **Maximum Timeframe** – A student must successfully complete the program of study within its timeframe. Federal regulations specify that the timeframe may not exceed 150% of the published length of the program. When students exceed the timeframe for their programs of study, they are no longer eligible to receive financial aid. However, students can appeal to the Director of Financial Aid to have their eligibility extended if there are extenuating circumstances.

Monitoring Satisfactory Progress. A-B Tech will monitor satisfactory progress using the chart below. The chart has been designed to accommodate all federally-eligible programs of study offered by the College and the variable enrollment status of students (e.g. full-time, 75% of the time, 50% of time and less than 50% time).

| Credit Hours Attempted* | Minimum Credit Hours to be Completed** | Minimum Cumulative GPA Required*** |
|-------------------------|--|------------------------------------|
| 1-18 | 33% | 2.00 |
| 19-40 | 50% | 2.00 |
| 41 and over | 67% | 2.00 |

*Credit hours attempted will be cumulative and will include all hours for which the student was enrolled as of the census date of each academic term or for which the student received a grade. The census date is defined as the day following the last day for registration and payment as outlined in the College catalog.

**Credit hours completed with grades of A, B, C, D, T, CR, P, or AP only will fulfill this requirement. Grades of I, NS, U, W, X, and Y will not fulfill this requirement.

***Cumulative GPA is calculated by dividing the total number of quality points earned by the total credit hours attempted for which the student received grades of A, B, C, D, F, and U.

The second quantitative standard referred to as the maximum timeframe will be measured independently of the monitoring chart. For each program of study, a maximum timeframe will be calculated by taking the total credit hours required for the program as outlined in the College catalog and multiplying the total by 150%. Timeframes will vary from program to program.

Key points to remember regarding the maximum timeframe:

1. Since the timeframe sets the limit for the number of credit hours a student may attempt and remain eligible to receive financial assistance, it is very important that the student plan class schedules carefully with his or her academic advisor and/or the Student Services counseling staff. It is the responsibility of the student to register only for classes listed in his or her chosen major in the College catalog and for scheduling only the number of hours he or she is capable of completing. **SOME STUDENTS WILL BE REQUIRED TO TAKE PROVISIONAL COURSES, WHICH WILL ALSO BE COUNTED AS HOURS ATTEMPTED.** Students are responsible for knowing the policy concerning the limitation on hours attempted for financial aid purposes. Registering for more courses than a student is capable of completing, having to withdraw from classes, registering for courses for which the student has already received credit, taking courses in error, etc. all impact the timeframe and could result in losing financial aid eligibility before completing a program of study.
2. The timeframe is cumulative; therefore, by switching programs without completing the initial program, the student runs the risk of losing financial aid eligibility.

3. The timeframe begins when the student first attends the College and continues until that student successfully completes a program of study regardless of the number of years that may elapse between enrollment periods.
4. Only students who successfully complete a program of study will be given a new timeframe should they decide to enter a subsequent program of study. The credit hours attempted to complete the first program will not be included as hours attempted in the timeframe for the second program of study.
5. Students who take course work and are unclassified will have those hours attempted added to their timeframe if and when they enter a specific program of study.
6. Students accepted into a program of study who are required to take developmental course work, as determined by placement testing results and the professional judgment of a Student Services counselor, will have the credit hours attempted for such course work count toward their timeframe. (Financial aid can only pay for 30 credit hours of developmental course work).
7. The credit hours for course incompletes, withdrawals, and repetitions will be counted as hours attempted toward the timeframe.
8. Students switching from a degree program to a vocational program who have or nearly have exceeded the initial timeframe may appeal to the Director of Financial Aid for a timeframe extension.
9. Credit hours transferred in will be counted toward the maximum timeframe of eligibility. Prior degrees earned will be taken into consideration when determining transfer hours.

SAP Status. Based on these calculations, students will be assigned certain satisfactory academic progress statuses. Please see the statuses and their definitions listed below:

Satisfactory. Satisfactory status is achieved when the cumulative GPA, completion rate and timeframe are met.

Warning. Students who fail to meet the minimum cumulative GPA of 2.0 and fail to complete a minimum percentage of classes (completion rate) are given a *warning*. Students in the status of *warning* remain eligible for financial aid for one payment period (semester). Participation in the following success strategies while on *warning* may positively impact a student's performance as well as positively impact any appeal of loss of financial aid if it becomes necessary. It is recommended that students do the following.

1. Complete the one-hour "What It Means To Be a Successful Student at A-B Tech" academic success workshop during the semester on *warning*. (See Financial Aid Office for specifics.)

2. Meet with their academic advisor to review academic success strategies during the semester on *warning*.

Participation in the success strategies mentioned above will affect whether any appeal of *suspension* is positively received.

Suspension. Students who fail to meet the conditions of a *warning*, which are to maintain a minimum cumulative GPA of 2.0 and complete a minimum percentage of classes (completion rate), are placed on *suspension*. Students who are placed on *suspension* forfeit their financial aid. A student may either appeal to have their financial aid eligibility reinstated or may notify the Financial Aid Office when the student is meeting the satisfactory academic progress policy for students receiving financial aid so that their financial aid eligibility can be reconsidered. If an appeal is approved, the suspended student is placed on *probation*.

Probation. Probation occurs when students on *suspension* have their eligibility for financial aid reinstated by the Director of Financial Aid. Students who are suspended may appeal to the Director of Financial Aid to have their financial aid eligibility reinstated for one payment period (semester) on *probation*. (See the appeal process outlined below.) A student on *probation* may not receive financial aid for the subsequent payment period unless:

1. The student is now meeting the financial aid satisfactory academic progress policy at the end of the *probation* period (semester); or
2. The student meets with his or her academic advisor to be placed on an individualized academic probation/suspension success plan. A copy of this plan must be provided to the Financial Aid Office by the student. The plan may include one or more of the following strategies:
 - Limiting the number of hours attempted
 - Scheduling developmental courses as needed
 - And scheduling repeat of courses

Students will be notified of their status at the end of each payment period (semester) or when they first apply for financial aid. This notification will be sent to their student email account.

Appeal Process. Students who are suspended for not meeting the satisfactory academic progress standards may appeal for reinstatement of financial aid eligibility for one semester, if they have extenuating circumstances that are generally beyond their control such as a death in the family, serious illness or injury. The procedure for appeal is:

1. Print out and complete the Satisfactory Academic Progress Appeal Request Form from the financial aid web page.

2. The student will indicate in writing to the Director of Financial Aid the reasons why he or she did not make satisfactory academic progress and why financial aid should not be suspended. Also, changes that will allow the student to make satisfactory academic progress at the next evaluation should be addressed.
3. Documentation to support the appeal is required and must be attached to the letter of appeal. Appeals submitted without documentation will not be reviewed.
4. The Director of Financial Aid will review the appeal and documentation to determine whether or not the student's financial aid eligibility will be reinstated. The student will be advised of the decision via their student email address.
5. Decisions of the Director of Financial Aid, regarding loss of aid, may be appealed through the Student Appeals Policy.

Submission of an appeal does not guarantee reinstatement of eligibility for financial aid. Each appeal is reviewed on a case-by-case basis.

Paying out of pocket for classes or sitting out a semester is not grounds for reinstatement of aid. Students must bring their academic progress back into compliance or have an appeal approved to have aid reinstated.

Federal Return of Title IV Funds Policy; Financial Aid for Students Who Withdraw or Drop Out. The Higher Education Act of 1965, as amended Oct. 1, 1998 allows institutions participating in any Title IV program (e.g. Pell Grant, Direct Loan Program etc.) to implement the policy and make a "good faith effort" to enforce it prior to the writing of the final regulations, which became effective on October 7, 2000.

In general, the law focuses on the return of Title IV Funds received for the semester the student was enrolled if that student completely withdraws or partially withdraws (terms with modules) from the College prior to the 60 percent point of the semester.

If a student withdraws after the 60 percent point of the semester or minimester, the student will be considered to have earned all funds disbursed and no return of funds will be required unless, of course, a student had received a loan that was subject to repayment under the terms of the loan.

Any student who decides to completely withdraw from the College prior to the 60 percent point of the semester and who has been disbursed Title IV funds may be required to repay a portion of those funds based on the federal formula calculation.

Students may request a copy of the complete policy and the calculation sheet used to determine liability from the Financial Aid Office located in the K. Ray Bailey Student Services Center.

Scholarships and Other Financial Aid Information

Scholarships

A-B Tech offers a variety of enrollment scholarships each year. There are certain requirements for these scholarships. Students should check with the Financial Aid Office at 398-7162 for an application and additional information regarding these scholarships.

All students are encouraged to seek out scholarships offered by clubs and organizations in their communities.

An excellent source for scholarships is located on the World Wide Web. Students can do searches by accessing www.finaid.org and using the free scholarship search, FASTWEB. FASTWEB alone contains a database of more than 180,000 scholarships. The website of the North Carolina State Education Assistance Authority, www.ncseaa.edu, lists scholarships available to North Carolina residents only.

Asheville-Buncombe Technical Community College Foundation

The Asheville-Buncombe Technical Community College Foundation awards scholarships annually.

- January 7 – Online applications are available at: abtech.edu/foundation/scholarships.
- March 15 – Students applying for scholarships requiring the establishment of financial need should complete the Free Application for Federal Student Aid (FAFSA). www.fafsa.gov.
- March 29 – Online application for scholarships closes and all reference forms must be submitted by 5 p.m.
- June 3 – Scholarship awards sent to students via email.

Students may access scholarship criteria on the A-B Tech website at abtech.edu/foundation. For additional information about the Foundation, please call 398-7562.

Other Financial Aid Information

In addition to scholarships, information about grants, loans and work programs is also available on the internet. Some recommended sites are:

www.ed.gov/offices/ope: Click on “Information for Students” for federal student aid information.

www.cfnc.org: Provides comprehensive information about scholarships, loans, and other programs/issues.

www.nasfaa.org: Click on “Financial Aid Information for Students, Parents & Counselors,” provided by the National Association of Student Financial Aid Administrators.

Education Tax Credits

Community college students are eligible to receive education tax credits that can reduce the expense of their education. There are three education tax credits available, the American Recovery and Reinvestment Act, Hope Credit and the Lifetime Learning Credit. The credits are based on education expenses paid for them, their spouse, or their dependents.

American Opportunity Credit

The American Opportunity Tax Credit modifies the existing Hope Credit for tax years 2009 and 2010 under ARRA. The credit was extended to apply for tax years 2011 and 2012 by the Tax Relief and Job Creation Act of 2010. The new credit makes the Hope Credit available to a broader range of taxpayers, including many with higher incomes and those who owe no tax. It also adds required course materials to the list of qualifying expenses and allows the credit to be claimed for four post-secondary education years instead of two. Many of those eligible will qualify for the maximum annual credit of \$2,500 per student.

The full credit is available to individuals whose modified adjusted gross income is \$80,000 or less, or \$160,000 or less for married couples filing a joint return. The credit is phased out for taxpayers with incomes above these levels. These income limits are higher than under the existing Hope and Lifetime Learning Credits.

For information about the American Opportunity Credit, see <http://www.irs.gov/newsroom/article/0,,id=205674,00.html>.

The Hope Tax Credit

The Hope Credit is a federal tax credit. The actual amount of the credit depends upon family income and the amount of qualified tuition paid less any financial aid.

To qualify, the taxpayer must file a return, owe taxes, and claim the student as a dependent (unless the student is a spouse). The student must be enrolled at least half-time in an eligible program leading to a degree, certificate or diploma and must not have completed the first two years of undergraduate study. The credit is not available to students who have been convicted of a felony drug offense.

The Lifetime Learning Tax Credit

The Lifetime Learning Tax Credit may be claimed for the taxpayer, spouse, or eligible dependents for an unlimited number of years. This credit is family-based rather than dependent-based like the Hope Credit. The actual amount of the credit depends upon the family's income and the amount of qualified tuition less any

financial aid. Unlike the Hope Credit, students are not required to be enrolled at least half-time in one of the first two years of post-secondary education.

This is provided for informational purposes only. For detailed tax information, please consult a tax advisor. Information is also available at <http://www.irs.gov/newsroom/article/0,,id=213044,00.html>.

Other Regulations

Intellectual Property

Intellectual property is a creative work that merits protection by a copyright, trademark, or patent. Sometimes, in the pursuit of academic studies, a student or faculty member will produce such a creative work. A-B Tech supports the development and production of intellectual property.

The College publishes an Intellectual Property policy and procedure, the purpose of which is to protect the College and the creators, including students, as they attempt to transfer inventions or creative works to the marketplace. This policy supports the sharing of property rights between the College and the originator as specified in the procedures.

Unless otherwise specified in a rights agreement, the College owns all rights to intellectual property created by an employee inside the normal scope of work or using College resources. If the property were created outside the normal scope of work or without College resources, then the property belongs to the creator. Typically, students retain rights to original works created within the course of their studies, unless otherwise specified in a rights agreement.

For a complete copy of the Intellectual Property policy and procedure, see the Vice President for Instructional Services.

Tobacco Free Campus

Asheville-Buncombe Technical Community College is committed to providing students and employees with a safe and healthy environment. It is the policy of A-B Tech that tobacco use is not permitted on any College property. A-B Tech is tobacco free.

Parking Regulations

All students are required to register their vehicles and display parking permits. Copies of parking regulations are available at the Student Success Center in the K. Ray Bailey Student Services Building lobby and the college website. Parking spaces designated for individuals with disabilities are located at each facility. Spaces marked by yellow lines are for faculty and staff use only. Students park in white-lined spaces. All parking fines must be paid prior to registering for classes, seeing grades or getting transcripts.

Veterans' Educational Benefits

The Veterans' Advisor will help incoming veterans process their request for benefits. The Veterans' Office is located in the K. Ray Bailey Student Services Center. Individuals applying for veteran's benefits must meet all entrance requirements and are required to meet the College's academic standards as they progress through their programs. Failure to meet these academic standards of progress will result in loss of veteran's educational benefits.

Drug and Alcohol Free Workplace Policy

The safety and health of our employees and students is our paramount concern. Drugs and alcohol abuse are harmful to the health and well being of the employees and students of Asheville-Buncombe Technical Community College (the "College"). People who use prohibited drugs and abuse alcohol tend to be less productive, less reliable and prone to greater absenteeism resulting in greater costs, delay and risks in the College's operations. The College will not tolerate any drug use or alcohol abuse, which imperils the health and well being of its employees and students or threatens its operations. The College is committed to maintaining a safe workplace and an educational environment free from the influence of drugs and alcohol.

Violations and Consequences

A violation of the policy occurs when an employee or student:

1. Possesses, manufactures, distributes, dispenses or uses prohibited drugs while on campus, while engaging in official College activities, or on official College business;
2. Is under the influence of prohibited drugs while on campus, while engaging in official College activities, or on official College business;
3. Distributes prohibited drugs on or off the College's premises;
4. Is charged and convicted of possessing, manufacturing, distributing, or being under the influence of prohibited drugs;
5. Fails to report a conviction for a violation of a criminal drug statute occurring in the workplace to his or her supervisor within five days of such conviction;
6. Engages in the unauthorized possession, manufacture, distribution, sale or use of alcohol, or is under the influence of alcohol, while on campus, while engaging in official College activities, or on official College business.

Commission of the above violations may result, at the College's sole discretion, in disciplinary action,

up to and including suspension or termination of any employee, and suspension or expulsion of a student. At its sole discretion, in lieu of or in addition to taking disciplinary action against an employee, the College may require the employee to satisfactorily participate in a drug or alcohol abuse assistance or rehabilitation program approved by a federal, state or local health, law enforcement or other appropriate agency.

Definitions

“Prohibited drugs” means any “Controlled substances” as defined at 21 U.S.C. §802 and listed in Schedules I through V of 21 U.S.C. §812, as revised from time to time, and other federal laws and regulations. Generally, these are drugs that have a high potential for abuse and include but are not limited to, heroin, marijuana, cocaine, PCP, amphetamines, and “crack”. Also included are any other drugs that are illegal under federal, state or local law, legal drugs that have been obtained illegally or are not intended for human consumption (such as glue).

The term “alcohol” means the intoxicating agent in beverage alcohol, ethyl alcohol, or other low molecular weight alcohols, including methyl and isopropyl alcohol.

The term “criminal drug statute” means a federal or non-federal criminal statute involving the manufacture, distribution, dispensing, use or possession of a controlled substance.

The term “conviction” means a finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the federal or state criminal drug and alcoholic beverage statutes.

“Disciplinary action” may include suspension, probation, expulsion, dismissal or termination.

Procedure

Each employee or student is required by law to inform the College within five days after a conviction for violation of any federal or state criminal drug statute where such violation occurred on the College campus or on official business or as a part of any official College activity.

The President of the College must notify the federal governmental agencies granting funds to the College within 10 days after receiving notice of the conviction. Any employee or student convicted of violating a criminal drug statute while on the College campus or on official business of the College or as part of any official College activity will be subject to disciplinary sanction up to and including termination of the employee or expulsion of a student. Alternatively, the College may require the employee or student to finish successfully a drug or alcohol counseling treatment or rehabilitation program sponsored by an approved private or governmental institution as a precondition to continued employment or enrollment.

Extracurricular student activities sponsored by the College or any student organization of the College will not provide alcohol to students. Students or employees suspected of using alcohol while on campus, while engaging in official College activities, or on official College business will be subject to identification verification and other appropriate verification necessary to the enforcement of this policy.

Condition of Employment

As a condition of employment, the College requires all employees to abide by this policy. Employees are also required to sign an acknowledgment of receipt of a copy of this policy.

Dissemination to Students and Employees

A copy of this drug and alcohol prevention policy will be distributed annually to each employee of the College and to each student taking one or more credit classes. Each student taking a class for academic credit shall be given a copy of this policy in September of each year.

Policy Review

The College reviews this drug and alcohol policy in August of even numbered years.

Sexual and Other Unlawful Harassment

Policy

It is the policy of the Board of Trustees of the College that a learning and working environment free from sexual and other unlawful harassment shall be maintained. Harassment, retaliation, coercion, interference, or intimidation of an employee or student due to his or her race, color, religion, sex, age, national origin, disability, veteran's status, creed, sexual orientation, political affiliation or any other legally protected status not listed herein, or that of any employee's or student's relatives, friends, or associates, is strictly forbidden and will not be tolerated of anyone associated with the College either at a campus facility or College-sponsored event. The scope of this policy also extends to any visitor, vendor, or contractor while on campus property.

Sexual Harassment

Sexual harassment includes physical contact and/or conduct that creates an unwelcome or hostile environment. It includes unwelcome sexual advances, requests for sexual favors, and other verbal or physical contact of a sexual nature when submission to the conduct is made a term or condition of an individual's employment or academic performance (either implicitly or explicitly), when submission to or rejection of the conduct is used as the basis for employment or educational decisions affecting the individual, or when the conduct is sufficiently severe, persistent, or pervasive to interfere with an individual's work or academic performance or to create an intimidating, hostile, or offensive working or learning environment. Occasional

compliments of a socially acceptable nature do not constitute sexual harassment.

Sexual harassment may include, but is not limited to:

- a. Physical assault, including rape, or any coerced sexual relations.
- b. Subtle pressure for sexual activity or for a relationship that takes on a sexual or romantic coloring, thereby exceeding the limits of healthy relation.
- c. Any demeaning sexual propositions.
- d. Unnecessary touching in any form.
- e. Sexually explicit or suggestive remarks about a person's physical attributes, clothing, or behavior.
- f. Sexually stereotyped or sexually charged insults, humor, verbal abuse, or graffiti.
- g. Any sexually inappropriate behavior that prevents an individual from participating in their employment, academic performance, or in any functions of the College.

Other Unlawful Harassment

Other unlawful harassment may consist of verbal or physical conduct that denigrate or shows hostility or aversion toward an individual because of his or her race, color, religion, age, national origin, disability, veteran's status, creed, sexual orientation, political affiliation, or any other legally protected status not listed herein, or that of his or her relatives, friends, or associates, and has the purpose or effect of creating an intimidating, hostile, or offensive work or learning environment; has the purpose or effect of interfering unreasonably with an individual's work or academic performance; or otherwise adversely affects an individual's employment or educational opportunities.

Other unlawful harassment may include, but is not limited to:

- a. Threatening or intimidating conduct directed at another because of the individual's race, color, religion, age, national origin, disability, veteran's status, creed, sexual orientation, political affiliation, or any legally protected status not listed herein.
- b. Jokes, name calling, or rumors based upon an individual's race, color, religion, age, national origin, disability, veteran's status, creed, sexual orientation, political affiliation, or any legally protected status not listed herein.
- c. Ethnic slurs, negative stereotypes and hostile acts based on an individual's race, color, religion, age, national origin, disability, veteran's status, creed, sexual orientation, political affiliation, or any legally protected status not listed herein.

Reports and Investigations

Employees and students, without any fear of reprisal, have the responsibility to bring any form of sexual or other unlawful harassment (whether by a co-worker, student, or other person who is participating in, observing or otherwise engaged in the activities of A-B Tech) to the attention of his or her immediate supervisor or instructor so that a prompt investigation into the circumstances of the incident and the alleged harassment may be conducted.

An employee who has a complaint of harassment at work is urged to bring the matter to the attention of his or her immediate supervisor. If the employee is not comfortable bringing the complaint to the immediate supervisor, then the complaint should be brought to the Director of Human Resources. If an employee is not comfortable bringing the complaint to the Director of Human Resources, then the complaint may be brought to the Vice President of Human Resources and Organizational Development (formerly Vice President of College Relations).

A student who has a complaint of harassment is urged to bring the matter to the attention of his or her instructor. If the student is not comfortable bringing the complaint to the instructor, then the complaint should be brought to the Vice President for Student Services. If a student is not comfortable bringing the complaint to the Vice President for Student Services, then the complaint may be brought to the Director of Human Resources.

Individuals with complaints of harassment are urged to place their complaints in writing. All charges of harassment shall be brought to the attention of the Director of Human Resources. The Director of Human Resources or Vice President of Human Resources and Organizational Development (formerly Vice President of College Relations) shall conduct an investigation of charges of harassment made by an employee. The Vice President for Student Services shall conduct an investigation when a charge of harassment is made by a student.

A confidential file regarding the charge of harassment by an employee shall be maintained in the office of the Director of Human Resources. A confidential file regarding the charge of harassment by a student shall be maintained in the office of the Vice President for Student Services.

A-B Tech will keep all information relating to harassment allegations and investigations as confidential as possible.

Corrective and/or Disciplinary Action

Following an investigation, a review of the results of the investigation with the person involved will be conducted and if appropriate, corrective and/or disciplinary action will be taken. Appropriate disciplinary ac-

tion shall depend upon the seriousness of the misconduct and may include a warning, written reprimand, demotion, suspension from employment or from the College, termination of employment, expulsion, removal from College property, or denial of access to College services or programs.

Protection Against Retaliation

A-B Tech will not in any way retaliate against an individual who makes a report of harassment in good faith or who assists in an investigation. Retaliation includes, but is not limited to, any form of intimidation, disciplinary action, reprisal or harassment. Retaliation is a serious violation of this harassment policy and should be reported immediately. A-B Tech will take appropriate action against any employee or student found to have retaliated against another in violation of this policy.

Prohibition of Relationships Between Employees and Students

Romantic or sexual relationships between College employees and students are prohibited if the employee and the student have an academic relationship. Academic relationships include any activities in which the employee is a direct or indirect supervisor or instructor for the student, as in a classroom or lab, or is a sponsor for any College activity involving the student, including work study or organizational/club/sport activities. This prohibition shall continue until the student or the employee is no longer affiliated with the College. Employees engaging in inappropriate relationships with students will be subject to disciplinary action, up to and including termination of employment.

A-B Tech Campus Police and Security Department

The department mission is to serve the College in a manner that is unsurpassed and serve as the standard for others to emulate. The primary function is to provide an environment that allows students, staff, faculty and visitors to interact in safe and secure surroundings. The role is to actively support the educational activities of the college through safety, security and parking services. These services will meet the highest level of approval and will constantly strive to anticipate the needs of the College community.

Telephone Numbers for Security Services

Main College: 254-1921

Non-Emergency: 279-3166

Emergency: 398-7125 or 9-911

Safety Tips

The following tips can help students avoid becoming a victim of a crime when they are at school, work, or just out and about.

By taking a few simple precautions, students can reduce their risk, and also discourage those who commit crime.

Be Prepared

- Students should always be alert and aware of the people around them.
- Students should educate themselves concerning prevention tactics.
- Students should be aware of locations and situations which would make them vulnerable to crime, such as alleys and dark parking lots.

Street and Parking Lot Precautions

- Students should be alert to their surroundings and the people around them, especially if they are alone or it is dark.
- Whenever possible, students should travel with someone else.
- Students should stay in well-lit areas as much as possible.
- Students should walk close to the curb, avoiding bushes and alleys where someone could hide.
- Students carrying purses should hold them securely between their arms and body.
- Students should walk confidently, and at a steady pace.

Car Safety

- Students should ALWAYS lock car doors after entering or leaving their cars.
- Students should park in well-lit areas.
- Students should have their car keys in hand before getting to the car.
- Students should check the back seat before entering the car.
- If a student thinks he or she is being followed, the student should drive to a security, police, sheriff or fire station.
- Students should not stop to aid motorists stopped on the side of the road. Students should go to a phone and request help.
- Students should never pick up hitchhikers.

Office and Classroom Safety

- Students should never leave a purse or billfold in plain view or in the pocket of a jacket hanging on a door or chair.
- Students should not leave cash or valuables in an office or classroom, even for a short time, such as a break.
- Students should be aware of escape routes for emergencies.
- Students should report suspicious people and activities to security personnel.

- When sitting in the cafeteria, lounge or on outside benches, students should always keep personal belongings with them.
- If working alone or before/after normal business hours, students keep doors locked.
- If attending night classes or working late, students should try to walk out with one another or call security for an escort.

If a Crime Occurs – Report It

Everyone should consider it his or her responsibility to report crime. Many criminals target favorite areas and have predictable methods of operation. At least one out of two crimes in the United States goes unreported, usually because people don't want to get involved. Not reporting a crime allows the criminal to continue to operate without interference.

In many cases, it is the information provided by victims and witnesses that leads to the arrest of a criminal. No fact is too trivial.

Crime statistics for A-B Tech are posted annually on the US Department of Education, Office of Postsecondary Education's web site at <http://ope.ed.gov/security/>.

Workplace Violence Prevention Policy and Procedures

A-B Tech is committed to providing everyone associated with the College a work and learning environment that is safe and free of violence. To this end, the College prohibits any form of violence.

For purposes of this policy, “violence” includes, but is not limited to, verbally or physically attacking, harassing, intimidating, stalking or coercing any employee, student, visitor, vendor or other person associated with the College, brandishing weapons, damaging property, and/or threatening or talking of engaging in such activities. Brandishing weapons shall not include the use or possession of weapons by authorized employees or students for the purpose of training, or by College security, law enforcement officers, or military personnel when acting in the discharge of their official duties (See “No Weapons on Campus” policy).

Any member of the College community who commits an act of violence toward other persons or property on campus, while engaged in any work for or on behalf of A-B Tech or at events sponsored by A-B Tech shall be subject to disciplinary action, up to and including dismissal from employment or expulsion from the College, exclusive of any civil and/or criminal penalties that may be pursued, as appropriate. For the purposes of this policy, a “member of the College community” includes, but is not limited to, employees, students, visitors, College officers and College officials.

Every employee and student is responsible for reporting any threats or acts of violence that he or she has witnessed, received, or has been told that another person has witnessed or received. Even without an actual threat, an employee or student should report any behavior he or she has witnessed that he or she regards as threatening or violent when that behavior is job related or might be carried out on College property or is connected to College employment or activities. Reports should be made immediately to the campus police department. The College intends to investigate all acts of violence promptly and objectively.

No Weapons On Campus Policy

The use or possession of any weapons is prohibited on A-B Tech property or at any College-sponsored activities or events. (See also Workplace Violence Prevention Policy.) It is a violation of A-B Tech policy and state law (N.C.G.S. 14.269.2) for any person, including students, employees and visitors to possess or carry, whether openly or concealed, any weapon. The term “weapon” includes, but is not limited to, the following:

Gun, rifle, pistol, dynamite, cartridge, bomb, grenade, mine, powerful explosive (as defined in N.C.G.S. 14-284.1), BB gun, stun gun, air rifle or pistol, bowie knife, dirk, dagger, slingshot, leaded cane, switchblade knife, razors, razor blades, black-jack, metallic knuckles, fireworks.

The term “weapon” also includes any other weapon of like kind, such as sharp pointed or edged instruments; but the term “weapon” excludes tools, utensils, and equipment used solely for maintenance or instructional purposes (such as unaltered nail files and clips, dental tools, and tools used solely for preparation of food) or used for authorized ceremonial purposes on the A-B Tech campus, grounds, recreation areas, athletic field, or other properly owned, used, or operated by A-B Tech.

This policy shall not apply to employees or students when used for authorized training purposes, or to law enforcement officers or military personnel when acting in the discharge of their official duties.

Any person violating this policy shall be disciplined at the discretion of the A-B Tech administration. A person found guilty of activity prohibited by this Weapons Policy may also be guilty under state law of a felony and, upon conviction, may be punished at the discretion of the court.

Other College Services and Information

College Services

A-B Tech Café. The Café is located in the Coman Student Activity Center. Breakfast and lunch meals, including sandwiches, salads, and soups, are prepared daily. Regular hours of operation are posted in the Café and are normally from 7 a.m. to 6 p.m. Monday - Thursday and 7 a.m. to 2 p.m. on Fridays. Hours may vary. Vending machines dispensing soft drinks, coffee, and snacks can be found at various locations around campus.

The Culinary Arts and Hospitality students offer dining experiences on most Thursdays during fall and spring semesters. These lunches and dinners are held in the dining rooms of the Magnolia and Fernhurst Buildings on the A-B Tech Asheville Campus. To be on the mailing list, call 398-7244.

Bookstore. A bookstore is operated by the College for the convenience of students and staff members to provide required textbooks and materials. Students should plan to purchase all texts and materials at the beginning of each semester.

Textbook costs vary considerably depending upon the curriculum and semester. Book costs also vary from year to year because of changes in curriculum book prices, texts, and material requirements. Texts and materials will be made available in alternative accessible formats for individuals with disabilities upon request to the Disabilities Services Academic Advisor.

Campus Police and Security. Police and Security personnel are on duty 24 hours a day, seven days a week. Each officer is certified to respond to medical emergencies.

Child Care. A-B Tech has limited dollars to assist students with child care services rendered off campus. These funds are provided annually by the state of North Carolina, and funding is therefore subject to annual state budgeting. To be eligible, the student must be approved for federal financial aid, having submitted a FAFSA. The student must have unmet need of greater than \$1,000, be taking 12 or more credits, be on campus a minimum of four days per week, and be in good academic standing.

Also on campus is a child care facility operated by A-B Tech for the general public as well as students and staff. Admission to the facility is on a first-come, first-served basis. For further information, call 255-5111.

College Closing or Delayed Opening. The College will either be closed or opened on a delayed schedule when inclement weather conditions warrant such a decision. (See Student Handbook for Inclement Weather Procedures at abtech.edu/student-handbook.) Closing or delaying announcements are placed on the switchboard automated attendant, on the A-B Tech website

at abtech.edu, and will be made on Asheville radio and television stations and some surrounding community radio stations. Separate decisions and announcements are made for the day and evening programs.

Dental Clinic. Throughout the year, the Allied Dental Department provides oral health services, such as patient education, dental X-rays, cleaning of teeth, nutritional counseling, and sealants. During spring and summer semesters, limited dental services such as fillings, crowns and partial dentures are also available. A nominal fee is charged for these services. Call the Allied Dental Clinic, 398-7255, for an appointment and approximate charges for services.

Honorary Societies. The College is proud to sponsor the Alpha Upsilon Eta Chapter of Phi Theta Kappa Academic Honor Society. Membership is open to any student who has a 3.5 GPA after 12 credits of completed work. Eligible students are welcome to seek more information from the Phi Theta Kappa faculty advisor.

Intramurals. A-B Tech offers a wide variety of intramural activities that are open to student or employee participation. Check the calendar portion of the Student Handbook for a listing of intramural activities. Students can sign up for these activities in the gymnasium of the Coman Student Activity Center. For more information, visit abtech.edu/intramural_sports.

Holly Library. Holly Library has books, journals, DVDs and audio books to check out, and databases and e-books to help with research. Computers are located on both levels and laptops can be checked out for in-building use. The Library is wireless and offers comfortable seating, quiet study areas and group study rooms. For more information, call the library circulation desk at 398-7301.

Library Hours

| | |
|-----------------|-----------------------|
| Monday-Thursday | 7:30 a.m. – 8:00 p.m. |
| Friday | 7:30 a.m. – 5:00 p.m. |
| Saturday | 9:00 a.m. – 1:00 p.m. |

Mountain Tech Spa, an on-campus spa facility, located in the Birch Building, provides practical experience for Cosmetology, Esthetics Technology, Manicuring/Nail Technology and Therapeutic Massage students under the direction of College faculty.

Parking Locations and Shuttle Service. Parking is provided at various locations around campus. Refer to the campus map located in this catalog for specific sites. Students with disabilities are provided parking at all locations. Parking areas are lighted during evening hours. Spaces marked with yellow lines are reserved for faculty, staff, disabled persons, and visitors. White-lined spaces are reserved for students. A shuttle ser-

vice is provided for students who park in remote lots, during the first few weeks of fall and spring semesters. After evaluating ridership and traffic flow, the shuttle service may be changed. Shuttle routes and schedules can be found by calling 254-1921, Ext. 0.

Placement Service. No reputable college can guarantee jobs for graduates. However, the College will assist students and alumni in every possible way to obtain suitable employment. Applied Science department chairs are particularly helpful with placing their program graduates. Career Development Services maintains an online Job Board where employers may post openings and where students/alumni may post their résumés.

Service-Learning Center. Provides staffing to coordinate class-based projects with community service activities for curriculum classes that require or encourage service-learning as part of the educational experience. The Service-Learning Center is located in Holly Library, Room 129; Phone: 398-7573.

Small Business Center. The Small Business Center supports the development of new business and the growth of existing businesses by being a community-based provider of training, counseling, and resource information. Confidential counseling services and access to resource libraries are free of charge as are the majority of seminar offerings.

Student Incubation. Students with an entrepreneurial spirit may apply for the student incubation program managed by the Small Business Center. The program is designed to provide a nurturing environment for students to develop and grow their own businesses. They receive guidance toward becoming sustainable and contributing members of a strong economic community. The 12-month extracurricular program is located at A-B Tech's Enka site and is open to all students. More information can be found at abtech.edu/sbc.

Student Lounge. A student lounge is located in the Coman Student Activity Center for those students with spare time who wish to socialize. Wireless internet access is available as well as a community resource area.

Student Housing. Students are responsible for their own living accommodations. A-B Tech neither approves nor maintains housing facilities. Students who are looking for housing or roommates may check bulletin boards in the K. Ray Bailey Student Services Center or the Coman Student Activity Center.

Study Abroad Program. A-B Tech occasionally sponsors study abroad opportunities for students. Students who want to participate must be enrolled in the College, must register for the study abroad course, and must purchase health and accident insurance that is valid outside of the United States. Students who successfully complete the study abroad activity and the course requirements will receive course credit.

General Education for AAS Degrees

Purpose

The General Education component of all AAS degrees provides students with a knowledge base of historical, societal, and environmental contexts for succeeding in the changing global community. The General Education component represents a full spectrum of communication, humanities and fine arts, social and behavioral sciences, and natural sciences and mathematics courses.

General education courses facilitate student acquisition and sharing of knowledge, encourage social interaction, and promote an educated citizenry. General education courses also develop broad, cross-curriculum knowledge and skill sets that prepare the student to successfully master the challenges of post-graduation endeavors.

General Education Outcomes Assessment

Upon successful completion of an AAS degree, the student will demonstrate competency in four General Education Outcomes. Each outcome is assessed in several General Education courses. General Education Outcomes and the courses where these outcomes are assessed follow. Note that additional General Education courses beyond those listed here may be required by individual programs. See individual program requirements for further details. See the General Education for Transfer Degrees and Diplomas section for General Education requirements for the AA, AFA, and AS degrees.

Communication

Students will deliver purposeful messages designed to increase knowledge, foster understanding, or promote change in an audience's attitudes or behaviors.

- ENG 110 Freshman Composition
- ENG 111 Expository Writing
- ENG 112 Argument-Based Research
- ENG 113 Literature-Based Research
- ENG 114 Professional Research and Reporting
- COM 120 Intro to Interpersonal Communication
- COM 140 Intro to Intercultural Communication
- COM 231 Public Speaking

General Education for AAS Degrees

Social/Behavioral Sciences

Students will demonstrate an understanding of social institutions and of the diversity of human experiences within a framework of historical and cultural contexts.

Allied Health and Public Service

The Allied Health and Public Service Division offers a variety of programs designed to meet the increasing demand for specialized professionals in the burgeoning health care, child care, and public service industries. The programs in this division present a broad range of career options for individuals desiring a career in an allied health or public service profession. The division offers a variety of programs at the Associate in Applied Science degree, diploma and certificate levels. Some areas of study are offered on a day and evening basis.

In addition to classroom and laboratory instruction, each program emphasizes learning experiences at health and public service settings in the community. This extensive training at clinical, pre-hospital, laboratory, or child care affords students a unique opportunity to develop the specialized skills required for employment in a health or public service profession.

An individual desiring training in a health or public service program should have a background in chemistry, biology, science, mathematics, and Social/Behavioral Sciences. The applicant to an area of study in this division should become familiar with the selection criteria and application deadlines for the specific program. People interested in a health or public service career are advised that professional licensure, certification, employment, or admission to clinical/work experience sites may be denied to anyone who has been convicted of a felony or other crime involving moral turpitude.

Graduation Requirements

Because of rapid changes in workplace technologies, certain technical courses will "time out" after five years and must be repeated for graduation. Exceptions must be approved by the department chairperson.

All courses with the following prefixes DEN, EMS, MLT, NUR, RAD, SAB, SON, SUR, VET, MED, PBT, and PHM are designated as five year "time out" courses and must have been completed within five years of graduation.

Dental Assisting

This curriculum prepares individuals to assist the dentist in the delivery of dental treatment and to function as integral members of the dental team while performing chair-side and related office and laboratory procedures.

Course work includes instruction in general studies, biomedical sciences, dental sciences, clinical sciences, and clinical practice. A combination of lecture, laboratory, and clinical experiences provide students with knowledge in infection/hazard control, radiography, dental materials, preventive dentistry, and clinical procedures.

Graduates of this program may be eligible to take the Dental Assisting National Board Examination to become Certified Dental Assistants. As Dental Assistant IIs, defined by the dental laws of North Carolina, graduates work in dental clinics/offices, and insurance companies.

This program is accredited by the American Dental Association Commission on Dental Accreditation (CODA), 211 East Chicago Avenue, Chicago, IL 60611, 1-800-621-8099, Ext. 2705, www.ada.org.

Specific Requirements

1. General college admission requirements.
2. This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the College Admissions Office web page for full details.

www.abtech.edu/Student_Services/admissions/allied_health.asp
3. Acceptable report of medical examination by first day of class.
4. Completion of required immunizations by first day of class, including first two doses of Hepatitis B vaccine.
5. Students applying to the Dental Assisting program are encouraged to have successfully completed BIO 161 or BIO 163 or BIO 168 and BIO 169, CIS 110 or CIS 111, COM 120 or ENG 111 and COM 231, and PSY 150 prior to program admission due to the rigorous nature of the Dental Assisting curriculum.

Dental Hygiene

This curriculum prepares individuals with the knowledge and skills to assess, plan, implement, and evaluate dental hygiene care for the individual and the community.

Students will learn to prepare the operatory, take patient histories, note abnormalities, plan care, teach oral hygiene, clean teeth, take x-rays, apply preventive agents, complete necessary chart entries, and perform other procedures related to dental hygiene care.

Graduates of this program may be eligible to take national and state/regional examinations for licensure, which are required to practice dental hygiene. Employment opportunities include dental offices, clinics, schools, public health agencies, industry, and professional education.

This program is accredited by the **American Dental Association Commission on Dental Accreditation (CODA)**, 211 East Chicago Avenue, Chicago, IL 60611, 1-800-621-8099, Ext. 2705, www.ada.org.

Specific Requirements

1. General college admission requirements.
2. This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the College Admissions Office web page for full details.

www.abtech.edu/Student_Services/admissions/allied_health.asp
3. High school chemistry or equivalent from A-B Tech or other regionally-accredited college.
4. Acceptable report of medical examination by the first day of class.
5. Completion of required immunizations by first day of class, including first two doses of Hepatitis B vaccine.
6. Students applying to the Dental Hygiene program are encouraged to have successfully completed: BIO 168, BIO 169, BIO 175, CIS 110 or CIS 111, COM 231, ENG 111, HUM 115, and SOC 240 prior to program admission due to the rigorous nature of the Dental Hygiene curriculum.
7. The North Carolina Board of Dental Examiners may deny a license to individuals convicted of a felony or any other crime involving moral turpitude.

Early Childhood Associate

This curriculum prepares individuals to work with children from infancy through early childhood in diverse learning environments. Students will combine learned theories with practice in actual settings with young children under the supervision of qualified teachers.

Course work includes childhood growth and development, physical/nutritional needs of children, care and guidance of children, and communication skills with parents and children. Students will foster the cognitive/language, physical/motor, social/emotional and creative development of young children.

Graduates are prepared to plan and implement developmentally appropriate programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Head Start programs, and school-age programs.

This program is accredited by the **National Association for the Education of Young Children (NAEYC)**, 1313 L St. NW, Suite 500, Washington, DC 20005, Phone: (202)-232-8777, **www.naeyc.org**.

Specific Requirements

- 1. General college admission requirements.
- 2. Acceptable reports of medical examination by the first day of class.
- 3. Three character/employment references by the first day of class.
- 4. According to GS 110-91, "No person shall be an operator of nor be employed in a child care facility who has been convicted of a crime involving child neglect, child abuse, or moral turpitude, or who is an habitually excessive user of alcohol or who illegally uses narcotic or other impairing drugs, or who is mentally or emotionally impaired to an extent that may be injurious to children."
- 5. Criminal background checks are required prior to assignment to cooperative work experience sites.

Special Education Certificate (C55220L2)

The Early Childhood Special Education Certificate focuses on working with children from infancy through middle childhood in diverse learning environments.

Course work includes childhood growth and development, guidance of children, causes, expressions, prevention and management of challenging behaviors as well as definition, characteristics, assessment, educational strategies, inclusion, family involvement, and services for children with developmental delays.

Students who complete these courses are eligible to earn a certificate in Special Education. The Special Education certificate will better prepare the student to provide early childhood educational services to special needs populations.

Major Requirements

Infant/Toddler Care Certificate Program (C55290)

The curriculum prepares individuals to work with children from infancy to three years of age in diverse learning environments. Students will combine learned theories, competency-based knowledge, and practice in actual settings with young children under the supervision of qualified teachers.

Course work includes infant/toddler growth and development; physical/nutritional needs of infants and toddlers; safety issues in the care of infants and toddlers; care and guidance; communication skills with parents and children; design and implementation of appropriate curriculum; and other related topics.

Graduates should be prepared to plan and implement developmentally appropriate infant/toddler programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Early Head Start Programs, and other infant/toddler programs.

Specific Requirements:

1. General college admission requirements.
2. Three character/employee references by the first day of class.
3. Criminal background checks are required prior to credentialing. According to GS 110-91, "No person shall be an operator of nor be employed in a child care facility who has been convicted of a crime involving child neglect, child abuse, or moral turpitude, or who is an habitually excessive user of alcohol or who illegally uses narcotic or other impairing drugs, or who is mentally or emotionally impaired to an extent that may be injurious to children."

| EDU 144 | Child Development I | 3 |
| EDU 153 | Health, Safety & Nutrition | 3 |
| EDU 234 | Infant, Toddlers, and Twos | 3 |

Total Credit Hours Required **16**

Early Childhood/School-Age Education

This curriculum prepares individuals to work with children in elementary through middle grades in diverse learning environments. Students will combine learned theories with practice in actual settings with school-age children under the supervision of qualified teachers.

Course work includes child growth/development; computer technology in education; physical/nutritional needs of school-age children; care and guidance of school-age children; and communication skills with families and children. Students will foster the cognitive/language, physical/motor, social/emotional, and creative development of school-age populations.

Graduates are prepared to plan and implement developmentally appropriate programs in school-aged environments. Employment opportunities include school-age teachers in child care programs, before/after-school programs, paraprofessional positions in public/private schools, recreational centers, and other programs that work with school-age populations.

This program is accredited by the **National Association for the Education of Young Children (NAEYC)**, 1313 L St. NW, Suite 500, Washington, DC 20005, Phone: (202)-232-8777, www.naeyc.org.

Specific Requirements

1. General college admission requirements.
2. Acceptable reports of medical examination by the first day of class.
3. Three character/employment references by the first day of class.
4. Criminal background checks are required prior to assignment to cooperative work experience sites.

Human Services Technology

The Human Services Technology curriculum prepares students for entry-level positions in institutions and agencies that provide social, community, and educational services. Along with core courses, students take courses that prepare them for specialization in specific human service areas.

Students will take courses from a variety of disciplines. Emphasis in core courses is placed on development of relevant knowledge, skills, and attitudes in human services. Fieldwork experience will provide opportunities for application of knowledge and skills learned in the classroom.

Graduates should qualify for positions in mental health, child care, family services, social services, rehabilitation, correction, and educational agencies. Graduates choosing to continue their education may select from a variety of transfer programs at senior public and private institutions.

Specific Requirements

1. General college admission requirements.
2. Three character references by the end of the first semester of enrollment in this program.
3. Acceptable results on medical examinations, criminal background checks, drug and alcohol screens, and immunization records as these are required by a specific cooperative site.
4. Compliance with relevant standards outlined in the College's "Guidelines for Students at Risk" brochure.
5. Students pursuing the A.A.S. degree in Human Services Technology should be aware that employers in the human services field can require prospective volunteers, interns, and employees to pass criminal background, drug screen, and citizenship verification checks before they are allowed to work at an organization.

*This course is a required option for only those students who choose to complete the requirements of the Human Services & Substance Abuse Studies Certificate at the same time they complete the requirements of the A.A.S. in Human Services Technology degree.

**BIO 163 is recommended for students who desire to eventually pursue a bachelor's degree.

***To satisfy the foreign language elective requirement, students may select from one of the following courses and must take any accompanying lab as required: FRE 111, SPA 110, or SPA 111; SPA 110 is not recommended for students who desire to eventually pursue a bachelor's degree.

Human Services & Substance Abuse Studies Certificate (C45380L1)

This certificate offers students an opportunity to learn about substance abuse and professional human services practice. The certificate has been designed to enhance the professional knowledge base of individuals who have obtained or who desire to obtain entry-level employment in human services settings, particularly those serving individuals affected by substance abuse issues.

The certificate's course work can be of particular value to:

1. Workers already employed in the human services field who desire to increase their knowledge of substance abuse and professional human services practice.
2. Individuals seeking to obtain or renew credentials as a substance abuse professional through the North Carolina Substance Abuse Professional Practice Board (NCSAPPB); consult the NCSAPPB website for credentialing requirements.
3. Students who are currently completing or who have previously completed the requirements of the College's associate's degree in Human Services Technology who desire to expand their knowledge of substance abuse as a component of wider human services practice.

Student interested in completing the certificate have the following options:

1. Since the certificate's course work can be counted toward the course requirements for the College's associate's degree in Human Services Technology, students can graduate with both the certificate and the associate's degree at the same time.
2. Students can earn the certificate and then complete the requirements of the associate's degree at a later time.
3. The certificate can be pursued separately from other credentials offered by the College, including its associate's degree in Human Services Technology.

Specific Requirements

1. General college admission requirements.
2. 50% of the credits toward this certificate must be earned at the College.
3. Students must pass all courses required to earn the certificate with a grade of "C" or higher.
4. Students must satisfy any course prerequisite requirements and pass such courses with a grade of "C" or higher.

5. Students pursuing the certificate should be aware that employers in the human services field (substance abuse and otherwise) can require prospective volunteers, interns, and employees to pass criminal background, drug screen, and citizenship verification checks before they are allowed to work at an organization.

Major Requirements

| | | Credits |
|---------|----------------------------|---------|
| SAB 110 | Substance Abuse Overview | 3 |
| SAB 140 | Pharmacology | 3 |
| SAB 210 | Substance Abuse Counseling | 3 |

Medical Assisting

The Medical Assisting curriculum prepares multi-skilled health care professionals qualified to perform administrative, clinical, and laboratory procedures.

Course work includes instruction in scheduling appointments, coding and processing insurance accounts, billing, collections, medical transcription, computer operations; assisting with examinations/treatments, performing routine laboratory procedures, electrocardiography, supervised medication administration; and ethical/legal issues associated with patient care.

Employment opportunities include physicians' offices, health maintenance organizations, health departments, and hospitals.

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). Program criteria are governed by the Medical Assisting Education Review Board (MAERB). A student must be a graduate of a CAAHEP-accredited Medical Assisting program to be eligible to sit for the American Association of Medical Assistants' certification examination to become Certified Medical Assistants.

Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, FL 33756, www.caahep.org, Phone: 727-210-2350, Fax: 727-210-2354 and **American Association of Medical Assistants (AAMA)**, 20 N. Wacker Dr., Ste. 1575 Chicago, IL 60606, www.aama-ntl.org, Phone: 312-899-1500, Fax: 312-899-1259.

Specific Requirements

- General college admission requirements.
 - Complete application for admission.
 - Successfully complete College Placement Test.
 - High school transcript or GED scores on file with Admissions Office.
 - Official transcript of any prior college credit on file with Admissions Office.
- High school units:
 - Algebra and Biology strongly recommended.
- This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the College Admissions Office web page for full details: <http://www1.abtech.edu/content/allied-health-and-public-service-education/Allied-Health-and-Public-Service-Education>.
- Acceptable reports of medical examinations by the first day of second semester.
- Satisfactory completion of required immunizations by the first day of second semester.
- Criminal background checks and drug screenings

will be required prior to admissions to any Mission Hospitals, Inc. clinical sites.

- Current CPR certification for the Professional Rescuer or Healthcare Provider by the first day of fifth semester.

Medical Laboratory Technology

This curriculum prepares individuals to perform clinical laboratory procedures in chemistry, hematology, microbiology, and immunohematology that may be used in the maintenance of health and diagnosis/treatment of disease.

Course work emphasizes mathematical and scientific concepts related to specimen collection, laboratory testing and procedures, quality assurance and reporting/recording and interpreting findings involving tissues, blood, and body fluids.

Graduates may be eligible to take the Board of Certification for Medical Laboratory Technicians by the American Society of Clinical Pathologists. Employment opportunities include laboratories in hospitals, medical offices, industry and research facilities.

This program is accredited by the

National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 5600 N River Rd. Suite 720, Rosemont, IL 60018, Phone: (773) 714-8880, www.naacls.org.

Specific Requirements

- General college admission requirements.
- High school units:
 - High school-level chemistry or college-level Chemistry 092 required.
 - Biology strongly recommended.
- Acceptable reports of medical examinations by first day of MLT 252 Practicum I.
- Satisfactory completion of required immunizations by first day of MLT 252 Practicum I.
- Criminal background checks and drug screens are required prior to admission to clinical sites.
- Current CPR certification for the Professional Rescuer or Healthcare Provider by the first day of MLT 252 Practicum I.

Medical Sonography

The Medical Sonography curriculum provides knowledge and clinical skills in the application of high frequency sound waves to image internal body structures.

Course work includes physics, cross-sectional anatomy, abdominal, introductory vascular, and obstetrical/gynecological sonography. Competencies are attained in identification of normal anatomy and pathological processes, use of equipment, fetal growth and development, integration of related imaging, and patient interaction skills.

Graduates of accredited programs may be eligible to take examinations in ultra-sound physics and instrumentation and specialty examinations administered by the American Registry of Diagnostic Medical Sonographers (ARDMS) and find employment in clinics, physicians' offices, mobile services, hospitals, and educational institutions.

Graduates will be eligible to take all ARDMS examinations in general and vascular concentrations.

The Diagnostic Medical Sonography Program is accredited in general and vascular concentrations. The following are the accrediting agencies:

Commission on Accreditation of Allied Health Education Programs (CAAHEP)

1361 Park Street, Clearwater, FL 33756, www.caahep.org,
Phone: 727-210-2350, Fax: 727-210-2354

JRC-DMS

6201 University Boulevard, Suite 500,
Ellicott City, MD 21043, Phone: 443-973-3251

Specific Requirements

1. General college admission requirements.
2. This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the College Admissions Office web page for full details.

www.abtech.edu/Student_Services/admissions/allied_health.asp
3. Keyboarding skills are highly recommended.
4. Final admission to the Medical Sonography program shall be contingent upon documentation of physical and emotional health that would provide evidence indicative of the applicant's ability to provide safe care to the public. Completed medical and immunization records must be submitted before classes begin.
5. Either first dose of Hepatitis B vaccine or completion of series.
6. Documentation of current CPR certification for the Professional Rescuer or Healthcare Provider, which must be kept current throughout the program.
7. Completion of an observation in an approved Sonography area after final acceptance into the

program. Details are available from the Medical Sonography faculty.

8. Criminal background checks, drug screening, and seasonal flu vaccinations at cost to the student will be required prior to admission to clinical sites.
9. Sonography students will be required to complete clinical rotations that may require them to travel as much as two hours from campus.
10. Students applying to the Medical Sonography program are encouraged to have successfully completed: BIO 163 (or BIO 168 and BIO 169), CIS 110, ENG 111, COM 231, PHY 125, MAT 115 and Social/Behavioral Sciences and Humanities/Fine Arts Electives prior to program admission due to the rigorous nature of the Medical Sonography curriculum.

Nursing

Associate Degree Nursing Option

This curriculum provides individuals with the knowledge and skills necessary to provide nursing care to clients and groups of clients throughout their lifespan in a variety of settings.

Upon completion of the Associate Degree Nursing Program and licensure, the graduate will:

1. Practice professional nursing behaviors incorporating personal responsibility and accountability for continued competence.
2. Communicate effectively with individuals, significant support person(s), and members of the interdisciplinary healthcare team.
3. Integrate knowledge of the holistic needs of the individual to provide an individual-centered assessment.
4. Incorporate informatics to formulate evidence-based clinical judgments and management decisions.
5. Implement caring interventions incorporating documented best practices for individuals in diverse settings.
6. Develop a teaching plan for individuals, and/or the nursing team, incorporating teaching and learning principles.
7. Collaborate with the interdisciplinary healthcare team, as an advocate for the individual, to achieve positive individual and organization outcomes.
8. Manage health care for the individual using cost effective nursing strategies, quality improvement processes, and current technologies.

Graduates of this program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN) which is required for practice as a Registered Nurse. Employment opportunities include hospitals, long-term care facilities, clinics, physicians' offices, industry, and community agencies.

This program is approved by the
North Carolina Board of Nursing
 P.O. Box 2129, Raleigh, NC 27602
 (919) 782-3211, www.ncbon.com.

Specific Requirements

1. General college admission requirements.
2. High School units:
 - a. Chemistry and Biology strongly suggested
 - b. Algebra highly recommended

3. This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the college admissions office web page for full details.

www.abtech.edu/Student_Services/admissions/allied_health.asp

4. Final admission to the Associate Degree Nursing program shall be contingent upon documentation of physical and emotional health that would provide evidence indicative of the applicant's ability to provide safe nursing care to the public.
5. To be eligible for admission in Fall, all nursing program applicants must by November:
 - a. Provide documentation of successful completion of a NC-approved Certified Nurse Aide I Program which includes theory, lab, and clinical components. (A copy of a college transcript or a notarized course completion certificate will be acceptable documentation).

and

- b. Hold a documented, current, unrestricted credential as a Nurse Aide I (NAI) from the North Carolina Nurse Aide Registry and the Division of Health Service Regulation. (A copy of current listing on the NC DHSR Nurse Aide Registry website will be acceptable documentation).
6. Satisfactory completion of required immunizations.
 7. Current CPR for the Professional Rescuer certification is a prerequisite to admission and must be maintained throughout the program.
 8. Students applying to the Associate Degree Nursing program are encouraged to have successfully completed: BIO 168, BIO 169, BIO 175 or BIO 275, CIS 110, ENG 111, ENG 114, PSY 150, PSY 241, and a Humanities/Fine Arts Elective prior to program admission due to the rigorous nature of the ADN curriculum.
 9. Applicants for initial licensure in North Carolina must have a criminal background check. Affiliated clinical sites for nursing will require a criminal background check and drug testing prior to participation in the clinical component. If any clinical facility refuses to allow the student to participate in clinical experiences in that clinical agency, the student may not be able to progress in the program.
 10. Admission with advanced standing is subject to space available in the clinical component of the nursing program. Students who begin their nursing education at A-B Tech have preference in admission over students requesting transfer into the program. Space will be allotted to transfer students only when no students who have previously enrolled in the A-B Tech ADN Program are requesting and have qualified for re-entry.

Program Totals**72****Associate Degree Nursing Regionally Increasing Baccalaureate Nursing (RIBN) Option**

The RIBN option is an A.A.S. Dual Enrollment Program offered in collaboration with Western Carolina University. Students are accepted into and take courses at both A-B Tech and WCU during enrollment in the RIBN option.

Students are required to:

1. Provide documentation of successful completion of a NC-approved Certified Nurse Aide I Program which includes theory, lab, and clinical components no later than the first day of fall semester year two. (A copy of a college transcript or a notarized course completion certificate will be acceptable documentation).
2. Hold a documented, current, unrestricted credential as a Nurse Aide I (NAI) from the North Carolina Nurse Aide Registry and the Division of Health Service Regulation.
3. Maintain dual admission and continued enrollment at both A-B Tech and WCU by completing at least one WCU course each semester (Fall / Spring) during years 1 through 3.
4. Maintain a GPA of 2.5 or greater to progress in the RIBN option.
5. Maintain full-time enrollment each semester if a recipient of the NC Forgivable Education Loan Program.
6. Home school will be A-B Tech years 1, 2, and 3.
7. Year 1: enroll in general education courses at A-B Tech and WCU as advised by the RIBN Nursing Student Advisor
8. Year 2 and 3: enroll in Associate Degree Nursing courses at A-B Tech and continue enrollment in WCU courses as advised by RIBN Nursing Student Advisor.
9. Year 4: home school will be WCU
10. Successfully pass NCLEX - RN to progress to year 4.
11. See the RIBN nursing advisor for the recommended course sequence.

This program is approved by the
North Carolina Board of Nursing,
 P.O. Box 2129, Raleigh, NC 27602,
 (919)-782-3211, www.ncbon.com.

Practical Nursing Option

This curriculum prepares individuals with the knowledge and skills to provide nursing care to children and adults. Students will participate in assessment, planning, implementing, and evaluating nursing care.

Upon completion of the Practical Nursing Program and licensure, the graduate will:

1. Practice professional nursing behaviors incorporating personal responsibility and accountability for continued competence.
2. Communicate data professionally and effectively to the registered nurse.
3. Provide individualized nursing care utilizing knowledge of holistic needs.
4. Utilize informatics to know where to find data, including best practices.
5. Implement caring interventions which incorporate documented best practices for individuals in diverse settings as is developed by the registered nurse.
6. Reinforce the individualized teaching plan developed by the registered nurse.
7. Provide nursing care for the individual using cost effective nursing strategies and current technology.

Graduates of this program are eligible to apply to take the National Council Licensure Examination (NCLEX-PN) which is required for practice as a Practical Nurse. Employment opportunities include hospitals, rehabilitation facilities, long-term care facilities, clinics, physician's offices, and home health agencies.

This program is approved by the North Carolina Board of Nursing, P.O. Box 2129, Raleigh, NC 27602, (919)-782-3211, www.ncbon.com.

Specific Requirements

1. General college admission requirements.
2. This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the college admissions office web page for full details.

www.abtech.edu/Student_Services/admissions/allied_health.asp
3. Final admission to the Practical Nursing program shall be contingent upon documentation of physical and emotional health that would provide evidence that is indicative of the applicant's ability to provide safe nursing care to the public.
4. To be eligible for admission in Fall, all nursing program applicants must, by November:
 - a. Provide documentation of successful completion of a NC approved Certified Nurse Aide I

Program which includes theory, lab, and clinical components. (A copy of a college transcript or a notarized course completion certificate will be acceptable documentation).

and

- b. Hold a documented, current, unrestricted credential as a Nurse Aide I (NAI) from the North Carolina Nurse Aide Registry and the Division of Health Service Regulation. (A copy of current listing on the NC DHSR Nurse Aide Registry Website will be acceptable documentation).
5. Satisfactory completion of required immunizations.
 6. Current CPR for the Professional Rescuer certification is a prerequisite to admission and must be maintained throughout the program.
 7. Students applying to the Practical Nursing Program are encouraged to have successfully completed: BIO 168, BIO 169, ENG 111, and PSY 150 prior to program admission due to the rigorous nature of the Practical Nursing curriculum. Students with limited technology skills are encouraged to complete CIS 110 as an aid to understanding computer documentation and use of informatics in clinical agencies.
 8. Applicants for initial licensure in North Carolina must have a criminal background check. Affiliated clinical sites will require a criminal background check and drug testing prior to participation in the clinical component. If any clinical facility refuses to allow the student to participate in clinical experiences in that clinical agency, the student may not be able to progress in the program.

Pharmacy Technology

The Pharmacy Technology Program prepares individuals to assist the pharmacist in duties that a technician can legally perform and to function within the boundaries prescribed by the pharmacist and the employment agency.

Students will prepare prescription medications, mix intravenous solutions and other specialized medications, update patient profiles, maintain inventories, package medications in unit-dose or med-card form, and gather data used by pharmacists to monitor drug therapy.

Employment opportunities include retail, hospitals, nursing homes, research laboratories, wholesale drug companies, and pharmaceutical manufacturing facilities. Graduates from the program may be eligible to take the national certification examination to become a Certified Pharmacy Technician.

Phlebotomy

This curriculum prepares individuals to obtain blood and other specimens for the purpose of laboratory analysis. Course work includes proper specimen collection and handling, communication skills and maintaining patient data.

Graduates may be eligible to take the Board of Certification for Phlebotomy by the American Society of Clinical Pathologists. Employment opportunities include hospitals, clinics, physicians' offices, and other health care settings.

This program is approved by the **National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)**, 5600 N. River Rd. Suite 720 Rosemont, IL 60018, (773) 714-8880 www.naaccls.org.

Specific Requirements

1. General college admission requirements.
2. Acceptable reports of medical examinations by first day of class.
3. Satisfactory completion of required immunizations.
4. Criminal background checks and drug screens are required prior to admission to clinical sites.
5. Current CPR certification for the Professional Rescuer or Healthcare Provider by the first day of class.

Radiography

The Radiography curriculum prepares the graduate to be a radiographer, a skilled health care professional who uses radiation to produce images of the human body.

Course work includes clinical rotations to area health care facilities, radiographic exposure, image processing, radiographic procedures, physics, pathology, patient care and management, radiation protection, quality assurance, anatomy and physiology, and radiobiology.

Graduates of accredited programs are eligible to apply to take the American Registry of Radiologic Technologists national examination for certification and registration as medical radiographers. Graduates may be employed in hospitals, clinics, physicians' offices, medical laboratories, government agencies, and industry.

Specific Requirements

1. General college admission requirements.
2. This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the College Admissions Office web page for full details.
3. High school biology, high school algebra, and keyboarding skills are highly recommended.
4. Final admission to the Radiography program shall be contingent upon documentation of physical and emotional health that would provide evidence indicative of the applicant's ability to provide safe care to the public.
5. Completed medical and immunization records must be submitted to the department chair before classes begin.
6. Either first dose of Hepatitis B vaccine or completion of series.
7. Documentation of current CPR certification for the Professional Rescuer or Healthcare Provider, which must be kept current throughout the program.
8. Completion of a minimum of six hours observation in the Radiology department at one of the clinical affiliates. Details will be provided to the top program applicants and alternates after the selection process has been completed.
9. Criminal background checks, drug screening, and/or seasonal flu vaccinations at cost to the student will be required prior to admission to clinical sites.
10. Students applying to the Radiography program are encouraged to have successfully completed: BIO 163 (or BIO 168 and BIO 169), CIS 110, ENG 111, COM 231, HUM 115 and the Social/Behavioral Science elective prior to program admission due to the rigorous nature of the Radiography curriculum.

This program is accredited by Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 N.

Wacker Drive, Suite 2850, Chicago, IL 60606-3182, www.jrcert.org, Phone: (312)-704-5300, Fax: (312)-704-5304

Notice: Candidates for certification from the American Registry of Radiologic Technologists (ARRT) must comply with the “Rules of Ethics” contained in the ARRT Standards of Ethics. Any conviction of a crime, including a felony, a gross misdemeanor, or a misdemeanor with the sole exception of speeding and parking violations must be investigated by the ARRT in order to determine eligibility for the certification examination. Additional information may be obtained from the department chairperson or on the ARRT website at www.arrt.org.

Radiography students will be required to complete clinical rotations, which may require them to travel as much as one hour from campus. Clinical affiliates are currently located in Asheville, Hendersonville, Fletcher, Brevard, Weaverville and Marion.

Surgical Technology

The Surgical Technology curriculum prepares individuals to assist in the care of the surgical patient in the operating room and to function as a member of the surgical team.

Students will apply theoretical knowledge to the care of patients undergoing surgery and develop skills necessary to prepare supplies, equipment, and instruments; maintain aseptic conditions; prepare patients for surgery; and assist surgeons during operations.

Employment opportunities include labor/delivery/emergency departments, inpatient/outpatient surgery centers, dialysis units/facilities, physicians' offices, and central supply processing units.

Students of programs accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) are required to take the national certification exam administered by the National Board on Certification in Surgical Technology and Surgical Assisting (NBSTSA) within a four-week period prior to or after graduation.

Specific Requirements

1. General College admission requirements.
2. This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the College Admissions Office web page for full details.
abtech.edu/Student_Services/admissions/allied_health.asp
3. Final admission to the Surgical Technology program shall be contingent upon documentation of physical and emotional health that would provide evidence indicative of the applicant's ability to provide safe care to the public.
4. Satisfactory completion of required immunizations.
5. Current CPR for the Professional Rescuer certification is a prerequisite to admission and must be maintained throughout the program.
6. Clinical agencies and/or credentialing bodies require criminal background checks and drug screens prior to admission to clinical sites or issuance of credentials.
7. Students applying to the Surgical Technology program are encouraged to have successfully completed: ACA 115, BIO 163 (or BIO 168 and BIO 169), BIO 175, CIS 110, and ENG 111 prior to program admission due to the rigorous nature of the Surgical Technology curriculum.

The Surgical Technology program is accredited by the **Commission on Accreditation of Allied Health Education Programs (CAAHEP)**, 1361 Park Street, Clearwater, FL 33756, www.caahep.org, Phone: 727-210-2350, Fax: 727-210-2354, through the **Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC-STSA)**, 6 W. Dry Creek Circle, Suite #110, Littleton, CO 80120, Phone: 303-694-9262, Fax: 303-741-3655 <http://www.arcstsa.org/>.

Surgical Technology Bridge Program

The Surgical Technology Bridge program is designed to allow currently certified non-degree surgical technologists to earn an Associate in Applied Science (A.A.S.) degree in Surgical Technology. Surgical technologists enrolled in the bridge program must have completed their surgical technology certificate or diploma at a Commission on Accreditation for Allied Health Education Programs (CAAHEP) accredited surgical technology program. All major courses along with all related and general education course requirements must be met for the Surgical Technology Associate in Applied Science Degree.

Specific Requirements

1. General college admission requirements.
 - a. Complete application for admission.
 - b. Successfully complete college placement test.
 - c. High school transcript or GED scores.
 - d. Official transcript of any prior college credit on file with admissions office.
 - e. Diploma or certificate in Surgical Technology from a CAAHEP-accredited program.
2. Current Basic Cardiac Life Support for the health care provider.
3. Final admission to the Surgical Technology program shall be contingent upon documentation of physical and emotional health that would provide evidence that is indicative of the applicant's ability to provide safe care to the public.
4. Satisfactory completion of required immunizations.
5. Current certification in Surgical Technology (CST) through the NBSTSA (National Board on Surgical Technology and Surgical Assisting) prior to taking SUR 210 course.
6. Clinical agencies and/or credentialing bodies require criminal background checks and drug screens prior to admission to clinical sites.

Copies of 1e. as well as 2-7 must be on file with the Surgical Technology Department.

The CST and Surgical Technology certificate or diploma will provide 33 hours of credit toward the A.A.S. degree. The program will accept transferred curriculum courses from regionally-accredited institutions in related and general education course work, as well as major area course work. Students must earn a minimum of 25% of all A.A.S. courses at A-B Tech.

Surgical Technology, related and general education courses can be completed at the student's own pace. It is understood that most students are employed full time during their A.A.S. pursuit. General education courses are offered fall, spring and summer semesters. Surgical Technology courses, SUR 210 and SUR 211 are offered during fall and spring semesters, respectively.

Surgical Technology Bridge Program Associate in Applied Science Degree (A45740BR)

Courses requiring a grade of "C" or better: BIO and SUR

| General Education Requirements | | | Credits |
|--------------------------------|--|--|---------|
| BIO 163 | Basic Anatomy & Physiology | | 5 |
| ENG 111 | Expository Writing | | 3 |
| ENG 114 | Professional Research & Reporting (or COM 120 or COM 231) | | 3 |
| PSY 150 | General Psychology | | 3 |

| SUR 211 | Advanced Theoretical Concepts | | 2 |

**Total Credit Hours Required
excluding SUR Diploma courses** **33**

**Program Totals with SUR Diploma/Certificate courses:
33 credits plus above 33 credits = 66**

At least 25% of required total credit hours (17 hours) must be earned at A-B Tech.

Veterinary Medical Technology

This curriculum is designed to prepare individuals to assist veterinarians in pre-paring animals, equipment, and medications for examination and surgery; collecting specimens; performing laboratory, radiographic, anesthetic, and dental procedures; assisting in surgery; and providing proper husbandry of animals and their environment.

Course work includes instruction in veterinary anatomy, nutrition, parasitology, pathology, physiology, radiology, terminology, zoology, office practices, laboratory techniques, dentistry, and small and large animal clinical practices.

Graduates of accredited programs may be eligible to take state and national examinations administered by the North Carolina Veterinary Medical Board. Graduates may be employed in veterinary clinics; diagnostic, research, or pharmaceutical laboratories; zoos; academic institutions; or other areas associated with animal care.

This program is accredited by the **American Veterinary Medical Association (AVMA)**, 1931 North Meacham Road, Suite 100, Schaumburg, IL 60173-4360, www.avma.org, Phone: 1-800-248-2862, Fax: 847-925-1329

Specific Requirements

- General college admission requirements.
- High school units:
 - Chemistry required.
 - Biology and algebra highly recommended.
- This program has a competitive selection process. See Selection Criteria and Procedures for Allied Health Programs on the college admissions office web page for full details.
www.abtech.edu/Student_Services/admissions/allied_health.asp
- Final admission to the Veterinary Medical Technology program shall be contingent upon documentation of physical and emotional health that would provide evidence that is indicative of the applicant's ability to provide safe care to animals.
- Satisfactory completion of required immunizations.
- North Carolina Board for Veterinary Medicine may require criminal background checks on all applicants for initial credentialing.

Business and Hospitality Education

The Business and Hospitality Education Division provides technical postsecondary education in the academic departments of Administrative/Medical Systems Technology, Business Administration, Business Computer Technologies, Culinary Arts and Hospitality, Networking Technologies, and Spa Therapies and Operations. Programs of study are specifically designed to provide students with necessary job skills to meet the personnel needs of local employers. All programs emphasize the mastery of analytical and technology-related skills. Business and Hospitality faculty work in partnership with local employers and program advisory committees to provide students with an appropriate foundation of theoretical and hands-on experiences. Day and evening classes are available for most programs. Some programs offer weekend classes.

For students interested in starting or managing their own business, the Student Business Incubator is one of many programs and services offered by the A-B Tech Small Business Center/Business Incubator, located at the College's Enka site.

Objectives of Business and Hospitality Programs

1. To provide students with the necessary skills to compete in local business or hospitality job markets while gaining an appreciation for global markets.
2. To provide students with a challenging and rigorous program of study emphasizing oral and written communication skills along with analytical, computational, and technical proficiencies.
3. To provide an interactive partnership between students, employers and faculty through a variety of methods, including cooperative work experiences, guest lecturers, field trips, and advisory committee input.
4. To invest in the human capital of Buncombe and Madison counties and contribute to the economic development of the business and hospitality community.

A.A.S. Degrees Conferred

Accounting
Baking and Pastry Arts
Business Administration
Computer Information Technology
Cosmetology
Culinary Arts
Cyber Crime Technology
Digital Media Technology
Entrepreneurship
Healthcare Business Informatics
Hospitality Management
Human Resources Management
Information Systems Security
Marketing and Retailing
Medical Office Administration
Networking Technology
Office Administration
Therapeutic Massage
Web Technologies

All degree programs in the Division of Business and Hospitality Education are five to six semesters in duration and will require from 20 to 30 hours per week of course work. If a student elects to enroll in the Business and Hospitality Division through the evening program, the time required for completion will be extended.

Diplomas Awarded

Business Administration
Cosmetology
Food Service Technology
Medical Office Administration
Medical Transcription
Mobile Development
Office Administration
Therapeutic Massage

Certificates Awarded

Accounting - Level I and Level II
Computer Information Technology - Geospatial Database and Web
Computer Information Technology - Microcomputer Applications
Computer Information Technology - PC Installation and Maintenance
Computer Information Technology - Computer Basics
Cosmetology Instructor
Digital Media Technology - Digital Video
Digital Media Technology - Interactive Multimedia
Entrepreneurship
Esthetics Technology
Hospitality Management - Leadership in Hospitality
Human Resources Management
Information Systems Security - CNSS 4011/4013 Certificate
Manicuring/Nail Technology
Marketing and Retailing - Retail Marketing
Medical Office Administration - Medical Coding
Networking Technology - Basic Network Administration
Networking Technology - CCNA Preparation
Office Administration - Word Processing and Desktop Publishing
Office Administration - Office Management
Web Technologies - Database Management
Web Technologies - Web Designer
Web Technologies - Web Programmer

Accounting

The Accounting curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in the accounting profession. Using the “language of business,” accountants assemble, analyze, process, and communicate essential information about financial operations.

In addition to course work in accounting principles, theories and practice, students will study business law, finance, management, and economics. Related skills are developed through the study of communications, computer applications, financial analysis, critical thinking skills, and ethics.

Graduates should qualify for entry-level accounting positions in many types of organizations, including accounting firms, small businesses, manufacturing firms, banks, hospitals, school systems, and governmental agencies. With work experience and additional education, an individual may advance in the accounting profession.

Accounting Level I Certificate (C25100L1)

Accounting Level I provides introductory training in the field of accounting. Applicants must have earned a high school diploma or GED to apply for this certificate.

| Major Requirements | | Credits |
|------------------------------------|-------------------------------------|----------------|
| ACC 120 | Principles of Financial Accounting | 4 |
| ACC 121 | Principles of Managerial Accounting | 4 |
| ACC 140 | Payroll Accounting | 2 |
| BUS 115 | Business Law I | 3 |
| Total Credit Hours Required | | 13 |

Accounting Level II Certificate (C25100L2)

Accounting Level II takes students to an advanced level, including the specialized area of government and not-for-profit accounting. Applicants must have earned a high school diploma or GED to apply for this certificate.

| Major Requirements | | Credits |
|------------------------------------|----------------------------------|----------------|
| ACC 129 | Individual Income Taxes | 3 |
| ACC 220 | Intermediate Accounting I | 4 |
| ACC 180 | Practices in Bookkeeping | 3 |
| ACC 240 | Government & Not-for-Profit Acct | 3 |
| Total Credit Hours Required | | 13 |

Baking and Pastry Arts

This curriculum is designed to provide students with the skills and knowledge required for employment in the baking/pastry industry, including restaurants, hotels, independent bakeries/pastry shops, wholesale/retail markets, and high-volume bakeries, and/or for further academic studies.

Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Course work includes specialty/artisanal breads, desserts, pastries, decorative work, high-volume production and food marketing.

Graduates should qualify for entry-level positions, such as pastry/bakery assistants, area pastry chef and assistant pastry chef. American Culinary Federation certification may be available to graduates.

Specific Program Requirements

- 1 General college admission requirements.
2. Completion of first dose of Hepatitis A vaccine is required by the first day of food preparation and service classes. Second Hepatitis A vaccine must be completed within six to 12 months of the first vaccination.

Business Administration

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy.

Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making.

Through these skills, students will have a sound business education base for life-long learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Business Administration Diploma (D25120)

The Business Administration Diploma is designed as a supplemental program to provide a basic understanding of business principles and practices for students enrolled in or completing a non-business related program. The diploma is not intended to be a stand-alone credential leading to employment in a business field.

| First Semester (Fall) | | |

Computer Information Technology

The Computer Information Technology curriculum is designed to prepare graduates for employment with organizations that use computers to process, manage, and communicate information. This is a flexible curriculum that can be customized to meet community information system needs.

Course work will develop a student's ability to communicate complex technical issues related to computer hardware, software, and networks in a manner that computer users can understand. Classes cover computer operations and terminology, operating systems, database, networking, security, and technical support.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies that rely on computer systems to manage information. Graduates should be prepared to sit for industry-recognized certification exams.

Computer Information Technology Associate in Applied Science Degree (A25260)

Courses requiring a grade of "C" or better: ACA, BUS, CIS, COE, CSC, CTS, DBA, DME, GIS, SEC and WEB

| First Semester (Fall) | | | Credits |
|--------------------------|------------------------------------|--|---------|

*Major Electives

Students have the ability to select an area of interest through the selection of their major electives. The following are the five interest areas and the associated classes. Students should meet with their advisor to help determine the courses that best meet their needs.

Option I - Database:

| | | |
|------------|---------|---|
| Elective 1 | DBA 120 | Database Programming I |
| Elective 2 | DBA 210 | Database Administration |
| | | (or COE 212 Work Experience IV and COE 215 Work Experience Seminar IV) |

Option II - Tech Support:

| | | |
|------------|---------|---|
| Elective 1 | CTS 217 | Computer Training and Support |
| Elective 2 | CTS 220 | Adv. Hardware/Software Support |
| | | (or COE 212 Work Experience IV and COE 215 Work Experience Seminar IV) |

Option III - Design:

| | | |
|------------|---------|---|
| Elective 1 | WEB 140 | Web Development Tools |
| Elective 2 | CIS 165 | Desktop Publishing I |
| | | (or COE 212 Work Experience IV and COE 215 Work Experience Seminar IV) |

Option IV - Business Support:

| | | |
|------------|---------|---|
| Elective 1 | CTS 217 | Computer Train/Support |
| Elective 2 | CIS 165 | Desktop Publishing I |
| | | (or COE 212 Work Experience IV and COE 215 Work Experience Seminar IV) |

Option V - Geographic Information Systems:

| | | |
|------------|---------|---|
| Elective 1 | GIS 222 | Internet Mapping |
| Elective 2 | GIS 232 | Spatial Databases |
| | | (or COE 212 Work Experience IV and COE 215 Work Experience Seminar IV) |

Computer Information Technology Associate in Applied Science Degree (A25260) - Evening Schedule *(Begins in even years only)*

First Semester (Fall)

| | | Credits |
|---------|---------------------------|---------|
| ACA 115 | Success and Study Skills | 1 |
| CIS 110 | Introduction to Computers | 3 |

Microcomputer Applications Certificate (C25260L2)

Participants in this certificate program learn about computer hardware as well as a variety of the most popular software application packages used in business. Applicants must have earned a high school diploma or GED to apply for this certificate program.

This certificate is designed for students who have little or no computer experience who want to improve their skills for home or the workplace.

| Major Requirements | Credits |
|------------------------------------|-----------|
| CIS 110 Introduction to Computers | 3 |
| CTS 135 Integrated Software | 4 |
| DBA 110 Database Concepts | 3 |
| NOS 110 Operating Systems Concepts | 3 |
| WEB 115 Web Markup and Scripting | 3 |
| Total Credit Hours Required | 16 |

PC Installation and Maintenance Certificate (C25260L3)

Students learn how to install, optimize, upgrade, and troubleshoot personal computer hardware and software. They gain both theoretical and hands-on experience using a variety of current hardware and software technologies. Topics such as testing electrical components, using diagnostics utilities, and user PC support interactions will be covered.

Preparation for the A+ Certification examination is an integral objective of this certificate program. Success as a PC technician requires essential knowledge and skills that may be tested by the internationally-recognized A+ Certification exam.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | Credits |
|--|-----------|
| CIS 110 Introduction to Computers | 3 |
| CTS 120 Hardware/Software Support | 3 |
| CTS 217 Computer Training/Support | 3 |
| CTS 220 Advanced Hardware/Software Support | 3 |
| NOS 110 Operating System Concepts | 3 |
| NOS 130 Windows Single User | 3 |
| Total Credit Hours Required | 18 |

Geospatial Database and Web Certificate (C25260L5)

The Geospatial Technology (GIS) Certificate: Database and Web provides a curriculum based on a solid foundation in GIS concepts. Students enrolled in this certificate will learn different methods of delivery of geographic information; enterprise/multi-user database implementation and management; and delivery of geographic information through the World Wide Web.

This certificate is designed for students who have experience with computers and want to improve geospatial technology skills.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | Credits |
|------------------------------------|-----------|
| CIS 110 Introduction to Computers | 3 |
| DBA 110 Database Concepts | 3 |
| GIS 111 Introduction to GIS | 3 |
| GIS 222 Internet Mapping | 3 |
| GIS 232 Spatial Databases | 3 |
| WEB 115 Web Markup and Scripting | 3 |
| Total Credit Hours Required | 18 |

Computer Basics Certificate (C25260L6)

The Computer Basics certificate provides students with an essential set of skills to prepare for the workplace. Students will learn to: (1) use the most popular software application package, (2) create and design databases; (3) design web sites and (4) perform operating system basics on different platforms.

This certificate is designed for students who want to improve their skills for the workplace. Successful applications for this certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | Credits |
|---|-----------|
| CIS 110 Introduction to Computers | 3 |
| CIS 115 Introduction to Programming and Logic | 3 |
| DBA 110 Database Concepts | 3 |
| NOS 110 Operating System Concepts | 3 |
| WEB 115 Web Markup and Scripting | 3 |
| Total Credit Hours Required | 15 |

Cosmetology

The Cosmetology curriculum is designed to provide competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the cosmetology industry. The curriculum provides a simulated salon environment that enables students to develop manipulative skills.

Course work includes instruction in all phases of professional imaging, hair design, chemical processes, skin care, nail care, multi-cultural practices, business/computer principles, product knowledge, and other selected topics.

Graduates should qualify to sit for the North Carolina State Board of Cosmetic Arts examination. Upon successfully passing the State Board exam, graduates will be issued a license. Employment is available in beauty salons and related businesses.

The Mountain Tech Spa, an on-campus spa facility located in the Birch Building, provides practical experience for Cosmetology students under the direction of College faculty.

Specific Program Requirements

1. General college admission requirements.
2. Completion of required Hepatitis B vaccine. First dose to be completed by the first day of class. Second Hepatitis B vaccine to be completed at least one month after the first dose. Third dose must be completed six months after the first.
3. To earn hours, Cosmetology students must be physically present in the laboratory. When leaving a laboratory, students must clock out.
4. Students enrolled in the program should not be pregnant, be color blind, or have a sensitivity to chemicals.
5. Students should be physically able to use cosmetology equipment such as clippers and shears and be able to stand for long periods of time.

Cosmetology Instructor

The Cosmetology Instructor curriculum provides a course of study for learning the skills needed to teach the theory and practice of cosmetology as required by the North Carolina State Board of Cosmetic Arts.

Course work includes requirements for becoming an instructor, introduction to teaching theory, methods and aids, practice teaching, and development of evaluation instruments.

Graduates of the program may be employed as cosmetology instructors in public or private education and business.

Specific Program Requirements

1. General college admission requirements.
2. Completion of required Hepatitis B vaccine. First dose to be completed by the first day of class. Second Hepatitis B vaccine to be completed at least one month after the first dose. Third dose must be completed six months after the first.
3. To earn hours, Cosmetology students must be physically present in the laboratory. When leaving a laboratory, students must clock out.
4. Students enrolled in the program should not be pregnant, be color blind, or have a sensitivity to chemicals.
5. Students should be physically able to use cosmetology equipment such as clippers and shears and able to stand for long periods of time.
6. Applicants of the Cosmetology Instructor program should hold a current North Carolina State Board of Cosmetic Arts Cosmetologist license.

Total Credit Hours Required **24**

Culinary Arts

This curriculum provides specific training required to prepare students to assume positions as trained culinary professionals in a variety of food service settings, including full-service restaurants, hotels, resorts, clubs, catering operations, contract foodservice, and health care facilities.

Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Courses include sanitation/safety, baking, garde manger, culinary fundamentals/production skills, nutrition, customer service, purchasing/cost control, and human resource management.

Graduates should qualify for entry-level opportunities such as prep cook, line cook, and station chef. American Culinary Federation certification may be available to graduates. With experience, graduates may advance to positions including sous chef, pastry chef, executive chef, or foodservice manager.

Specific Program Requirements

1. General college admission requirements.
2. Completion of first dose of Hepatitis A vaccine is required by the first day of food preparation and service classes. Second Hepatitis A vaccine must be completed within six to 12 months of the first vaccination.

Program Totals**76****Cyber Crime Technology**

This curriculum will prepare students to enter the field of computer crime investigations and private security. Students completing this curriculum will be capable of investigating computer crimes, properly seizing and recovering computer evidence and aiding in the prosecution of cyber criminals. Course work in this curriculum will include work in both the disciplines of criminal justice and computer information systems. Additionally, students will be required to take specific cyber crime classes.

Graduates should qualify to become computer crime investigators for local or state criminal justice agencies. Also, these graduates should be competent to serve as computer security specialists or consultants with private business.

The program is offered in collaboration with Catawba Valley Community College, Hickory, North Carolina. General education and related courses may be taken at A-B Tech. Major area (CCT) classes are taken through Catawba Valley Community College. The degree is awarded by Catawba Valley Community College.

Cyber Crime Technology Associate in Applied Science Degree (A55210)

Courses requiring a grade of "C" or better: ACA, CCT, CIS, CJC, CTS, NET, NOS, PSY, and SEC

First Semester (Fall)

Program Totals**65****Digital Media Technology**

The Digital Media Technology program prepares students for entry-level jobs in the digital design and multimedia industry. Students learn to synthesize multimedia, hypertext, computer programming, information architecture, and client/server technologies using both Internet and non-network-based media.

Students develop skills in communication, critical thinking, and problem solving as well as interface design, multimedia formats, application programming, data architecture, and client/server technologies. The program develops technical skills through practical applications that employ current and emerging standards and technologies.

Graduates should qualify for employment as web designers, graphic artists/designers, multimedia specialists, web developers, web content specialists, media specialists, information specialists, digital media specialists, animation specialists, interface designers, and many new jobs yet to be defined in this expanding field.

Digital Media Technology Associate in Applied Science Degree (A25210)

Courses requiring a grade of "C" or better: ACA, ART, CIS, COE, CSC, CTS, DBA, DME, FVP, GIS, and WEB

First Semester (Fall)**Credits**

| | | |
|---------|-------------------------------|---|
| ACA 115 | Success and Study Skills | 1 |
| CIS 110 | Introduction to Computers | 3 |
| DME 110 | Introduction to Digital Media | 3 |
| DME 115 | Graphic Design Tools | 3 |
| WEB 115 | Web Markup and Scripting | 3 |

Second Semester (Spring)

| | | |
|---------|---------------------------------------|---|
| CIS 115 | Introduction to Programming and Logic | 3 |
| DME 130 | Digital Animation I | 3 |
| DME 215 | Graphic Design Tools II | 3 |
| ENG 111 | Expository Writing | 3 |
| WEB 210 | Graphic Design | 3 |

Third Semester (Summer)

| | | |
|---------|----------------------------------|---|
| ENG 114 | Prof. Research & Reporting | 3 |
| MAT 115 | Mathematical Models (or MAT 171) | 3 |

Fourth Semester (Fall)

| | | |
|---------|-----------------------------------|---|
| DME 120 | Intro to Multimedia Applications | 3 |
| DME 140 | Introduction to Audio/Video Media | 3 |
| DME 210 | User Interface Design | 3 |
| DME 230 | Digital Animation II | 3 |
| | Major Elective 1* | 3 |

Fifth Semester (Spring)

| | | |
|---------|---|---|
| DME 260 | Emerging Technologies in Digital Media | 3 |
| DME 270 | Professional Practices in Digital Media | 3 |
| DME 285 | Systems Project | 3 |
| | Major Elective 2* | 3 |

Sixth Semester (Summer)

| | | |
|--|------------------------------------|---|
| | Humanities/Fine Arts Elective | 3 |
| | Social/Behavioral Science Elective | 3 |

Program Totals**67*****Major Electives**

Students have the ability to select an area of interest through the selection of their major electives. The following are the four interest areas and the associated classes. Students should meet with their advisor to help determine the courses that best meet their needs.

Web/Multimedia Programming Track:

| | | |
|------------|---------|--|
| Elective 1 | WEB 182 | PHP Programming |
| Elective 2 | DME 220 | Interactive Multimedia Programming (or Co-op Work Experience) |

Artistic Track:

| | | |
|------------|-----|--|
| Elective 1 | ART | Art course approved by advisor (or WEB 140) |
| Elective 2 | ART | Art course approved by advisor (or COE 212 and COE 215) |

Video Track:

| | | |
|------------|---------|-------------------------------------|
| Elective 1 | FVP 250 | Production Specialties (or ART 266) |
| Elective 2 | DME 240 | Media Compression |

GIS Track:

| | | |
|------------|---------|---|
| Elective 1 | GIS 111 | Introduction to GIS |
| Elective 2 | GIS 121 | Georeferencing and Mapping (or GIS 222) |

Digital Media Technology Associate
in Applied Science Degree (A25210) -
Evening Schedule

| First Semester (Fall) | | | Credits |
|-----------------------------|---|--|---------|
| ACA 115 | First-Year Seminar | | 1 |
| CIS 110 | Introduction to Computers | | 3 |
| DME 110 | Introduction to Digital Media | | 3 |
| MAT 115 | Mathematical Models (or MAT 171) | | 3 |
| Second Semester (Spring) | | | |
| DME 115 | Graphic Design Tools | | 3 |
| DME 130 | Digital Animation I | | 3 |

*Major Electives

Students have the ability to select an area of interest through the selection of their major electives. The following are the four interest areas and the associated classes. Students should meet with their advisor to help determine the courses that best meet their needs.

Web/Multimedia Programming Track:

- Elective 1 WEB 182 PHP Programming
Elective 2 DME 220 Interactive Multimedia Programming
(or Co-op Work Experience)

Artistic Track:

- Elective 1 ART Art course approved by advisor (or WEB 140)
Elective 2 ART Art course approved by advisor
(or COE 212 and COE 215)

Video Track:

- Elective 1 FVP 250 Production Specialties (or ART 266)
Elective 2 DME 240 Media Compression

GIS Track:

- Elective 1 GIS 111 Introduction to GIS
Elective 2 GIS 121 Georeferencing and Mapping (or GIS 222)

Digital Media Technology Digital Video Certificate (C25210L1)

The Digital Video certificate provides training in multiple aspects of digital video and audio technologies, including creating graphics for video, camera and lighting techniques, capturing video, non-linear editing, and compression of audio/video media.

This certificate is designed for students who have experience with computers and want to improve digital audio and video skills. If a student does not have the prior proficiency, other course work might be required to meet course pre-requisites.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | | Credits |
|------------------------------------|-----------------------------------|-----------|
| DME 115 | Graphic Design Tools | 3 |
| DME 140 | Introduction to Audio/Video Media | 3 |
| DME 240 | Media Compression | 3 |
| FVP 250 | Production Specialties I | 3 |
| Total Credit Hours Required | | 12 |

Digital Media Technology Interactive Multimedia Certificate (C25210L2)

The Interactive Multimedia Certificate provides training in multiple aspects of interactive multimedia using the industry standard software Adobe Flash. Topics will include drawing with Flash, using symbols, animation and motion graphics, using audio and video, designing for interactivity and Actionscript programming.

This certificate is designed for students who have experience with computers and want to improve Flash design and programming skills. Previous experience with Adobe Photoshop, Adobe Illustrator, and web design suggested. If a student does not have the prior proficiency, other course work might be required to meet course pre-requisites.

Successful applicants for this certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | | Credits |
|------------------------------------|------------------------------------|-----------|
| DME 110 | Introduction to Digital Media | 3 |
| DME 120 | Intro to Multimedia Applications | 3 |
| DME 130 | Digital Animation I | 3 |
| DME 220 | Interactive Multimedia Programming | 3 |
| Total Credit Hours Required | | 12 |

Entrepreneurship

The Entrepreneurship curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth as self-employed business owners.

Course work includes developing a student's ability to make informed decisions as future business owners. Courses include entrepreneurial concepts learned in innovation and creativity, business funding, and marketing. Additional course work includes computers and economics.

Through these skills, students will have a sound education base in entrepreneurship for lifelong learning. Graduates are prepared to be self-employed and open their own businesses.

Entrepreneurship Associate in Applied Science Degree (A25490)

Courses requiring a grade of "C" or better: ACA, ACC, BUS, CIS, ECO and ETR

| First Semester (Fall) | | | Credits |
|-----------------------|------------------------------------|--|---------|
| ACA 115 | Success and Study Skills | | 1 |
| ACC 120 | Principles of Financial Accounting | | 4 |
| BUS 110 | Introduction to Business | | 3 |
| CIS 110 | Introduction to Computers | | 3 |
| ENG 111 | Expository Writing | | 3 |
| ETR 210 | Introduction to Entrepreneurship | | 3 |

| Second Semester (Spring) | | | Credits |
|--------------------------|-------------------------------------|--|---------|
| ACC 121 | Principles of Managerial Accounting | | 4 |
| BUS 137 | Principles of Management | | 3 |
| CTS 130 | Spreadsheet | | 3 |
| ENG 114 | Professional Research & Reporting | | 3 |
| ETR 220 | Innovation and Creativity | | 3 |
| PSY 150 | General Psychology | | 3 |

| Third Semester (Summer) | | | Credits |
|-------------------------|---------------------------------------|--|---------|
| COM 231 | Public Speaking | | 3 |
| ECO 251 | Principles of Microeconomics | | 3 |
| MAT 115 | Mathematical Models (or MAT 151/151A) | | 3 |

| Fourth Semester (Fall) | | | Credits |
|------------------------|------------------------------|--|---------|
| ECO 252 | Principles of Macroeconomics | | 3 |
| ETR 215 | Law for Entrepreneurs | | 3 |
| ETR 230 | Entrepreneur Marketing | | 3 |

|---------|----------------------------------|---|
| ACC 150 | Accounting Software Applications | 2 |
| BUS 175 | Contract Negotiations | 3 |
| BUS 280 | REAL Small Business | 4 |
| ETR 270 | Entrepreneurship Issues | 3 |

Program Totals **75**

Entrepreneurship Certificate (C25490L1)

The Entrepreneurship Certificate is designed to provide students with basic knowledge and skills necessary in establishing a new business venture. Course work includes financial accounting and understanding of the operation of a business in the free enterprise system, as well as principles of entrepreneurship and development of a business plan. Students will develop a detailed business plan that may be used for the establishment of a business venture.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

Major Requirements **Credits**

| | | |
|---------|------------------------------------|---|
| ACC 120 | Principles of Financial Accounting | 4 |
| BUS 110 | Introduction to Business | 3 |
| BUS 280 | REAL Small Business | 4 |
| ETR 210 | Introduction to Entrepreneurship | 3 |

Total Credit Hours Required **14**

Esthetics Technology

The Esthetics Technology curriculum provides competency-based knowledge, scientific/artistic principles and hands-on fundamentals associated with the art of skin care. The curriculum provides a simulated salon environment that enables students to develop manipulative skills.

Course work includes instruction in all phases of professional Esthetics Technology, business/human relations, product knowledge, and other related topics.

Graduates should be prepared to take the North Carolina Cosmetology State Board Licensing Exam and, upon passing, may be licensed and qualify for employment in beauty and cosmetic/skin care salons, as a platform artist, and in related businesses.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

The Mountain Tech Spa, an on-campus spa facility located in the Birch Building, provides practical experience for Esthetics students under the direction of College faculty.

Specific Program Requirements

1. General college admission requirements.
2. Completion of required Hepatitis B vaccine. First dose to be completed by the first day of class. Second Hepatitis B vaccine to be completed at least one month after the first dose. Third dose must be completed six months after the first.
3. Esthetics Technology students must clock out when leaving the laboratory. To earn hours, students must be physically present in the laboratory.
4. Students should be physically able to operate esthetics equipment and safely use products used in esthetics.

Esthetics Technology – Certificate (C55230)**First Semester (Fall)** **Credits**

| | | |
|---------|----------------------|---|
| COS 119 | Esthetics Concepts I | 2 |
| COS 120 | Esthetics Salon I | 6 |

Second Semester (Spring)

| | | |
|---------|-----------------------|---|
| COS 125 | Esthetics Concepts II | 2 |
| COS 126 | Esthetics Salon II | 6 |

Total Credit Hours Required **16**

Foodservice Technology

This curriculum is designed to introduce students to the foodservice industry and prepare them for entry-level positions in industrial, institutional or commercial production foodservice operations.

Courses include sanitation, basic and intermediate foodservice production skills, baking, menus, purchasing and basic cost control.

Graduates should qualify for employment as line cooks, prep cooks, or bakers in production foodservice settings or entry-level kitchen management in an institutional foodservice setting.

Specific Program Requirements

1. General college admission requirements.
2. Completion of first dose of Hepatitis A vaccine is required by the first day of food preparation and service classes. Second Hepatitis A vaccine must be completed within six to 12 months of the first vaccination.

Foodservice Technology Diploma (D55250)

Courses requiring a grade of "C" or better: CUL and HRM

| First Semester (Fall) | | | Credits |
|------------------------------------|---------------------------------|--|-----------|
| CUL 111 | Success in Hospitality Studies | | 1 |
| CUL 110 | Sanitation & Safety | | 2 |
| CUL 110A | Sanitation & Safety Lab | | 1 |
| CUL 140 | Culinary Skills I | | 5 |
| ENG 111 | Expository Writing (or ENG 110) | | 3 |

Healthcare Business Informatics - Evening Program

(Offered in odd numbered years, beginning in 2013)

Please consult program advisor.

Hospitality Management

This curriculum prepares individuals to understand and apply the administrative and practical skills needed for supervisory and managerial positions in hotels, motels, resorts, inns, restaurants, institutions, and clubs.

Course work includes guest services, leadership, management, restaurant operations, lodging operations, marketing, sanitation, food preparation, food and beverage management and other critical areas.

Graduates should qualify for management or entry-level supervisory positions in food and lodging operations, including restaurants, foodservice, beverage service, catering, front office, reservations and house-keeping. Opportunities are also available in product services, and technology support and sales.

Mountain Tech Lodge

An on-campus lodging facility, the Mountain Tech Lodge, is operated and maintained by the Hospitality Management students, and provides practical experience under the direction of College faculty.

Specific Program Requirements

1. General college admission requirements.
2. Completion of first dose of Hepatitis A vaccine is required by the first day of food preparation and service classes. The second Hepatitis A dose must be completed within six to 12 months of the first.

Human Resources Management

Human Resources Management is a concentration under the curriculum title of Business Administration. This concentration is designed to meet the demands of business and service agencies. The objective is the development of generalists and specialists in the administration, training and management of human resources.

Course work includes studies in management, interviewing, placement, needs assessment, planning, compensation and benefits, and training techniques. Also included are topics such as people skills, learning approaches, skills building, and development of instructional and training materials.

Graduates of this program will have a sound business educational base for lifelong learning. Students will be prepared for employment opportunities in personnel, training, and other human resources development areas.

This program is offered in the evening only.

Information Systems Security

Information Systems Security covers a broad expanse of technology concepts. This curriculum provides individuals with the skills required to implement effective and comprehensive information security controls.

Course work includes networking technologies, operating systems administration, information policy, intrusion detection, security administration, and industry best practices to protect data communications.

Graduates should be prepared for employment as security administrators. Additionally, they will acquire the skills that allow them to pursue security certifications.

NSA-NIATP Courseware Certification

Courseware in the Information Systems Security program has been certified by the National Security Agency, National Information Assurance Education and Training Program meeting the requirements as set forth by the national training standards Information Systems Security (INFOSEC) Professionals NSTISSI No. 4011 and Systems Administrators (SA), CNSSI 4013. This certification gives A-B Tech the authority to recognize candidates who demonstrate that they have met 4011 and 4013 training standards. Candidates who have met the standard will be issued a certificate of recognition acknowledging their completion of the CNSS 4011 and 4013 requirements.

CNSS 4011/4013 Certificate (C25270L1)

This certificate is intended for information security professionals and system administrators responsible for the security oversight or management of critical networks. A-B Tech is authorized to recognize individuals completing the national training requirements set forth by the Committee on National Security Systems in Information Systems Security (INFOSEC) Professionals NSTISSI No. 4011 and Systems Administrators (SA), CNSSI 4013. Candidates who demonstrate their attainment of the knowledge and skills required by these training standards will be issued a certificate of recognition acknowledging their completion of the requirements.

The instruction included in this program is required for those INFOSEC professionals and systems administrators employed by a federal government department or agency. It is also desirable for those same individuals working for a private sector entity under contract to provide management services to the federal government to have this training.

Applicants to this program must already have at least an Associate of Applied Science degree in an information technology field, be enrolled in an information technology-related degree program, or have permission from the department chair.

| Major Requirements | | Credits |
|------------------------------------|-------------------|-----------|
| NET 125 | Networking Basics | 3 |
| SEC 110 | Security Concepts | 3 |
| SEC 160 | Security Admin I | 3 |
| SEC 220 | Defense-In-Depth | 3 |
| Total Credit Hours Required | | 12 |

Manicuring/Nail Technology

The Manicuring/Nail Technology curriculum provides competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the nail technology industry. The curriculum provides a simulated salon environment that enables students to develop manipulative skills.

Course work includes instruction in all phases of professional nail technology, business/computer principles, product knowledge, and other related topics.

Graduates should be prepared to take the North Carolina Cosmetology State Board Licensing Exam and, upon passing, be licensed and qualify for employment in beauty and nail salons, as a platform artist, and in related businesses.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

The Mountain Tech Spa, an on-campus spa facility located in the Birch Building, provides practical experience for Manicuring/Nail Technology students under the direction of College faculty.

Specific Program Requirements

1. General college admission requirements.
2. Completion of required Hepatitis B vaccine. First dose to be completed by the first day of class. Second Hepatitis B vaccine to be completed at least one month after the first dose. Third dose must be completed six months after the first.
3. Manicuring/Nail Technology students must clock out when leaving the laboratory. To earn hours, students must be physically present in the laboratory.
4. Students should be physically able to operate manicuring/nail technology equipment and safely use manicuring/nail technology products for long periods of time.

Manicuring/Nail Technology Certificate (C55400)

| Major Requirements | | Credit |

| COS 121 | Manicure/Nail Technology I | 6 |
| COS 222 | Manicure/Nail Technology II | 6 |
| Total Credit Hours Required | | 12 |

Marketing and Retailing

Marketing and Retailing is a concentration under the curriculum title of Business Administration. This concentration is designed to provide students with fundamental skills in marketing and retailing.

Course work includes marketing, retailing, merchandising, selling, advertising, computer technology, and management.

Graduates should qualify for marketing positions within manufacturing, retailing, and service organizations.

Marketing and Retailing Associate in Applied Science Degree (A2512F)

Courses requiring a grade of "C" or better: ACA, ACC, BUS, CIS, CTS, ECO and MKT

| First Semester (Fall) | | Credits |

Retail Marketing Certificate (C2512FL1)

The Retail Marketing Certificate is designed to prepare students to be successful in a retail marketing environment. Students will learn the fundamentals of marketing goods and services. This certificate will provide students with the essential knowledge of retailing, including effective operations, retail structure, non-store retailing, and upcoming trends. Students will learn how to design stimulating visual displays and the importance of visual merchandising. The uniqueness of consumer behavior will be explored with emphasis on the decision-making process.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | | Credits |
|------------------------------------|-------------------------|----------------|
| MKT 120 | Principles of Marketing | 3 |
| MKT 121 | Retailing | 3 |
| MKT 122 | Visual Merchandising | 3 |
| MKT 221 | Consumer Behavior | 3 |
| Total Credit Hours Required | | 12 |

Medical Office Administration

This curriculum prepares individuals for employment in medical and other health-care related offices.

Course work will include medical terminology; information systems; office management; medical coding, billing, and insurance; legal and ethical issues; and formatting and word processing. Students will learn administrative and support functions and develop skills applicable in medical environments.

Employment opportunities are available in medical and dental offices, hospitals, insurance companies, laboratories, medical supply companies, and other health-care related organizations.

Medical Office Administration Associate in Applied Science Degree (A25310)

Courses requiring a grade of "C" or better: ACA, ACC, BUS, CIS and OST

Entrance requirements: Keyboarding placement test into OST 134 consisting of 25 gross words a minute (gwam) at 98% accuracy using the touch system and college English placement test.

*Major Electives: CTS 130, DBA 110, OST 201, OST 233, SPA 120, or OST 247 and OST 248 (departmental approval required). The semester in which the major elective is taken may vary.

Medical Office Administration Medical Coding Certificate (C25310L1)

The Medical Coding Certificate program will prepare individuals for entry-level employment opportunities in the allied health specialty of medical coding. This is an introductory program that may, with experience and additional training, lead to national certification. Requirements for the certificate include successful completion of the listed courses and the following documented prerequisite office skills:

Pass a keyboarding and basic computer skills test requiring:

- Keyboarding skill level of 25 words per minute for five minutes (or OST 131)
- Theory and hands-on skill using Microsoft Office software (Word, Excel, PowerPoint) and Windows with 80 percent accuracy (or CIS 110).

Major Requirements

| | | Credits |
|---------|--|----------------|
| BIO 163 | Basic Anatomy and Physiology | 5 |
| OST 141 | Medical Terms I - Med Office | 3 |
| OST 142 | Medical Terms II - Med Office | 3 |
| OST 148 | Medical Coding, Billing, and Insurance | 3 |
| OST 247 | CPT Coding in the Medical Office | 2 |
| OST 248 | Diagnostic Coding | 2 |

Total Credit Hours Required **18**

Medical Transcription

The Medical Transcription curriculum prepares individuals to become medical language specialists who interpret and transcribe dictation by physicians and other healthcare professionals in order to document patient care and facilitate delivery of healthcare services.

Students will gain extensive knowledge of medical terminology, pharmacology, human diseases, diagnostic studies, surgical procedures, and laboratory procedures. In addition to word processing skill and knowledge of voice processing equipment, students must master English grammar, spelling, and proofreading.

Graduates should qualify for employment in hospitals, medical clinics, doctors' offices, private transcription businesses, research facilities, insurance companies, and publishing companies. After acquiring work experience, individuals can apply to the American Association for Medical Transcription to become Certified Medical Transcriptionists.

Note: The American Association for Medical Transcription is now known as the Association for Healthcare Documentation Integrity.

Medical Transcription - Diploma (D25320)

Courses requiring a grade of "C" or better: ACA, CIS, COE, MED and OST

Entrance requirements: Keyboarding placement test into OST 134 consisting of 25 gross words a minute (gwam) at 98% accuracy using the touch system and college English placement test.

| First Semester (Fall) | | | Credits |

| | | | |
|-----|-----|------------------------|---|
| COE | 111 | Co-Op Work Experience* | 1 |
|-----|-----|------------------------|---|

Program Totals **47**

*A co-op work experience is an additional requirement of the MT curriculum. Students will be expected to complete the co-op during daytime hours Monday - Friday.

Networking Technology

The Networking Technology curriculum prepares individuals for employment supporting network infrastructure environments. Students will learn how to use technologies to provide reliable transmission and delivery of data, voice, image, and video communications in business, industry, and education.

Course work includes design, installation, configuration, and management of network infrastructure technologies and network operating systems. Emphasis is placed on the implementation and management of network software and the implementation and management of hardware such as switches and routers.

Graduates may find employment in entry-level jobs as local area network managers, network operators, network analysts, and network technicians. Graduates may also be qualified to take certification examinations for various network industry certifications, depending on their local program.

Networking Technology Associate in Applied Science Degree (A25340)

Networking Technology Basic Network Administration Certificate (C25340L3)

This certificate is designed for the office professional with responsibilities for an organization's local area network administration. Students will learn the basics of network administration including file management, network infrastructure, user management, security concepts, and troubleshooting using operating systems such as Microsoft Windows™ and Linux. Upon successful completion of this certificate program students will have the knowledge they need to perform basic administrative tasks on servers in a small office-home office (SOHO) environment.

Applicants must have earned a high school diploma or GED to apply for this certificate. Applicants must also successfully complete a basic computer concepts assessment or have completed CIS 110.

| Major Requirements | | | Credits |

Networking Technology CCNA Preparation Certificate (C25340L1)

This certificate is designed to help prepare students for the Cisco Certified Network Associate (CCNA) examination. Topics include network topologies and design, router configuration and protocols, switching theory, virtual LANS and threaded case studies. Upon successful completion of the four course sequence, students will have acquired the knowledge necessary to perform entry level design, construction, and maintenance of network infrastructures. This certificate will help prepare students for the Cisco Certified Network Associate certification exam.

Applicants must successfully complete a basic computer concepts assessment or have completed CIS 110.

| Major Requirements | | Credits |

Office Administration

The Office Administration curriculum prepares individuals for positions in administrative support careers. It equips office professionals to respond to the demands of a dynamic computerized workplace.

Students will complete courses designed to develop proficiency in the use of integrated software, oral and written communication, analysis and coordination of office duties and systems, and other support topics. Emphasis is placed on non-technical as well as technical skills.

Graduates qualify for employment in a variety of positions in business, government, and industry. Job classifications range from entry-level to supervisor to middle management.

Total Credit Hours Required **14**

Therapeutic Massage

The Therapeutic Massage curriculum prepares graduates to work in direct client care settings to provide manipulation, methodical pressure, friction and kneading of the body for maintaining wellness or treating alterations in wellness throughout the lifespan.

Courses will include content in normal human anatomy and physiology, therapeutic massage, ethical/legal issues, business practices, nutrition and psychology.

Employment opportunities include hospitals/rehabilitation centers, health departments, home health, medical offices, nursing homes, spas/health/sports clubs, and private practice. Graduates are eligible to take the Massage and Bodywork Licensing Exam or the National Certification for Therapeutic Massage and Bodywork.

The Mountain Tech Spa, an on-campus spa facility located in the Birch Building, provides practical experience for Therapeutic Massage students under the direction of College faculty.

Specific Program Requirements

1. General college admission requirements.
2. Current CPR certification is required by the end of the first semester of study and must be maintained throughout the program.
3. Completion of the Student Medical Form documenting immunization history, medical history, and assessment of the applicant's physical and emotional ability to participate in the activities in a clinical setting.
4. Completion of required Hepatitis B vaccine. First dose to be completed by the first day of class. Second Hepatitis B vaccine to be completed at least one month after the first dose. Third dose must be completed six months after the first dose.
5. Clinical facilities may require a criminal background check and/or drug testing prior to participation in the clinical/co-op component. In addition, national and/or state licensure boards **may prohibit** eligibility for licensure based on criminal records. Licensure is required to practice as a massage therapist in North Carolina. Please refer to the North Carolina Massage and Bodywork Therapy Practice Act, ARTICLE 36 of CHAPTER 90 of the NORTH CAROLINA GENERAL STATUTES (90-629.1) www.bmbt.org.
6. Interview with Department Chair of Spa Therapies and Operations.

Web Technologies

The Web Technologies curriculum prepares graduates for careers in the information technology arena using computers and distributed computing to disseminate and collect information via the web.

Course work in this program covers the terminology and use of computers, network devices, networks, servers, databases, applications, programming languages, as well as web applications, site development and design. Studies will provide opportunity for students to learn related industry standards.

Graduates should qualify for career opportunities as designers, administrators, or developers in the areas of web applications, websites, web services, and related areas of distributed computing.

Web Technologies Associate in Applied Science (A25290)

Web Technologies - Mobile Development Diploma (D25290)

The Mobile Development diploma prepares students for entry-level jobs in the mobile design and development industry. Students learn to incorporate graphics and media, principles of interface and user experience design, programming and technologies to create mobile and Internet-based projects. The program develops skills through practical application of current and emerging standards and technologies.

Graduates should qualify for employment as web/mobile designers and/or developers.

First Semester (Fall)

| | | Credits |
|---------|---------------------------------------|---------|
| CIS 110 | Introduction to Computers | 3 |
| CIS 115 | Introduction to Programming and Logic | 3 |
| DME 115 | Graphic Design Tools I | 3 |

|------------------------------------|-----------|

Web Technologies – Web Designer Certificate (C25290L1)

The Web Designer certificate provides students with an essential set of courses that prepares them to create effective Web sites. Students will learn essential skills of Web design and gain proficiency in the software tools necessary to create Web sites. Courses cover multiple aspects of Internet-related technologies, including: Internet protocols and tools, web site design, markup languages, client-side scripting, and multimedia development.

This certificate is designed for students who have experience with computers and wish to acquire a credential that provides evidence of their proficiency in web design. If a student does not have prior computer proficiency, other course work might be required to meet course prerequisites.

Successful applicants for this certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | Credits |
|---|-----------|
| CIS 115 Intro to Programming and Logic | 3 |
| WEB 110 Internet/Web Fundamentals | 3 |
| WEB 115 Web Markup and Scripting | 3 |
| WEB 120 Introduction to Internet Multimedia | 3 |
| WEB 140 Web Development Tools | 3 |
| WEB 210 Web Design | 3 |
| <hr/> | |
| Total Credit Hours Required | 18 |

Web Technologies – Web Programmer
Certificate (C25290L2)

The Web Programming certificate provides courses in the programming/database aspects of Internet-related technologies. Course work includes client- and server-side scripting, web/database programming, and an advanced programming elective (XML, Java, or Advanced Markup and Scripting).

This certificate is designed for students who have experience with computers and wish to acquire a credential that provides evidence of their proficiency in web programming. If a student does not have prior computer proficiency, other course work might be required to meet course pre-requisites.

Successful applicants for this certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | | | Credits |
|-----------------------------|--------------------------------|--|---------|
| CIS 115 | Intro to Programming and Logic | | 3 |
| DBA 120 | Database Programming I | | 3 |
| WEB 115 | Web Markup and Scripting | | 3 |
| WEB 182 | PHP Programming | | 3 |
| WEB 250 | Database Driven Websites | | 3 |
| | Major Electives* | | 3 |
| Total Credit Hours Required | | | 18 |

*Major Electives: CSC 151, WEB 186, WEB 215

Database Management Certificate (C25290L3)

Students will learn how to design, manipulate and update databases using a variety of database programs. Upon completion of the certificate students should be able to write programs which create, update and produce databases, tables and reports representative of industry standards.

This certificate is designed for students who have experience with computers and want to improve database skills. If a student does not have the prior proficiency, other course work might be required to meet course prerequisites.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

| Major Requirements | | | Credits |
|-----------------------------|--------------------------------|--|---------|
| CIS 115 | Intro to Programming and Logic | | 3 |
| DBA 110 | Database Concepts | | 3 |
| DBA 120 | Database Programming I | | 3 |
| DBA 210 | Database Administration | | 3 |
| WEB 115 | Web Markup and Scripting | | 3 |
| WEB 182 | PHP Programming | | 3 |
| Total Credit Hours Required | | | 18 |

Emergency Services

The Division of Emergency Services includes the following professional programs: Basic Law Enforcement, Criminal Justice Technology, Emergency Medical Science, and Fire Protection Technology. The Division offers training in both curriculum and continuing education. It offers a variety of academic credentials, including associate degrees, certificates, and diplomas. Many of the Division's curriculum courses are designed to meet licensure/certification requirements necessary for employment.

In addition to classroom and laboratory instruction, each program provides experiential learning through field/clinical experiences. These field/clinical experiences occur at emergency services sites in the community, including medical, law enforcement, and fire and rescue settings.

Applicants should become familiar with the selection criteria and application deadlines for the specific program. Persons interested in a public service career are advised that professional licensure, certification, employment, or admission to clinical/work experience sites may be denied to anyone who has been convicted of a felony or other crime involving moral turpitude.

A.A.S. Degrees Conferred

Criminal Justice Technology
Emergency Medical Science
Fire Protection Technology

Certificates Awarded

Basic Law Enforcement Training
Courts and the Law
Criminal Investigations and Crime Scenes
Criminal Justice Administration & Management
Criminal Justice & Special Populations
Essential Police Operations
Fire Protection Technology
System of Criminal Justice

Basic Law Enforcement Training

Basic Law Enforcement Training (BLET) is designed to give students essential skills required for entry-level employment as law enforcement officers with state, county, or municipal governments, or with private enterprise.

This program utilizes state-commission-mandated topics and methods of instruction. General subjects include, but are not limited to, criminal, juvenile, civil, traffic, and alcoholic beverage laws; investigative, patrol, custody, and court procedures; emergency responses; and ethics and community relations.

Successful graduates receive a curriculum certificate and are qualified to take certification examinations mandated by the North Carolina Criminal Justice Education and Training Standards Commission and/or the North Carolina Sheriffs Education and Training Standards Commission.

Specific Requirements

1. General college admission requirements.
2. Individuals must meet the Minimum Standard for Employment Criteria outlined in North Carolina Code Book - General Statute 17-A and Title-12, Chapter 9, North Carolina Administrative Code.
3. Individuals must be sponsored by a North Carolina law enforcement agency. The letter of sponsorship must:
 - a. Be signed by the agency head; i.e., Chief or Sheriff.
 - b. Include a statement of sponsorship that certifies that the applicant meets the standards for certification as stated in number two above.
 - c. State that a background investigation was conducted.
4. Individuals must submit their sponsorship letter and college application to the Law Enforcement Training Center director at least 15 days prior to the courses scheduled start date. Applicants are accepted on a first-come, first-served basis. Priority will be given to full-time employees of law enforcement agencies.
5. Individuals must provide the School Director a certified criminal record check for local and state records for the time period since the trainee became 16 years of age and from all locations where the trainee has resided since becoming an adult. An Administrative Office of the Courts criminal record check or a comparable out-of-state criminal record check will satisfy this requirement.

6. If accepted into the program, the student must submit completed North Carolina State Forms F-1 and F-2.
7. Prior to admission each student must achieve a reading score of at least the tenth grade level. This testing can be done AFTER submitting an application for enrollment. Testing is done in the K. Ray Bailey Student Services Center Monday through Thursdays: 8:30 a.m., 10:30 a.m., 1:30 p.m., 3:30 p.m., and 5:30 p.m. and Fridays: 8:30 a.m., 10:30 a.m., and 1:30 p.m. A student's placement test will be scheduled by the School Director after all paperwork has been turned in. Arrive in the counseling department of the K. Ray Bailey Student Services Center 20 minutes prior to the scheduled test time.

Criminal Justice Technology

This curriculum is designed to provide practical knowledge of criminal justice systems and operations. Study will focus on local, state, and federal law enforcement, judicial processes, corrections and security services. The criminal justice system's role within society will be explored.

Emphasis is on criminal justice systems, criminology, juvenile justice, criminal and constitutional law, investigative principles, ethics and community relations. Additional study may include issues and concepts of government, counseling, communications, computers and technology.

Employment opportunities exist in a variety of local, state, and federal law enforcement, corrections, and security fields. Examples include police officer, deputy sheriff, county detention officer, state trooper, intensive probation/parole surveillance officer, correctional officer, and loss prevention specialist.

**A-B Tech has a unique transfer agreement with Western Carolina University for A.A.S. Criminal Justice graduates. If a student chooses to transfer to WCU under this agreement, MAT 115 will fulfill the math requirement.

Students who have successfully completed a curriculum offering of Basic Law Enforcement Training within 10 years of their application to the Criminal Justice Technology Program will receive credit for CJC 121, 131, 132, 221, and 231.

System of Criminal Justice Certificate (C55180L1)

This certificate program is intended to provide an overview of the components of the Criminal Justice system. Topics include a detailed look at the major procedural processes of the overall system, which includes the application of ethical and principled law enforcement, the responsibilities of courts and corrections, and the rights and protections of all persons served by this broad system.

Major Requirements

| | | Credits |
|---------|----------------------------------|---------|
| CJC 111 | Introduction to Criminal Justice | 3 |
| CJC 112 | Criminology | 3 |
| CJC 131 | Criminal Law | 3 |
| CJC 212 | Ethics and Community Relations | 3 |
| CJC 231 | Constitutional Law | 3 |

Total Credit Hours Required

15

Essential Police Operations Certificate (C55180L2)

This certificate program is intended to provide overview and practical look at the field of law enforcement, including its history and current trends, current and traditional operations, along with practices that failed, applied technology, training and career development. Philosophical orientations influencing departments are also examined, including community policing, professional ethics and community relations, investigative trends and relevant constitutional law protections.

| Major Requirements | | | Credits |
|------------------------------------|--------------------------------|--|-----------|
| CJC 121 | Law Enforcement Operations | | 3 |
| CJC 122 | Community Policing | | 3 |
| CJC 212 | Ethics and Community Relations | | 3 |
| CJC 221 | Investigative Principles | | 4 |
| CJC 231 | Constitutional Law | | 3 |
| Total Credit Hours Required | | | 16 |

Criminal Justice Administration & Management Certificate (C55180L3)

This certificate program is intended to explore the technical aspects of the administration of law enforcement and considerations when addressing special problems, from inside and outside an agency or with regard to special populations or crime problems on the street or in the social realm. Topics include law enforcement operations, the management of critical incidents, professional ethics and community relations, and how departments are typically organized and managed.

| Major Requirements | | | Credits |
|------------------------------------|--------------------------------|--|-----------|
| CJC 121 | Law Enforcement Operations | | 3 |
| CJC 170 | Critical Incident Management | | 3 |
| CJC 212 | Ethics and Community Relations | | 3 |
| CJC 215 | Organization & Administration | | 3 |
| CJC 231 | Constitutional Law | | 3 |
| Total Credit Hours Required | | | 15 |

Courts and the Law Certificate (C55180L4)

This certificate program is intended to provide an overview of the operation of the court systems. Topics include criminal law complaints, enforcement, defenses and case adjudication. Broad areas of related civil ramifications and constitutional law protections and rights are examined along with special applications in juvenile justice, and the procedure of various courts.

| Major Requirements | | | Credits |
|------------------------------------|-----------------------------|--|-----------|
| CJC 131 | Criminal Law | | 3 |
| CJC 113 | Juvenile Justice | | 3 |
| CJC 132 | Court Procedures & Evidence | | 3 |
| CJC 231 | Constitutional Law | | 3 |
| CJC 232 | Civil Liability | | 3 |
| Total Credit Hours Required | | | 15 |

Criminal Investigations and Crime Scenes Certificate (C55180L5)

This certificate program is intended to provide a glimpse into the world of professional criminal investigator and forensic criminalist and the traditional practices and considerations of those endeavors. Topics include law enforcement typical investigative procedures, investigative traditions and trends, investigations by crime category, specific procedures such as crime scene photography or interviewing, and the controls of criminal and constitutional law.

| Major Requirements | | | Credits |
|------------------------------------|--|--|-----------|
| CJC 121 | Law Enforcement Operations | | 3 |
| CJC 114 | Investigative Photography (or CJC 120) | | 2 |
| CJC 221 | Investigative Principles | | 4 |
| CJC 222 | Criminalistics | | 3 |
| CJC 231 | Constitutional Law | | 3 |
| Total Credit Hours Required | | | 15 |

Criminal Justice and Special Populations Certificate (C55180L6)

This certificate program is intended to provide insight into the considerations inherent in serving special populations within the Criminal Justice system. Topics explored include juvenile justice, substance abuse, victimology, organized crime, crisis intervention and those individuals afforded special protection under law.

| Major Requirements | | | Credits |
|------------------------------------|---------------------|--|-----------|
| CJC 113 | Juvenile Justice | | 3 |
| CJC 213 | Substance Abuse | | 3 |
| CJC 214 | Victimology | | 3 |
| CJC 223 | Organized Crime | | 3 |
| CJC 225 | Crisis Intervention | | 3 |
| Total Credit Hours Required | | | 15 |

Emergency Medical Science

This curriculum is designed to prepare graduates to enter the workforce as paramedics. Additionally, the program can provide an Associate Degree for individuals desiring an opportunity for career enhancement.

The course of study provides the student an opportunity to acquire basic and advanced life support knowledge and skills by utilizing classroom instruction, practical laboratory sessions, hospital clinical experience, and field internships with emergency medical service agencies.

Students progressing through the program become eligible to apply for both state and national certification exams. Employment opportunities include ambulance services, fire and rescue agencies, air medical services, specialty areas of hospitals, industry, educational institutions, and government agencies.

This program is seeking accreditation by **Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP)**, 8301 Lakeview Parkway, Suite 111-312, Rowlett, TX 75088, www.coaemsp.org, Phone: 214-703-8445, Fax: 214-703-8992

Specific Requirements

- General college admission requirements:
 - Complete application for admission.
 - Successfully complete College Placement Test.
 - High School transcript or GED scores on file with admissions office.
 - Official transcript of any prior college credit on file with admissions office.
- Must be 18 years of age by the end of the first semester of the program.

- Current N.C. driver's license.
- Acceptable reports of medical examinations and immunizations.
- Criminal background checks will be required prior to admission to clinical sites.

Emergency Medical Science
Bridge Program

The Emergency Medical Science Bridge Program is designed to allow currently certified non-degree paramedics to earn an Associate in Applied Science (A.A.S.) degree in Emergency Medical Science.

Specific Requirements

1. General college admission requirements:
 - a. Complete application for admission.
 - b. Successfully complete College Placement Test.
 - c. High School transcript or GED scores on file with admissions office.
 - d. Official transcript of any prior college credit on file with admissions office.
2. Possess current North Carolina driver's license.
3. Complete interview with EMS Department faculty.
4. At least 4,000 hours of patient contact at the paramedic level as evidenced by the signature of the director of the EMS agency with which the paramedic is affiliated and the medical director of the Advanced Life Support system with which the paramedic is affiliated.
5. Current Emergency Medical Technician-Paramedic certification.* (A copy of the paramedic education program transcript must be on file in the EMS Department.)
6. Current Basic Cardiac Life Support certification.
7. Current Advanced Cardiac Life Support certification.
8. Current Basic Trauma Life Support certification.
9. Current Pediatric Advanced Life Support certification.

The above certifications and experience (4-9) will provide 41 hours of proficiency credit toward the A.A.S. degree and will count toward the A-B Tech residency requirement. These 41 hours represent the major area (EMS) courses required for EMT-Basic, EMT-Intermediate, and Paramedic certification that are not required as part of the EMS Bridge Program.

Fire Protection Technology

This curriculum is designed to provide individuals with technical and professional knowledge to make decisions regarding fire protection for both public and private sectors. It also provides a sound foundation for continuous higher learning in fire protection, administration, and management.

Course work includes classroom and laboratory exercises to introduce the student to various aspects of fire protection. Students will learn technical and administrative skills such as hydraulics, hazardous materials, arson investigation, fire protection safety, fire suppression management, law, and codes.

Graduates should qualify for employment or advancement in governmental agencies, industrial firms, insurance rating organizations, educational organizations, and municipal fire departments. Employed persons should have opportunities for skilled and supervisory-level positions with their current organizations.

Fire Protection Technology Certificate (C55240L1)

The certificate in Fire Protection Technology provides recognition of the accomplishment of selected courses within the Fire Protection Technology program. These courses should be of particular value to those who are serving or who aspire to serve as officers in fire departments and similar organizations as these courses are comparable with the requirements of NFPA 1021, the National Standard for Fire Officer Professional Qualifications, for Fire Officer 1 and 2.

| Major Requirements | | | Credits |
|------------------------------------|-----|--------------------------|-----------|
| ENG | 111 | Expository Writing | 3 |
| FIP | 132 | Building Construction | 3 |
| FIP | 152 | Fire Protection Law | 3 |

Engineering and Applied Technology

The Engineering and Applied Technology division offers a variety of Associate in Applied Science degree programs in engineering technologies and applied technologies. Most programs are available on a day and evening basis.

Students enrolled in this division are provided an appropriate mix of theory and hands-on applications. Students in the diploma programs spend much of their time working under industrial shop conditions. Modern facilities include well-equipped laboratories and shops to support goals of the programs. Emphasis is placed on student proficiency in the use of procedures, equipment, and instruments related to the specific program area. Appropriate related and general education courses support these applied programs.

For students interested in starting or managing their own business, the Student Business Incubator is one of many programs and services offered by the A-B Tech Small Business Center/Business Incubator.

 Mechanical Engineering Technology - Plastic Injection Molding
 Mechanical Engineering Technology - Pre-Engineering
 Mechanical Engineering Technology - Mechanical Drafting
 Mechanical Engineering Technology - Quality & cGMP
 Surveying Technology - Geospatial Technology Fundamentals
 Surveying Technology - Surveying Fundamentals
 Welding Technology - Basic Welding I

Air Conditioning, Heating and Refrigeration Technology

The Air Conditioning, Heating, and Refrigeration Technology curriculum provides the basic knowledge to develop skills necessary to work with residential and light commercial systems.

Topics include mechanical refrigeration, heating and cooling theory, electricity, controls, and safety. The diploma program covers air conditioning, furnaces, heat pumps, tools and instruments.

Graduates will be able to assist in the startup, preventive maintenance, service, repair, and/or installation of residential and light commercial systems.

The Basic and Intermediate certificates include mechanical and fuel gas codes, residential system sizing, and advanced comfort systems.

Air Conditioning, Heating and Refrigeration Technology Diploma (D35100)

Courses requiring a grade of "C" or better: AHR and ELC

| First Semester (Fall) | | Credits |
|--------------------------|---|---------|
| AHR 111 | Introduction to Electricity | 3 |
| AHR 112 | Heating Technology | 4 |
| AHR 130 | HVAC Controls | 3 |
| AHR 170 | Heating Lab | 1 |
| ELC 132 | Electrical Drawings | 2 |
| PHY 121 | Applied Physics (or a MAT equivalent) | 4 |
| WLD 113 | Soldering and Brazing | 2 |
| Second Semester (Spring) | | |
| AHR 110 | Introduction to Refrigeration | 5 |
| AHR 113 | Comfort Cooling | 4 |
| AHR 114 | Heat Pump Technology | 4 |
| AHR 160 | Refrigerant Certification | 1 |
| AHR 172 | Heat Pump Lab | 1 |

| AHR 172 | Heat Pump Lab | 1 |
| Total Credit Hours Required | | 39 |

Air Conditioning, Heating and Refrigeration Technology Basic Certificate (C35100L1)

The Basic Air Conditioning and Heating certificate program teaches the student concepts and skills needed to service and repair various types of domestic furnaces and air conditioners.

| Major Requirements | | Credits |
|------------------------------------|-------------------------------|-----------|
| AHR 110 | Introduction to Refrigeration | 5 |
| AHR 111 | Introduction to Electricity | 3 |
| AHR 112 | Heating Technology | 4 |
| AHR 160 | Refrigerant Certification | 1 |
| AHR 170 | Heating Lab (or AHR 120) | 1 |
| AHR 210 | Residential Building Code | 2 |
| ELC 132 | Electrical Drawings | 2 |
| Total Credit Hours Required | | 18 |

Air Conditioning, Heating and Refrigeration Technology Intermediate Certificate (C35100L2)

The Intermediate Air Conditioning and Heating certificate program teaches students concepts and skills needed to service and repair domestic heat pumps, light commercial air conditioning, and light commercial heating units. The material for the EPA's CFC license will be covered, and the exam will be given during the program.

The Basic Air Conditioning and Heating certificate program must be completed before beginning this program.

| Major Requirements | | Credits |
|------------------------------------|--|-----------|
| AHR 113 | Comfort Cooling | 4 |
| AHR 114 | Heat Pump Technology | 4 |
| AHR 130 | HVAC Controls | 3 |
| AHR 160 | Refrigerant Certification | 1 |
| AHR 172 | Heat Pump Lab | 1 |
| AHR 211 | Residential System Design (or AHR 212) | 3 |
| WLD 113 | Soldering and Brazing | 2 |
| Total Credit Hours Required | | 18 |

Automotive Systems Technology

The Automotive Systems Technology curriculum prepares individuals for employment as automotive service technicians.

Classroom and lab experiences integrate technical and academic course work. Emphasis is placed on theory, servicing and operation of brakes, electrical/electronic systems, engine performance, steering/suspension, automatic transmission/transaxles, engine repair, climate control, and manual drive trains.

Upon completion of this curriculum, students will be prepared to take the ASE exam and be ready for full-time employment in dealerships and repair shops in the automotive service industry.

The instruction, course of study, facilities and equipment of A-B Tech have been evaluated by the National Automotive Technicians Education Foundation and meet the National Institute for Automotive Service Excellence standards of quality for the training of automobile technicians in the following areas: Automatic Transmission & Transaxle, Brakes, Electrical/Electronic Systems, Engine Performance, Engine Repair, Heating and Air Conditioning, Manual Drive Train & Axles, Suspension & Steering.

National Automotive Technicians Education Foundation 101 Blue Seal Drive, SE, Suite 101, Leesburg, VA 20175; Phone: 703-669-6650; Fax: 703-669-6125

Carpentry

The Carpentry curriculum is designed to train students to construct residential structures using standard building materials, and hand and power tools. Carpentry skills and a general knowledge of residential construction methods also will be taught.

Course work includes footings and foundations, framing, interior and exterior trim, cabinetry, blueprint reading, residential planning and estimating, and other related topics. Students will develop skills through hands-on participation.

Graduates will qualify for employment in the residential building construction field as rough carpenters, framing carpenters, roofers, maintenance carpenters, and other related job titles.

Basic Carpentry Certificate (C35180L1)

| Major Requirements | | Credits |
|-----------------------------|--------------------------------|---------|
| BPR 130 | Blueprint Reading/Construction | 2 |
| CAR 111 | Carpentry I | 8 |
| CAR 113 | Carpentry III | 6 |
| Total Credit Hours Required | | 16 |

Basic Cabinetry Certificate (C35180L2)

| Major Requirements | | Credits |
|-----------------------------|-----------------------|---------|
| CAB 110 | Shop Operation | 4 |
| CAB 119 | Cabinetry/Millworking | 7 |
| MEC 110 | Intro to CAD/CAM | 2 |
| MEC 181 | Intro to CIM | 2 |
| Total Credit Hours Required | | 15 |

Civil Engineering Technology

The Civil Engineering Technology curriculum provides the application of relevant theory of engineering needed by technicians to carry out planning and supervisory tasks in the construction of transportation systems, residential and commercial buildings, bridges, dams, and water and wastewater treatment systems.

Course work includes the communication and computational skills required to support fields such as materials testing, structures, estimating, project management, hydraulics, environmental technology, and surveying. Additional course work will cover the operation of computers and application software including computer-aided drafting.

Graduates will qualify for technician-level jobs with both public and private engineering, construction, and surveying agencies.

Civil Engineering Technology Associate in Applied Science Degree (A40140)

Courses requiring a grade of “C” or better: ACA, CIS, CIV, DFT, EGR, MEC, SRV

| First Semester (Fall) | | | Credits |
|--------------------------|--|--|---------|
| CIS 110 | Introduction to Computers | | 3 |
| EGR 110 | Introduction to Engineering Tech (or ACA 115 or EGR 150) | | 2 |
| EGR 115 | Intro to Technology | | 3 |
| ENG 111 | Expository Writing | | 3 |
| MAT 121 | Algebra/Trigonometry I (or MAT 171/171A) | | 3 |
| Second Semester (Spring) | | | |
| CIV 110 | Statics/Strength of Materials (or MEC 250) | | 4 |
| DFT 119 | Basic CAD | | 2 |
| ENG 114 | Professional Research and Reporting (or COM 120 or COM 231) | | 3 |
| MAT 122 | Algebra/Trigonometry II (or MAT 172/172A) | | 3 |
| SRV 110 | Surveying I | | 4 |
| Third Semester (Summer) | | | |
| CIV 211 | Hydraulics and Hydrology | | 3 |
| SRV 111 | Surveying II | | 4 |
| | Humanities/Fine Arts Elective | | 3 |
| | Social/Behavioral Sciences Elective | | 3 |

Fourth Semester (Fall)

| | | |
|---------|---------------------------|---|
| CIV 111 | Soils and Foundations | 3 |
| CIV 125 | Civil/Surveying CAD | 3 |
| CIV 210 | Engineering Materials | 2 |
| CIV 215 | Highway Technology | 2 |
| CIV 220 | Basic Structural Concepts | 2 |
| CIV 240 | Project Management | 3 |

Fifth Semester (Spring)

Program Totals **72**

Computer-Aided Drafting Technology

This curriculum prepares individuals for employment as computer-aided drafting technicians. Graduates will be prepared for a wide variety of jobs that involve managing the hardware and software of a CAD system. Emphasis is placed on developing the student's ability to interface with computer hardware and software in a CAD office.

Students will use CAD workstations to create and manage two and three-dimensional models for a wide variety of fields. Students will link CAD documents to other applications such as a database, GIS maps, spreadsheets, word processing, or CNC machining systems. Course work includes the study of drafting, computer hardware and operating systems, two- and three-dimensional computer models, solid modeling, rendering, and engineering systems.

Graduates will qualify for CAD jobs in a wide variety of fields that use computer-aided drafting technology. Job titles include CAD technician, CAD manager, CAD drafter and detail drafter.

Please note: The CAD program also includes course work in creating architectural and landscape designs, with an emphasis on sustainable practices in these areas.

Computer-Aided Drafting Technology**Associate in Applied Science Degree (A50150)**

Courses requiring a grade of "C" or better: ACA, ARC, ART, CET, CIS, CIV, CST, DFT, EGR, GIS, LAR, MEC, SRV

First Semester (Fall)

| | | Credits |
|---------|---|----------------|
| ACA 115 | Success and Study Skills (or EGR 110) | 1 |
| ARC 111 | Intro to Architecture Technology | 3 |
| EGR 125 | Application Software for Technicians I (or CIS 110 or CIS 111) | 2 |
| DFT 151 | CAD I | 3 |
| LAR 242 | Planning and Environment | 3 |

Second Semester (Spring)

| | | |
|---------|---|---|
| ARC 112 | Construction Materials and Methods | 4 |
| ARC 113 | Residential Architecture Technology I | 3 |
| DFT 152 | CAD II | 3 |
| DFT 154 | Intro to Solid Modeling | 3 |
| MAT 121 | Algebra/Trigonometry I (or MAT 171/171A) | 3 |

Third Semester (Summer)

| | | |
|---------|------------------------------------|---|
| COM 231 | Public Speaking (or ENG 114) | 3 |
| ENG 111 | Expository Writing (or ENG 110) | 3 |
| | Humanities/Fine Arts Elective | 3 |
| | Social/Behavioral Science Elective | 3 |

Fourth Semester (Fall)

| | | |
|---------|--------------------------------------|---|
| ARC 230 | Environmental Systems | 4 |
| CST 211 | Construction Surveying (or SRV 110) | 3 |
| DFT 153 | CAD III | 3 |
| DFT 253 | CAD Data Management | 3 |
| LAR 210 | Principles of Landscape Architecture | 2 |
| | Major Elective* | 3 |

Fifth Semester (Spring)

| | | |
|---------|---------------------------------|---|
| CET 111 | Computer Upgrade/Repair I | 3 |
| CIV 125 | Civil/Surveying CAD | 3 |
| DFT 259 | CAD Project | 3 |
| MEC 110 | Introduction to CAD/CAM | 2 |
| LAR 230 | Principles of Exterior Planting | 4 |

Program Totals **73**

*Major Electives: ARC 131, ARC 210, ARC 240, ARC 261, ART 121, ART 171, CET 211, COE 111CA, DFT 170, DFT 189, GIS 111

Computer-Aided Drafting Technology
Certificate (C50150L1)

The purpose of this certificate program is to provide basic computer-aided drafting (CAD) skills. Students learn CAD techniques for producing 2D and 3D technical drawings using different CAD software programs. Accurate and efficient use of the computer and software are emphasized.

| Major Requirements | | | Credits |
|-----------------------------|--|--|---------|
| DFT 151 | CAD I | | 3 |
| DFT 152 | CAD II | | 3 |
| DFT 153 | CAD III | | 3 |
| DFT 154 | Intro to Solid Modeling (or CIV 125 or DFT 189) | | 3 |
| Total Credit Hours Required | | | 12 |

Architectural Drafting Certificate (C50150L2)

The purpose of this certificate program is to provide basic architectural drafting skills. Students will produce residential construction drawings, including floor plans, foundation plans, typical wall sections, elevations, and details following standard practices. Topics include drafting practices, 2D CAD software, traditional and sustainable building methods, and building materials.

| Major Requirements | | | Credits |
|-----------------------------|-------------------------------------|--|---------|
| ARC 111 | Intro to Architecture Technology | | 3 |
| ARC 112 | Construction Materials and Methods | | 4 |
| ARC 113 | Residential Architecture Technology | | 3 |
| DFT 151 | CAD I | | 3 |
| Total Credit Hours Required | | | 13 |

Landscape Architecture Drafting Certificate
(C50150L3)

The purpose of this certificate program is to provide basic drafting and planning skills for sustainable landscape design. Students will study regenerative strategies for landscape planning. They will also construct landscape architecture drawings using 2D and 3D CAD programs. Topics include drafting practices, 2D and 3D CAD software, sustainable practices for landscape design, and plant selection.

| Major Requirements | | | Credit |
|-----------------------------|---------------------------------------|--|--------|
| DFT 151 | CAD I | | 3 |
| LAR 210 | Principles of Landscape Architecture | | 2 |
| LAR 230 | Principles of Exterior Planting | | 4 |
| LAR 242 | Planning and Environment (or CIV 125) | | 3 |
| Total Credit Hours Required | | | 12 |

Computer Engineering Technology

The Computer Engineering Technology curriculum provides the skills required to install, service, and maintain computers, peripherals, networks, and micro-processor and computer controlled equipment. It includes training in both hardware and software, emphasizing operating systems concepts to provide a unified view of computer systems.

Course work includes mathematics, physics, electronics, digital circuits, and programming, with emphasis on the operation, use, and interfacing of memory and devices to the CPU. Additional topics may include communications, networks, operating systems, programming languages, internet configuration and design, and industrial applications.

Graduates will qualify for employment opportunities in electronics technology, computer service, computer networks, server maintenance, programming, and other areas of knowledge in electronics and computer systems. Graduates may also qualify for certification in electronics, computers, or networks.

Computer Engineering Technology Associate in Applied Science Degree (A40160)

Courses requiring a grade of "C" or better: CET, CSC, EGR, ELC, ELN

| First Semester (Fall) | | Credits |
|--------------------------|--|---------|
| CET 111 | Computer Upgrade/Repair I | 3 |
| EGR 110 | Introduction to Engineering | 2 |
| ELC 138 | DC Circuit Analysis | 3 |
| ENG 111 | Expository Writing | 3 |
| MAT 121 | Algebra/Trigonometry I (or MAT 171/171A**) | 3 |
| Second Semester (Spring) | | |
| CET 211 | Computer Upgrade/Repair II | 3 |
| EGR 125 | Application Software for Technology | 2 |
| ELC 139 | AC Circuit Analysis | 3 |
| MAT 122 | Algebra/Trigonometry II (or MAT 172/172A**) | 3 |
| | Humanities/Fine Arts Elective | 3 |
| Third Semester (Summer) | | |
| ELC 117 | Motors and Controls | 4 |
| ELN 237 | Local Area Networks | 3 |
| ELN 238 | Advanced LANs | 3 |
| PHY 131 | Physics-Mechanics (or PHY 151**) | 4 |

Fourth Semester (Fall)

| | | |
|---------|--|---|
| CSC 143 | Object-Oriented Programming (or CET 161) | 3 |
| ELC 128 | Introduction to PLC | 3 |
| ELN 133 | Digital Electronics | 4 |
| ELN 137 | Electrical Devices & Circuits | 5 |
| | Social/Behavioral Science Elective | 3 |

Fifth Semester (Spring)

| | | |
|---------|---|---|
| CET 212 | Integrated Manufacturing Systems | 2 |
| ELN 232 | Introduction to Microprocessors | 4 |
| ENG 114 | Professional Research and Reporting | 3 |
| ELN 154 | Introduction to Data Communications (or ELN 234) | 3 |
| | Major Electives* | 3 |

Program Totals **75**

*Major Electives: CET 125, CHM 135, COE 112/COE 115, EGR 285, ELC 213, ELC 228, ELN 133A, ELN 150, MAT 151/MAT 151A, MAT 271.

**Recommended courses for students seeking transfer for bachelor's degree in engineering technology.

Computer Engineering Technology - Personal Computer and Network Maintenance Certificate (C40160L1)

This training program provides the individual the theory and hands-on experience to become a PC specialist capable of performing maintenance and upgrades on all types of personal computer systems. This program combines the theory of computer and network operation with the practical skills necessary for efficient diagnosis and repair work in the field. The program provides the foundation for further study of networks and new computer-based products.

| Major Requirements | | Credits |
|------------------------------------|----------------------------|-----------|
| CET 111 | Computer Upgrade/Repair I | 3 |
| CET 125 | Voice and Data Cabling | 3 |
| CET 211 | Computer Upgrade/Repair II | 3 |
| ELN 237 | Local Area Networks | 3 |
| ELN 238 | Advanced LAN | 3 |
| Total Credit Hours Required | | 15 |

Computer-Integrated Machining Technology

The Computer-Integrated Machining Technology curriculum is designed to develop skills in the theory and safe use of hand tools, power machinery, computerized equipment and sophisticated precision inspection instruments.

Students will learn to interpret blueprints, set up manual and computer numerical control (CNC) machines, perform basic and advanced machining operations and make decisions to ensure that work quality is maintained.

Employment opportunities for machining technicians exist in manufacturing industries, public institutions, governmental agencies and in a wide range of specialty machining job shops.

Computer-Integrated Machining Technology Associate in Applied Science Degree (A50210)

Courses requiring a grade of "C" or better: ACA, BPR, MAC, MEC, WLD

| First Semester (Fall) | | Credits |
|-----------------------|------------------------------------|---------|
| ACA 115 | Success and Study Skills | 1 |
| BPR 111 | Blueprint Reading I | 2 |
| MAC 111 | Machining Technology I | 6 |
| MAC 121 | Introduction to CNC | 2 |
| MAC 151 | Machining Calculations | 2 |
| | Social/Behavioral Science Elective | 3 |

| Second Semester (Spring) | | Credits |
|--------------------------|-----------------------------------|---------|
| BPR 121 | Blueprint Reading: Mechanical | 2 |
| ENG 110 | Freshman Composition (or ENG 111) | 3 |
| MAC 112 | Machining Technology II | 6 |
| MAC 122 | CNC Turning | 2 |
| MAC 124 | CNC Milling | 2 |
| MAC 152 | Advanced Machining Calculations | 2 |

| Third Semester (Summer) | | Credits |
|-------------------------|------------------------------|---------|
| COM 231 | Public Speaking (or COM 120) | 3 |

| Fourth Semester (Fall) | | Credits |
|------------------------|-----------------------------------|---------|
| MAC 226 | CNC EDM Machining | 2 |
| MAC 241 | Jigs and Fixtures I | 4 |
| MEC 231 | CAM I | 3 |
| MAT 121 | Algebra/Trigonometry (or PHY 121) | 3 |
| | Humanities/Fine Arts Elective | 3 |

| Fifth Semester (Spring) | | |
|-------------------------|----------------------|---|
| MAC 222 | Advanced CNC Turning | 2 |
| MAC 224 | Advanced CNC Milling | 2 |
| MAC 245 | Mold Construction I | 4 |
| MAC 247 | Production Tooling | 2 |

Computer-Integrated Machining Technology Basic Certificate (C50210L1)

This certificate program is designed to develop fundamental skills in the operation of machine tools including drilling, turning, milling and grinding. Training in basic measuring, layout, and blueprint reading is also provided.

Students who complete the program will be prepared for employment as entry-level machine operators/machinist apprentices in area manufacturing firms. Courses in this program can be transferred directly into the Computer-Integrated Machining Technology Associate Degree curriculum.

| Major Requirements | | Credits |
|------------------------------------|----------------------|-----------|
| BPR 111 | Blueprint Reading | 2 |
| MAC 121 | Introduction to CNC | 2 |
| MAC 124 | CNC Milling | 2 |
| MAC 111 | Machining Technology | 6 |
| Total Credit Hours Required | | 12 |

Computer-Integrated Machining Technology CNC Programming Certificate (C50210L2)

The purpose of this certificate program is to introduce basic CAD/CAM programming skills to individuals who want to learn CNC machining. Students will learn 2D and 3D programming as well as 2 axis and 3 axis machining. The student will make the parts they design.

| Major Requirements | | Credits |
|------------------------------------|-------------------------------|-----------|
| BPR 111 | Blueprint Reading | 2 |
| BPR 121 | Blueprint Reading: Mechanical | 2 |
| MAC 121 | Introduction to CNC | 2 |
| MAC 151 | Machining Calculations | 2 |
| MAC 122 | CNC Turning | 2 |
| MAC 124 | CNC Milling | 2 |
| MEC 231 | CAM I | 3 |
| Total Credit Hours Required | | 15 |

Computer-Integrated Machining Technology Advanced CNC Programming Certificate (C50210L3)

The purpose of this certificate program is to introduce advanced CAD/CAM programming skills to individuals who have completed the courses in the CNC Programming Certificate or equivalent. Students will learn 4 axis and 5 axis programming and machining. The students will make the parts they design.

| Major Requirements | | Credits |
|------------------------------------|-------------------------------|-----------|
| BPR 121 | Blueprint Reading: Mechanical | 2 |
| MAC 228 | Advanced CNC Processes | 3 |
| MAC 231 | CAM: CNC Turning | 3 |
| MAC 232 | CAM: CNC Milling | 3 |
| MAC 234 | Adv Multi-Axis Machining | 3 |
| Total Credit Hours Required | | 14 |

Computer-Integrated Machining Technology Fundamentals of Metals Certificate (C50210L4)

The purpose of this certificate program is to introduce students to metals manufacturing.

| Major Requirements | | Credits |
|------------------------------------|-------------------------------|-----------|
| BPR 111 | Blueprint Reading | 2 |
| BPR 121 | Blueprint Reading: Mechanical | 2 |
| MAC 111 | Machining Technology I | 6 |
| MAC 112 | Machining Technology II | 6 |
| Total Credit Hours Required | | 16 |

Construction Management Technology

This curriculum is designed to prepare individuals for careers in the construction management field. Such positions may include project manager, superintendent, estimator, or foreman.

Course work includes safety, planning, scheduling, cost control, productivity, human relations, estimating, and building codes. Students will also gain proficiency in specific construction-related skills.

Graduates will qualify for entry-level positions in the field of construction management.

CMT students are eligible for entry-level management positions in traditional commercial and residential construction projects as well as non-traditional construction projects such as large wind turbine and photovoltaic solar projects.

Construction Management Technology Associate in Applied Science (A35190)

Courses requiring a grade of "C" or better: ACA, ALT, ARC, BPR, CIS, CIV, CMT, COE, ELC, EGR, SPA, SST, CAR

| First Semester (Fall) | | | Credits |
|--------------------------|--|--|---------|
| EGR 110 | Intro. to Engineering Tech. (or ACA 115) | | 2 |
| CIS 111 | Basic PC Literacy (or EGR 125) | | 2 |
| BPR 130 | Blueprint Reading/Construction | | 2 |
| ARC 112 | Construction Materials and Methods | | 4 |
| | Major Electives* | | 8 |
| Second Semester (Spring) | | | |
| CAR 115 | Residential Planning and Estimating | | 3 |
| ARC 131 | Building Codes | | 3 |
| ENG 110 | Freshman Composition (or ENG 111) | | 3 |
| SST 140 | Green Building Concepts | | 2 |
| | Other Required Elective* | | 6 |
| Third Semester (Summer) | | | |
| COM 120 | Intro to Interpersonal Communications | | 3 |
| | (or COM 231 or ENG 114) | | |
| | Social/Behavioral Science Elective | | 3 |
| | Humanities/Fine Arts Elective | | 3 |
| Fourth Semester (Fall) | | | |
| ACC 120 | Principles of Financial Accounting | | 4 |
| MAT 121 | Algebra/Trig. I | | 3 |
| | (or PHY 110/110A or PHY121) | | |

| MAT 121 | Algebra/Trig I (or PHY 121 or PHY 110/110A) | 3 |

Total Credit Hours Required **42**

*CMT prefix classes are offered in the evenings only.

Construction Management Technology Certificate - Evening Schedule (C35190L1)

The Construction Management Technology certificate is designed for the skilled tradesman who is experienced in the construction industry and has the desire to advance to construction management. Recent high school graduates will also be accepted.

Major Requirements

| | | |
|---------|---------------------------------------|---|
| BPR 130 | Blueprint Reading/Construction | 2 |
| CMT 210 | Professional Construction Supervision | 3 |
| CMT 212 | Total Safety Performance | 3 |
| CMT 214 | Planning and Scheduling | 3 |
| CMT 216 | Costs and Productivity | 3 |
| CMT 218 | Human Relations Issues | 3 |

Total Credit Hours Required **17**

Electrical/Electronics Technology

The Electrical/Electronics Technology curriculum is designed to provide training for persons interested in the installation and maintenance of electrical/electronic systems found in residential, commercial and industrial facilities.

Training, most of which is hands-on, includes such topics as AC/DC theory, basic wiring practices, digital electronics, programmable logic controllers, industrial motor controls, the National Electric Code, and other subjects as local needs require.

Graduates should qualify for a variety of jobs in the electrical/electronics field as an on-the-job trainee or apprentice, assisting in the layout, installation, and maintenance of electrical/electronic systems.

Electrical/Electronics Technology Associate in Applied Science Degree (A35220)

Courses requiring a grade of "C" or better: COE, EGR, ELC, ELN

First Semester (Fall) Credits

| | | |
|-----------|--|---|
| EGR 110 | Introduction to Engineering Technology I | 2 |
| ELC 112AB | DC/AC Electricity (or ELC 138) | 3 |
| ELC 113 | Basic Wiring I | 4 |
| ENG 111 | Expository Writing (or ENG 110) | 3 |
| MAT 121 | Algebra/Trigonometry | 3 |

Second Semester (Spring)

| | | |
|-----------|--|---|
| EGR 125 | Application Software for Tech | 2 |
| ELC 112BB | DC/AC Electricity (or ELC 139) | 2 |
| ELC 115 | Industrial Wiring | 4 |
| ELN 152 | Fabrication Techniques | 2 |
| MAT 122 | Algebra/Trigonometry II (or Natural Science/Mathematics Elective) | 3 |

Third Semester (Summer)

| | | |
|---------|------------------------------------|---|
| ELC 117 | Motors and Controls | 4 |
| PHY 131 | Physics-Mechanics | 4 |
| | Humanities/Fine Arts Elective | 3 |
| | Social/Behavioral Science Elective | 3 |

Fourth Semester (Fall)

| | | |
|---------|---|---|
| ELC 128 | Introduction to PLC | 3 |
| ELN 133 | Digital Electronics | 4 |
| ELN 137 | Electronic Devices & Circuits | 5 |
| ENG 114 | Prof Research and Report Writing (or COM 120 or COM 231) | 3 |

Fifth Semester (Spring)

| | | |
|---------|--------------------------|---|
| ELC 118 | National Electrical Code | 2 |
| ELC 213 | Instrumentation | 4 |
| ELC 228 | PLC Applications | 4 |
| HYD 110 | Hydraulics/Pneumatics | 3 |
| | Major Elective* | 2 |

Program Totals 72

*Major Elective: ELC 229, COE 112, ALT 120, SST 120

Electrical/Electronics Technology Associate in Applied Science Degree (A35220) – Evening Schedule

First Semester (Fall) Credits

| | | |
|-----------|--|---|
| EGR 110 | Introduction to Engineering Technology | 2 |
| ELC 112AB | DC/AC Electricity (or ELC 138) | 3 |
| MAT 121 | Algebra/Trigonometry | 3 |

Second Semester (Spring)

| | | |
|-----------|--|---|
| ELC 112BB | DC/AC Electricity (or ELC 139) | 2 |
| ELN 152 | Fabrication Techniques | 2 |
| MAT 122 | Algebra/Trigonometry II (or Natural Science/Mathematics Elective) | 3 |

Third Semester (Summer)

| | | |
|---------|---------------------------------|---|
| ENG 111 | Expository Writing (or ENG 110) | 3 |
| PHY 131 | Physics-Mechanics | 4 |

Fourth Semester (Fall)

| | | |
|---------|-------------------------------|---|
| EGR 125 | Application Software for Tech | 2 |
| ELC 113 | Basic Wiring I | 4 |
| ELN 137 | Electronic Devices & Circuits | 5 |

Fifth Semester (Spring)

| | | |
|---------|---|---|
| ENG 114 | Prof Research and Report Writing (or COM 120 or COM 231) | 3 |
|---------|---|---|

Total Credit Hours Required **72**

*Major Elective: ELC 229, COE 112, ALT 120, SST 120

Electrical/Electronics Technology Diploma (D35220)

Courses requiring a grade of "C" or better: EGR, ELC, ELN

First Semester (Fall)

| | | Credits |
|-----------|-----------------------------------|----------------|
| ELC 112AB | DC/AC Electricity (or ELC 138) | 3 |
| MAT 101 | Algebra/Trigonometry (or MAT 121) | 3 |

Second Semester (Spring)

| | | |
|-----------|--------------------------------|---|
| ELC 112BB | DC/AC Electricity (or ELC 139) | 2 |
| ELN 152 | Fabrication Techniques | 2 |
| EGR 125 | Application Software for Tech | 2 |

Third Semester (Summer)

| | | |
|---------|--|---|
| COM 120 | Intro to Interpersonal Communications (or ENG 110 or ENG 111) | 3 |
|---------|--|---|

Fourth Semester (Fall)

| | | |
|---------|---------------------|---|
| ELC 113 | Basic Wiring I | 4 |
| ELC 117 | Motors and Controls | 4 |

Fifth Semester (Spring)

| | | |
|---------|--------------------------|---|
| ELC 115 | Industrial Wiring | 4 |
| ELC 128 | Introduction to PLC | 3 |
| ELC 118 | National Electrical Code | 2 |
| ELC 213 | Instrumentation | 4 |

Total Credit Hours Required **36**

Electrical/Electronics Technology**Electrical Wiring Certificate (C35220L1)**

The Electrical Wiring Certificate program teaches the student the concepts and skills needed to install and repair residential, commercial, and industrial wiring systems. Preparation for state and local licenses are achieved through laboratory and classroom studies that focus on the National Electrical Code.

Major Requirements

| | | |
|---------|-------------------|---|
| ELC 112 | DC/AC Electricity | 5 |
| ELC 113 | Basic Wiring I | 4 |
| ELC 115 | Industrial Wiring | 4 |

Total Credit Hours Required **13**

Electrical/Electronics Technology Instrumentation and Control Certificate (C35220L2)

The Instrumentation and Control Certificate program teaches the student the concepts and skills needed to program, install, calibrate and service systems that acquire and record industrial and environmental data.

Major Requirements

| | | |
|---------|---------------------|---|
| ELC 112 | DC/AC Electricity | 5 |
| ELC 128 | Introduction to PLC | 3 |
| ELC 213 | Instrumentation | 4 |

Total Credit Hours Required **12**

Electrical/Electronics Technology Building Automation & Controls (C35220L3)

This advanced certificate is intended to prepare students to install and maintain automated energy and environmental control systems.

Major Requirements

| | | |
|---------|---------------------|---|
| ELC 117 | Motors and Controls | 4 |
| ELC 128 | Intro to PLCs | 3 |
| ELC 213 | Instrumentation | 4 |
| SST 120 | Energy Use Analysis | 3 |

Total Credit Hours **14**

Electronics Engineering Technology

The Electronics Engineering Technology curriculum prepares individuals to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems.

A broad-based core of courses, including basic electricity, solid-state fundamentals, digital concepts, and microprocessors, ensures the student will develop the skills necessary to perform entry-level tasks. Emphasis is placed on developing the student's ability to analyze and troubleshoot electronic systems.

Graduates should qualify for employment as engineering assistants or electronic technicians with job titles such as electronics engineering technician, field service technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Electronics Engineering Technology
Associate in Applied Science Degree (A40200)

Courses requiring a grade of "C" or better: COE, ELC, and ELN

| First Semester (Fall) | | | Credits |
|-----------------------|-----|---|---------|
| CET | 111 | Computer Upgrade/Repair I | 3 |
| ELC | 138 | DC Circuit Analysis | 3 |
| EGR | 110 | Introduction to Engineering Tech | 2 |
| ENG | 111 | Expository Writing (or ENG 110) | 3 |
| MAT | 121 | Algebra/Trigonometry I (or MAT 171/171A**) | 3 |

| Second Semester (Spring) | | | Credits |
|--------------------------|-----|--|---------|
| DFT | 151 | CAD I (or ELN 150) | 3 |
| EGR | 125 | Application Software for Technicians | 2 |
| ELC | 139 | AC Circuit Analysis | 3 |
| ELN | 152 | Fabrication Techniques | 2 |
| MAT | 122 | Algebra/Trigonometry II (or MAT 172/172A**) | 3 |

| Third Semester (Summer) | | | Credits |
|-------------------------|-----|------------------------------------|---------|
| ELC | 117 | Motors and Controls | 4 |
| PHY | 131 | Physics-Mechanics (or PHY 151**) | 4 |
| | | Humanities/Fine Arts Elective | 3 |
| | | Social/Behavioral Science Elective | 3 |

| Fourth Semester (Fall) | | | Credits |
|------------------------|-----|--|---------|
| ELC | 128 | Introduction to PLC | 3 |
| ELN | 137 | Electronic Devices & Circuits | 5 |
| ELN | 133 | Digital Electronics | 4 |
| ENG | 114 | Professional Research and Report Writing | 3 |

| Fifth Semester (Spring) | | | Credits |
|-------------------------|------|---------------------------------|---------|
| ELN | 232 | Introduction to Microprocessors | 4 |
| ELN | 234 | Communication Systems | 4 |
| ELN | 133A | Digital Electronics Lab | 1 |
| | | Major Electives* | 6 |

| | |

|---------|----------------------------------|---|
| ENG 114 | Prof Research and Report Writing | 3 |
|---------|----------------------------------|---|

Total Credit Hours Required **71**

*Major Elective: CET 125, CET 211, CET 212, CHM 135, EGR 285, ELC 213, ELC 228, ELC 229, ELN 237, MAT 151/151A, MAT 271, PHY 152, COE 112/115, SST 120

**Recommended courses for students seeking transfer for bachelor's degree in engineering technology.

Heavy Equipment and Transport Technology (Diesel)

The Heavy Equipment and Transport Technology curriculum is designed to prepare individuals with the knowledge and skills needed to service, troubleshoot, and repair medium and heavy duty vehicles.

The course work includes the purpose, construction features, and principles of operation of medium and heavy duty vehicles.

Graduates of the curriculum will qualify for entry-level employment opportunities in a dealership, fleet shop, or independent garage as a technician. Graduates who have met the work experience requirement will also be prepared to take the ASE certification exam.

Heavy Equipment and Transport Technology Diploma (D60240)

Courses requiring a grade of "C" or better: ACA, HET

First Semester (Fall)

| | | Credits |
|---------|--------------------------------|----------------|
| ACA 115 | Success and Study Skills | 1 |
| HET 110 | Diesel Engines | 6 |
| HET 118 | Mechanical Orientation | 2 |
| HET 125 | Preventative Maintenance | 2 |
| PHY 121 | Applied Physics I (or MAT 121) | 4 |
| MEC 111 | Machine Processes I | 3 |

Second Semester (Spring)

| | | |
|---------|-----------------------------------|---|
| ENG 110 | Freshman Composition (or ENG 111) | 3 |
| HET 112 | Diesel Electrical System | 5 |
| HET 115 | Electronic Engines | 3 |
| HET 119 | Mechanical Transmissions | 3 |
| WLD 112 | Basic Welding Processes | 2 |
| HYD 112 | Hydraulics Medium/Heavy Duty | 2 |

Third Semester (Summer)

| | | |
|---------|---------------------------------|---|
| HET 116 | A/C/Diesel Equipment | 2 |
| HET 231 | Medium-Heavy Duty Brake Systems | 2 |
| HET 233 | Suspension and Steering | 4 |
| CIS 110 | Introduction to Computers | 3 |

Total Credit Hours Required **17**

Industrial Systems Technology

The Industrial Systems Technology curriculum is designed to prepare or upgrade individuals to safely service, maintain, repair, or install equipment. Instruction includes theory and skill training needed for inspecting, testing, troubleshooting, and diagnosing industrial systems.

Students will learn multi-craft technical skills in blueprint reading, mechanical systems maintenance, electricity, hydraulics/pneumatics, welding, machining or fabrication, including various diagnostic and repair procedures. Practical application in these industrial systems will be emphasized and additional advanced course work may be offered.

Upon completion of this curriculum, graduates will be able to individually, or with a team, safely install, inspect, diagnose, repair, and maintain industrial process and support equipment. Students will also be encouraged to develop their skills as lifelong learners.

The Biogas Option is designed for preparing graduates for opportunities in landfill gas extraction and utilization. The Industrial Maintenance Option prepares graduates for opportunities in a multitude of entry-level maintenance related positions.

**Industrial Systems Technology
Associate in Applied Science Degree -
Biogas Option (A50240)**

Courses requiring a grade of "C" or better: ACA, ALT, BPR, COE, CMT, EGR, ELC, HYD, ISC, MEC, MNT, WAT, and WLD

First Semester (Fall) Credits

| | | | |

| WLD 212 | Inert Gas Welding | 2 |

| | |
|-----------------------------|----|
| Total Credit Hours Required | 16 |
|-----------------------------|----|

Mechanical Engineering Technology

The Mechanical Engineering Technology curriculum prepares graduates for employment as mechanical technicians. Typical assignments would include assisting in the design, development, testing and repair of mechanical equipment. Emphasis is placed on the integration of theory and mechanical principles.

Course work includes applied mechanics, manufacturing methods and processes, computer usage, computer-aided drafting, mathematics, physics, and oral and written communications.

Graduates of the curriculum will find employment opportunities in the diversified branches of the mechanical field. Mechanical engineering technicians are employed in many types of manufacturing, fabrication, research and development, and service industries.

Mechanical Engineering Technology
Associate in Applied Science Degree (A40320)

Courses requiring a grade of "C" or better: ACA, ATR, CIV, COE, DFT, EGR, ELC, HYD, ISC, MAT, MEC, PLA, WLD

| First Semester (Fall) | | | Credits |
|-----------------------|--------------------------------------|--|---------|
| ACA 115 | Success and Study Skills | (or EGR 110 or EGR 150) | 1 |

| | Major Elective Group 1* | | 3 |

Fourth Semester (Fall)

| | | |
|---------|-----------------------------------|---|
| CIV 110 | Statics and Strength of Materials | 4 |
| ELC 111 | Introduction to Electricity | 3 |
| PLA 110 | Introduction to Plastics | 2 |
| PLA 120 | Injection Molding | 3 |
| | Major Elective Group 2** | 2 |
| | Humanities/Fine Arts Elective | 3 |

Fifth Semester (Spring)

| | | |
|---------|--|---|
| ATR 112 | Intro to Automation | 3 |
| COM 231 | Public Speaking (or COM 120 or ENG 114) | 3 |
| ELC 213 | Instrumentation | 4 |
| MEC 260 | Fundamentals of Machine Design | 3 |
| | Social/Behavioral Science Elective | 3 |

Program Totals **74**

***Major Elective Group 1 – Select one course from:**

ATR 212, ELC 128, ISC 132, ISC 255, ISC 279

****Major Elective Group 2:** COE 112, EGR 285, BPR 111, DFT 111, ISC 278, ISC 280

Students transferring to a 4-year institution are strongly encouraged to take the following four courses in addition to those listed above: ENG 114, CHM 135 or CHM 151, PHY 131 or PHY 151, MAT 151/151A.

Mechanical Engineering Technology - Plastic Injection Molding Certificate (C40320L2)

The Mechanical Engineering Technology Plastic Injection Molding Certificate program is designed to develop the fundamental knowledge of plastics and plastic injection molding. This certificate prepares students for employment opportunities in the plastics industry.

| Major Requirements | | Credits |
|------------------------------------|---------------------------------|-----------|
| ATR 112 | Intro to Automation | 3 |
| BPR 111 | Blueprint Reading | 2 |
| EGR 115 | Introduction to Technology | 3 |
| ISC 121 | Environmental Health and Safety | 3 |
| PLA 110 | Introduction to Plastics | 2 |
| PLA 120 | Injection Molding | 3 |
| Total Credit Hours Required | | 16 |

Mechanical Engineering Technology - Mechanical Drafting Certificate (C40320L3)

The Mechanical Engineering Technology Mechanical Drafting Certificate program is designed to develop fundamental skills in CAD, engineering drafting, three-dimensional solid modeling and design software, engineering materials, and the different machining and manufacturing processes.

| Major Requirements | | Credits |
|--------------------|----------------------------------|---------|
| DFT 111 | Technical Drafting I | 2 |
| DFT 151 | CAD I (or DFT 170) | 3 |
| DFT 154 | Introduction to Solid Modeling | 3 |
| MEC 111 | Machine Processes I (or MAC 111) | 3 |
| MEC 161 | Manufacturing Processes I | 3 |
| MEC 180 | Engineering Materials | 3 |

Total Credit Hours Required **17**

Mechanical Engineering Technology - Quality and cGMP Certificate (C40320L4)

The Mechanical Engineering Technology Quality and cGMP Certificate program is designed to develop fundamental skills in Quality Systems, cGMP and FDA compliant validation. This certificate prepares students for employment opportunities in regulated manufacturing industries.

| Major Requirements | | Credits |
|--------------------|---------------------------------|---------|
| EGR 115 | Introduction to Technology | 3 |
| ISC 121 | Environmental Health and Safety | 3 |
| ISC 132 | Manufacturing Quality Control | 3 |
| ISC 278 | cGMP Quality Systems | 2 |
| ISC 279 | Auditing for cGMP | 3 |
| ISC 280 | Validation Fundamentals | 2 |

Total Credit Hours Required **16**

Mechanical Engineering Technology - Automation & Robotics Certificate (C40320L5)

The Mechanical Engineering Technology Automation and Robotics Certificate program is designed to develop fundamental skills necessary to safely operate and maintain robotic and automated equipment. This certificate prepares students for employment opportunities in automated industries.

| Major Requirements | | Credits |
|-----------------------------|----------------------------|---------|
| ATR 112 | Intro to Automation | 3 |
| ATR 212 | Industrial Robots | 3 |
| EGR 115 | Introduction to Technology | 3 |
| ELC 111 | Intro to Electricity | 3 |
| ELC 128 | Intro to PLC | 3 |
| MEC 181 | Intro to CIM | 2 |
| Total Credit Hours Required | | 17 |

Mechanical Engineering Technology - Pre-Engineering Certificate (C40320L6)

The Mechanical Engineering Technology Pre-Engineering Certificate program is designed to develop the fundamental skills necessary to pursue a degree in engineering technology.

| Major Requirements | | Credits |
|-----------------------------|--|---------|
| CIV 110 | Statics | 4 |
| DFT 151 | CAD 1 (or DFT 154) | 3 |
| EGR 110 | Intro to Engineering Tech (or EGR 150) | 2 |
| ISC 121 | Environmental Health and Safety | 3 |

| MEC 180 | Engineering Materials | 3 |
| Total Credit Hours Required | | 18 |

Mechanical Engineering Technology - Green Technologies Certificate (C40320L7)

The Mechanical Engineering Technology Green Technologies Certificate program is designed to develop a fundamental base of knowledge regarding the modification of industrial processes toward a sustainable end.

| Major Requirements | | Credits |
|-----------------------------|---------------------------|---------|
| ISC 255 | Engineering Economy | 3 |
| MEC 155 | Env Benign Manufacturing | 3 |
| MEC 161 | Manufacturing Processes 1 | 3 |
| MEC 180 | Engineering Materials | 3 |
| Total Credit Hours Required | | 12 |

Surveying Technology

The Surveying Technology curriculum provides training for technicians in the many areas of surveying. Surveyors are involved in land surveying, route surveying, construction surveying, photogrammetry, mapping, global positioning systems, geographical information systems, and other areas of property description and measurements.

Course work includes the communication and computational skills required for boundary, construction, route, and control surveying, photogrammetry, topography, drainage, surveying law, and subdivision design, with emphasis upon applications of electronic data collection and related software, including CAD.

Graduates will qualify for jobs as survey party chief, instrument person, surveying technician, highway surveyor, mapper, GPS technician, and CAD operator. Graduates will be prepared to pursue the requirements necessary to become a professional land surveyor in North Carolina.

Surveying Technology Associate in Applied Science Degree - Geospatial Technology Fundamentals Option (A40380)

Courses requiring a grade of "C" or better: CIS, CIV, DBA, DFT, EGR, GIS, SRV

| First Semester (Fall) | | Credits |
|-----------------------|---|---------|
| CIS 110 | Introduction to Computers | 3 |
| EGR 110 | Introduction to Engineering Tech (or ACA 115 or EGR 150) | 2 |
| EGR 115 | Intro to Technology | 3 |
| ENG 111 | Expository Writing | 3 |
| MAT 121 | Algebra/Trigonometry I (or MAT 171/171A) | 3 |

Second Semester (Spring)

| | | |
|---------|--|---|
| CIS 115 | Intro to Programming and Logic | 3 |
| DFT 119 | Basic CAD | 2 |
| GIS 111 | Introduction to GIS | 3 |
| MAT 122 | Algebra/Trigonometry II (or MAT 172/172A) | 3 |
| SRV 110 | Surveying I | 4 |

Third Semester (Summer)

| | | |
|---------|-------------------------------------|---|
| GIS 120 | Introduction to Geodesy | 3 |
| SRV 111 | Surveying II | 4 |
| | Humanities/Fine Arts Elective | 3 |
| | Social/Behavioral Sciences Elective | 3 |

Fourth Semester (Fall)

| | | |
|---------|--|---|
| DBA 110 | Database Concepts | 3 |
| ENG 114 | Professional Research and Reporting (or COM 120 or COM 231) | 3 |
| GIS 215 | GIS Data Models | 3 |
| SRV 210 | Surveying III | 4 |
| SRV 240 | Topo/Site Surveying | 4 |

Fifth Semester (Spring)

| | | |
|---------|----------------------------|---|
| CIV 125 | Civil/Surveying CAD | 3 |
| GIS 112 | Introduction to GPS | 3 |
| GIS 121 | Georeferencing and Mapping | 3 |
| GIS 232 | Spatial Databases | 3 |
| GIS 240 | Air Photo Interpretation | 3 |

Total Credit Hours Required**74****Second Semester (Spring)**

| | | |
|---------|--|---|
| CIV 110 | Statics/Strength of Materials (or PHY 251 or MEC 250) | 4 |
| DFT 119 | Basic CAD | 2 |
| ENG 114 | Professional Research and Reporting (or COM 120 or COM 231) | 3 |
| MAT 122 | Algebra/Trigonometry II (or MAT 172/172A) | 3 |
| SRV 110 | Surveying I | 4 |

Third Semester (Summer)

| | | |

| CIV 211 | Hydraulics and Hydrology | 3 |
| SRV 111 | Surveying II | 4 |
| | Humanities/Fine Arts Elective | 3 |
| | Social/Behavioral Sciences Elective | 3 |

Fourth Semester (Fall)

| | | |
|---------|---------------------|---|
| CIV 125 | Civil/Surveying CAD | 3 |
| CIV 215 | Highway Technology | 2 |
| SRV 210 | Surveying III | 4 |
| SRV 240 | Topo/Site Surveying | 4 |

Fifth Semester (Spring)

| | | |
|---------|----------------------|---|
| GIS 112 | Introduction to GPS | 3 |
| SRV 220 | Surveying Law | 3 |
| SRV 230 | Subdivision Planning | 3 |
| SRV 250 | Advanced Surveying | 4 |

Total Credit Hours Required**69**

Surveying Technology Associate in Applied Science Degree - Land Survey Option (A40380)

Courses requiring a grade of "C" or better: CIS, CIV, DBA, DFT, EGR, GIS, SRV

First Semester (Fall)**Credits**

| | | |
|---------|---|---|
| CIS 110 | Introduction to Computers | 3 |
| EGR 110 | Introduction to Engineering Tech (or ACA 115 or EGR 150) | 2 |
| EGR 115 | Intro to Technology | 3 |
| ENG 111 | Expository Writing | 3 |
| MAT 121 | Algebra/Trigonometry I (or MAT 171/171A) | 3 |

Surveying Technology - Geospatial Technology Fundamentals Certificate (C40380L3)

The Geospatial Technology (GIS) Fundamentals Certificate provides a curriculum based on a solid foundation in GIS concepts. Students enrolled in this certificate will learn the different forms of spatial data and their essential properties; ways spatial data can be used to investigate complex problems; principles and methods for collecting spatial data; principles of map design and effective cartographic communication; designing, creating and manipulating GIS databases and operating GPS technology.

This certificate is designed for students who have experience with computers and want to improve geospatial technology skills. If a student does not have prior computer proficiency, other course work might be required to meet course pre-requisites.

Successful applicants for the certificate must complete all courses listed below with at least a grade of C.

| First Semester (Fall) | | | Credits |
|-----------------------------|-----|--------------------------------|---------|
| CIS | 115 | Intro to Programming and Logic | 3 |
| GIS | 111 | Introduction to GIS | 3 |
| Second Semester (Spring) | | | |
| GIS | 121 | Georeferencing and Mapping | 3 |
| GIS | 215 | GIS Data Models | 3 |
| Total Credit Hours Required | | | 12 |

Surveying Technology - Surveying Fundamentals Certificate (C40380L1)

| First Semester (Fall) | | | Credits |
|-----------------------------|-----|---|---------|
| EGR | 110 | Introduction to Engineering Tech (or ACA 115 or EGR 150) | 2 |
| EGR | 115 | Intro to Technology | 3 |
| MAT | 121 | Algebra/Trigonometry I | 3 |
| Second Semester (Spring) | | | |
| DFT | 119 | Basic CAD | 2 |
| GIS | 111 | Introduction to GIS | 3 |
| SRV | 110 | Surveying I | 4 |
| Total Credit Hours Required | | | 17 |

Sustainability Technologies

The Sustainability Technologies curriculum is designed to prepare individuals for employment in environmental, construction, alternative energy, manufacturing, or related industries, where key emphasis is placed on energy production and waste reduction along with sustainable technologies.

Course work may include alternative energy, environmental engineering technology, sustainable manufacturing, and green building technology. Additional topics may include sustainability, energy management, waste reduction, renewable energy, site assessment, and environmental responsibility.

Graduates will qualify for positions within the alternative energy, construction, environmental, and/or manufacturing industries. Employment opportunities exist in both the government and private industry sectors, where graduates may function as manufacturing technicians, sustainability consultants, environmental technicians, or green building supervisors.

Sustainability Technologies Associates in Applied Science Technology (A40370)

Courses requiring a grade of "C" or better: ALT, ARC, ENV, SST

| First Semester (Fall) | | | Credits |
|-----------------------|-----|--|---------|
| ARC | 112 | Construction Materials and Methods | 4 |
| EGR | 110 | Introduction to Eng. Tech (or EGR 150) | 2 |
| EGR | 125 | Application Software for Technology | 2 |
| ELC | 111 | Introduction to Electricity | 3 |
| MAT | 121 | Algebra/Trigonometry I (or MAT 161/161A, MAT 171/171A, MAT 175) | 3 |
| SST | 110 | Introduction to Sustainability | 3 |

| Second Semester (Spring) | | | |
|--------------------------|-----|-----------------------------|---|
| ALT | 120 | Renewable Energy Technology | 3 |
| ARC | 111 | Intro to Arch Technology | 3 |
| ARC | 131 | Building Codes | 3 |
| CST | 111 | Construction I | 4 |
| DFT | 170 | Engineering Graphics | 3 |
| SST | 140 | Green Building Concepts | 2 |

| Third Semester (Summer) | | | |
|-------------------------|-----|------------------------------------|---|
| ENG | 111 | Expository Writing | 3 |
| PHY | 131 | Physics-Mechanics (or PHY 151) | 4 |
| | | Social/Behavioral Science Elective | 3 |
| | | Humanities/Fine Arts Elective | 3 |

Fourth Semester (Fall)

| | | |
|---------|--|---|
| ALT 220 | Photovoltaic Systems Tech. | 3 |
| AHR 211 | Residential System Design (or ARC 230) | 3 |
| ARC 261 | Solar Technology | 2 |
| CIV 110 | Statics/Strength of Materials | 4 |
| SST 130 | Modeling Renewable Energy | 3 |

Fifth Semester (Spring)

| | | |
|----------|---|---|
| ENG 114 | Professional Research and Reporting | 3 |
| ENV 110 | Environmental Science (or BIO 140) | 3 |
| ENV 110A | Environmental Science Lab (or BIO 140A) | 1 |
| SST 120 | Energy Use Analysis | 3 |
| SST 210 | Issues on Sustainability | 3 |

Program Totals **76**

Third Semester (Summer)

| | |
|------------------------------------|---|
| Social/Behavioral Science Elective | 3 |
| Humanities/Fine Arts Elective | 3 |
| Communications Elective* | 3 |

Fourth Semester (Fall)

| | | |

| MEC 111 | Machine Processes I | 3 |
| WLD 151 | Fabrication I | 4 |
| WLD 231 | GTAW (TIG) Pipe | 3 |
| WLD 261 | Certification Practices | 2 |

Fifth Semester (Spring)

| | | |
|---------|----------------------|---|
| MEC 110 | Intro to CAD/CAM | 2 |
| WLD 215 | SMAW (Stick) Pipe | 4 |
| WLD 251 | Fabrication II | 3 |
| WLD 262 | Inspection & Testing | 3 |

Program Totals **69**

*Communications Elective: COM 120, COM 231, ENG 114

Welding Technology

The Welding Technology curriculum provides students with a sound understanding of the science, technology, and applications essential for successful employment in the welding and metal industry. Instruction includes consumable and non-consumable electrode welding and cutting processes.

Courses provide the student with industry-standard skills developed through classroom training and practical application.

Successful graduates of the Welding Technology curriculum may be employed as entry-level technicians in welding and metalworking industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.

Welding Technology Associate in Applied Science Degree (A50420)

Courses requiring a grade of "C" or better: ACA, WLD

| First Semester (Fall) | | Credits |
|------------------------------|--------------------------|----------------|
| ACA 115 | Success and Study Skills | 1 |
| PHY 121 | Applied Physics I | 4 |
| WLD 110 | Cutting Processes | 2 |
| WLD 115 | SMAW (Stick) Plate | 5 |
| WLD 121 | GMAW (MIG) Plate | 4 |
| WLD 131 | GTAW (TIG) Plate | 4 |

Second Semester (Spring)

| | | |
|---------|----------------------------|---|
| ENG 110 | Freshman Composition | 3 |
| WLD 116 | SMAW (Stick) Plate/Pipe | 4 |
| WLD 122 | GMAW (MIG) Plate/Pipe | 3 |
| WLD 132 | GTAW (TIG) Plate/Pipe | 3 |
| WLD 141 | Symbols and Specifications | 3 |

Welding Technology - Diploma (D50420)

Courses requiring a grade of “C” or better: ACA, WLD

First Semester (Fall)

| | | |
|---------|------------------------------|---|
| ACA 115 | Success and Study Skills | 1 |
| PHY 121 | Applied Physics I | 4 |

Arts and Sciences

General Education for Transfer Degrees and Diplomas

Purpose

The General Education component of transfer degrees and diplomas provide students with a knowledge base of historical, societal, and environmental contexts for succeeding in the changing global community. The General Education component represents a full spectrum of English composition, communication, humanities and fine arts, social and behavioral sciences, natural sciences, and mathematics courses.

General education courses facilitate student acquisition and sharing of knowledge, encourage social interaction, and promote an educated citizenry. General education courses also develop broad, cross-curriculum knowledge and skill sets that prepare the student to successfully master the challenges of post-graduation endeavors.

General Education Outcomes Assessment

Upon successful completion of a transfer degree, the student will demonstrate competency in four General Education Outcomes. Each outcome is assessed in several General Education courses. General Education Outcomes and the courses where these outcomes are assessed follow. Note that additional General Education courses beyond those listed are required under the Comprehensive Articulation Agreement for university transfer. See individual program requirements for further details. See the General Education for AAS Degrees section for General Education requirements for AAS degrees.

Communication

Students will deliver purposeful messages designed to increase knowledge, foster understanding, or promote change in an audience's attitudes or behaviors.

| | |
|---------|--------------------------------------|
| ENG 111 | Expository Writing |
| ENG 112 | Argument-Based Research |
| ENG 113 | Literature-Based Research |
| ENG 114 | Professional Research and Reporting |
| COM 120 | Intro to Interpersonal Communication |
| COM 140 | Intro to Intercultural Communication |
| COM 231 | Public Speaking |

Social/Behavioral Sciences

Students will demonstrate an understanding of social institutions and of the diversity of human experiences within a framework of historical and cultural contexts.

| | |
|---------|-----------------------------------|
| ANT 210 | General Anthropology |
| ANT 220 | Cultural Anthropology |
| ANT 240 | Archaeology |
| ECO 151 | Survey of Economics |

Honors Interdisciplinary Studies Program

This new program for honors students emphasizing interdependency between varied disciplines encourages students to view their education as a comprehensive experience. The interdisciplinary unifying structure is an invitational approach connecting individual courses and demonstrating the necessity of such links for a more conscious experience. A-B Tech's Honors Interdisciplinary Studies Program includes linked courses from the general education program. These learning communities allow students to understand the relationships connecting natural and social sciences, humanities, and history.

For more information and eligibility requirements, please contact Gigi Derballa, 398-7329.

Curriculum Requirements for the Associate in Arts (A.A.) Degree (A10100)

| Program Summary | Hours |
|---|-------|
| General Education | 44 |
| <i>English/Composition</i> | 6 |
| <i>Humanities/Communication/Fine Arts</i> | 12 |
| <i>Social/Behavioral Sciences</i> | 12 |
| <i>Natural Sciences</i> | 8 |
| <i>Mathematics</i> | 6 |
| Other Courses | 21 |
| Program Total | 65 |

General Education Core Requirements 44 Semester Hours

English Composition (6 semester hours)

1. ENG 111 Expository Writing is required.

2. Select one additional course from:

ENG 112 Argument-Based Research
ENG 113 Literature-Based Research
ENG 114 Professional Research and Reporting

Humanities/Fine Arts (12 semester hours)

1. A communication course is required in lieu of one humanities/fine arts course. COM 231, Public Speaking, is preferred. COM 120, Introduction to Interpersonal Communication, and COM 140, Introduction to Intercultural Communication, are also acceptable.
2. HUM 220, Human Values and Meaning, is the required capstone course for the Associate in Arts Degree.
3. Select two additional courses from the following disciplines: art, drama, foreign languages, humanities, literature, music, philosophy, and religion. **At least one course must be a literature (*) course.**

| | | | | |
|---------|----------|---------|---------|---------|
| ART 111 | ENG 131* | FRE 112 | HUM 211 | REL 110 |
| ART 114 | ENG 231* | FRE 211 | HUM 212 | REL 111 |
| ART 115 | ENG 232* | FRE 212 | MUS 110 | REL 112 |
| ART 117 | ENG 233* | HUM 110 | MUS 112 | REL 211 |
| DRA 111 | ENG 241* | HUM 115 | MUS 113 | REL 212 |
| DRA 112 | ENG 242* | HUM 121 | MUS 114 | SPA 111 |
| DRA 122 | ENG 243* | HUM 122 | MUS 210 | SPA 112 |
| DRA 126 | ENG 261* | HUM 130 | PHI 215 | SPA 211 |
| DRA 211 | ENG 262* | HUM 150 | PHI 230 | SPA 212 |
| DRA 212 | FRE 111 | HUM 160 | PHI 240 | |

Social/Behavioral Sciences (12 semester hours)

Select four courses from at least three of the following disciplines: anthropology, economics, geography, history, political science, psychology, and sociology. **At least one course must be a history (*) course.**

| | | | | |
|---------|----------|----------|---------|---------|
| ANT 210 | GEO 111 | HIS 132* | PSY 237 | SOC 220 |
| ANT 220 | GEO 112 | POL 110 | PSY 239 | SOC 225 |
| ANT 240 | HIS 111* | POL 120 | PSY 241 | SOC 240 |
| ECO 151 | HIS 112* | POL 210 | PSY 281 | |
| ECO 251 | HIS 115* | POL 220 | SOC 210 | |
| ECO 252 | HIS 131* | PSY 150 | SOC 213 | |

Natural Sciences (8 semester hours)

Select two courses, including accompanying laboratory* work, from the astronomy, biology, chemistry, geology, or physics disciplines. Either BIO 110 or BIO 111 may count toward General Education core hours.

| | | | | |
|-----------|-----------|---------|-----------|---------|
| AST 111 | BIO 120 | CHM 135 | GEL 113 | PHY 152 |
| AST 111A* | BIO 130 | CHM 136 | GEL 230 | PHY 251 |
| BIO 110 | BIO 140 | CHM 151 | PHY 110 | |
| BIO 111 | BIO 140A* | CHM 152 | PHY 110A* | PHY 252 |
| BIO 112 | CHM 132 | GEL 111 | PHY 151 | |

Mathematics (6 semester hours)

1. MAT 161 or higher is required. Select one course from:

| | |
|----------|--------------------------|
| MAT 161* | College Algebra |
| MAT 171* | Precalculus Algebra |
| MAT 172* | Precalculus Trigonometry |
| MAT 175 | Precalculus |
| MAT 271 | Calculus I |
| MAT 272 | Calculus II |
| MAT 273 | Calculus III |

2. Select a second course from the following:

| | | | | |
|----------|----------|---------|---------|---------|
| MAT 140 | MAT 171* | MAT 175 | MAT 272 | CIS 110 |
| MAT 151* | MAT 172* | MAT 271 | MAT 273 | CIS 115 |

*A math lab is required for this course. Labs count as elective hours.

Other Required Hours (21 Semester Hours)

- 1. ACA 115, Success and Study Skills is required.
- 2. Additional Courses (20 Semester Hours):
These include general education, pre-major and elective courses that have been approved for transfer (see Electives – Associate in Arts).

Math lab hours, when required as a corequisite, count as an elective. Students should refer to Pre-Major Articulation Agreements before making selections for required hours:
www.ga.unc.edu/student_info/caa/.

Total Semester Hours 65

Most colleges/universities require a two-semester sequence of foreign language. Check with the transfer institution for further information.
All college transfer courses submitted for graduation require a minimum grade of “C”. Courses selected may vary according to requirements of the pre-major, senior institution, etc. Health and Physical Education courses may be selected any semester.

Electives – Associate in Arts (20 semester hours)

Any approved transfer course (including core courses) may be taken as an elective. Listed below are electives taught at A-B Tech. No elective course may be substituted for an approved general education core course. All PED (physical education) courses count as electives.

Curriculum Requirements for the Transfer Core Diploma in Arts (D10100)

| Program Summary | Hours |
|--|-------|
| General Education | 44 |
| <i>English/Composition</i> | 6 |
| <i>Humanities/ Communication/Fine Arts</i> | 12 |
| <i>Social/Behavioral Sciences</i> | 12 |
| <i>Natural Sciences</i> | 8 |
| <i>Mathematics</i> | 6 |
| Other Courses | 1 |
| Program Total | 45 |

General Education Core Requirements 44 Semester Hours

English Composition (6 semester hours)

1. ENG 111 Expository Writing is required.
2. Select one additional course from:
 - ENG 112 Argument-Based Research
 - ENG 113 Literature-Based Research
 - ENG 114 Professional Research and Reporting

Humanities/Fine Arts (12 semester hours)

1. A communication course is required in lieu of one humanities/fine arts course. COM 231, Public Speaking, is preferred. COM 120, Introduction to Interpersonal Communication, and COM 140, Introduction to Intercultural Communication, are also acceptable.
2. HUM 220, Human Values and Meaning, is the required capstone course for the Associate in Arts Diploma.
3. Select two additional courses from the following disciplines: art, drama, foreign languages, humanities, literature, music, philosophy, and religion. **At least one course must be a literature (*) course.**

| | | | | |
|---------|----------|---------|---------|---------|
| ART 111 | ENG 131* | FRE 112 | HUM 211 | REL 110 |
| ART 114 | ENG 231* | FRE 211 | HUM 212 | REL 111 |
| ART 115 | ENG 232* | FRE 212 | MUS 110 | REL 112 |
| ART 117 | ENG 233* | HUM 110 | MUS 112 | REL 211 |
| DRA 111 | ENG 241* | HUM 115 | MUS 113 | REL 212 |
| DRA 112 | ENG 242* | HUM 121 | MUS 114 | SPA 111 |
| DRA 122 | ENG 243* | HUM 122 | MUS 210 | SPA 112 |
| DRA 126 | ENG 261* | HUM 130 | PHI 215 | SPA 211 |
| DRA 211 | ENG 262* | HUM 150 | PHI 230 | SPA 212 |
| DRA 212 | FRE 111 | HUM 160 | PHI 240 | |

Social/Behavioral Sciences (12 semester hours)

Select four courses from at least three of the following disciplines: anthropology, economics, geography, history, political science, psychology, and sociology. **At least one course must be a history (*) course.**

| | | | | |
|---------|----------|----------|---------|---------|
| ANT 210 | GEO 111 | HIS 132* | PSY 237 | SOC 220 |
| ANT 220 | GEO 112 | POL 110 | PSY 239 | SOC 225 |
| ANT 240 | HIS 111* | POL 120 | PSY 241 | SOC 240 |
| ECO 151 | HIS 112* | POL 210 | PSY 281 | |
| ECO 251 | HIS 115* | POL 220 | SOC 210 | |
| ECO 252 | HIS 131* | PSY 150 | SOC 213 | |

Natural Sciences (8 semester hours)

Select two courses, including accompanying laboratory* work, from the astronomy, biology, chemistry, geology, or physics disciplines. Either BIO 110 or BIO 111 may count toward General Education core hours.

| | | | | |
|-----------|-----------|---------|-----------|---------|
| AST 111 | BIO 120 | CHM 135 | GEL 113 | PHY 152 |
| AST 111A* | BIO 130 | CHM 136 | GEL 230 | PHY 251 |
| BIO 110 | BIO 140 | CHM 151 | PHY 110 | PHY 252 |
| BIO 111 | BIO 140A* | CHM 152 | PHY 110A* | |
| BIO 112 | CHM 132 | GEL 111 | PHY 151 | |

Mathematics (6 semester hours)

1. MAT 161 or higher is required. Select one course from:
 - MAT 161* College Algebra
 - MAT 171* Precalculus Algebra
 - MAT 172* Precalculus Trigonometry
 - MAT 175 Precalculus
 - MAT 271 Calculus I
 - MAT 272 Calculus II
 - MAT 273 Calculus III

2. Select a second course from the following:

| | | | | |
|----------|----------|---------|---------|---------|
| MAT 140 | MAT 171* | MAT 175 | MAT 272 | CIS 110 |
| MAT 151* | MAT 172* | MAT 271 | MAT 273 | CIS 115 |

*Math lab is required for this course. Labs count as elective hours.

Other Required Hours (1 Semester Hour)

1. ACA 115, Success and Study Skills is required.

Total Semester Hours

45

Curriculum Requirements for the Associate in Science (A.S.) Degree (A10400)

| | |
|------------------------------------|-------|
| Program Summary | Hours |
| General Education | 44 |
| English/Composition | 6 |
| Humanities/Communication/Fine Arts | 9 |
| Social/Behavioral Sciences | 9 |
| Natural Sciences/Mathematics | 20 |
| Other Courses | 21 |
| Program Total | 65 |

General Education Core Requirements
44 Semester Hours

English Composition (6 semester hours)

- 1. ENG 111 Expository Writing is required.
- 2. Select one additional course from:
 ENG 112 Argument-Based Research
 ENG 113 Literature-Based Research
 ENG 114 Professional Research and Reporting

Humanities/Fine Arts (9 semester hours)

- 1. A communication course is required in lieu of one humanities/fine arts course. COM 231, Public Speaking, is preferred. COM 120, Introduction to Interpersonal Communication, and COM 140, Introduction to Intercultural Communication, are also acceptable.
- 2. Select two additional courses from two of the following disciplines: art, drama, foreign languages, humanities, literature, music, philosophy and religion. **One course must be a literature (*) course.**

| | | | | |
|---------|----------|---------|---------|---------|
| ART 111 | ENG 131* | FRE 112 | HUM 211 | PHI 240 |
| ART 114 | ENG 231* | FRE 211 | HUM 212 | REL 110 |
| ART 115 | ENG 232* | FRE 212 | HUM 220 | REL 111 |
| ART 117 | ENG 233* | HUM 110 | MUS 110 | REL 112 |
| DRA 111 | ENG 241* | HUM 115 | MUS 112 | REL 211 |
| DRA 112 | ENG 242* | HUM 121 | MUS 113 | REL 212 |
| DRA 122 | ENG 243* | HUM 122 | MUS 114 | SPA 111 |
| DRA 126 | ENG 261* | HUM 130 | MUS 210 | SPA 112 |
| DRA 211 | ENG 262* | HUM 150 | PHI 215 | SPA 211 |
| DRA 212 | FRE 111 | HUM 160 | PHI 230 | SPA 212 |

Social/Behavioral Sciences (9 semester hours)

Select three courses from three of the following disciplines: anthropology, economics, geography, political science, psychology and sociology. **One course must be a history (*) course.**

| | | | | |
|---------|----------|----------|---------|---------|
| ANT 210 | GEO 111 | HIS 132* | PSY 237 | SOC 220 |
| ANT 220 | GEO 112 | POL 110 | PSY 239 | SOC 225 |
| ANT 240 | HIS 111* | POL 120 | PSY 241 | SOC 240 |
| ECO 151 | HIS 112* | POL 210 | PSY 281 | |
| ECO 251 | HIS 115* | POL 220 | SOC 210 | |
| ECO 252 | HIS 131* | PSY 150 | SOC 213 | |

Natural Science/Mathematics
(20 semester hours)

Natural Sciences (8 semester hours)

Select a minimum two-course sequence from the following general biology, general chemistry, or general physics courses.

- BIO 111 and BIO 112
- CHM 151 and CHM 152
- PHY 151 and PHY 152
- PHY 251 and PHY 252

Mathematics (6 semester hours)

- 1. MAT 171 or higher is required. Select one course from:
 MAT 171* Precalculus Algebra
 MAT 172* Precalculus Trigonometry
 MAT 175 Precalculus
 MAT 271 Calculus I
 MAT 272 Calculus II
 MAT 273 Calculus III
- 2. Select a second course from the following:

| | | | |
|----------|---------|---------|---------|
| MAT 151* | MAT 175 | MAT 272 | CIS 110 |
| MAT 172* | MAT 271 | MAT 273 | CIS 115 |

*A math lab is required for this course. Labs count as elective hours.

Either BIO 110 or BIO 111 may count toward General Education core hours, not both. Six additional semester hours may be selected from either natural sciences (listed below) or mathematics (listed above):

| | | | | |
|---------|----------|---------|---------|---------|
| BIO 110 | BIO 140/ | CHM 132 | CHM 136 | GEL 113 |
| BIO 120 | BIO 140A | CHM 135 | GEL 111 | GEL 230 |
| BIO 130 | | | | |

Other Required Hours (21 Semester Hours)

1. ACA 115, Success and Study Skills is required.
2. Additional Courses (14 Semester Hours):
A minimum of 14 semester hours of credit of college transfer courses in mathematics, natural sciences, or computer science is required.
3. Additional Elective Courses (6 Semester Hours):
Math lab hours, when required as a corequisite, count as electives. Students should refer to Pre-Major Articulation Agreements before making selections for required hours:
www.ga.unc.edu/student_info/caa/

Total Semester Hours 65

Most colleges/universities require a two-semester sequence of foreign language. Check with the transfer institution for further information.

All college transfer courses submitted for graduation require a minimum grade of "C". Courses selected may vary according to requirements of the pre-major, senior institution, etc. Health and Physical Education courses may be selected any semester.

**Electives – Associate in Science
(20 semester hours)**

Fourteen semester hours in mathematics, natural sciences, or computer science is required. Any approved transfer course (including core courses) may be taken as an elective. Listed below are electives taught at A-B Tech. No elective course may be substituted for an approved general education core course.

All PED (physical education) courses count as electives.

| | | | |
|--------------|-------------|--------------|--------------|
| ACC 120 (4) | BIO 224 (2) | ENG 125 (3) | MUS 122 (4) |

Mathematics Education

Elementary and Special Education 2+2 Agreements

The 2+2 Agreement allows students who successfully complete two years at A-B Tech to transfer seamlessly into their next two years in a highly acclaimed teacher education program. The 2+2 Agreement outlines which credits transfer and which additional courses an A-B Tech transfer student must complete at the senior institution to earn a bachelor's degree in education. Please see an advisor in the Transfer Advising Center for information about the program and the colleges which offer the 2+2 Agreement.

Lateral Entry Program

The lateral entry program is an alternative route to teaching for qualified individuals outside of the public education system. The individual is hired by a school system, which recommends the individual for a lateral-entry license. The individual is issued a two-year lateral-entry license. The license may be extended annually for one additional year beyond the two years. Lateral entry teachers must meet testing requirements within the first 2 years of employment and complete all course requirements within a three year period. Please contact Lori Seiderman for information about the program and the college which offers the lateral entry program or contact the instructor for Teacher Education for Secondary Schools in the Arts & Sciences Division.

General Occupational Technology (A55280)

The General Occupational Technology curriculum provides individuals with an opportunity to upgrade their skills and to earn an associate degree or diploma by taking courses suited for their occupational interests and/or needs.

The curriculum content will be individualized for students according to their occupational interests and needs. A program of study for each student will be selected from non-developmental level courses offered by the College.

Graduates will become more effective workers, better qualified for advancements within their field of employment, and become qualified for a wide range of entry-level employment opportunities. Please see a counselor for additional information.

A.A.S. Degree Program Summary

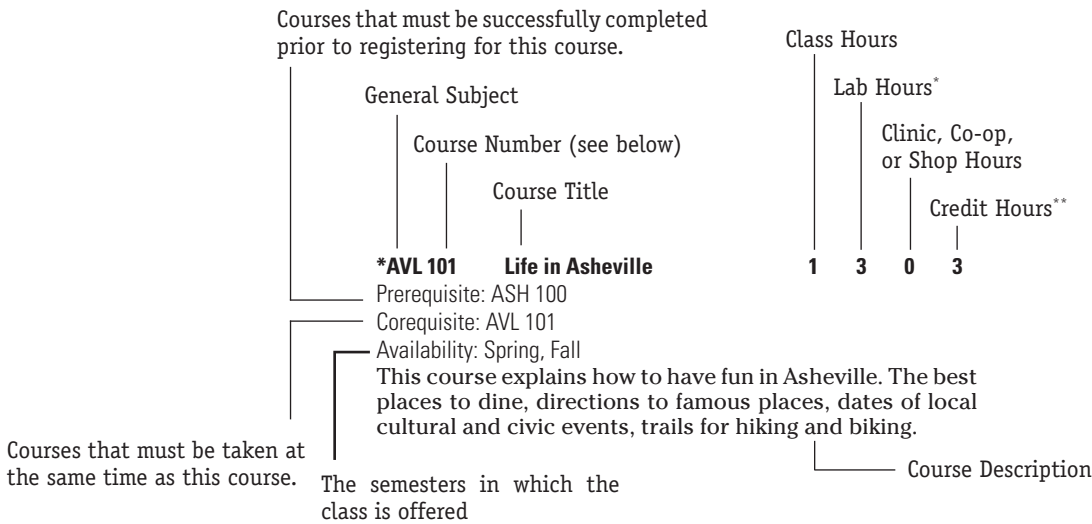

| | Credit Hours |
|----------------------|--------------|
| General Education | 15 |
| Major Hours | 49 |
| Other Required Hours | 0-7 |
| Program Total | 64-71 |

Diploma Program Summary

| | Credit Hours |
|----------------------|--------------|
| General Education | 6 |
| Major Hours | 30 |
| Other Required Hours | 0-4 |
| Program Total | 36-40 |

Course Descriptions

The following section contains descriptions of courses offered by Asheville-Buncombe Technical Community College. The following example explains each component of the course description entry.

* When only three numbers are listed, the middle number always designates Lab Hours.

** Credit Hours are always the last number.

Course Numbers consist of three digits, and numbers are assigned as follows:

- The first digit indicates the year the course is normally taken. A first digit of "0" is used for Guided Studies courses.
- The second digit denotes the credential for which the course is intended:
 - 100-109 and 200-209:** Courses for stand-alone certificate and diploma programs.
 - 110-189 and 210-289:** Courses for associate degree programs; these courses may also be used in certificate and diploma programs.
 - 190-199 and 290-299:** Seminar and Selected Topics courses for all programs.
- The third digit indicates the order in which the course is usually taken.

Example: **ACC 120 Principles of Financial Accounting**
ACC 121 Principles of Managerial Accounting

Please examine each course description before registering and determine if all prerequisites have been met. Prerequisites shown are those courses that must be successfully completed before attempting further study. In certain cases the department chairperson may waive some prerequisites.

***Credit by Examination is not available for courses marked with an asterisk because of the nature of the course and in some cases safety requirements in the use of equipment. Any exceptions must be with the approval of the department chairperson.**

Academic Related

ACA 115 Success and Study Skills

0 2 1

Prerequisites: None

Corequisites: None

This course provides an orientation to the campus resources and academic skills necessary to achieve educational objectives. Emphasis is placed on an exploration of facilities and services, study skills, library skills, self-assessment, wellness, goal-setting, and critical thinking. Upon completion, students should be able to manage their learning experiences to successfully meet educational goals.

ACA 122 College Transfer Success

1 0 1

Prerequisites: None

Corequisites: None

This course provides preparation for meeting the demands of employment or education beyond the community college experience. Emphasis is placed on strategic planning, gathering information on workplaces or colleges, and developing human interaction skills for professional, academic, and/or community life. Upon completion, students should be able to successfully make the transition to appropriate workplaces or senior institutions.

Accounting

ACC 120 Principles of Financial Accounting

3 2 4

Prerequisites: None

Corequisites: None

This course introduces business decision-making using accounting information systems. Emphasis is placed on analyzing, summarizing, reporting, and interpreting financial information. Upon completion, students should be able to prepare financial statements, understand the role of financial information in decision-making and address ethical considerations. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ACC 121 Principles of Managerial Accounting

3 2 4

Prerequisites: ACC 120

Corequisites: None

This course includes a greater emphasis on managerial and cost accounting skills. Emphasis is placed on managerial accounting concepts for external and internal analysis, reporting and decision-making. Upon completion, students should be able to analyze and interpret transactions relating to managerial concepts, including product costing systems. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ACC 129 Individual Income Taxes

2 2 3

Prerequisites: None

Corequisites: None

This course introduces the relevant laws governing individual income taxation. Topics include tax law, electronic research and methodologies, and the use of technology for preparation of individual tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete various individual tax forms.

ACC 130 Business Income Taxes

2 2 3

Prerequisites: ACC 129

Corequisites: None

This course introduces the relevant laws governing business and fiduciary income taxes. Topics include tax law relating to business organizations, electronic research and methodologies, and the use of technology for the preparation of business tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete various business tax forms.

ACC 131 Federal Income Taxes

2 2 3

Prerequisites: None

Corequisites: None

This course provides an overview of federal income taxes for individuals, partnerships, and corporations. Topics include tax law, electronic research and methodologies, and the use of technology for the preparation of individual and business tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete federal tax returns for individuals, partnerships, and corporations.

ACC 140 Payroll Accounting

1 2 2

Prerequisites: ACC 115 or ACC 120

Corequisites: None

This course covers federal and state laws pertaining to wages, payroll taxes, payroll tax forms, and journal and general ledger transactions. Emphasis is placed on computing wages; calculating social security, income, and unemployment taxes; preparing appropriate payroll tax forms; and journalizing/posting transactions. Upon completion, students should be able to analyze data, make appropriate computations, complete forms, and prepare accounting entries using appropriate technology.

ACC 150 Accounting Software Applications

1 2 2

Prerequisites: ACC 115 or ACC 120

Corequisites: None

This course introduces microcomputer applications related to accounting systems. Topics include general ledger, accounts receivable, accounts payable, inventory, payroll, and correcting, adjusting, and closing entries. Upon completion, students should be able to use a computer accounting software package to solve accounting problems.

ACC 180 Practices in Bookkeeping

3 0 3

Prerequisites: ACC 120

Corequisites: None

This course provides advanced instruction in bookkeeping and record-keeping functions. Emphasis is placed on mastering adjusting entries, correction of errors, depreciation, payroll, and inventory. Upon completion, students should be able to conduct all key bookkeeping functions for small businesses.

*ACC 220 Intermediate Accounting I

3 2 4

Prerequisites: ACC 120

Corequisites: None

This course is a continuation of the study of accounting principles with in-depth coverage of theoretical concepts and financial statements. Topics include generally accepted accounting principles and extensive analyses of financial statements. Upon completion, students should be able to demonstrate competence in the conceptual framework underlying financial accounting, including the application of financial standards.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

ACC 240 Government & Not-for-Profit Accounting 3 0 3
 Prerequisites: ACC 121
 Corequisites: None

This course introduces principles and procedures applicable to governmental and not-for-profit organizations. Emphasis is placed on various budgetary accounting procedures and fund accounting. Upon completion, students should be able to demonstrate an understanding of the principles involved and display an analytical problem-solving ability for the topics covered.

***ACC 269 Auditing and Assurance Services** 3 0 3
 Prerequisites: ACC 220
 Corequisites: None

This course introduces selected topics pertaining to the objectives, theory and practices in engagements providing auditing and other assurance services. Topics will include planning, conducting and reporting, with emphasis on the related professional ethics and standards. Upon completion, students should be able to demonstrate an understanding of the types of professional services, the related professional standards, and engagement methodology.

Air Conditioning, Heating, and Refrigeration

***AHR 110 Introduction to Refrigeration** 2 6 5
 Prerequisites: None
 Corequisites: None

This course introduces the basic refrigeration process used in mechanical refrigeration and air conditioning systems. Topics include terminology, safety, and identification and function of components; refrigeration cycle; and tools and instrumentation used in mechanical refrigeration systems. Emphasis will be placed on how refrigeration theory, principles and practice are used in the refrigeration/cooling trades. Upon completion, students should be able to identify refrigeration systems and components, explain the refrigeration process, and use the tools and instrumentation of the trade.

AHR 111 HVACR Electricity 2 2 3
 Prerequisites: None
 Corequisites: None

This course introduces electricity as it applies to HVACR equipment. Emphasis is placed on power sources, interaction of electrical components, wiring of simple circuits, and the use of electrical test equipment. Upon completion, students should be able to demonstrate good wiring practices and the ability to read simple wiring diagrams.

***AHR 112 Heating Technology** 2 4 4
 Prerequisites: None
 Corequisites: None

This course covers the fundamentals of heating including oil, gas, and electric heating systems. Topics include safety, tools and instrumentation, system operating characteristics, installation techniques, efficiency testing, electrical power, and control systems. Upon completion, students should be able to explain the basic oil, gas, and electrical heating systems and describe the major components of a heating system.

***AHR 113 Comfort Cooling** 2 4 4
 Prerequisites: None
 Corequisites: None

This course covers the installation procedures, system operations, and maintenance of residential and light commercial comfort cooling systems. Topics include terminology, component operation, and testing and repair of equipment used to control and produce assured comfort levels. Upon completion, students should be able to use psychometrics, manufacturer specifications, and test instruments to determine proper system operation.

***AHR 114 Heat Pump Technology** 2 4 4
 Prerequisites: AHR 110 or AHR 113
 Corequisites: None

This course covers the principles of air source and water source heat pumps. Emphasis is placed on safety, modes of operation, defrost systems, refrigerant charging, and system performance. Upon completion, students should be able to understand and analyze system performance and perform routine service procedures.

***AHR 120 HVACR Maintenance** 1 3 2
 Prerequisites: None
 Corequisites: None

This course introduces the basic principles of industrial air conditioning and heating systems. Emphasis is placed on preventive maintenance procedures for heating and cooling equipment and related components. Upon completion, students should be able to perform routine preventive maintenance tasks, maintain records, and assist in routine equipment repairs.

***AHR 130 HVAC Controls** 2 2 3
 Prerequisites: AHR 111 or ELC 111
 Corequisites: None

This course covers the types of controls found in residential and commercial comfort systems. Topics include electrical and electronic controls, control schematics and diagrams, test instruments, and analysis and troubleshooting of electrical systems. Upon completion, students should be able to diagnose and repair common residential and commercial comfort systems controls.

AHR 160 Refrigerant Certification 1 0 1
 Prerequisites: None
 Corequisites: None

This course covers the requirements for the EPA certification examinations. Topics include small appliances, high pressure systems, and low pressure systems. Upon completion, students should be able to demonstrate knowledge of refrigerants and be prepared for the EPA certification examinations.

AHR 170 Heating Lab 0 3 1
 Prerequisites: None
 Corequisites: AHR 112

This course provides a laboratory experience in heating technology. Emphasis is placed on providing practical experience in the fundamentals of heating. Upon completion, students should be able to demonstrate an understanding of electric, oil, and gas fueled heating systems.

AHR 172 Heat Pump Lab 0 3 1
 Prerequisites: None
 Corequisites: AHR 114

This course provides a laboratory experience in heat pump technology. Emphasis is placed on providing practical experience with air source and water heat pumps. Upon completion, students should be able to demonstrate an understanding of heat pump year round comfort systems.

***AHR 210 Residential Building Code** 1 2 2

Prerequisites: Basic computer literacy is necessary. (CTS 060 will provide students the foundation for this course.)

Corequisites: None

This course covers the residential building codes that are applicable to the design and installation of HVAC systems. Topics include current residential codes as applied to HVAC design, service, and installation. Upon completion, students should be able to demonstrate the correct usage of residential building codes that apply to specific areas of the HVAC trade.

***AHR 211 Residential System Design** 2 2 3

Prerequisites: None

Corequisites: None

This course introduces the principles and concepts of conventional residential heating and cooling system design. Topics include heating and cooling load estimating, basic psychometrics, equipment selection, duct system selection, and system design. Upon completion, students should be able to design a basic residential heating and cooling system.

***AHR 212 Advanced Comfort Systems** 2 6 4

Prerequisites: AHR 114

Corequisites: None

This course covers water-cooled comfort systems, water-source/geothermal heat pumps, and high efficiency heat pump systems including variable speed drives and controls. Emphasis is placed on the application, installation, and servicing of water-source systems and the mechanical and electronic control components of advanced comfort systems. Upon completion, students should be able to test, analyze, and troubleshoot water-cooled comfort systems, water-source/geothermal heat pumps, and high efficiency heat pumps. Hydronic (hot water) and steam heating systems will also be studied.

Alternative Energy Technology

ALT 120 Renewable Energy Tech 2 2 3

Prerequisites: AHR 111, ELC 111, ELC 112 or ELC 139

Corequisites: None

This course provides an introduction to multiple technologies that allow for the production and conservation of energy from renewable sources. Topics include hydroelectric, wind power, passive and active solar energy, tidal energy, appropriate building techniques, and energy conservation methods. Upon completion, students should be able to demonstrate an understanding of renewable energy production and its impact on humans and their environment.

ALT 130 Biogas Operations I 2 0 2

Prerequisite: Enrollment in the Industrial Systems Technology Program

Corequisites: ALT 130A or COE 111

This course introduces the extraction and collection of biogas. Emphasis is placed on gas production and operations. Upon completion, students should be able to demonstrate an understanding of the operation and maintenance of a biogas production facility.

ALT 130A Biogas Operations I Lab 0 3 1

Prerequisite: None

Corequisites: ALT 130

This course provides students with the opportunity to enhance skills associated with industrial operations in the extraction and collection of biogas. Emphasis is placed on location, equipment, components, and facilities associated with biogas production and operations. Upon completion, students should be able to demonstrate an understanding of the equipment, components and facilities necessary to operate a biogas production facility.

ALT 131 Biogas Operations II 2 0 2

Prerequisite: ALT 130

Corequisites: ALT 131A or COE 121

This course introduces the combustion and use of energy from biogas. Emphasis is placed upon gas combustion flaring, air quality, and gas to energy production. Upon completion, students should be able to demonstrate an understanding of gas combustion principles and energy production at a biogas production facility.

ALT 131A Biogas Operations II Lab 0 3 1

Prerequisite: None

Corequisites: ALT 131

This course provides students with the opportunity to enhance skills associated with processes necessary to turn biogas into an effective combustible energy source. Emphasis is placed on industrial equipment, components, and facilities that are necessary for managing biogas processes, combustion flaring, air quality, and gas-to-energy production. Upon completion, students should be able to demonstrate an understanding of biogas processes, equipment, components, and facilities necessary for biogas production

ALT 220 Photovoltaic Sys Tech 2 3 3

Prerequisites: ALT 120

Corequisites: None

This course introduces the concepts, tools, techniques, and materials needed to understand systems that convert solar energy into electricity with photovoltaic (pv) technologies. Topics include site analysis for system integration, building codes, and advances in photovoltaic technology. Upon completion, students should be able to demonstrate an understanding of the principles of photovoltaic technology and current applications.

ALT 240 Wind & Hydro Power Systems 2 2 3

Prerequisite: None

Corequisites: None

This course introduces concepts, designs, tools, techniques, and material requirements for systems that convert wind and water into usable energy. Topics include the analysis, measurement, and estimation of potential energy of wind and water systems. Upon completion, students should be able to demonstrate an understanding of the technologies associated with converting wind and water into a viable energy source.

ALT 250 Thermal Systems 2 2 3

Prerequisites: None

Corequisites: None

This course introduces concepts, tools, techniques, and materials used to convert thermal energy into a viable, renewable energy resource. Topics include forced convection, heat flow and exchange, radiation, the various elements of thermal system design, regulations, and system installation

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

and maintenance. Upon completion, students should be able to demonstrate an understanding of geothermal and solar thermal systems and corresponding regulations.

Anthropology

ANT 210 General Anthropology 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the physical, archaeological, linguistic, and ethnological fields of anthropology. Topics include human origins, genetic variations, archaeology, linguistics, primatology, and contemporary cultures. Upon completion, students should be able to demonstrate an understanding of the four major fields of anthropology. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

ANT 220 Cultural Anthropology 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the nature of human culture. Emphasis is placed on cultural theory, methods of fieldwork, and cross-cultural comparisons in the areas of ethnology, language, and the cultural past. Upon completion, students should be able to demonstrate an understanding of basic cultural processes and how cultural data are collected and analyzed. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

ANT 240 Archaeology 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the scientific study of the unwritten record of the human past. Emphasis is placed on the process of human cultural evolution as revealed through archaeological methods of excavation and interpretation. Upon completion, students should be able to demonstrate an understanding of how archaeologists reconstruct the past and describe the variety of past human cultures. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

Architecture

ARC 111 Intro to Arch Technology 1 6 3

Prerequisites: None

Corequisites: None

This course introduces basic architectural drafting techniques, lettering, use of architectural and engineer scales, and sketching. Topics include orthographic, axonometric, and oblique drawing techniques using architectural plans, elevations, sections, and details; reprographic techniques; and other related topics. Upon completion, students should be able to prepare and print scaled drawings within minimum architectural standards.

ARC 112 Construction Materials and Methods 3 2 4

Prerequisites: None

Corequisites: None

This course introduces construction materials and their methodologies. Topics include construction terminology, materials and their properties, manufacturing processes, construction techniques, and other related topics. Upon completion, students should be able to detail construction assemblies and identify construction materials and properties.

ARC 113 Residential Arch Tech 1 6 3

Prerequisites: ARC 111

Corequisites: ARC 112

This course covers intermediate residential working drawings. Topics include residential plans, elevations, sections, details, schedules, and other related topics. Upon completion, students should be able to prepare a set of residential working drawings that are within accepted architectural standards.

ARC 131 Building Codes 2 2 3

Prerequisites: ARC 112 or CAR 111

Corequisites: None

This course covers the methods of researching building codes for specific projects. Topics include residential and commercial building codes. Upon completion, students should be able to determine the code constraints governing residential and commercial projects.

ARC 210 Intro to Sustain Design 1 3 2

Prerequisites: ARC 111

Corequisites: None

This course introduces concepts and principles related to sustainable site development and architectural design. Topics include low impact and sustainable site development, water efficiency, energy efficiency, material and resource management, indoor environmental quality, and return on investment. Upon completion, students should be able to articulate and integrate sustainable design principles into site and architectural design.

ARC 230 Environmental Systems 3 3 4

Prerequisites: ARC 111 and MAT 121, MAT 151, MAT 161, MAT 171, or MAT 175

Corequisites: None

This course introduces plumbing, mechanical (HVAC), and electrical systems for the architectural environment. Topics include basic plumbing, mechanical, and electrical systems for residential and/or commercial buildings with an introduction to selected code requirements. Upon completion, students should be able to perform related calculations.

ARC 240 Site Planning 2 2 3

Prerequisites: ARC 111 or LAR 111

Corequisites: None

This course introduces the principles of site planning, grading plans, and earthwork calculations. Topics include site analysis, site work, site utilities, cut and fill, soil erosion control, and other related topics. Upon completion, students should be able to prepare site development plans and details and perform cut and fill calculations.

ARC 261 Solar Technology 1 2 2

Prerequisites: ARC 111

Corequisites: None

This course introduces passive and active solar design theory and application. Topics include passive solar design, active solar theory, heat loss analysis, and other related topics. Upon completion, students should be able to design a passive solar system.

Art**ART 111 Art Appreciation****3 0 3**

Prerequisites: None

Corequisites: None

This course introduces the origins and historical development of art. Emphasis is placed on the relationship of design principles to various art forms including but not limited to sculpture, painting, and architecture. Upon completion, students should be able to identify and analyze a variety of artistic styles, periods, and media. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ART 114 Art History Survey I**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the development of art forms from ancient times to the Renaissance. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ART 115 Art History Survey II**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the development of art forms from the Renaissance to the present. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ART 117 Non-Western Art History**3 0 3**

Prerequisites: None

Corequisites: None

This course introduces non-Western cultural perspectives. Emphasis is placed on, but not limited to, African, Oriental, and Oceanic art forms throughout history. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of non-Western social and cultural development. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ART 121 Two-Dimensional Design**0 6 3**

Prerequisites: None

Corequisites: None

This course introduces the elements and principles of design as applied to two-dimensional art. Emphasis is placed on the structural elements, the principles of visual organization, and the theories of color mixing and interaction. Upon completion, students should be able to understand and use critical and analytical approaches as they apply to two-dimensional visual art. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 122 Three-Dimensional Design**0 6 3**

Prerequisites: None

Corequisites: None

This course introduces basic studio problems in three-dimensional visual design. Emphasis is placed on the structural elements and organizational principles as applied to mass and space. Upon completion, students should be able to apply three-dimensional design concepts. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 131 Drawing I**0 6 3**

Prerequisites: None

Corequisites: None

This course introduces the language of drawing and the use of various drawing materials. Emphasis is placed on drawing techniques, media, and graphic principles. Upon completion, students should be able to demonstrate competence in the use of graphic form and various drawing processes. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 132 Drawing II**0 6 3**

Prerequisites: ART 131

Corequisites: None

This course continues instruction in the language of drawing and the use of various materials. Emphasis is placed on experimentation in the use of drawing techniques, media, and graphic materials. Upon completion, students should be able to demonstrate increased competence in the expressive use of graphic form and techniques. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 171 Computer Art I**0 6 3**

Prerequisites: None

Corequisites: None

This course introduces the use of the computer as a tool for solving visual problems. Emphasis is placed on fundamentals of computer literacy and design through bit-mapped image manipulation. Upon completion, students should be able to demonstrate an understanding of paint programs, printers, and scanners to capture, manipulate, and output images. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 214 Portfolio and Resume**0 2 1**

Prerequisites: None

Corequisites: None

This course covers resume writing, interview skills, and the preparation and presentation of an art portfolio. Emphasis is placed on the preparation of a portfolio of original artwork, the preparation of a photographic portfolio, approaches to resume writing, and interview techniques. Upon completion, students should be able to mount original art for portfolio presentation, photograph and display a professional slide portfolio, and write an effective resume. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 231 Printmaking I**0 6 3**

Prerequisites: None

Corequisites: None

This course introduces printmaking: its history, development techniques, and processes. Emphasis is placed on basic applications with investigation into image source and

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

development. Upon completion, students should be able to produce printed images utilizing a variety of methods. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 240 Painting I 0 6 3

Prerequisites: ART 121 or ART 131 or Department Chair's approval of student's art portfolio to replace prerequisites

Corequisites: None

This course introduces the language of painting and the use of various painting materials. Emphasis is placed on the understanding and use of various painting techniques, media, and color principles. Upon completion, students should be able to demonstrate competence in the use of creative processes directed toward the development of expressive form. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 241 Painting II 0 6 3

Prerequisites: ART 240

Corequisites: None

This course provides a continuing investigation of the materials, processes, and techniques of painting. Emphasis is placed on the exploration of expressive content using a variety of creative processes. Upon completion, students should be able to demonstrate competence in the expanded use of form and variety. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 244 Watercolor 0 6 3

Prerequisites: ART 121 or ART 131 or Department Chair's approval of student's art portfolio to replace prerequisites

Corequisites: None

This course introduces basic methods and techniques used in watercolor. Emphasis is placed on application, materials, content, and individual expression. Upon completion, students should be able to demonstrate a variety of traditional and nontraditional concepts used in watercolor media. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 260 Photography Appreciation 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the origins and historical development of photography. Emphasis is placed on the study of composition and history of photography as an art form. Upon completion, students should be able to recognize and produce, using color transparencies, properly exposed, well-composed photographs. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 261 Photography I 0 6 3

Prerequisites: None

Corequisites: None

This course introduces photographic equipment, theory, and processes. Emphasis is placed on camera operation, composition, darkroom technique, and creative expression. Upon completion, students should be able to successfully expose, develop, and print a well-conceived composition. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 262 Photography II 0 6 3

Prerequisites: Art 261

Corequisites: None

This course introduces the creative manipulation of alternative photographic materials and processes such as toning, hand coloring, infrared, and multiple exposure. Emphasis is placed on personal vision and modes of seeing. Upon completion, students should be able to create properly exposed images using a variety of photographic materials and processes. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 264 Digital Photography I 1 4 3

Prerequisites: None

Corequisites: None

This course introduces digital photographic equipment, theory and processes. Emphasis is placed on camera operation, composition, computer photo manipulation and creative expression. Upon completion, students should be able to successfully expose, digitally manipulate, and print a well-conceived composition. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 265 Digital Photography II 1 4 3

Prerequisites: Art 264

Corequisites: None

This course provides exploration of the concepts and processes of photo manipulation through complex composite images, special effects, color balancing and image/text integration. Emphasis is placed on creating a personal vision and style. Upon completion, students should be able to produce well-executed images using a variety of photographic and photo manipulative approaches. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 266 Videography I 0 6 3

Prerequisites: None

Corequisites: None

This course introduces various aspects of basic video production including concept development, scripting, camera operation, and post-production. Emphasis is placed on creative expression, camera handling, story boarding and editing. Upon completion, students should be able to demonstrate a basic understanding of video camera operation and production techniques. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 271 Computer Art II 0 6 3

Prerequisites: Art 171

Corequisites: None

This course includes advanced computer imaging techniques. Emphasis is placed on creative applications of digital technology. Upon completion, students should be able to demonstrate command of computer systems and applications to express their personal vision. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ART 275 Intro to Commercial Art**0 6 3**

Prerequisites: Art 171

Corequisites: None

This course introduces the materials and techniques used in creative layout design for publication. Emphasis is placed on design for advertising in a variety of techniques and media including computer graphics. Upon completion, students should be able to demonstrate competence in manual camera-ready layout design and computer graphics literacy. This course has been approved to satisfy the Comprehensive Articulation Agreement as a pre-major and/or elective course requirement.

ART 281 Sculpture I**0 6 3**

Prerequisites: None

Corequisites: None

This course provides an exploration of the creative and technical methods of sculpture with focus on the traditional processes. Emphasis is placed on developing basic skills as they pertain to three-dimensional expression in various media. Upon completion, students should be able to show competence in a variety of sculptural approaches. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 282 Sculpture II**0 6 3**

Prerequisites: ART 281

Corequisites: None

This course builds on the visual and technical skills learned in ART 281. Emphasis is placed on developing original solutions to sculptural problems in a variety of media. Upon completion, students should be able to express individual ideas using the techniques and materials of sculpture. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 283 Ceramics I**0 6 3**

Prerequisites: None

Corequisites: None

This course provides an introduction to three-dimensional design principles using the medium of clay. Emphasis is placed on fundamentals of forming, surface design, glaze application, and firing. Upon completion, students should be able to demonstrate skills in slab and coil construction, simple wheel forms, glaze technique, and creative expression. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ART 284 Ceramics II**0 6 3**

Prerequisites: ART 283

Corequisites: None

This course covers advanced hand building and wheel techniques. Emphasis is placed on creative expression, surface design, sculptural quality, and glaze effect. Upon completion, students should be able to demonstrate a high level of technical competence in forming and glazing with a development of three-dimensional awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

Astronomy**AST 111 Descriptive Astronomy****3 0 3**

Prerequisites: None

Corequisites: AST 111A

This course introduces an overall view of modern astronomy. Topics include an overview of the solar system, the sun, stars, galaxies, and the larger universe. Upon completion, students should be able to demonstrate an understanding of the universe around them. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

AST 111A Descriptive Astronomy Lab**0 2 1**

Prerequisites: None

Corequisites: AST 111

The course is a laboratory to accompany AST 111. Emphasis is placed on laboratory experiences which enhance the materials presented in AST 111 and which provide practical experience. Upon completion, students should be able to demonstrate an understanding of the universe around them. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

Automation Training***ATR 112 Introduction to Automation****2 3 3**

Prerequisites: None

Corequisites: None

This course introduces the basic principles of automated manufacturing and describes the tasks that technicians perform on the job. Topics include the history, development, and current applications of robots and automated systems including their configuration, operation, components, and controls. Upon completion, students should be able to understand the basic concepts of automation and robotic systems.

ATR 212 Industrial Robots*2 3 3**

Prerequisites: ATR 112 or ATR 282

Corequisites: None

Available: As needed

This course covers the operation of advanced industrial robots. Topics include the classification of robots, activators, grippers, work envelopes, computer interfaces, overlapping work envelopes, installation, and programming. Upon completion, students should be able to install, program, and troubleshoot industrial robots.

Automotive***AUT 110 Introduction to Automotive Technology****2 2 3**

Prerequisites: None

Corequisites: None

Available: Fall

This course covers work-place safety, hazardous material and environmental regulations and procedures, proper use of hand tools, use of service information resources, and the basic concepts, systems and terms of automotive technology. Topics include familiarization with vehicle systems along with identification and proper use of various automotive hand and power tools. Upon completion, students should be able to describe safety and environmental procedures, terms associated with automobiles, identify and use basic tools and shop equipment.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | |
|---|--------------|---|
| *AUT 116 Engine Repair | 2 3 3 | boost, and anti-lock, parking brake systems and emerging brake systems technologies. Upon completion, students should be able to diagnose, service, and repair various automotive braking systems. |
| Prerequisites: None Corequisites: AUT 116A | | |
| This course covers the theory, construction, inspection, diagnosis, and repair of internal combustion engines and related systems. Topics include fundamental operating principles of engines and diagnosis, inspection, adjustment, and repair of automotive engines using appropriate service information. Upon completion, students should be able to perform basic diagnosis, measurement and repair of automotive engines using appropriate tools, equipment, procedures, and service information. | | |
| *AUT 116A Engine Repair Lab | 0 3 1 | |
| Prerequisites: None Corequisites: AUT 116 | | |
| This course is an optional lab for the program that needs to meet NATEF hour standards but does not have a Co-op component in the program. Topics include diagnosis, inspection, adjustment, and repair of automotive engines using appropriate service information. Upon completion, students should be able to perform basic diagnosis, measurement and repair of automotive engines using appropriate tools, equipment, procedures, and service information. | | |
| *AUT 141 Suspension and Steering Systems | 2 3 3 | |
| Prerequisites: None Corequisites: AUT 141A | | |
| This course covers principles of operation, types, and diagnosis/repair of suspension and steering systems to include steering geometry. Topics include manual and power steering systems and standard and electronically controlled suspension and steering systems. Upon completion, students should be able to identify steering and suspension problems, service and repair steering and suspension components, check and adjust alignment angles, and repair and balance tires. | | |
| *AUT 141A Suspension and Steering Systems Lab | 0 3 1 | |
| Prerequisites: None Corequisites: AUT 141 | | |
| This course is an optional lab for the program that needs to meet NATEF hour standards but does not have a Co-op component in the program. Topics include manual and power steering systems and standard and electronically controlled suspension and steering systems. Upon completion, students should be able to identify steering and suspension problems, service and repair steering and suspension components, check and adjust alignment angles, and repair and balance tires. | | |
| *AUT 151 Brake Systems | 2 3 3 | |
| Prerequisites: None Corequisites: AUT 151A | | |
| This course covers principles of operation and types, diagnosis, service, and repair of brake systems. Topics include drum and disc brakes involving hydraulic, vacuum boost, hydra-boost, electrically powered boost, and anti-lock and parking brake systems. Upon completion, students should be able to diagnose, service, and repair various automotive braking systems. | | |
| *AUT 151A Brake Systems Lab | 0 3 1 | |
| Prerequisites: None Corequisites: AUT 151 | | |
| This course is an optional lab for the program that needs to meet NATEF hour standards but does not have a Co-op component in the program. Topics include drum and disc brakes involving hydraulic, vacuum-boost, hydra-boost, electrically powered | | |
| | | *AUT 161 Basic Automotive Electricity |
| | | 4 3 5 Prerequisites: None Corequisites: None This course covers basic electrical theory, wiring diagrams, test equipment, and diagnosis/repair/replacement of batteries, starters, and alternators. Topics include Ohm's Law, Circuit construction, wiring diagrams, circuit testing, and basic trouble shooting. Upon completion, students should be able to read and understand wiring diagrams, diagnose, test, and repair basic wiring, battery, starting, charging, and basic electrical concerns. |
| | | *AUT 163 Advanced Automotive Electricity/Electronics |
| | | 2 3 3 Prerequisites: AUT 161 Corequisites: None This course covers basic electronic theory, wiring diagrams, test equipment, and diagnosis /repair/replacement of electronics, lighting, gauges, driver information, horn, wiper, accessories, and body modules. Topics include networking and module communication, circuit construction, wiring diagrams, circuit testing, and basic trouble shooting. Upon completion, students should be able to read and understand wiring diagrams, diagnose, test, and repair basic wiring, lighting, gauges, accessories, modules, and basic electronic concerns. |
| | | *AUT 171 Automotive Climate Control |
| | | 2 4 4 Prerequisites: None Corequisites: None This course covers the theory of refrigeration and heating, electrical/electronic/pneumatic controls, and diagnosis/repair of climate control systems. Topics include diagnosis and repair of climate control components and systems, recovery/recycling of refrigerants, and safety and environmental regulations. Upon completion, students should be able to describe the operation, diagnose, and safely service climate control systems using appropriate tools, equipment, and service information. |
| | | *AUT 181 Engine Performance 1 |
| | | 2 3 3 Prerequisites: None Corequisites: None This course covers the introduction, theory of operation, and basic diagnostic procedures required to restore engine performance to today's vehicles equipped with complex engine control systems. Topics include an overview of engine operation, ignition components and systems, fuel delivery, injection components and systems and emission control devices. Upon completion students should be able to describe operation of and diagnose/repair basic ignition, fuel and emission related drivability problems using appropriate test equipment and service information. |
| | | *AUT 221 Automatic Transmissions/Transaxles |
| | | 2 3 3 Prerequisites: None Corequisites: AUT 221A This course covers operation, diagnosis, service, and repair of automatic transmissions/transaxles. Topics include hydraulic, pneumatic, mechanical, and electrical/electronic operation of automatic drive trains and the use of appropriate service tools and equipment. Upon completion, students should be able to explain operational theory, diagnose and repair automatic drive trains. |

***AUT 221A Automatic Transmissions/Transaxles Lab 0 3 1**

Prerequisites: None

Corequisites: AUT 221

This course is an optional lab for the program that needs to meet NATEF hour standards but does not have a Co-op component in the program and covers diagnosis, service, and repair of automatic transmissions/transaxles. Topics include hydraulic, pneumatic, mechanical, and electrical/electronic operation of automatic drive trains and the use of appropriate service tools and equipment. Upon completion, students should be able to diagnose and repair automatic drive trains.

***AUT 231 Manual Trans/Transaxles and Drivetrains 2 3 3**

Prerequisites: None

Corequisites: AUT 231A

This course covers the operation, diagnosis, and repair of manual transmissions/transaxles, clutches, driveshafts, axles, and final drives. Topics include theory of torque, power flow, and manual drive train servicing and repair using appropriate service information, tools, and equipment. Upon completion, students should be able to explain operational theory, diagnose and repair manual drive trains.

***AUT 231A Manual Trans/Transaxles and Drivetrains Lab 0 3 1**

Prerequisites: None

Corequisites: AUT 231

This course is an optional lab for the program that needs to meet NATEF hour standards but does not have a Co-op component in the program. Topics include manual drive train diagnosis, service and repair using appropriate service information, tools, and equipment. Upon completion, students should be able to diagnose and repair manual drive trains.

***AUT 281 Advanced Engine Performance 2 2 3**

Prerequisites: None

Corequisites: None

Available: Spring, Summer

This course utilizes service information and specialized test equipment to diagnose and repair power train control systems. Topics include computerized ignition, fuel and emission systems, related diagnostic tools and equipment, data communication networks, and service information. Upon completion, students should be able to perform diagnosis and repair.

***AUT 285 Intro to Alternative Fuels 2 2 3**

Prerequisites: None

Corequisites: None

This course is an overview of alternative fuels and alternative fueled vehicles. Topics include composition and use of alternative fuels, including compressed natural gas, propane, biodiesel, ethanol, electric, hydrogen, synthetic fuels, and vehicles that use alternative fuels. Upon completion, students should be able to identify alternative fuel vehicles, explain how each alternative fuel delivery system works, and make minor repairs.

Biology**BIO 090 Foundations of Biology 3 2 4**

Prerequisites: None

Corequisites: RED 090

This course introduces basic biological concepts. Topics include basic biochemistry, cell structure and function, interrelationships among organisms, scientific methodology, and other related topics. Upon completion, students should be able to demonstrate preparedness for college-level biology courses.

BIO 106 Intro to Anat/Phys/Micro 2 2 3

Prerequisites: None

Corequisites: None

This course covers the fundamental and principle concepts of human anatomy and physiology and microbiology. Topics include an introduction to the structure and function of cells, tissues, and human organ systems, and an overview of microbiology, epidemiology, and control of microorganisms. Upon completion, students should be able to identify structures and functions of the human body and describe microorganisms and their significance in health and disease.

BIO 094 Concepts of Human Biology 3 2 4

Prerequisites: None

Corequisites: ENG 095 or RED 090

This course focuses on fundamental concepts of human biology. Topics include terminology, biochemistry, cell biology, tissues, body systems, and other related topics. Upon completion, students should be able to demonstrate preparedness for college-level anatomy and physiology courses.

BIO 110 Principles of Biology 3 3 4

Prerequisites: None

Corequisites: None

This course provides a survey of fundamental biological principles for non-science majors. Emphasis is placed on basic chemistry, cell biology, metabolism, genetics, taxonomy, evolution, ecology, diversity, and other related topics. Upon completion, students should be able to demonstrate increased knowledge and better understanding of biology as it applies to everyday life. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

BIO 111 General Biology I 3 3 4

Prerequisites: None

Corequisites: None

This course introduces the principles and concepts of biology. Emphasis is placed on basic biological chemistry, cell structure and function, metabolism and energy transformation, genetics, evolution, classification, and other related topics. Upon completion, students should be able to demonstrate understanding of life at the molecular and cellular levels. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

BIO 112 General Biology II 3 3 4

Prerequisites: BIO 111

Corequisites: None

This course is a continuation of BIO 111. Emphasis is placed on organisms, biodiversity, plant and animal systems, ecology, and other related topics. Upon completion, students should be able to demonstrate comprehension of life at the organismal and ecological levels. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

BIO 120 Introductory Botany 3 3 4

Prerequisites: BIO 110 or BIO 111

Corequisites: None

This course provides an introduction to the classification, relationships, structure, and function of plants. Topics include reproduction and development of seed and non-seed plants, levels of organization, form and function of systems, and a survey of major taxa. Upon completion, students should be able to demonstrate comprehension of plant form and function,

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

including selected taxa of both seed and non-seed plants. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

BIO 130 Introductory Zoology 3 3 4

Prerequisites: BIO 110 or BIO 111

Corequisites: None

This course provides an introduction to the classification, relationships, structure, and function of major animal phyla. Emphasis is placed on levels of organization, reproduction and development, comparative systems, and a survey of selected phyla. Upon completion, students should be able to demonstrate comprehension of animal form and function including comparative systems of selected groups. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

BIO 140 Environmental Biology 3 0 3

Prerequisites: None

Corequisites: BIO 140A

This course introduces environmental processes and the influence of human activities upon them. Topics include ecological concepts, population growth, natural resources, and a focus on current environmental problems from scientific, social, political, and economic perspectives. Upon completion, students should be able to demonstrate an understanding of environmental interrelationships and of contemporary environmental issues. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural sciences/mathematics.

BIO 140A Environmental Biology Lab 0 3 1

Prerequisites: None

Corequisites: BIO 140

This course provides a laboratory component to complement BIO 140. Emphasis is placed on laboratory and field experience. Upon completion, students should be able to demonstrate a practical understanding of environmental interrelationships and of contemporary environmental issues. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural sciences/mathematics.

BIO 155 Nutrition 3 0 3

Prerequisites: None

Corequisites: None

This course covers the biochemistry of foods and nutrients with consideration of the physiological effects of specialized diets for specific biological needs. Topics include cultural, religious, and economic factors that influence a person's acceptance of food, as well as nutrient requirements of the various life stages. Upon completion, students should be able to identify the functions and sources of nutrients, the mechanisms of digestion, and the nutritional requirements of all age groups. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

BIO 161 Intro to Human Biology 3 0 3

Prerequisites: None

Corequisites: None

This course provides a basic survey of human biology. Emphasis is placed on the basic structure and function of body systems and the medical terminology used to describe normal and pathological states. Upon completion, students should be able to demonstrate an understanding of normal anatomy and physiology and the appropriate use of medical terminology.

BIO 163 Basic Anatomy and Physiology 4 2 5

Prerequisites: RED 090

Corequisites: None

This course provides a basic study of the structure and function of the human body. Topics include a basic study of the body systems as well as an introduction to homeostasis, cells, tissues, nutrition, acid-base balance, and electrolytes. Upon completion, students should be able to demonstrate a basic understanding of the fundamental principles of anatomy and physiology and their interrelationships. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BIO 168 Anatomy and Physiology I 3 3 4

Prerequisites: RED 090

Corequisites: None

This course provides a comprehensive study of the anatomy and physiology of the human body. Topics include body organization, homeostasis, cytology, histology, and the integumentary, skeletal, muscular, and nervous systems, and special senses. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

BIO 169 Anatomy and Physiology II 3 3 4

Prerequisites: BIO 168

Corequisites: None

This course provides a continuation of the comprehensive study of the anatomy and physiology of the human body. Topics include the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems as well as metabolism, nutrition, acid-base balance, and fluid and electrolyte balance. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. This course has been approved to satisfy the Comprehensive Articulation Agreement transferability as a pre-major and/or elective course requirement.

BIO 175 General Microbiology 2 2 3

Prerequisites: Select One: BIO 110, BIO 111, BIO 163, BIO 165, BIO 168

Corequisites: None

This course covers principles of microbiology with emphasis on microorganisms and human disease. Topics include an overview of microbiology and aspects of medical microbiology, identification and control of pathogens, disease transmission, host resistance, and immunity. Upon completion, students should be able to demonstrate knowledge of microorganisms and the disease process as well as aseptic and sterile techniques. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BIO 223 Field Botany 2 3 3

Prerequisites: BIO 112

Corequisites: None

This course provides a field and laboratory study of local flora. Emphasis is placed on local flora classification, identification, and ecology by the use of keys and field studies. Upon completion, students should be able to use keys for the classification and identification of local flora and to demonstrate an understanding of plant ecology. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

BIO 224 Local Flora Spring 1 2 2

Prerequisites: None

Corequisites: None

This course provides an introduction to the identification of native plants. Emphasis is placed on spring wild flowers. Upon completion, students should be able to identify a variety of spring wild flowers and native plants. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BIO 225 Local Flora Summer 1 2 2

Prerequisites: None

Corequisites: None

This course provides an introduction to the identification of native plants. Emphasis is placed on summer wild flowers. Upon completion, students should be able to identify a variety of summer wild flowers and native plants. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BIO 226 Local Flora Fall 1 2 2

Prerequisites: None

Corequisites: None

This course provides an introduction to the identification of native plants. Emphasis is placed on fall wild flowers. Upon completion, students should be able to identify a variety of fall wild flowers and native plants. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BIO 250 Genetics 3 3 4

Prerequisites: BIO 112

Corequisites: None

Available: As Needed

This course covers principles of prokaryotic and eukaryotic cell genetics. Emphasis is placed on the molecular basis of heredity, chromosome structure, patterns of Mendelian and non-Mendelian inheritance, evolution, and biotechnological applications. Upon completion, students should be able to recognize and describe genetic phenomena and demonstrate knowledge of important genetic principles. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BIO 271 Pathophysiology 3 0 3

Prerequisites: Select One: BIO 163, BIO 166, BIO 169

Corequisites: None

This course provides an in-depth study of human pathological processes and their effects on homeostasis. Emphasis is placed on interrelationships among organ systems in deviations from homeostasis. Upon completion, students should be able to demonstrate a detailed knowledge of pathophysiology. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability pre-major and/or elective course requirement.

BIO 275 Microbiology 3 3 4

Prerequisites: Select One: BIO 110, BIO 111, BIO 163, BIO 165, BIO 168

Corequisites: None

This course covers principles of microbiology and the impact these organisms have on man and the environment. Topics include the various groups of microorganisms, their structure, physiology, genetics, microbial pathogenicity, infectious diseases, immunology, and selected practical applications. Upon completion, students should be able to demonstrate knowledge and skills including microscopy, aseptic technique,

staining, culture methods, and identification of microorganisms. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

Baking and Pastry Arts***BPA 120 Petit Fours & Pastries 1 4 3**

Prerequisites: CUL 110 and CUL 160

Corequisites: None

This course introduces the basic principles of the preparation and plating of a variety of petit fours and individual dessert pastries. Emphasis is placed on traditional and contemporary petit fours and pastries, utilizing updated production methods. Upon completion, students should be able to produce individual pastries and petit fours for buffet and special event settings.

***BPA 130 European Cakes and Tortes 1 4 3**

Prerequisites: CUL 110 and CUL 160

Corequisites: None

This course introduces the production of a wide variety of classical and modern cakes suitable for restaurants, retail shops and large-scale production. Emphasis is placed on classic cakes using the methods of mixing, filling, glazing and icing. Upon completion, students should be able to prepare, assemble and decorate gelatin-based and layered torts and cakes such as Bavarian, Dobos and Sacher.

***BPA 150 Artisan & Specialty Bread 1 6 4**

Prerequisites: CUL 110, CUL 142 and CUL 160

Corequisites: None

This course provides an advanced study in the art and craft of bread making. Topics include pertinent formulas and techniques associated with naturally leavened loaves, hearth breads, focaccia, flat breads, and other breads utilizing a variety of grains. Upon completion, students should be able to prepare artisan and specialty breads that meet or exceed the expectations of restaurant and retail public.

***BPA 210 Cake Design & Decorating 1 4 3**

Prerequisites: CUL 110 and CUL 160

Corequisites: None

Available: Fall

This course covers advanced concepts in the design and decoration of wedding cakes and other specialty cakes. Topics include baking, filling and assembling cakes; cake design; finishing techniques utilizing gum paste, fondant, and royal icing; and advanced piping skills. Upon completion, students should be able to design, create, finish and evaluate the quality of wedding and specialty cakes.

***BPA 220 Confection Artistry 1 6 4**

Prerequisites: BPA 240, CUL 110 and CUL 160

Corequisites: None

This course introduces the principles and techniques of decorative sugar work and confectionary candy. Topics include nougat, marzipan modeling, pastillage and cocoa painting, confection candy and a variety of sugar techniques including blown, spun, poured and pulled. Upon completion, students should be able to prepare edible centerpieces and confections to enhance dessert buffets and plate presentations.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

***BPA 230 Chocolate Artistry** 1 4 3
 Prerequisites: BPA 240, CUL 110 and CUL 160
 Corequisites: None
 This course provides a study in the art and craft of chocolate. Topics include chocolate tempering, piping, and molding; decorative work associated with cakes and centerpieces; and the candy production techniques of filling, enrobing and dipping. Upon completion, students should be able to properly evaluate tempered chocolate, and produce a variety of chocolate candies and decorative elements for garnishing desserts.

***BPA 240 Plated Desserts** 1 4 3
 Prerequisites: BPA 120, BPA 130, CUL 110, CUL 160, and COE 112
 Corequisites: None
 This course provides a study in the elements and principles of design as they relate to plated desserts. Topics include plate composition, portioning, flavor pairings, textures, temperatures, eye appeal, balance, color harmony and plate decorating/painting techniques such as stenciling and chocolate striping. Upon completion, students should be able to demonstrate competence in combining a variety of dessert components enhanced with plate decorating techniques.

***BPA 250 Dessert/Bread Production** 1 8 5
 Prerequisites: BPA 150, COE 112, CUL 110 and CUL 160
 Corequisites: None
 This course is designed to merge artistry and innovation with the practical baking and pastry techniques utilized in a production setting. Emphasis is placed on quantity bread and roll-in dough production, plated and platter presentations, seasonal/theme product utilization and cost effectiveness. Upon completion, students should be able to plan, prepare and evaluate breads and desserts within a commercial environment and determine production costs and selling prices.

***BPA 260 Pastry & Baking Marketing** 2 2 3
 Prerequisites: BPA 150, BPA 210, BPA 240, BPA 250, and COE 112
 Corequisites: BPA 220, BPA 230, and BPA 250
 This course is designed to cover the marketing concepts and merchandising trends utilized in bakery and pastry operations. Emphasis is placed on menu planning, pricing products / strategies, resale and wholesale distribution methods, legal implications, and advertising techniques. Upon completion, students should be able to create a marketing plan that will serve as a basis for a capstone experience.

Blueprint Reading

BPR 111 Blueprint Reading 1 2 2
 Prerequisites: None
 Corequisites: None
 This course introduces the basic principles of blueprint reading. Topics include line types, orthographic projections, dimensioning methods, and notes. Upon completion, students should be able to interpret basic blueprints and visualize the features of a part.

BPR 121 Blueprint Reading: Mechanical 1 2 2
 Prerequisites: BPR 111 or MAC 131
 Corequisites: None
 This course covers the interpretation of intermediate blueprints. Topics include tolerancing, auxiliary views, sectional views, and assembly drawings. Upon completion, students should be able to read and interpret a mechanical working drawing.

BPR 130 Blueprint Reading/Construction 1 2 2
 Prerequisites: None
 Corequisites: None
 This course covers the interpretation of blueprints and specifications that are associated with the construction trades. Emphasis is placed on interpretation of details for foundations, floor plans, elevations, and schedules. Upon completion, students should be able to read and interpret a set of construction blueprints.

Business Administration

BUS 110 Introduction to Business 3 0 3
 Prerequisites: None
 Corequisites: None
 This course provides a survey of the business world. Topics include the basic principles and practices of contemporary business. Upon completion, students should be able to demonstrate an understanding of business concepts as a foundation for studying other business subjects. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BUS 115 Business Law I 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the ethics and legal framework of business. Emphasis is placed on contracts, negotiable instruments, Uniform Commercial Code, and the working of the court systems. Upon completion, students should be able to apply ethical issues and laws covered to selected business decision-making situations. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

BUS 116 Business Law II 3 0 3
 Prerequisites: BUS 115
 Corequisites: None
 This course continues the study of ethics and business law. Emphasis is placed on bailments, sales, risk-bearing, forms of business ownership, and copyrights. Upon completion, students should be able to apply ethical issues and laws covered to selected business decision-making situations.

BUS 135 Principles of Supervision 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the basic responsibilities and duties of the supervisor and his or her relationship to higher-level supervisors, subordinates, and associates. Emphasis is placed on effective utilization of the work force and understanding the role of the supervisor. Upon completion, students should be able to apply supervisory principles in the workplace.

***BUS 137 Principles of Management** 3 0 3
 Prerequisites: None
 Corequisites: None
 This course is designed to be an overview of the major functions of management. Emphasis is placed on planning, organizing, controlling, directing, and communicating. Upon completion, students should be able to work as contributing members of a team utilizing these functions of management. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

| | | | |
|--|--------------|---|--------------|
| BUS 147 Business Insurance | 3 0 3 | BUS 234 Training and Development | 3 0 3 |
| Prerequisites: None | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course surveys the basic concepts of risk management. Topics include principles and applications of health, property, life, and casualty insurance. Upon completion, students should be able to evaluate different insurance needs and assist an organization in acquiring adequate insurance coverage. | | This course covers developing, conducting, and evaluating employee training with attention to adult learning principles. Emphasis is placed on conducting a needs assessment, using various instructional approaches, designing the learning environment, and locating learning resources. Upon completion, students should be able to design, conduct, and evaluate a training program. | |
| BUS 151 People Skills | 3 0 3 | *BUS 239 Business Applications Seminar | 1 2 2 |
| Prerequisites: None | | Prerequisites: ACC 120, BUS 115, BUS 137, MKT 120 and either ECO 151, ECO 251 or ECO 252 | |
| Corequisites: None | | Corequisites: None | |
| This course introduces the basic concepts of identity and communication in the business setting. Topics include self-concept, values, communication styles, feelings and emotions, roles versus relationships, and basic assertiveness, listening, and conflict resolution. Upon completion, students should be able to distinguish between unhealthy, self-destructive, communication patterns and healthy, non-destructive, positive communication patterns. | | This course is designed as a capstone course for Business Administration majors. Emphasis is placed on decision making in the areas of management, marketing, production, purchasing, and finance. Upon completion, students should be able to apply the techniques, processes, and vital professional skills needed in the workplace. | |
| BUS 153 Human Resources Management | 3 0 3 | BUS 240 Business Ethics | 3 0 3 |
| Prerequisites: None | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course introduces the functions of personnel/human resource management within an organization. Topics include equal opportunity and the legal environment, recruitment and selection, performance appraisal, employee development, compensation planning, and employee relations. Upon completion, students should be able to anticipate and resolve human resource concerns. | | This course introduces contemporary and controversial ethical issues that face the business community. Topics include moral reasoning, moral dilemmas, law and morality, equity, justice and fairness, ethical standards, and moral development. Upon completion, students should be able to demonstrate an understanding of their moral responsibilities and obligations as members of the work force and society. | |
| BUS 175 Contract Negotiations | 3 0 3 | BUS 255 Org Behavior in Business | 3 0 3 |
| Prerequisites: None | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course covers theory, strategies, techniques and tactics for negotiating contracts, and principles and practices of negotiations for government, corporate or institutional procurements. Topics include preparation and conduct of negotiations and methods of dealing with situations under different types of negotiations. Upon completion, students should be able to effectively negotiate contracts. | | This course covers the impact of different management practices and leadership styles on worker satisfaction and morale, organizational effectiveness, productivity, and profitability. Topics include a discussion of formal and informal organizations, group dynamics, motivation, and managing conflict and change. Upon completion, students should be able to analyze different types of interpersonal situations and determine an appropriate course of action. | |
| BUS 217 Employment Law and Regulations | 3 0 3 | BUS 256 Recruit Select and Per Plan | 3 0 3 |
| Prerequisites: None | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| Available: Spring | | | |
| This course introduces the principle laws and regulations affecting public and private organizations and their employees or prospective employees. Topics include fair employment practices, EEO, affirmative action, and employee rights and protections. Upon completion, students should be able to evaluate organization policy for compliance and assure that decisions are not contrary to law. | | This course introduces the basic principles involved in managing the employment process. Topics include personnel planning, recruiting, interviewing and screening techniques, maintaining employees records; and voluntary and involuntary separations. Upon completion, students should be able to acquire and retain employees who match position requirements and fulfill organizational objectives. The course is a unique concentration requirement of the Human Resources Management concentration in the Business Administration program. | |
| BUS 225 Business Finance | 2 2 3 | BUS 258 Compensation and Benefits | 3 0 3 |
| Prerequisites: ACC 120 | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course provides an overview of business financial management. Emphasis is placed on financial statement analysis, time value of money, management of cash flow, risk and return, and sources of financing. Upon completion, students should be able to interpret and apply the principles of financial management. | | This course is designed to study the basic concepts of pay and its role in rewarding performance. Topics include wage and salary surveys, job analysis, job evaluation techniques, benefits, and pay-for-performance programs. Upon completion, students should be able to develop and manage a basic compensation | |

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

system to attract, motivate, and retain employees. This course is a unique concentration requirement of the Human Resources Management concentration in the Business Administration program.

BUS 259 HRM Applications 3 0 3

Prerequisites: BUS 217, BUS 234, BUS 256, and BUS 258

Corequisites: None

This course provides students in the Human Resources Management concentration the opportunity to reinforce their learning experiences from preceding HRM courses. Emphasis is placed on application of day-to-day HRM functions by completing in-basket exercises and through simulations. Upon completion, students should be able to determine the appropriate actions called for by typical events that affect the status of people at work. This course is a unique concentration requirement of the Human Resources Management concentration in the Business Administration program.

BUS 260 Business Communication 3 0 3

Prerequisites: CIS 110 and ENG 111

Corequisites: None

This course is designed to develop skills in writing business communications. Emphasis is placed on business reports, correspondence, and professional presentations. Upon completion, students should be able to communicate effectively in the workplace.

BUS 270 Professional Development 3 0 3

Prerequisites: None

Corequisites: None

This course provides basic knowledge of self-improvement techniques as related to success in the professional world. Topics include positive human relations, job-seeking skills, and projecting positive self-image. Upon completion, students should be able to demonstrate competent personal and professional skills necessary to get and keep a job.

BUS 280 REAL Small Business 4 0 4

Prerequisites: None

Corequisites: None

This course introduces hands-on techniques and procedures for planning and opening a small business, including the personal qualities needed for entrepreneurship. Emphasis is placed on market research, finance, time management, and day-to-day activities of owning/operating a small business. Upon completion, students should be able to write and implement a viable business plan and seek funding.

Cabinetmaking

CAB 110 Shop Operation 3 3 4

Prerequisites: None

Corequisites: None

This course covers establishing and maintaining a custom cabinet shop. Topics include financing, equipment acquisition, maintenance, inventory techniques, OSHA requirements, shop organization, and safety and delivery systems. Upon completion, students should be able to organize and maintain a custom cabinet business.

CAB 119 Cabinetry/Millworking 4 9 7

Prerequisites: None

Corequisites: None

This course introduces wood technology, cabinet construction, and mill-working. Topics include safety, hand/power tools, wood identification and use, wood joinery, abrasives, cabinet layout, laminates, finishing techniques, and other related topics. Upon completion, students should be able to select and process materials using accurate drawings and cut lists and install finished products.

Carpentry

CAR 111 Carpentry I 3 15 8

Prerequisites: None

Corequisites: CMT 212

This course introduces the theory and construction methods associated with the building industry, including framing, materials, tools, and equipment. Topics include safety, hand/power tool use, site preparation, measurement and layout, footings and foundations, construction framing, and other related topics. Upon completion, students should be able to safely lay out and perform basic framing skills with supervision. This is a diploma-level course.

CAR 113 Carpentry III 3 9 6

Prerequisites: CAR 111

Corequisites: None

This course covers interior trim and finishes. Topics include safety, hand/power tool use, measurement and layout, specialty framing, interior trim and finishes, cabinetry, and other related topics. Upon completion, students should be able to safely install various interior trim and finishes in a residential building with supervision. This is a diploma-level course.

CAR 115 Residential Planning/Estimating 3 0 3

Prerequisites: BPR 130

Corequisites: None

This course covers project planning, management, and estimating for residential or light commercial buildings. Topics include planning and scheduling, interpretation of working drawings and specifications, estimating practices, and other related topics. Upon completion, students should be able to perform quantity take-offs and cost estimates.

Cyber Crime

CCT 110 Introduction to Cyber Crime 3 0 3

Prerequisites: None

Corequisites: None

This course introduces and explains the various types of offenses that qualify as cyber crime activity. Emphasis is placed on identifying cyber crime activity and the response to these problems from both the private and public domains. Upon completion, students should be able to accurately describe and define cyber crime activities and select an appropriate response to deal with the problem.

CCT 121 Computer Crime Investigation 3 2 4

Prerequisites: None

Corequisites: None

This course introduces the fundamental principles of computer crime investigation processes. Topics include crime scene/incident processing, information gathering techniques, data retrieval, collection and preservation of evidence, preparation of reports and court presentations. Upon completion, students should be able to identify cyber crime activity and demonstrate proper investigative techniques to process the scene and assist in case prosecution.

CCT 231 Technology Crimes and Law 3 0 3

Prerequisites: None

Corequisites: None

This course covers the applicable technological laws dealing with the regulation of cyber security and criminal activity. Topics include an examination of state, federal and international laws regarding cyber crime with an emphasis on both general and North Carolina statutes. Upon completion, students should be able to identify the elements of cyber crime activity and discuss the trends of evolving laws.

Computer Engineering Technology**CET 111 Computer Upgrade/Repair I 2 3 3**

Prerequisites: DMA 030 and RED 080 or placement

Corequisites: None

This course covers repairing, servicing, and upgrading computers and peripherals in preparation for industry certification. Topics include CPU/memory/bus identification, disk subsystems, hardware/software installation/configuration, common device drivers, data recovery, system maintenance, and other related topics. Upon completion, students should be able to safely repair and/or upgrade computer systems to perform within specifications.

CET 125 Voice and Data Cabling 2 3 3

Prerequisites: None

Corequisites: None

This course provides an understanding of the industry and its worldwide standards, types of media and cabling, physical and logical networks, including signal transmission. Topics include network design documentation, part list set-up, pulling and mounting cable, cable management, wiring closets, patch panel installation and termination including cable testing. Upon completion, students should be able to understand documentation, design, installation and safety issues associated with voice and data cabling.

CET 161 Procedural Programming 2 3 3

Prerequisites: None

Corequisites: None

This course introduces procedural programming for engineering applications. Emphasis is placed on event-driven programming methods, including creating and manipulating data, sequencing, iteration, and blocking of code. Upon completion, students should be able to design, code, test and debug at a beginning level.

CET 211 Computer Upgrade/Repair II 2 3 3

Prerequisites: CET 111

Corequisites: None

This course covers concepts of repair service, and upgrade of computers and peripherals in preparation for industry certification. Topics may include resolving resource conflicts and system bus specifications, configuration and troubleshooting peripherals, operating system configuration and optimization, and other related topics. Upon completion, students should be able to identify and resolve system conflicts and optimize system performance.

CET 212 Integrated Manufacturing Systems 1 3 2

Prerequisites: ELN 237 and (CET 161 or CSC 143)

Corequisites: None

This course covers computer topics related to integrated manufacturing systems common to current manufacturing facilities. Topics include robot programming, automated control systems, PLCs, data communication, and networking in an integrated manufacturing environment, and other related topics. Upon completion, students should be able to program robots using teaching pendants and troubleshoot and maintain network installations related to integrated manufacturing systems.

Chemistry**CHM 092 Fundamentals of Chemistry 3 2 4**

Prerequisites: None

Corequisites: None

This course covers fundamentals of chemistry with laboratory applications. Topics include measurements, matter, energy, atomic theory, bonding, molecular structure, nomenclature, balancing equations, stoichiometry, solutions, acids and bases, gases, and basic organic chemistry. Upon completion, students should be able to understand and apply basic chemical concepts and demonstrate basic laboratory skills necessary for success in college-level science courses.

CHM 121 Foundations of Chemistry 3 0 3

Prerequisites: None

Corequisites: CHM 121A

This course is designed for those who have no previous high school chemistry or a grade of C or less in high school chemistry. Topics include matter, structure of the atom, nomenclature, chemical equations, bonding and reactions; mathematical topics include measurements, scientific notation, and stoichiometry. Upon completion, students should be able to demonstrate an understanding of chemical concepts and an ability to solve related problems in subsequent chemistry courses.

CHM 121A Foundations of Chemistry Laboratory 0 2 1

Prerequisites: None

Corequisites: CHM 121

This course is a laboratory for CHM 121. Emphasis is placed on laboratory experiences that enhance materials presented in CHM 121. Upon completion, students should be able to utilize basic laboratory procedures and apply them to chemical principles presented in CHM 121.

CHM 130 General, Organic, and Biochemistry 3 0 3

Prerequisites: High school chemistry or CHM 092

Corequisites: CHM 130A

This course provides a survey of basic facts and principles of general, organic, and biochemistry. Topics include measurement, molecular structure, nuclear chemistry, solutions, acid-base chemistry, gas laws, and the structure, properties, and reactions of major organic and biological groups. Upon completion, students should be able to demonstrate an understanding of fundamental chemical concepts. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

CHM 130A General, Organic, and Biochemistry Lab 0 2 1

Prerequisites: None

Corequisites: CHM 130

This course is a laboratory for CHM 130. Emphasis is placed on laboratory experiences that enhance materials presented in CHM 130. Upon completion, students should be able to utilize basic laboratory procedures and apply them to chemical principles presented in CHM 130. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

CHM 132 Organic and Biochemistry 3 3 4

Prerequisites: CHM 131 and 131A or CHM 151

Corequisites: None

This course provides a survey of major functional classes of compounds in organic and biochemistry. Topics include structure, properties, and reactions of the major organic and biological molecules and basic principles of metabolism.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

Upon completion, students should be able to demonstrate an understanding of fundamental chemical concepts needed to pursue studies in related professional fields. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

CHM 135 Survey of Chemistry I 3 2 4

Prerequisites: None

Corequisites: None

This course provides an introduction to inorganic chemistry. Emphasis is placed on measurement, atomic structure, bonding, molecular geometry, nomenclature, reactions, the mole concept, stoichiometric calculations, states of matter, and the gas laws. Upon completion, students should be able to demonstrate a basic understanding of chemistry as it applies to other fields. This introductory course series to chemistry emphasizes the practical impact of chemistry and scientific reasoning on society. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

CHM 151 General Chemistry I 3 3 4

Prerequisites: High school chemistry or CHM 092

Corequisites: MAT 161

This course covers fundamental principles and laws of chemistry. Topics include measurement, atomic and molecular structure, periodicity, chemical reactions, chemical bonding, stoichiometry, thermochemistry, gas laws, and solutions. Upon completion, students should be able to demonstrate an understanding of fundamental chemical laws and concepts as needed in CHM 152. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

CHM 152 General Chemistry II 3 3 4

Prerequisites: CHM 151

Corequisites: None

This course provides a continuation of the study of the fundamental principles and laws of chemistry. Topics include kinetics, equilibrium, ionic and redox equations, acid-base theory, electrochemistry, thermodynamics, introduction to nuclear and organic chemistry, and complex ions. Upon completion, students should be able to demonstrate an understanding of chemical concepts as needed to pursue further study in chemistry and related professional fields. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

CHM 251 Organic Chemistry I 3 3 4

Prerequisites: CHM 152

Corequisites: None

This course provides a systematic study of the theories, principles, and techniques of organic chemistry. Topics include nomenclature, structure, properties, reactions, and mechanisms of hydrocarbons, alkyl halides, alcohols, and ethers; further topics include isomerization, stereochemistry, and spectroscopy. Upon completion, students should be able to demonstrate an understanding of the fundamental concepts of covered organic topics as needed in CHM 252. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

CHM 252 Organic Chemistry II 3 3 4

Prerequisites: CHM 251

Corequisites: None

This course provides continuation of the systematic study of the theories, principles, and techniques of organic chemistry. Topics include nomenclature, structure, properties, reactions, and mechanisms of aromatics, aldehydes, ketones, carboxylic acids and derivatives, amines and heterocyclics; multi-step synthesis will be emphasized. Upon completion, students should be able to demonstrate an understanding of organic concepts as needed to pursue further study in chemistry and related professional fields. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

CHM 271 Biochemical Principles 3 0 3

Prerequisites: CHM 252

Corequisites: None

The course covers fundamental principles of biochemistry. Topics include structures, properties, reactions, and mechanisms of biomacromolecules including amino acids, peptides, proteins, carbohydrates and nucleic acids, enzymatic metabolic pathways, and biochemical genetics. Upon completion, students should be able to demonstrate an understanding of fundamental biochemical processes. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirements.

Information Systems

CIS 110 Introduction to Computers 2 2 3

Prerequisites: Basic computer literacy is necessary. (CTS 060 will provide students the foundation for this course.)

Corequisites: None

This course introduces computer concepts, including fundamental functions and operations of the computer. Topics include identification of hardware components, basic computer operations, security issues, and use of software applications. Upon completion, students should be able to demonstrate an understanding of the role and function of computers and use the computer to solve problems. Microsoft Office will be used in this course; this includes Word, Excel, Access and PowerPoint. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics (Quantitative Option).

CIS 111 Basic PC Literacy 1 2 2

Prerequisites: Basic computer literacy is necessary. (CTS 060 will provide students the foundation for this course.)

Corequisites: None

This course provides an overview of computer concepts. Emphasis is placed on the use of personal computers and software applications for personal and fundamental workplace use. Upon completion, students should be able to demonstrate basic personal computer skills.

CIS 113 Computer Basics 0 2 1

Prerequisites: None

Corequisites: None

This course introduces basic computer usage for non-computers majors. Emphasis is placed on developing basic personal computer skills. Upon completion, students should be able to demonstrate basic computer applications.

CIS 115 Intro to Programming and Logic 2 3 3

Prerequisites: Select One: DMA 040 or placement, MAT 120, MAT 121, MAT 161, MAT 171, MAT 175

Corequisites: None

This course introduces computer programming and problem solving in a structured program logic environment. Topics include language syntax, data types, program organization, problem solving methods, algorithm design, and logic control structures. Upon completion, students should be able to manage files with operating system commands, use top-down algorithm design, and implement algorithmic solutions in a programming language. This course has been approved for transfer under the Comprehensive Articulation Agreement as a general education course in Mathematics (Quantitative Option).

CIS 165 Desktop Publishing I 2 2 3

Prerequisites: CIS 110

Corequisites: None

This course provides an introduction to desktop publishing software capabilities. Emphasis is placed on efficient use of a page layout software package to create, design, and print publications; hardware/software compatibility; and integration of specialized peripherals. Upon completion, students should be able to prepare publications given design specifications.

Civil Engineering**CIV 110 Statics/Strength of Materials 2 6 4**

Prerequisites: MAT 121, MAT 161, MAT 171, or MAT 175

Corequisites: None

This course includes vector analysis, equilibrium of force systems, friction, sectional properties, stress/strain, and deformation. Topics include resultants and components of forces, moments and couples, free-body diagrams, shear and moment diagrams, trusses, frames, beams, columns, connections, and combined stresses. Upon completion, students should be able to analyze simple structures.

CIV 111 Soils and Foundations 2 3 3

Prerequisites: CIV 110 or MEC 250

Corequisites: None

This course presents an overview of soil as a construction material using both analysis and testing procedures. Topics include index properties, classification, stress analysis, compressibility, compaction, dewatering, excavation, stabilization, settlement, and foundations. Upon completion, students should be able to perform basic soil tests and analyze engineering properties of soil.

CIV 125 Civil/Surveying CAD 1 6 3

Prerequisites: DFT 119 or DFT 151

Corequisites: None

This course introduces civil/surveying computer-aided drafting (CAD) software. Topics include drawing, editing, and dimensioning commands; plotting; and other related civil/surveying topics. Upon completion, students should be able to produce civil/surveying drawings using CAD software.

CIV 210 Engineering Materials 1 3 2

Prerequisites: None

Corequisites: None

This course covers the behavior and properties of Portland cement and asphaltic concretes and laboratory and field testing. Topics include cementing agents and aggregates; water and admixtures; proportioning, production, placing, consolidation, and curing; and inspection methods. Upon completion, students should be able to proportion concrete

mixes to attain predetermined strengths and other properties and perform standard control tests.

CIV 211 Hydraulics and Hydrology 2 3 3

Prerequisites: CIV 110 or MEC 250

Corequisites: None

This course introduces the basic engineering principles and characteristics of hydraulics and hydrology. Topics include precipitation and runoff, fluid statics and dynamics, flow measurement, and pipe and open channel flow. Upon completion, students should be able to analyze and size drainage structures.

CIV 212 Environmental Planning 2 3 3

Prerequisites: CIV 211

Corequisites: None

This course covers water and wastewater technology, erosion and sedimentation control, and other related topics. Topics include collection, treatment, and distribution of water and wastewater and erosion and sedimentation control law. Upon completion, students should be able to demonstrate knowledge of water and wastewater systems and prepare erosion and sedimentation control plans.

CIV 215 Highway Technology 1 3 2

Prerequisites: SRV 111

Corequisites: CIV 211

This course introduces the essential elements of roadway components and design. Topics include subgrade and pavement construction, roadway drawings and details, drainage, superelevation, and N.C. Department of Transportation Standards. Upon completion, students should be able to use roadway drawings and specifications to develop superelevation, drainage, and general highway construction details.

CIV 220 Basic Structural Concepts 1 3 2

Prerequisites: CIV 110 or MEC 250

Corequisites: None

This course covers the historical perspective of structures as well as types, materials, common elements, and mechanical principles of structures. Topics include basic structure shapes, advantages and disadvantages of standard building materials, application of structural concepts, and other related topics. Upon completion, students should be able to demonstrate an understanding of basic structural concepts.

CIV 221 Steel and Timber Design 2 3 3

Prerequisites: CIV 110 or MEC 250

Corequisites: None

This course introduces the basic elements of steel and timber structures. Topics include the analysis and design of steel and timber beams, columns, and connections and the use of appropriate manuals and codes. Upon completion, students should be able to analyze, design, and draw simple steel and timber structures. Successful completion of CIV 220 is recommended before attempting this course.

CIV 222 Reinforced Concrete 2 3 3

Prerequisites: CIV 110 or MEC 250

Corequisites: None

This course introduces the basic elements of reinforced concrete and masonry structures. Topics include analysis and design of reinforced concrete beams, slabs, columns, footings, and retaining walls; load-bearing masonry walls; and ACI manuals and codes. Upon completion, students should be able to analyze and design components of a structure using reinforced concrete and masonry elements and utilize appropriate ACI publications. Successful completion of CIV 220 is recommended before attempting this course.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively.

When only three numbers are listed, the middle number always designates lab hours.

CIV 230 Construction Estimating 2 3 3
 Prerequisites: ARC 111, CIS 110, CIS 111, or EGR 115
 Corequisites: None
 This course covers quantity take-offs of labor, materials, and equipment and calculation of direct and overhead costs for a construction project. Topics include the interpretation of working drawings and specifications, types of contracts and estimates, building codes, bidding techniques and procedures, and estimating software. Upon completion, students should be able to prepare a detailed cost estimate and bid documents for a construction project.

CIV 240 Project Management 2 3 3
 Prerequisites: ARC 111 or EGR 115
 Corequisites: None
 This course introduces construction planning and scheduling techniques and project management software. Topics include construction safety, operation analysis, construction scheduling, construction control systems, claims and dispute resolutions, project records, and documentation. Upon completion, students should be able to demonstrate an understanding of the roles of construction project participants, maintain construction records, and prepare construction schedules.

CIV 250 Civil Engineering Technology Project 1 3 2
 Prerequisites: Department Chair Approval
 Corequisites: None
 This course includes an integrated team approach to civil engineering technology projects. Emphasis is placed on project proposal, site selection, analysis/design of structures, construction material selection, time and cost estimating, planning, and management of a project. Upon completion, students should be able to apply team concepts, prepare estimates, submit bid proposals, and manage projects.

Criminal Justice

CJC 100 Basic Law Enforcement Training 9 30 19
 Prerequisites: RED 080
 Corequisites: None
 This course covers the skills and knowledge needed for entry-level employment as a law enforcement officer in North Carolina. Emphasis is placed on topics and areas as defined by the North Carolina Administrative Code. Upon completion, students should be able to demonstrate competence in the topics and areas required for the state comprehensive examination. This is a certificate-level course.

CJC 111 Introduction to Criminal Justice 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the components and processes of the criminal justice system. Topics include history, structure, functions, and philosophy of the criminal justice system and their relationship to life in our society. Upon completion, students should be able to define and describe the major system components and their interrelationships and evaluate career options. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

CJC 112 Criminology 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces deviant behavior as it relates to criminal activity. Topics include theories of crime causation; statistical analysis of criminal behavior; past, present, and future social control initiatives; and other related topics. Upon completion, students should be able to explain and discuss various theories of crime causation and societal response.

CJC 113 Juvenile Justice 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers the juvenile justice system and related juvenile issues. Topics include an overview of the juvenile justice system, treatment and prevention programs, special areas and laws unique to juveniles, and other related topics. Upon completion, students should be able to identify/discuss juvenile court structure/procedures, function and jurisdiction of juvenile agencies, processing/detention of juveniles, and case disposition.

CJC 114 Investigative Photography 1 2 2
 Prerequisites: None
 Corequisites: None
 This course covers the operation of various photographic equipment and its application to criminal justice. Topics include using various cameras, proper exposure of film, developing film/prints, and preparing photographic evidence. Upon completion, students should be able to demonstrate and explain the role of photography and proper film exposure and development techniques.

CJC 120 Interviews/Interrogations 1 2 2
 Prerequisites: None
 Corequisites: None
 This course covers basic and special techniques employed in criminal justice interviews and interrogations. Emphasis is placed on the interview/interrogation process, including interpretation of verbal and physical behavior and legal perspectives. Upon completion, students should be able to conduct interviews/interrogations in a legal, efficient, and professional manner and obtain the truth from suspects, witnesses, and victims.

CJC 121 Law Enforcement Operations 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces fundamental law enforcement operations. Topics include the contemporary evolution of law enforcement operations and related issues. Upon completion, students should be able to explain theories, practices, and issues related to law enforcement operations. There will be an emphasis on practical skills. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

CJC 122 Community Policing 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers the historical, philosophical, and practical dimensions of community policing. Emphasis is placed on the empowerment of police and the community to find solutions to problems by forming partnerships. Upon completion, students should be able to define community policing, describe how community policing strategies solve problems, and compare community policing to traditional policing.

CJC 131 Criminal Law 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers the history/evolution/principles and contemporary applications of criminal law. Topics include sources of substantive law, classification of crimes, parties to crime, elements of crimes, matters of criminal responsibility, and other related topics. Upon completion, students should be able to discuss the sources of law and identify, interpret, and apply the appropriate statutes/elements. There will be an emphasis on North Carolina law.

|---|---|--------------|---|--|--------------|
| CJC 132 | Court Procedure and Evidence | 3 0 3 | CJC 213 | Substance Abuse | 3 0 3 |
| Prerequisites: None Corequisites: None | | | Prerequisites: None Corequisites: None | | |
| This course covers judicial structure/process, procedure from incident to disposition, kinds and degrees of evidence, and the rules governing admissibility of evidence in court. Topics include consideration of state and federal courts, arrest, search and seizure laws, exclusionary and statutory rules of evidence, and other related issues. Upon completion, students should be able to identify and discuss procedures necessary to establish a lawful arrest/search, proper judicial procedures, and the admissibility of evidence. | | | This course is a study of substance abuse in our society. Topics include the history and classifications of drug abuse and the social, physical, and psychological impact of drug abuse. Upon completion, students should be able to identify various types of drugs, their effects on human behavior and society, and treatment modalities. Drug enforcement programs and techniques will be discussed. | | |
| CJC 160 | Terrorism: Underlying Issues | 3 0 3 | CJC 214 | Victimology | 3 0 3 |
| Prerequisites: None Corequisites: None | | | Prerequisites: None Corequisites: None | | |
| This course identifies the fundamental reasons why America is a target for terrorists, covering various domestic/international terrorist groups and ideologies from a historical aspect. Emphasis is placed upon recognition of terrorist crime scenes; weapons of mass destruction; chemical, biological, and nuclear terrorism; and planning consideration involving threat assessments. Upon completion, the student should be able to identify and discuss the methods used in terrorists' activities and complete a threat assessment for terrorists' incidents. | | | This course introduces the study of victims. Emphasis is placed on roles/characteristics of victims, victim interaction with the criminal justice system and society, current victim assistance programs, and other related topics. Upon completion, students should be able to discuss and identify victims, the uniqueness of victims' roles, and current victim assistance programs. | | |
| CJC 161 | Intro Homeland Security | 3 0 3 | CJC 215 | Organization and Administration | 3 0 3 |
| Prerequisites: None Corequisites: None | | | Prerequisites: None Corequisites: None | | |
| This course introduces the historical, organizational and practical aspects of Homeland Security. Topics include a historic overview, definitions and concepts, organizational structure, communications, technology, mitigation, prevention and preparedness, response and recovery, and the future of Homeland Security. Upon completion, students should be able to explain essential characteristics of terrorism and Homeland Security, and define roles, functions and interdependency between agencies. | | | This course introduces the components and functions of organization and administration as it applies to the agencies of the criminal justice system. Topics include operations/functions of organizations; recruiting, training, and retention of personnel; funding and budgeting; communications; span of control and discretion; and other related topics. Upon completion, students should be able to identify and discuss the basic components and functions of a criminal justice organization and its administrative operations. | | |
| CJC 170 | Critical Incident Management for Public Safety | 3 0 3 | CJC 221 | Investigative Principles | 3 2 4 |
| Prerequisites: None Corequisites: None | | | Prerequisites: None Corequisites: None | | |
| This course prepares the student to specialize in the direct response, operations, and management of critical incidents. Emphasis is placed upon the theoretical and applied models to understand and manage disasters, terrorism, and school/work place violence. Upon completion, the student should be able to identify and discuss managerial techniques, legal issues, and response procedures to critical incidents. | | | This course introduces the theories and fundamentals of the investigative process. Topics include crime scene/incident processing, information gathering techniques, collection/preservation of evidence, preparation of appropriate reports, court presentations, and other related topics. Upon completion, students should be able to identify, explain, and demonstrate the techniques of the investigative process, report preparation, and courtroom presentation. | | |
| CJC 212 | Ethics and Community Relations | 3 0 3 | CJC 222 | Criminalistics | 3 0 3 |
| Prerequisites: None Corequisites: None | | | Prerequisites: None Corequisites: None | | |
| This course covers ethical considerations and accepted standards applicable to criminal justice organizations and professionals. Topics include ethical systems; social change, values, and norms; cultural diversity; citizen involvement in criminal justice issues; and other related topics. Upon completion, students should be able to demonstrate the ability to apply ethical considerations to the decision-making process in identifiable criminal justice situations. | | | This course covers the functions of the forensic laboratory and its relationship to successful criminal investigations and prosecutions. Topics include advanced crime scene processing, investigative techniques, current forensic technologies, and other related topics. Upon completion, students should be able to identify and collect relevant evidence at simulated crime scenes and request appropriate laboratory analysis of submitted evidence. An emphasis will be placed on current technology for collection and classification of fingerprint evidence. | | |

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | |
|--|--------------------------------------|--------------|
| CJC 223 | Organized Crime | 3 0 3 |
| Prerequisites: None | | |
| Corequisites: None | | |
| This course introduces the evolution of traditional and non-traditional organized crime and its effect on society and the criminal justice system. Topics include identifying individuals and groups involved in organized crime, areas of criminal activity, legal and political responses to organized crime, and other related topics. Upon completion, students should be able to identify the groups and activities involved in organized crime and the responses of the criminal justice system. | | |
| CJC 225 | Crisis Intervention | 3 0 3 |
| Prerequisites: None | | |
| Corequisites: None | | |
| This course introduces critical incident intervention and management techniques as they apply to operational criminal justice practitioners. Emphasis is placed on the victim/offender situation as well as job-related high stress, dangerous, or problem-solving citizen contacts. Upon completion, students should be able to provide insightful analysis of emotional, violent, drug-induced, and other critical and/or stressful incidents that require field analysis and/or resolution. | | |
| CJC 231 | Constitutional Law | 3 0 3 |
| Prerequisites: None | | |
| Corequisites: None | | |
| The course covers the impact of the Constitution of the United States and its amendments on the criminal justice system. Topics include the structure of the Constitution and its amendments, court decisions pertinent to contemporary criminal justice issues, and other related topics. Upon completion, students should be able to identify/discuss the basic structure of the United States Constitution and the rights/procedures as interpreted by the courts. | | |
| CJC 232 | Civil Liability | 3 0 3 |
| Prerequisites: None | | |
| Corequisites: None | | |
| This course covers liability issues for the criminal justice professional. Topics include civil rights violations, tort liability, employment issues, and other related topics. Upon completion, students should be able to explain civil trial procedures and discuss contemporary liability issues. | | |
| CJC 255 | Issue in Criminal Justice App | 3 0 3 |
| Prerequisites: CJC 111, CJC 221, and CJC 231 | | |
| Corequisites: None | | |
| This course provides an opportunity to exhibit interpersonal and technical skills required for application of criminal justice concepts in contemporary practical situations. Emphasis is placed on critical thinking and integration of theory and practical skills components. Upon completion, students should be able to demonstrate the knowledge required of any entry-level law enforcement officer. | | |
| CJC 261 | High-Risk Situations | 1 2 2 |
| Prerequisites: None | | |
| Corequisites: None | | |
| This course prepares students to employ proper response methods, including a risk and attack analysis, when faced with high-risk situations. Emphasis will be placed on cover and evacuation techniques when faced with an active, barricaded shooter, improvised explosive device recognition, and hazardous material impact assessment. Upon completion, students would be able to demonstrate an ability to analyze a high-risk situation and use the proper decision-making process to respond. This course is restricted to the Criminal Justice Technology curriculum. | | |

Construction Management

| | | |
|---|--|--------------|
| *CMT 210 | Professional Construction Supervision | 3 0 3 |
| Prerequisites: None | | |
| Corequisites: None | | |
| This course introduces the student to the fundamentals of effective supervision emphasizing professionalism through knowledge and applied skills. Topics include safety, planning and scheduling, contract, problem-solving, communications, conflict resolution, recruitment, employment laws and regulations, leadership, motivation, teamwork, discipline, setting objectives, and training. Upon completion, the student should be able to demonstrate the basic skills necessary to be successful as a supervisor in the construction industry. | | |
| *CMT 212 | Total Safety Performance | 3 0 3 |
| Prerequisites: None | | |
| Corequisites: CMT 210 | | |
| This course covers the importance of managing safety and productivity equally by encouraging people to take individual responsibility for safety and health in the workplace. Topics include safety management, controlling construction hazards, communicating and enforcing policies, OSHA compliance, personal responsibility and accountability, safety planning, training, and personal protective equipment. Upon completion, students should be able to supervise safety at a construction job site and qualify for the OSHA Training Certification. | | |
| *CMT 214 | Planning and Scheduling | 3 0 3 |
| Prerequisites: CMT 210 and BPR 130 | | |
| Corequisites: None | | |
| This course covers the need for the process of planning construction projects, as well as the mechanics and vocabulary of project scheduling. Topics include project preplanning, scheduling format, planning for production, short interval planning, schedule updating and revising, and computer-based planning and scheduling. Upon completion, the student should be able to understand the need for planning and scheduling, the language and logic of scheduling, and use of planning skills. | | |
| *CMT 216 | Costs and Productivity | 3 0 3 |
| Prerequisites: CMT 210 | | |
| Corequisites: None | | |
| This course covers the relationships between time, work completed, work-hours spent, schedule duration, equipment hours, and materials used. Topics include production rates, productivity unit rates, work method improvements, and overall total project cost control. Upon completion, the student should be able to demonstrate an understanding of how costs may be controlled and productivity improved on a construction project. | | |
| *CMT 218 | Human Relations Issues | 3 0 3 |
| Prerequisites: CMT 210 | | |
| Corequisites: None | | |
| Available: Spring | | |
| This course provides instruction on human relations issues as they relate to construction project supervision. Topics include relationships, human behavior, project staffing issues, teamwork, effective communication networks, laws and regulations, and identifying and responding to conflict, crisis, and discipline. Upon completion, the student will demonstrate an understanding of the importance of human relations in the success of a construction project. | | |

Cooperative Education

*COE 111 Co-op Work Experience I 0 0 10 1

Prerequisites: See Department Chair for prerequisites

Corequisites: None

Available: See Department Chair for availability

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

*COE 112 Co-op Work Experience I 0 0 20 2

Prerequisites: See Department Chair for prerequisites

Corequisites: None

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

COE 115 Work Experience Seminar I 1 0 0 1

Prerequisites: See Department Chair for prerequisites

Corequisites: Select one: COE 111, COE 112, COE 113, COE 114

This course description is written by individual colleges.

*COE 122 Co-op Work Experience II 0 0 20 2

Prerequisites: See Department Chair for prerequisites

Corequisites: None

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

*COE 212 Work Experience IV 0 0 20 2

Prerequisites: See Department Chair for prerequisites

Corequisites: None

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

*COE 215 Work Experience Seminar IV 1 0 0 1

Prerequisites: See Department Chair for prerequisites

Corequisites: Select one: COE 211, COE 212, COE 213, COE 214

Available: See Department Chair for availability

This course description is written by individual colleges.

Communication

COM 120 Intro to Interpersonal Communication 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the practices and principles of interpersonal communication in both dyadic and group settings. Emphasis is placed on the communication process, perception, listening, self-disclosure, speech apprehension, ethics, nonverbal communication, conflict, power, and dysfunctional communication relationships. Upon completion, students should be able to demonstrate interpersonal communication

skills, apply basic principles of group discussion, and manage conflict in interpersonal communication situations. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

COM 140 Intro to Intercultural Communication 3 0 3

Prerequisites: None

Corequisites: None

This course introduces techniques of cultural research, definitions, functions, characteristics, and impacts of cultural differences in public address. Emphasis is placed on how diverse backgrounds influence the communication act and how cultural perceptions and experiences determine how one sends and receives messages. Upon completion, students should be able to demonstrate an understanding of the principles and skills needed to become effective in communicating outside one's primary culture. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

COM 150 Intro to Mass Communication 3 0 3

Prerequisites: ENG 111

Corequisites: None

This course introduces print and electronic media and the new information technologies in terms of communication theory and as economic, political, and social institutions. Topics include the nature, history, functions, and responsibilities of mass communication industries in a global environment and their role and impact in American society. Upon completion, students should be able to demonstrate awareness of the pervasive nature of mass media and how media operate in an advanced post-industrial society. COM 150 has been approved for transfer under the Comprehensive Articulation Agreement as a pre-major and/or elective course requirement.

COM 231 Public Speaking 3 0 3

Prerequisites: RED 090

Corequisites: None

This course provides instruction and experience in preparation and delivery of speeches within a public setting and group discussion. Emphasis is placed on research, preparation, delivery, and evaluation of informative, persuasive, and special occasion public speaking. Upon completion, students should be able to prepare and deliver well-organized speeches and participate in group discussion with appropriate audiovisual support. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

COM 250 Public Communication 3 0 3

Prerequisites: ENG 113 or ENG 114, and COM 120 or COM 231

Corequisites: None

This course provides a comprehensive theoretical background for the practice of speaking in public utilizing rhetoric principles applied in a series of speaking experiences. Emphasis is on informative and persuasive advanced speaking skills; speaking using the teleprompter, and on-camera presentations of news, weather and commercials. Upon completion, students should be able to construct, present, and critique public communications that are complex, dynamic and purposeful. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

Cosmetology

COS 111 Cosmetology Concepts I

4 0 4

Prerequisites: None

Corequisites: COS 112

This course introduces basic cosmetology concepts. Topics include safety, first aid, sanitation, bacteriology, anatomy, diseases and disorders, hygiene, product knowledge, chemistry, ethics, manicures, and other related topics. Upon completion, students should be able to safely and competently apply cosmetology concepts in the salon setting.

COS 112 Salon I

0 24 8

Prerequisites: None

Corequisites: COS 111

This course introduces basic salon services. Topics include scalp treatments, shampooing, rinsing, hair color, design, haircutting, permanent waving, pressing, relaxing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate salon services.

COS 113 Cosmetology Concepts II

4 0 4

Prerequisites: COS 111

Corequisites: COS 114

This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, chemistry, manicuring, chemical restructuring, and hair coloring. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting.

COS 114 Salon II

0 24 8

Prerequisites: COS 112

Corequisites: COS 113

This course provides experience in a simulated salon setting. Topics include basic skin care, manicuring, nail application, scalp treatments, shampooing, rinsing, hair color, design, haircutting, chemical restructuring, pressing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services.

COS 115 Cosmetology Concepts III

4 0 4

Prerequisites: COS 113

Corequisites: COS 116

This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, salon management, salesmanship, skin care, electricity/light therapy, wigs, thermal hair styling, lash and brow tinting, superfluous hair removal, and other related topics. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting.

COS 116 Salon III

0 12 4

Prerequisites: COS 114

Corequisites: COS 115

This course provides comprehensive experience in a simulated salon setting. Emphasis is placed on intermediate-level of skin care, manicuring, scalp treatments, shampooing, hair color, design, haircutting, chemical restructuring, pressing, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services.

COS 117 Cosmetology Concepts IV

2 0 2

Prerequisites: COS 115

Corequisites: COS 118

This course covers advanced cosmetology concepts. Topics include chemistry and hair structure, advanced cutting and design, and an overview of all cosmetology concepts in preparation for the licensing examination. Upon completion, students should be able to demonstrate an understanding of these cosmetology concepts and meet program completion requirements.

COS 118 Salon IV

0 21 7

Prerequisites: COS 116

Corequisites: COS 117

This course provides advanced experience in a simulated salon setting. Emphasis is placed on efficient and competent delivery of all salon services in preparation for the licensing examination and employment. Upon completion, students should be able to demonstrate competence in program requirements and the areas covered on the Cosmetology licensing examination and meet entry-level employment requirements.

COS 119 Esthetics Concepts I

2 0 2

Prerequisites: RED 080 or placement

Corequisites: COS 120

This course covers the concepts of esthetics. Topics include orientation, anatomy, physiology, hygiene, sterilization, first aid, chemistry, basic dermatology, and professional ethics. Upon completion, students should be able to demonstrate an understanding of the concepts of esthetics and meet course requirements.

COS 120 Esthetics Salon I

0 18 6

Prerequisites: RED 080 or placement

Corequisites: COS 119

This course covers the techniques of esthetics in a comprehensive experience in a simulated salon setting. Topics include client consultation, facials, body treatments, hair removal, make-up applications, and color analysis. Upon completion, students should be able to safely and competently demonstrate esthetic services on clients in a salon setting.

COS 121 Manicure/Nail Technology I

4 6 6

Prerequisites: RED 080 or placement

Corequisites: None

This course covers techniques of nail technology, hand and arm massage, and recognition of nail diseases and disorders. Topics include OSHA/safety, sanitation, bacteriology, product knowledge, salesmanship, manicures, artificial applications, pedicures, massage, and other related topics. Upon completion, students should be able to safely and competently perform nail care, including manicures, pedicures, massage, decorating, and artificial applications in a salon setting.

COS 125 Esthetics Concepts II

2 0 2

Prerequisites: COS 119

Corequisites: COS 126

This course covers more comprehensive esthetics concepts. Topics include nutrition, business management, make-up and color analysis. Upon completion students should be able to demonstrate an understanding of the advanced esthetics concepts and meet course requirements.

COS 126 Esthetics Salon II

0 18 6

Prerequisites: COS 120

Corequisites: COS 125

This course provides experience in a simulated esthetics setting. Topics include machine facials, aroma therapy, massage therapy, electricity, and apparatus. Upon completion, students should be able to demonstrate competence in program requirements and the areas covered on the Cosmetology licensing examination for Estheticians.

COS 222 Manicure/Nail Technology II 4 6 6
 Prerequisites: COS 121
 Corequisites: None

This course covers advanced techniques of nail technology and hand and arm massage. Topics include OSHA/safety, product knowledge, customer service, salesmanship, artificial applications, nail art, and other related topics. Upon completion, students should be able to demonstrate competence necessary for the licensing examination, including advanced nail care, artificial enhancements, and decorations.

COS 240 Contemporary Design 1 3 2
 Prerequisites: COS 111, COS 112
 Corequisites: None

This course covers methods and techniques for contemporary designs. Emphasis is placed on contemporary designs and other related topics. Upon completion, students should be able to demonstrate and apply techniques associated with contemporary design.

COS 260 Design Applications 1 3 2
 Prerequisites: COS 115, COS 116
 Corequisites: None

This course provides an overview of the design concepts used in cosmetology. Topics include the application of art principles and elements to artistically design hair, nails, and make-up and other related topics. Upon completion, students should be able to demonstrate knowledge and techniques associated with design concepts.

COS 271 Instructor Concepts I 5 0 5
 Prerequisites: None
 Corequisites: COS 272

This course introduces the basic cosmetology instructional concepts. Topics include orientation, theories of education, unit planning, daily lesson planning, laboratory management, student assessment, record keeping, and other related topics. Upon completion, students should be able to identify theories of education, develop lesson plans, demonstrate supervisory techniques, and assess student performance in a classroom setting.

COS 272 Instructor Practicum I 0 21 7
 Prerequisites: None
 Corequisites: COS 271

This course covers supervisory and instructional skills for teaching entry-level cosmetology students in a laboratory setting. Topics include demonstrations of services, supervision, and entry-level student assessment. Upon completion, students should be able to demonstrate salon services and instruct and objectively assess the entry-level student.

COS 273 Instructor Concepts II 5 0 5
 Prerequisites: COS 271, COS 272
 Corequisites: COS 274

This course covers advanced cosmetology instructional concepts. Topics include practical demonstrations, lesson planning, lecture techniques, development and administration of assessment tools, record keeping, and other related topics. Upon completion, students should be able to develop lesson plans, demonstrate supervision techniques, assess student performance in a classroom setting, and keep accurate records.

COS 274 Instructor Practicum II 0 21 7
 Prerequisites: COS 271, COS 272
 Corequisites: COS 273

This course is designed to develop supervisory and instructional skills for teaching advanced cosmetology students in a laboratory setting. Topics include practical demonstrations, supervision, and advanced student assessment. Upon completion, students should be able to demonstrate competence in the areas covered by the Instructor Licensing Examination and meet program completion requirements.

Computer Programming

CSC 134 C++ Programming 2 3 3
 Prerequisites: CIS 115
 Corequisites: None

This course introduces computer programming using the C++ programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test and debug at a beginning level. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

CSC 139 Visual BASIC Programming 2 3 3
 Prerequisites: CIS 115
 Corequisites: None

This course introduces computer programming using the Visual BASIC programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test and debug JAVA language programs. This course is also available through the Virtual Learning Community (VLC). This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

CSC 143 Object-Oriented Programming 2 3 3
 Prerequisites: None
 Corequisites: None

This course introduces the concepts of object-oriented programming. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, test, debug, and implement objects at the application level using the appropriate environment.

CSC 151 JAVA Programming 2 3 3
 Prerequisites: CIS 115
 Corequisites: None

This course introduces computer programming using the JAVA programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion students should be able to design, code, test, debug JAVA language programs. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

Construction

CST 111 Construction I 3 3 4

Prerequisites: None

Corequisites: None

This course covers standard and alternative building methods to include wall framing. Topics include safety and footings, foundations, floor framing systems, and wall framing systems commonly used in the construction industry. Upon completion, students should be able to safely erect all framing necessary to begin roof framing.

CST 211 Construction Surveying 2 3 3

Prerequisites: Select one: MAT 115, MAT 120, MAT 121, MAT 161, MAT 171, MAT 175

Corequisites: None

This course covers field-surveying applications for residential and commercial construction. Topics include building layout and leveling, linear measurement and turning angles, plumbing vertical members, and topographic and utilities surveys. Upon completion, students should be able to properly and accurately use surveying equipment to lay out residential and commercial buildings.

Computer Information Technology

CTS 060 Essential Computer Usage 1 2 2

Prerequisites: None

Corequisites: None

This course covers the basic functions and operations of the computer. Topics include identification of components, overview of operating systems and other basic computer operations. Upon completion, students should be able to perform basic computer commands, access files, print documents and complete fundamental application operations.

CTS 115 Info Sys Business Concept 3 0 3

Prerequisites: CIS115, DBA110, WEB115

Corequisites: None

The course introduces the role of IT in managing business processes and the need for business process and IT alignment. Emphasis is placed on industry need for understanding business challenges and developing/managing information systems to contribute to the decision making process based on these challenges. Upon completion, students should be able to demonstrate knowledge of the 'hybrid business manager' and the potential offered by new technology and systems. Students will acquire the skills to prepare themselves and their work for a career in the information technology field.

This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

CTS 120 Hardware/Software Support 2 3 3

Prerequisites: CIS 110 or CIS 111, and NOS 110

Corequisites: None

This course covers the basic hardware of a personal computer, including installation, operations and interactions with software. Topics include component identification, memory-system, peripheral installation and configuration, preventive maintenance, hardware diagnostics/repair, installation and optimization of system software, commercial programs, system configuration, and device-drivers. Upon completion, students should be able to select appropriate computer equipment and software, upgrade/maintain existing equipment and software, and troubleshoot/repair non-functioning personal computers.

CTS 130 Spreadsheet 2 2 3

Prerequisites: CIS 110 or CIS 111 or OST 137, and DMA 040 or placement
Corequisites: None

This course introduces basic spreadsheet design and development. Topics include writing formulas, using functions, enhancing spreadsheets, creating charts, and printing. Upon completion, students should be able to design and print basic spreadsheets and charts. This course covers advanced functions, charting, macros, databases, and linking.

CTS 135 Integrated Software Intro 2 4 4

Prerequisites: CIS 110 or CIS 111

Corequisites: None

This course instructs students in the Windows or Linux based program suites for word processing, spreadsheet, database, personal information manager, and presentation software. This course prepares students for introductory level skills in database, spreadsheet, personal information manager, word processing, and presentation applications to utilize data sharing. Upon completion, students should be able to design and integrate data at an introductory level to produce documents using multiple technologies.

***CTS 217 Computer Training/Support** 2 2 3

Prerequisites: CIS 110 and DBA 110

Corequisites: None

This course introduces computer training and support techniques. Topics include methods of adult learning, training design, delivery, and evaluation, creating documentation, and user support methods. Upon completion, students should be able to design and implement training and provide continued support for computer users.

CTS 220 Advanced Hard/Software Support 2 3 3

Prerequisites: CTS 120

Corequisites: None

This course provides advanced knowledge and competencies in hardware and operating system technologies for computer technicians to support personal computers. Emphasis is placed on configuring and upgrading; diagnosis and troubleshooting; as well as preventative maintenance of hardware and system software. Upon completion, students should be able to install, configure, diagnose, perform preventative maintenance, and maintain basic networking on personal computers.

***CTS 285 Systems Analysis and Design** 3 0 3

Prerequisites: CIS 115, DBA 110 and Department Chair Approval

Corequisites: None

This course introduces established and evolving methodologies for the analysis, design, and development of an information system. Emphasis is placed on system characteristics, managing projects, prototyping, CASE/OOM tools, and systems development life cycle phases. Upon completion, students should be able to analyze a problem and design an appropriate solution using a combination of tools and techniques.

CTS 287 Emerging Technologies 3 0 3

Prerequisites: CIS 115, DBA 110, WEB 115

Corequisites: None

This course introduces emerging information technologies. Emphasis is placed on evolving technologies and trends in business and industry. Upon completion, students should be able to articulate an understanding of the current trends and issues in emerging technologies for information systems.

CTS 289 System Support Project*1 4 3**

Prerequisites: CTS 285

Corequisites: None

This course provides an opportunity to complete a significant support project with minimal instructor assistance. Emphasis is placed on written and oral communication skills, project definition, documentation, installation, testing, presentation, and user training. Upon completion, students should be able to complete a project from the definition phase through implementation.

Culinary Arts**CUL 110 Sanitation & Safety****2 0 2**

Prerequisites: ENG 080, RED 090 or placement

Corequisites: None

This course introduces the basic principles of sanitation and safety relative to the hospitality industry. Topics include personal hygiene, sanitation and safety regulations, use and care of equipment, the principles of food-borne illness, and other related topics. Upon completion, students should be able to demonstrate an understanding of the content necessary for successful completion of a nationally recognized food/safety/sanitation exam.

CUL 110A Sanitation & Safety Lab*0 2 1**

Prerequisites: ENG 080, RED 090 or placement

Corequisites: CUL 110

This course provides a laboratory experience for enhancing student skills in the basic principles of sanitation and safety. Emphasis is placed on personal hygiene, sanitation and safety regulations, use and care of equipment, the principles of food-borne illness, and other related topics. Upon completion, students should be able to demonstrate practical applications of sanitation and safety procedures in the hospitality industry.

CUL 111 Success in Hospitality Studies**1 0 1**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: None

This course provides an orientation to the resources available and academic skills necessary to achieve success in a hospitality program. Emphasis is placed on technical and interpersonal skills, study skills, ethics, professionalism and time management as they relate to a hospitality field. Upon completion, students should be able to manage their learning experiences to successfully meet their educational goals.

CUL 112 Nutrition for Foodservice**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the principles of nutrition and its relationship to the foodservice industry. Topics include personal nutrition fundamentals, weight management, exercise, nutritional adaptation/analysis of recipes/menus, healthy cooking techniques and marketing nutrition in a foodservice operation. Upon completion, students should be able to apply basic nutritional concepts to food preparation and selection.

CUL 130 Menu Design*2 0 2**

Prerequisites: CUL 140 and HRM 220

Corequisites: None

This course introduces menu design and its relationship to foodservice operations. Topics include layout, marketing, concept development, dietary concerns, product utilization, target consumers and trends. Upon completion, students should be able to design, create and produce menus for a variety of foodservice settings.

CUL 135 Food & Beverage Service*2 0 2**

Prerequisites: Select one: CUL 230, CUL 275, HRM 124

Corequisites: None

This course is designed to cover the practical skills and knowledge necessary for effective food and beverage service in a variety of settings. Topics include greeting/service of guests, dining room set-up, profitability, menu sales and merchandising, service styles and reservations. Upon completion, students should be able to demonstrate competence in human relations and the skills required in the service of foods and beverages.

CUL 135A Food & Beverage Serv Lab*0 2 1**

Prerequisites: Select one: CUL 230, CUL 275, HRM 124

Corequisites: CUL 135

This course provides a laboratory experience for enhancing student skills in effective food and beverage service. Emphasis is placed on practical experiences including greeting/service of guests, dining room set-up, profitability, menu sales and merchandising, service styles and reservations. Upon completion, students should be able to demonstrate practical applications of human relations and the skills required in the service of foods and beverages.

CUL 140 Culinary Skills I*2 6 5**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: CUL 110, CUL 110A

This course introduces the fundamental concepts, skills, and techniques in basic cookery and moist, dry and combination heat. Emphasis is placed on recipe conversion, measurements, terminology, classical knife cuts, safe food/equipment handling, flavorings/seasonings, stocks/sauces/soups, and related topics. Upon completion, students should be able to exhibit the basic cooking skills used in the food service industry. Weekly participation in Global Cuisine buffets, banquets, and a la carte production enhances students' culinary and service skills.

CUL 142 Fundamentals of Food*2 6 5**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: CUL 110, CUL 110A, and CUL 150 or HRM 124

This course introduces the student to the basic principles of cooking, baking, and kitchen operations. Topics include preparation methods for protein, starch, vegetable/fruit identification, selection, storage; breakfast cookery, breads, sweet doughs/pastries; basic fabrication, knife skills, and mise en place. Upon completion, students should be able to execute efficiently a broad range of basic cooking/baking skills as they apply to different stations in foodservice operations. Weekly participation in Global Cuisine buffets, banquets, and a la carte production enhances student service skills.

CUL 150 Food Science*1 2 2**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: None

This course covers the chemical and physical changes in foods that occur with cooking, handling, and processing. Emphasis is placed on practical application of heat transfer and its effect on color/flavor/texture; emulsification, protein coagulation, leavening agents, viscosity, and gel formation. Upon completion, students should be able to demonstrate an understanding of these principles covered as they apply to food preparation in an experimental setting.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | |
|---|--|
| *CUL 160 Baking I 1 4 3 Prerequisites: DMA 030, ENG 080, RED 090 or placement Corequisites: CUL 110 This course covers basic ingredients, techniques, weights and measures, baking terminology, and formula calculations. Topics include yeast/chemically leavened products, laminated doughs, pastry dough batter, pies/tarts, meringue, custard, cakes and cookies, icings, glazes and basic sauces. Upon completion, students should be able to demonstrate proper scaling and measurement techniques, and prepare and evaluate a variety of bakery products. | *CUL 250 Classical Cuisine 1 8 5 Prerequisites: CIS 110, COE 112, CUL 110, CUL 130, CUL 140, CUL 160, CUL 214, CUL 230 or CUL 275, CUL 240, CUL 270, and HRM 245 Corequisites: CUL 135 and CUL 135A This course is designed to reinforce the classical culinary kitchen. Topics include the working Grand Brigade of the kitchen, signature dishes, and classical banquets. Upon completion, students should be able to demonstrate competence in food preparation in a classical/upscale restaurant or banquet setting. This course includes weekly a la carte service encompassing contemporary and classical preparation and a capstone final exam. |
| *CUL 170 Garde Manger I 1 4 3 Prerequisites: DMA 030 Corequisites: CUL 110, and CUL 110A This course introduces basic cold food preparation techniques and pantry production. Topics include salads, sandwiches, appetizers, dressings, basic garnishes, cheeses, cold sauces, and related food items. Upon completion, students should be able to present a cold food display and exhibit an understanding of the cold kitchen and its related terminology. | *CUL 260 Baking II 1 4 3 Prerequisites: CUL 110, CUL 110A, and CUL 160 Corequisites: None This course is designed to further students' knowledge in ingredients, weights and measures, baking terminology and formula calculation. Topics include classical desserts, frozen desserts, cake and torte production, decorating and icings/glazes, dessert plating and presentation. Upon completion, students should be able to demonstrate pastry preparation and plating, and dessert buffet production skills. |
| *CUL 214 Wine Appreciation 1 2 2 Prerequisites: COE 112 or Department Chair Approval Corequisites: None This course provides an introduction to information about wine from all the major wine producing regions. Emphasis is placed on the history of wine, production, characteristics, wine list development, laws, purchasing and storing requirements. Upon completion, students should be able to evaluate varietal wines and basic food pairings. | *CUL 270 Garde Manger II 1 4 3 Prerequisites: CUL 110, CUL 140, CUL 170 and CUL 240 Corequisites: None This course is designed to further students' knowledge in basic cold food preparation techniques and pantry production. Topics include pâtés, terrines, galantines, decorative garnishing skills, carving, charcuterie, smoking, canapés, hors d'oeuvres, and related food items. Upon completion, students should be able to design, set up, and evaluate a catering/event display to include a cold buffet with appropriate showpieces. |
| *CUL 230 Global Cuisines 1 8 5 Prerequisites: CUL 110 COE 112, CUL 140, CUL 240, CUL 240A Corequisites: None This course provides practical experience in the planning, preparation, and presentation of representative foods from a variety of world cuisines. Emphasis is placed on indigenous ingredients and customs, nutritional concerns, and cooking techniques. Upon completion, students should be able to research and execute a variety of international and domestic menus. Weekly participation in buffets, banquets, and a la carte production enhances students' supervisory and technical skills. | *CUL 273 Career Development 1 0 1 Prerequisites: ENG 080, RED 090 or placement Corequisites: None This course introduces students to career planning/management practices that serve as a foundation for success in the hospitality industry. Emphasis is placed on self-assessment, goal/career pathway development and employment strategies such as resume preparation, interviewing techniques, and developing/utilizing the portfolio as a credential. Upon completion, students should be able to develop a career path leading to an effective job search. |
| *CUL 240 Culinary Skills II 1 8 5 Prerequisites: CUL 110, CUL 110A, and CUL 140 Corequisites: CUL 240A This course is designed to further students' knowledge of the fundamental concepts, skills, and techniques involved in basic cookery. Emphasis is placed on meat identification/fabrication, butchery and cooking techniques/methods; appropriate vegetable/starch accompaniments; compound sauces; plate presentation; breakfast cookery; and quantity food preparation. Upon completion, students should be able to plan, execute, and successfully serve entrees with complementary side items. Weekly participation in a la carte production enhances students' culinary and service skills. | *CUL 275 Catering Cuisine 1 8 5 Prerequisites: COE 112, CUL 110, CUL 140, CUL 240, CUL 240A Corequisites: None This course covers the sequential steps to successful catering that includes sales, client needs, menu planning, purchasing, costing, event pricing, staffing and sanitation concerns. Emphasis is placed on new culinary competencies and skills specific to catering preparation, presentation, and customer service. Upon completion, students should be able to demonstrate proficiency in the successful design and execution of various types of catering events. |
| *CUL 240A Culinary Skills II Lab 0 3 1 Prerequisites: CUL 110, CUL 110A, and CUL 140 Corequisites: CUL 240 This course provides a laboratory experience for furthering students' knowledge of the fundamental concepts, skills, and techniques involved in basic cookery. Emphasis is placed on practical applications of meat identification/fabrication; butchery and cooking techniques/methods; appropriate vegetable/starch accompaniments; compound sauces; plate presentation; breakfast cookery; and food preparation. Upon completion, students should be able to demonstrate a basic proficiency in the preparation of entrées and accompaniments. | *CUL 285 Competition Fundamentals 1 4 3 Prerequisites: CUL 110, CUL 110A, and CUL 140 or CUL 160 Corequisites: None This course provides practical expertise in the planning, techniques, and procedures required for culinary competitions and exhibitions. Emphasis is placed on competition strategies including menu planning, teamwork, plate design, flavor profiles, recipe development, nutrition, advanced knife/culinary skills, professionalism and portfolio development. Upon completion, students should be able to apply exhibition/competition skills and standards in the competition arena and professional kitchen. |

Database Management Technology

DBA 110 Database Concepts 2 3 3

Prerequisites: CIS 110, CIS 111 or CIS 115

Corequisites: None

This course introduces database design and creation using a DBMS product. Emphasis is placed on data dictionaries, normalization, data integrity, data modeling, and creation of simple tables, queries, reports, and forms. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports and forms.

DBA 120 Database Programming I 2 2 3

Prerequisites: CIS 110

Corequisites: None

This course is designed to develop SQL programming proficiency. Emphasis is placed on data definition, data manipulation, and data control statements as well as on report generation. Upon completion, students should be able to write programs which create, update and produce reports.

DBA 210 Database Administration 2 3 3

Prerequisites: DBA 120

Corequisites: None

This course covers database administration issues and distributed database concepts. Topics include database administrator (DBA) goals and functions, backup and recovery, standards and procedures, training, and database security and performance evaluations. Upon completion, students should be able to produce functional DBA documentation and administer a database.

Developmental Disabilities

DDT 110 Developmental Disabilities 3 0 0 3

Prerequisites: None

Corequisites: None

This course identifies the characteristics and causes of various disabilities. Topics include history of service provision, human rights, legislation and litigation, advocacy, and accessing support services. Upon completion, students should be able to demonstrate an understanding of current and historical developmental disability definitions and support systems used throughout the life span. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

Dental

DEN 100 Basic Orofacial Anatomy 2 0 0 2

Prerequisites: None

Corequisites: DEN 111

This course provides a basic introduction to the structures of the head, neck, and oral cavity. Topics include tooth morphology, head and neck anatomy, histology, and embryology. Upon completion, students should be able to demonstrate knowledge of normal structures and development and how they relate to the practice of dental assisting.

DEN 101 Preclinical Procedures 2 0 0 2

Prerequisites: None

Corequisites: DEN 111

This course provides a basic introduction to the structures of the head, neck, and oral cavity. Topics include tooth morphology, head and neck anatomy, histology, and embryology. Upon completion, students should be able to demonstrate knowledge of normal structures and development and how they relate to the practice of dental assisting.

*DEN 102 Dental Materials 3 4 0 5

Prerequisites: DEN 101

Corequisites: None

This course provides instruction in identification, properties, evaluation of quality, principles, and procedures related to manipulation and storage of operative and specialty dental materials. Emphasis is placed on the understanding and safe application of materials used in the dental office and laboratory. Upon completion, students should be able to demonstrate proficiency in the laboratory and clinical application of routinely used dental materials. This is a diploma-level course.

DEN 103 Dental Sciences 2 0 0 2

Prerequisites: None

Corequisites: None

This course is a study of oral pathology, pharmacology, and dental office emergencies. Topics include oral pathological conditions, dental therapeutics, and management of emergency situations. Upon completion, students should be able to recognize abnormal oral conditions, identify classifications, describe actions and effects of commonly prescribed drugs, and respond to medical emergencies. This is a diploma-level course.

*DEN 104 Dental Health Education 2 2 0 3

Prerequisites: DEN 101

Corequisites: None

This course covers the study of preventative dentistry to prepare dental assisting students for the role of dental health educator. Topics include etiology of dental diseases, preventative procedures, and patient education theory and practice. Upon completion, students should be able to demonstrate proficiency in patient counseling and oral health instruction in private practice or public health settings. This is a diploma-level course.

*DEN 105 Practice Management 2 0 0 2

Prerequisites: None

Corequisites: None

This course provides a study of principles and procedures related to management of the dental practice. Emphasis is placed on maintaining clinical and financial records, patient scheduling, and supply and inventory control. Upon completion, students should be able to demonstrate fundamental skills in dental practice management. This is a diploma-level course.

*DEN 106 Clinical Practice I 1 0 12 5

Prerequisites: DEN 101, DEN 103, DEN 111, DEN 112

Corequisites: None

This course is designed to provide experience assisting in a clinical setting. Emphasis is placed on the application of principles and procedures of four-handed dentistry and laboratory and clinical support functions. Upon completion, students should be able to utilize classroom theory, laboratory, and clinical skills in a dental setting. This is a diploma-level course.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | | |
|---|-----------------|---|----------------|
| *DEN 107 Clinical Practice II Prerequisites: DEN 102, DEN 105, DEN 106 Corequisites: None | 1 0 12 5 | DEN 123 Nutrition/Dental Health Prerequisites: None Corequisites: None | 2 0 0 2 |
| This course is designed to increase the level of proficiency in assisting in a clinical setting. Emphasis is placed on the application of principles and procedures of four-handed dentistry and laboratory and clinical support functions. Upon completion, students should be able to combine theoretical and ethical principles necessary to perform entry-level skills including functions delegable to a DA II. This is a diploma-level course. | | This course introduces basic principles of nutrition with emphasis on nutritional requirements and their application to individual patient needs. Topics include the study of the food pyramid, nutrient functions, Recommended Daily Allowances, and related psychological principles. Upon completion, students should be able to recommend and counsel individuals on their food intake as related to their dental health. | |
| DEN 110 Orofacial Anatomy Prerequisites: None Corequisites: None | 2 2 0 3 | DEN 124 Periodontology Prerequisites: DEN 110 Corequisites: None | 2 0 0 2 |
| This course introduces the structures of the head, neck, and oral cavity. Topics include tooth morphology, head and neck anatomy, histology, and embryology. Upon completion, students should be able to relate the identification of normal structures and development to the practice of dental assisting and dental hygiene. | | This course provides an in-depth study of the periodontium, periodontal pathology, periodontal monitoring, and the principles of periodontal therapy. Topics include periodontal anatomy and a study of the etiology, classification, and treatment modalities of periodontal diseases. Upon completion, students should be able to describe, compare, and contrast techniques involved in periodontal/maintenance therapy, as well as patient care management. | |
| DEN 111 Infection/Hazard Control Prerequisites: None Corequisites: DEN 101 or DEN 121 | 2 0 0 2 | *DEN 125 Dental Office Emergencies Prerequisites: None Corequisites: None | 0 2 0 1 |
| This course introduces the infection and hazard control procedures necessary for the safe practice of dentistry. Topics include microbiology, practical infection control, sterilization and monitoring, chemical disinfectants, aseptic technique, infectious diseases, OSHA standards, and applicable North Carolina laws. Upon completion, students should be able to understand infectious diseases, disease transmission, infection control procedures, biohazard management, OSHA standards, and applicable North Carolina laws. Upon successful completion, students will also meet the requirements of 10ANC Administrative Code 41A.0206 for SPICE training. | | This course provides a study of the management of dental office emergencies. Topics include methods of prevention, necessary equipment/drugs, medicolegal considerations, recognition and effective initial management of a variety of emergencies. Upon completion, students should be able to recognize, assess, and manage various dental office emergencies and activate advanced medical support when indicated. | |
| DEN 112 Dental Radiography Prerequisites: None Corequisites: DEN 111 and DEN 100 or DEN 110; DEN 101 or DEN 121 | 2 3 0 3 | *DEN 130 Dental Hygiene Theory I Prerequisites: DEN 120 Corequisites: DEN 131 | 2 0 0 2 |
| This course provides a comprehensive view of the principles and procedures of radiology as they apply to dentistry. Topics include techniques in exposing, processing, and evaluating radiographs, as well as radiation safety, quality assurance, and legal issues. Upon completion, students should be able to demonstrate proficiency in the production of diagnostically acceptable radiographs using appropriate safety precautions. | | This course is a continuation of the didactic dental hygiene concepts necessary for providing an oral prophylaxis. Topics include deposits/removal, instrument sharpening, patient education, fluorides, planning for dental hygiene treatment, charting, and clinical records and procedures. Upon completion, students should be able to demonstrate knowledge needed to complete a thorough oral prophylaxis. | |
| DEN 120 Dental Hygiene Preclinic Lecture Prerequisites: None Corequisites: DEN 121 | 2 0 0 2 | *DEN 131 Dental Hygiene Clinic I Prerequisites: DEN 111, DEN 121 and DEN 112 Corequisites: DEN 130 | 0 0 9 3 |
| This course introduces preoperative and clinical dental hygiene concepts. Emphasis is placed on the assessment phase of patient care as well as the theory of basic dental hygiene instrumentation. Upon completion, students should be able to collect and evaluate patient data at a basic level and demonstrate knowledge of dental hygiene instrumentation. | | This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of the recall patients with gingivitis or light deposits. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment. | |
| *DEN 121 Dental Hygiene Preclinic Lab Prerequisites: None Corequisites: DEN 111 and DEN 120 | 0 6 0 2 | *DEN 140 Dental Hygiene Theory II Prerequisites: DEN 130 Corequisites: DEN 141 | 1 0 0 1 |
| This course provides the opportunity to perform clinical dental hygiene procedures discussed in DEN 120. Emphasis is placed on clinical skills in patient assessment and instrumentation techniques. Upon completion, students should be able to demonstrate the ability to perform specific preclinical procedures. Also, students should be able to demonstrate aseptic technique used in a dental environment. | | This course provides a continuation of the development, theory, and practice of patient care. Topics include modification of treatment for special needs patients, advanced radiographic interpretation, and ergonomics. Upon completion, students should be able to differentiate necessary treatment modifications, effective ergonomic principles, and radiographic abnormalities. | |

***DEN 141 Dental Hygiene Clinic II** 0 0 6 2
 Prerequisites: DEN 124, DEN 131
 Corequisites: DEN 140

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of patients with early periodontal disease and subgingival deposits. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment.

***DEN 220 Dental Hygiene Theory III** 2 0 0 2
 Prerequisites: DEN 140
 Corequisites: DEN 221

This course provides a continuation in developing the theories and practices of patient care. Topics include periodontal debridement, pain control, subgingival irrigation, air polishing, and case presentations. Upon completion, students should be able to demonstrate knowledge of methods of treatment and management of periodontally compromised patients.

***DEN 221 Dental Hygiene Clinic III** 0 0 12 4
 Prerequisites: DEN 141
 Corequisites: DEN 220

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of patients with moderate to advanced periodontal involvement and moderate deposits. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment.

DEN 222 General and Oral Pathology 2 0 0 2
 Prerequisites: BIO 163 or BIO 165 or BIO 168 and DEN 110
 Corequisites: None

This course provides a general knowledge of oral pathological manifestations associated with selected systemic and oral diseases. Topics include developmental and degenerative diseases, selected microbial diseases, specific and nonspecific immune and inflammatory responses with emphasis on recognizing abnormalities. Upon completion, students should be able to differentiate between normal and abnormal tissues and refer unusual findings to the dentist for diagnosis.

DEN 223 Dental Pharmacology 2 0 0 2
 Prerequisites: DEN 110
 Corequisites: Select one: BIO 163, BIO 165 or BIO 168

This course provides basic drug terminology, general principles of drug actions, dosages, routes of administration, adverse reactions, and basic principles of anesthesiology. Emphasis is placed on knowledge of drugs in overall understanding of patient histories and health status. Upon completion, students should be able to recognize that each patient's general health or drug usage may require modification of the treatment procedures.

***DEN 224 Materials and Procedures** 1 3 0 2
 Prerequisites: DEN 111 and DEN 121
 Corequisites: None

This course introduces the physical properties of materials and related procedures used in dentistry. Topics include restorative and preventative materials, fabrication of casts and appliances, and chair-side functions of the dental hygienist. Upon completion, students should be able to demonstrate proficiency in the laboratory and/or clinical application of routinely used dental materials and chair-side functions.

***DEN 230 Dental Hygiene Theory IV** 1 0 0 1
 Prerequisites: DEN 220
 Corequisites: DEN 231

This course provides an opportunity to increase knowledge of the profession. Emphasis is placed on dental specialties and completion of a case presentation. Upon completion, students should be able to demonstrate knowledge of various disciplines of dentistry and principles of case presentations.

***DEN 231 Dental Hygiene Clinic IV** 0 0 12 4
 Prerequisites: DEN 221
 Corequisites: DEN 230

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on periodontal maintenance and on treating patients with moderate to advanced/refractory periodontal disease. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment.

***DEN 232 Community Dental Health** 2 0 3 3
 Prerequisites: None
 Corequisites: None

This course provides a study of the principles and methods used in assessing, planning, implementing, and evaluating community dental health programs. Topics include epidemiology, research methodology, biostatistics, preventative dental care, dental health education, program planning, and financing and utilization of dental services. Upon completion, students should be able to assess, plan, implement, and evaluate a community dental health program.

***DEN 233 Professional Development** 2 0 0 2
 Prerequisites: None
 Corequisites: None

This course includes professional development, ethics, and jurisprudence with applications to practice management. Topics include conflict management, state laws, resumes, interviews, and legal liabilities as health care professionals. Upon completion, students should be able to demonstrate the ability to practice dental hygiene within established ethical standards and state laws.

DEN 235 Dental Hygiene Concepts 2 0 0 2
 Prerequisites: None
 Corequisites: None

This course provides an opportunity to exhibit interpersonal and job-related skills for effective dental hygiene practice. Emphasis is placed on critical thinking and integration of didactic and clinical components into the workplace. Upon completion, students should be able to demonstrate the knowledge required of any entry-level dental hygienist.

Drafting

DFT 111 Technical Drafting I 1 3 2
 Prerequisites: None
 Corequisites: None

This course introduces basic drafting skills, equipment, and applications. Topics include sketching, measurements, lettering, dimensioning, geometric construction, orthographic projections and pictorial drawings, sections, and auxiliary views. Upon completion, students should be able to understand and apply basic drawing principles and practices.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | | |
|--|--------------|--|--------------|
| DFT 119 Basic CAD | 1 2 2 | *DFT 253 CAD Data Management | 2 2 3 |
| Prerequisites: None | | Prerequisites: DFT 151 and DFT 251 | |
| Corequisites: None | | Corequisites: None | |
| This course introduces computer-aided drafting software for specific technologies to non-drafting majors. Emphasis is placed on understanding the software command structure and drafting standards for specific technical fields. Upon completion, students should be able to create and plot basic drawings. | | This course covers engineering document management techniques. Topics include efficient control of engineering documents, manipulation of CAD drawing data, generation of bill of materials, and linking to spreadsheets or databases. Upon completion, students should be able to utilize systems for managing CAD drawings, extract data from drawings, and link data to spreadsheets or database applications. | |
| DFT 151 CAD I | 2 3 3 | *DFT 259 CAD Project | 1 4 3 |
| Prerequisites: None | | Prerequisites: ARC 112, ARC 113, and DFT 251 | |
| Corequisites: None | | Corequisites: None | |
| This course introduces CAD software as a drawing tool. Topics include drawing, editing, file management, and plotting. Upon completion, students should be able to produce and plot a CAD drawing. | | This course is a capstone course experience for programs with a focus in computer-aided design. Emphasis is placed on the use of design principles and computer technology in planning, managing, and completing a design project. Upon completion, students should be able to plan and produce engineering documents of a design project, including solid models, working drawings, BOMs, annotations, and spreadsheets. | |
| DFT 152 CAD II | 2 3 3 | Developmental Mathematics | |
| Prerequisites: DFT 151 | | DMA 010 Operations With Integers | 1 1 1 |
| Corequisites: None | | Prerequisites: None | |
| This course is a continuation of DFT 151. Topics include advanced two-dimensional, three-dimensional, and solid modeling and extended CAD applications. Upon completion, students should be able to generate and manage CAD drawings and models to produce engineering documents. | | Corequisites: None | |
| DFT 153 CAD III | 2 3 3 | This course provides a conceptual study of integers and integer operations. Topics include integers, absolute value, exponents, square roots, perimeter and area of basic geometric figures, Pythagorean theorem, and use of the correct order of operations. Upon completion, students should be able to demonstrate an understanding of pertinent concepts and principles and apply this knowledge in the evaluation of expressions. | |
| Prerequisites: DFT 151 | | DMA 020 Fractions and Decimals | 1 1 1 |
| Corequisites: None | | Prerequisites: DMA 010 | |
| This course covers basic principles of three-dimensional CAD wireframe and surface models. Topics include user coordinate systems, three-dimensional viewpoints, three-dimensional wireframes, and surface components and viewpoints. Upon completion, students should be able to create and manipulate three-dimensional wireframe and surface models. | | Corequisites: None | |
| DFT 154 Intro Solid Modeling | 2 3 3 | This course provides a conceptual study of the relationship between fractions and decimals and covers related problems. Topics include application of operations and solving contextual application problems, including determining the circumference and area of circles with the concept of pi. Upon completion, students should be able to demonstrate an understanding of the connections between fractions and decimals. | |
| Prerequisites: DFT 151 | | DMA 030 Propor/Ratio/Rate/Percent | 1 1 1 |
| Corequisites: None | | Prerequisites: DMA 010 and DMA 020 | |
| This course is an introduction to basic three-dimensional solid modeling and design software. Topics include basic design, creation, editing, rendering and analysis of solid models and creation of multiview drawings. Upon completion, students should be able to use design techniques to create, edit, render and generate a multiview drawing. | | Corequisites: None | |
| DFT 170 Engineering Graphics | 2 2 3 | This course provides a conceptual study of the problems that are represented by rates, ratios, percent, and proportions. Topics include rates, ratios, percent, proportion, conversion of English and metric units, and applications of the geometry of similar triangles. Upon completion, students should be able to use their understanding to solve conceptual application problems. | |
| Prerequisites: None | | DMA 040 Express/Lin Equat/Inequal | 1 1 1 |
| This course introduces basic engineering graphics skills and applications. Topics include sketching, selection and use of current methods and tools, and the use of engineering graphics applications. Upon completion, students should be able to demonstrate an understanding of basic engineering graphics principles and practices. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. | | Prerequisites: DMA 010, DMA 020 and DMA 030 | |
| DFT 189 Emerging Technologies in CAD | 1 2 2 | Corequisites: None | |
| Prerequisites: None | | This course provides a conceptual study of problems involving linear expressions, equations, and inequalities. Emphasis is placed on solving contextual application problems. Upon completion, students should be able to distinguish between simplifying expressions and solving equations and apply this knowledge to problems involving linear expressions, equations, and inequalities. | |
| Corequisites: None | | | |
| This course provides an opportunity to explore new and emerging technologies related to Computer-Aided Drafting. Emphasis is placed on introducing a selected CAD technology or topic, identified as being "new" or "emerging", from a variety of drafting disciplines. Upon completion, students should be able to demonstrate an understanding of and practical skill in the use of the CAD technology studied. | | | |

abtech.edu

DME 220 Interact Multi-Media Programming 2 2 3

Prerequisites: DME 120

Corequisites: None

This course is designed to build on concepts developed in DME 120 and teaches students to apply custom programming to develop advanced applications and components. Emphasis is placed on scripting language functionalities associated with a variety of software packages. Upon completion, students should be able to produce advanced, high-quality interactive multimedia applications.

DME 230 Digital Animation II 2 2 3

Prerequisites: DME 115 and DME 130

Corequisites: None

This course introduces state-of-the-art 3D animation techniques and concepts. Emphasis is placed on utilizing the features of current animation software. Upon completion, students should be able to produce 3D animations as components of a multimedia application. Adobe (Photoshop, Illustrator, and Flash) and Google SketchUp will be used in the course.

DME 240 Media Compression 2 2 3

Prerequisites: DME 110, DME 115, and DME 140

Corequisites: None

This course will introduce software and usage of digital audio and video compression and streaming media technologies. Topics include compression techniques, file formats and codecs, streaming media, streaming media services, and current and emerging trends. Upon completion, students should be able to utilize compressed media in a variety of video, web and multimedia applications. Adobe (Photoshop, After Effects, and Media Encoder) will be used in the course.

***DME 260 Emerg Tech Digital Media 2 2 3**

Prerequisites: DME 120, DME 130, and DME 210

Corequisites: None

This course provides students with the latest technologies and strategies in the field of digital media. Emphasis is placed on the evaluation of emerging digital media technologies and presenting those findings to the class. Upon completion, students should be able to critically analyze emerging digital media technologies and establish informed opinions.

***DME 270 Prof Prac Digital Media 2 2 3**

Prerequisites: DME 120, DME 130, and DME 210

Corequisites: None

This course introduces students to business skills needed to succeed in the digital media workplace. Topics include portfolio development, resume design, and preparation of media contacts. Upon completion, students should be able to prepare themselves and their work for a career in the digital media workplace.

***DME 285 Systems Projects 2 2 3**

Prerequisites: DME 120, DME 130 and DME 210

Corequisites: None

This course provides an opportunity to complete a significant digital media project from the design phase through implementation with minimal instructor support. Emphasis is placed on project definition, testing, presentation, and implementation. Upon completion, students should be able to complete, maintain and implement a digital media project.

Drama**DRA 111 Theatre Appreciation 3 0 3**

Prerequisites: None

Corequisites: None

This course provides a study of the art, craft, and business of the theatre. Emphasis is placed on the audience's appreciation of the work of the playwright, director, actor, designer, producer, and critic. Upon completion, students should be able to demonstrate a vocabulary of theatre terms and to recognize the contributions of various theatre artists. Attendance at one play performance and in-depth reading of two plays are required. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

DRA 112 Literature of the Theatre 3 0 3

Prerequisites: None

Corequisites: None

This course provides a survey of dramatic works from the classical Greek through the present. Emphasis is placed on the language of drama, critical theory, and background as well as on play reading and analysis. Upon completion, students should be able to articulate, orally and in writing, their appreciation and understanding of dramatic works. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

DRA 120 Voice for Performance 3 0 3

Prerequisites: None

Corequisites: None

This course provides guided practice in the proper production of speech for the theatre. Emphasis is placed on improving speech, including breathing, articulation, pronunciation, and other vocal variables. Upon completion, students should be able to demonstrate effective theatrical speech. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 122 Oral Interpretation 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the dramatic study of literature through performance. Emphasis is placed on analysis and performance of poetry, drama, and prose fiction. Upon completion, students should be able to embody and discuss critically the speakers inherent in literature. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

DRA 124 Readers Theatre 3 0 3

Prerequisites: None

Corequisites: None

This course provides a theoretical and applied introduction to the medium of readers theatre. Emphasis is placed on the group performance considerations posed by various genres of literature. Upon completion, students should be able to adapt and present a literary script following the conventions of readers theatre. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

DRA 126 Storytelling**3 0 3**

Prerequisites: None

Corequisites: None

This course introduces the art of storytelling and the oral traditions of folk literature. Topics include the history of storytelling, its value and purpose, techniques of the storyteller, and methods of collecting verbal art. Upon completion, students should be able to present and discuss critically stories from the world's repertory of traditional lore. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

DRA 130 Acting I**0 6 3**

Prerequisites: None

Corequisites: None

This course provides an applied study of the actor's craft. Topics include role analysis, training the voice, and body concentration, discipline, and self-evaluation. Upon completion, students should be able to explore their creativity in an acting ensemble. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

DRA 131 Acting II**0 6 3**

Prerequisites: DRA 130

Corequisites: None

This course provides additional hands-on practice in the actor's craft. Emphasis is placed on further analysis, characterization, growth, and training for acting competence. Upon completion, students should be able to explore their creativity in an acting ensemble. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 135 Acting for the Camera I**1 4 3**

Prerequisites: None

Corequisites: None

This course provides an applied study of the camera actor's craft. Topics include commercial, dramatic, and print performance styles. Upon completion, students should be able to explore their creativity in on-camera performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 140 Stagecraft I**0 6 3**

Prerequisites: None

Corequisites: None

This course introduces the theory and basic construction of stage scenery and properties. Topics include stage carpentry, scene painting, stage electrics, properties, and backstage organization. Upon completion, students should be able to pursue vocational and avocational roles in technical theatre. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 141 Stagecraft II**0 6 3**

Prerequisites: DRA 140

Corequisites: None

This course provides additional hands-on practice in the elements of stagecraft. Emphasis is placed on the design and implementation of the arts and crafts of technical theatre. Upon completion, students should be able to pursue vocational or avocational roles in technical theatre. This course has

been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 145 Stage Make-up**1 2 2**

Prerequisites: None

Corequisites: None

This course covers the research, design, selection of materials, and application of stage make-up, prosthetics, wigs, and hairpieces. Emphasis is placed on the development of techniques, style, and presentation of the finished make-up. Upon completion, students should be able to create and apply make-up prosthetics, and hairpieces. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 170 Play Production I**0 9 3**

Prerequisites: None

Corequisites: None

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 171 Play Production II**0 9 3**

Prerequisites: DRA 170

Corequisites: None

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 211 Theatre History I**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the development of theatre from its origin to the closing of the British theatre in 1642. Topics include the history, aesthetics, and representative dramatic literature of the period. Upon completion, students should be able to trace the evolution of theatre and recognize the styles and types of world drama. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

DRA 212 Theatre History II**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the development of theatre from 1660 through the diverse influences which shaped the theatre of the twentieth century. Topics include the history, aesthetics, and representative dramatic literature of the period. Upon completion, students should be able to trace the evolution of theatre and recognize the styles and types of world drama. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

DRA 240 Lighting for the Theatre**2 2 3**

Prerequisites: None

Corequisites: None

This course is an applied study of theatre lighting and is designed to train theatre technicians. Emphasis is placed on lighting technology including the mechanics of lighting and light control equipment by practical work with lighting equipment. Upon completion, students should be able to demonstrate competence with lighting equipment. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

DRA 250 Theatre Management**1 3 2**

Prerequisites: None

Corequisites: None

This course introduces the organization and operation of a theatre. Emphasis is placed on organization, communication, networking with other organizations, and grant writing. Upon completion, students should be able to demonstrate an understanding of the structure and operation of a theatre organization. This course has been approved to satisfy the Comprehensive Articulation Agreement general education elective requirement in humanities/fine arts.

Economics**ECO 151 Survey of Economics****3 0 3**

Prerequisites: None

Corequisites: None

This course introduces basic concepts of micro- and macroeconomics. Topics include supply and demand, optimizing economic behavior, prices and wages, money, interest rates, banking system, unemployment, inflation, taxes, government spending, and international trade. Upon completion, students should be able to explain alternative solutions for economic problems faced by private and government sectors. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

ECO 251 Principles of Microeconomics**3 0 3**

Prerequisites: None

Corequisites: None

This course introduces economic analysis of individual, business, and industry choices in the market economy. Topics include the price mechanism, supply and demand, optimizing economic behavior, costs and revenue, market structures, factor markets, income distribution, market failure, and government intervention. Upon completion, students should be able to identify and evaluate consumer and business alternatives in order to efficiently achieve economic objectives. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

ECO 252 Principles of Macroeconomics**3 0 3**

Prerequisites: ECO 151 or ECO 251

Corequisites: None

This course introduces economic analysis of aggregate employment, income, and prices. Topics include major schools of economic thought; aggregate supply and demand; economic measures, fluctuations, and growth; money and banking; stabilization techniques; and international trade. Upon completion, students should be able to evaluate national economic components, conditions, and alternatives for achieving socioeconomic goals. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

Education**EDU 114 Intro to Family Childcare****3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080, DMA 030 or placement

Set 2: ENG 085, DMA 030 or placement

Corequisites: None

This course introduces the student to family child care home environments with emphasis on standards and developmentally effective approaches for supporting diverse children and families. Topics include standards for quality, curriculum for multiple age groups, authentic assessment methods, business practices, building positive family and community partnerships, and professionalism. Upon completion, students should be able to design a family child care handbook that reflects a healthy, respectful, supportive, and stimulating learning environment.

EDU 119 Intro to Early Child Educ**4 0 4**

Prerequisites: None

Corequisites: None

This course covers the foundations of the education profession, the diverse educational settings for young children, professionalism and planning developmentally appropriate programs for all children. Topics include historical foundations, program types, career options, professionalism and creating inclusive environments and curriculum responsive to the needs of all children and families. Upon completion, students should be able to design career plans and develop schedules, environments and activity plans appropriate for all children.

EDU 131 Child, Family, & Commun**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080

Set 2: ENG 085

Corequisites: None

This course covers the development of partnerships between culturally and linguistically diverse families, children, schools and communities. Emphasis is placed on developing skills and identifying benefits for establishing, supporting, and maintaining respectful, collaborative relationships between diverse families, programs/schools, and community agencies/resources. Upon completion, students should be able to explain appropriate relationships between families, educators, and professionals that enhance development and educational experiences of all children.

EDU 144 Child Development I**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080

Set 2: ENG 085

Corequisites: None

This course includes the theories of child development, needs, milestones, and factors that influence development, from conception through approximately 36 months. Emphasis is placed on developmental sequences in physical/motor, emotional/social, cognitive, and language domains and the impact of multiple influences on development and learning. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain environmental factors that impact development, and identify strategies for enhancing development. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

EDU 145 Child Development II**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080

Set 2: ENG 085

Corequisites: None

This course includes the theories of child development, needs, milestones, and factors that influence development, from preschool through middle childhood. Emphasis is placed on developmental sequences in physical/motor, emotional/social, cognitive, and language domains and the impact of multiple influences on development and learning. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain environmental factors that impact development, and identify strategies for enhancing development. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

EDU 146 Child Guidance**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080

Set 2: ENG 085

Corequisites: None

This course introduces principles and practical techniques including the design of learning environments for providing developmentally appropriate guidance for all children, including those at risk. Emphasis is placed on observation skills, cultural influences, underlying causes of behavior, appropriate expectations, development of self control and the role of communication and guidance. Upon completion, students should be able to demonstrate direct/indirect strategies for preventing problem behaviors, teaching appropriate/acceptable behaviors, negotiation, setting limits and recognizing at risk behaviors. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

EDU 151 Creative Activities**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080

Set 2: ENG 085

Corequisites: None

This course covers planning, creation and adaptation of developmentally supportive learning environments with attention to curriculum, interactions, teaching practices and learning materials. Emphasis is placed on creating and adapting integrated, meaningful, challenging and engaging developmentally supportive learning experiences in art, music, movement and dramatics for all children. Upon completion, students should be able to create, adapt, implement and evaluate developmentally supportive learning materials, experiences and environments.

EDU 153 Health, Safety & Nutrit**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080

Set 2: ENG 085

Corequisites: None

This course covers promoting and maintaining the health and well-being of all children. Topics include health and nutritional guidelines, common childhood illnesses, maintaining safe and healthy learning environments, recognition and reporting of abuse and neglect and state regulations. Upon completion, students should be able to demonstrate knowledge of health, safety, and nutritional needs, safe learning environments, and adhere to state regulations.

EDU 154 Social/Emotion/Behav Dev**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080, EDU 144, EDU 145

Set 2: ENG 080, RED 080, PSY 244, PSY 245

Set 3: ENG 085, EDU 144, EDU 145

Set 4: ENG 085, PSY 244, PSY 245

Corequisites: None

This course covers the emotional/social development of children and the causes, expressions, prevention and management of challenging behaviors in all children. Emphasis is placed on caregiver/family/child relationships, positive emotional/social environments, developmental concerns, risk factors, and intervention strategies. Upon completion, students should be able to identify factors influencing emotional/social development, utilizing screening measures, and designing positive behavioral supports.

EDU 163 Classroom Mgt & Instruct**3 0 3**

Prerequisites: Take one set

Set 1: ENG 080, RED 080

Set 2: ENG 085

Corequisites: None

This course covers management and instructional techniques with school-age populations. Topics include classroom management and organization, teaching strategies, individual student differences and learning styles, and developmentally appropriate classroom guidance techniques. Upon completion, students should be able to utilize developmentally appropriate behavior management and instructional strategies that enhance the teaching/learning process and promote students' academic success.

EDU 184 Early Child Intro Pract**1 3 2**

Prerequisites: Take one set

Set 1: ENG 080, RED 080, EDU 119

Set 2: ENG 085, EDU 119

Corequisites: None

This course introduces students to early childhood settings and applying skills in a three star (minimum) or NAEYC accredited or equivalent, quality early childhood environment. Emphasis is placed on observing children and assisting in the implementation of developmentally appropriate activities/environments for all children; and modeling reflective/professional practices. Upon completion, students should be able to demonstrate developmentally appropriate interactions with children and ethical/professional behaviors as indicated by assignments and onsite faculty visits.

EDU 214 Early Child Intern Pract**1 9 4**

Prerequisites: Take one set

Set 1: ENG 090, RED 090, EDU 119, EDU 144, EDU 146

Set 2: ENG 090, RED 090, PSY 244, EDU 119, EDU 146

Set 3: ENG 095, EDU 119, EDU 144, EDU 146

Set 4: ENG 095, EDU 119, PSY 244, EDU 146

Corequisites: None

This course is designed to allow students to apply skills in a three star (minimum) or NAEYC accredited or equivalent, quality early childhood environment. Emphasis is placed on observing children and assisting with the implementation of developmentally appropriate activities and environments for all children; modeling reflective and professional practices. Upon completion, students should be able to demonstrate developmentally appropriate plans/assessments, appropriate guidance techniques and ethical/professional behaviors as indicated by assignments and onsite faculty visits.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively.

When only three numbers are listed, the middle number always designates lab hours.

|--|-------|--|-------|
| EDU 216 Foundations of Education (EDU 216 replaced EDU 116) | 4 0 4 | EDU 248 Developmental Delays Prerequisites: Take one set Set 1: ENG 090, RED 090, EDU 144, EDU 145, EDU 221 Set 2: ENG 090, RED 090, PSY 244, PSY 245 Set 3: ENG 095, EDU 144, EDU 145 Set 4: ENG 095, PSY 244, PSY 245 Corequisites: None This course covers the causes and assessment of developmental delays and individualized instruction and curriculum for children with developmental delays. Emphasis is placed on definition, characteristics, assessment, educational strategies, inclusion, family involvement, and services for children with developmental delays. Upon completion, students should be able to identify, assess, and plan educational intervention strategies for children with developmental delays and their families. | 3 0 3 |
| Prerequisites: Take one set Set 1: ENG 090, RED 090 Set 2: ENG 095 Corequisites: None This course introduces the American educational system and the teaching profession. Topics include historical and philosophical foundations of education, contemporary educational, structural, legal, and financial issues, and experiences in public school classrooms. Upon completion, students should be able to relate classroom observations to the roles of teachers and schools and the process of teacher education. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement at select institutions only. | | EDU 251 Exploration Activities Prerequisites: Take one set Set 1: ENG 090, RED 090 Set 2: ENG 095 Corequisites: EDU 251A This course covers discovery experiences in science, math, and social studies. Emphasis is placed on developing concepts for each area and encouraging young children to explore, discover, and construct concepts. Upon completion, students should be able to discuss the discovery approach to teaching, explain major concepts in each area, and plan appropriate experiences for children. | 3 0 3 |
| EDU 221 Children with Exceptionalities Prerequisites: Take one set Set 1: ENG 090, RED 090, EDU 144 EDU 145 Set 2: ENG 090, RED 090, PSY 244 PSY 245 Set 3: ENG 095, EDU 144 EDU 145 Set 4: ENG 095, PSY 244 PSY 245 Corequisites: None This course introduces children with exceptionalities, their families, support services, inclusive/diverse settings, and educational/family plans based on the foundations of child development. Emphasis is placed on the characteristics of exceptionalities, observation and assessment of children, strategies for adapting the learning environment, and identification of community resources. Upon completion, students should be able to recognize diverse abilities, describe the referral process, and depict collaboration with families/professionals to plan/implement, and promote best practice. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement at select institutions only. | 3 0 3 | EDU 261 Early Childhood Admin I Prerequisites: Take one set Set 1: ENG 090, RED 090 Set 2: ENG 095 Corequisites: EDU 119 This course introduces principles of basic programming and staffing, budgeting/financial management and marketing, and rules and regulations of diverse early childhood programs. Topics include program structure and philosophy, standards of NC child care programs, finance, funding resources, and staff and organizational management. Upon completion, students should be able to develop components of program/personnel handbooks, a program budget, and demonstrate knowledge of fundamental marketing strategies and NC standards. | 3 0 3 |
| EDU 234 Infants, Toddlers, & Twos Prerequisites: Take one set Set 1: ENG 090, RED 090, EDU 119 Set 2: ENG 095, EDU 119 Corequisites: None This course covers the unique needs and rapid changes that occur in the first three years of life and the inter-related factors that influence development. Emphasis is placed on recognizing and supporting developmental milestones through purposeful strategies, responsive care routines and identifying elements of quality, inclusive early care and education. Upon completion, students should be able to demonstrate respectful relationships that provide a foundation for healthy infant/toddler/twos development, plan/select activities/materials, and partner with diverse families. | 3 0 3 | EDU 262 Early Childhood Admin II Prerequisites: Take one set Set 1: ENG 090, RED 090, EDU 261 Set 2: ENG 095, EDU 261 Corequisites: EDU 119 This course focuses on advocacy/leadership, public relations/community outreach and program quality/evaluation for diverse early childhood programs. Topics include program evaluation/accreditation, involvement in early childhood professional organizations, leadership/mentoring, family, volunteer and community involvement and early childhood advocacy. Upon completion, students should be able to define and evaluate all components of early childhood programs, develop strategies for advocacy and integrate community into programs. | 3 0 3 |
| EDU 243 Learning Theory Prerequisites: Take one set Set 1: ENG 090, RED 090 Set 2: ENG 095 Corequisites: None This course provides lateral entry teachers an introduction to learning theory, various styles of learning, and motivational factors involved in the learning process. Emphasis is placed on the development of cognitive skills using the eight types of intelligence and applying these to practical classroom situations. Upon completion, students should be able to describe theories and styles of learning and discuss the relationship between different types of intelligence to learning motivation. | 3 0 3 | | |

EDU 271 Educational Technology**2 2 3**

Prerequisites: Take one set

Set 1: ENG 090, RED 090

Set 2: ENG 095

Corequisites: None

This course introduces the use of technology to enhance teaching and learning in all educational settings. Topics include technology concepts, instructional strategies, materials and adaptive technology for children with exceptionalities, facilitation of assessment/evaluation, and ethical issues surrounding the use of technology.

Upon completion, students should be able to apply technology enhanced instructional strategies, use a variety of technology resources and demonstrate appropriate technology skills in educational environments.

EDU 280 Language & Literacy Exp**3 0 3**

Prerequisites: Take one set

Set 1: ENG 090, RED 090

Set 2: ENG 095

Corequisites: None

This course is designed to expand students' understanding of children's language and literacy development and provides strategies for enhancing language/literacy experiences in an enriched environment. Topics include selection of diverse literature and interactive media, the integration of literacy concepts throughout the curriculum, appropriate observations/assessments and inclusive practices. Upon completion, students should be able to select, plan, implement and evaluate developmentally appropriate and diverse language/literacy experiences.

EDU 284 Early Child Capstone Prac**1 9 4**

Prerequisites: Take one set

Set 1: ENG 090, RED 090, EDU 119, EDU 144, EDU 145, EDU 146, EDU 151

Set 2: ENG 090, RED 090, EDU 119, PSY 244, PSY 245, EDU 146, EDU 151

Set 5: ENG 090, RED 090, PSY 244, PSY 245, EDU 216, EDU 163

Set 6: ENG 090, RED 090, EDU 144, EDU 145, EDU 216, EDU 163

Set 7: ENG 090, RED 090, EDU 144, PSY 245, EDU 216, EDU 163

Set 8: ENG 090, RED 090, PSY 244, EDU 216, EDU 163

Set 9: ENG 095, PSY 244, PSY 245, EDU 118, EDU 163

Set 10: ENG 095, EDU 144, EDU 145, EDU 118, EDU 163

Set 11: ENG 095, EDU 144, PSY 245, EDU 118, EDU 163

Set 12: ENG 095, PSY 244, EDU 145, EDU 118, EDU 163

Set 13: ENG 095, PSY 244, PSY 245, EDU 216, EDU 163

Set 14: ENG 095, EDU 144, EDU 145, EDU 216, EDU 163

Set 15: ENG 095, EDU 144, PSY 245, EDU 216, EDU 163

Set 16: ENG 095, PSY 244, EDU 145, EDU 216, EDU 163

Corequisites: None

This course is designed to allow students to apply skills in a quality public or private school environment. Emphasis is placed on designing, implementing and evaluating developmentally appropriate activities and environments for all children; supporting/involving families; and modeling reflective and professional practices. Upon completion, students should be able to demonstrate developmentally appropriate lesson plans/assessments, appropriate guidance techniques, ethical/professional behaviors as indicated by assignments and onsite faculty visits.

EDU 289 Adv Issues/School Age**2 0 2**

Prerequisites: Take one set

Set 1: ENG 090, RED 090

Set 2: ENG 095

Corequisites: None

This course covers advanced topics and issues that relate to school-age programs. Emphasis is placed on current advocacy issues, emerging technology, professional growth, ethics, and organizations for providers/teachers working with school-age populations. Upon completion, students should be able to list, discuss, and explain advanced current topics and issues surrounding school-aged populations.

Engineering***EGR 110 Introduction to Engineering Tech****1 2 2**

Prerequisites: None

Corequisites: None

This course introduces general topics relevant to engineering technology. Skills developed include goal setting and career assessment, professional ethics, critical thinking and problem solving, using college resources for study and research, and using tools for engineering computations. Upon completion, students should be able to choose a career option in engineering technology and utilize college resources to meet their educational goals.

EGR 115 Intro to Technology*2 3 3**

Prerequisites: None

Corequisites: None

This course introduces the basic skills and career fields for technicians. Topics include career options, technical vocabulary, dimensional analysis, measurement systems, engineering graphics, calculator applications, professional

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively.

When only three numbers are listed, the middle number always designates lab hours.

ethics, safety practices, and other related topics. Upon completion, students should be able to demonstrate an understanding of the basic technologies, prepare drawings and sketches, and perform computations using a scientific calculator.

***EGR 125 Application Software for Technicians 1 2 2**

Prerequisites: None

Corequisites: None

This course introduces personal computer software and teaches students how to customize the software for technical applications. Emphasis is placed on the use of common office applications software such as spreadsheets, word processing, graphics and Internet access. Upon completion, students should be able to demonstrate competency in using applications software to solve technical problems and communicate the end results in text and graphical formats.

***EGR 130 Engineering Cost Control 2 2 3**

Prerequisites: MAT 121 or MAT 161 or MAT 171

Corequisites: None

This course covers the management of projects and systems through the control of costs. Topics include economic analysis of alternatives within budget constraints and utilization of the time value of money approach. Upon completion, students should be able to make choices that optimize profits on both short-term and long-term decisions.

***EGR 150 Intro to Engineering 1 2 2**

Prerequisites: MAT 080 or Placement

Corequisites: None

This course is an overview of the engineering profession. Topics include goal setting and career assessment, ethics, public safety, the engineering method and design process, written and oral communication, interpersonal skills and team building, and computer applications. Upon completion, students should be able to understand the engineering process, the engineering profession, and utilize college resources to meet their educational goals. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

***EGR 220 Engineering Statics 3 0 3**

Prerequisites: PHY 251

Corequisites: MAT 272

This course introduces the concepts of engineering based on forces in equilibrium. Topics include concentrated forces, distributed forces, forces due to friction and inertia as they apply to machines, structures, and systems. Upon completion, students should be able to solve problems which require the ability to analyze systems of forces in static equilibrium. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

***EGR 230 Engineering Materials 3 0 3**

Prerequisites: CHM 151

Corequisites: None

This course provides an introduction to fundamental physical principals governing the structure and constitution of metallic and nonmetallic materials. Topics include the relationship among the fundamental physical principles and the mechanical, physical and chemical properties of engineering materials. Upon completion, students should be able to explain the fundamental physical properties important to the design and understanding of engineering materials. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

EGR 285 Design Project 0 4 2

Prerequisites: Department Chair Approval

Corequisites: None

This course provides the opportunity to design an instructor-approved project using previously acquired skills. Emphasis is placed on selection, proposal, design, testing, and documentation of the approved project. Upon completion, students should be able to present and demonstrate projects.

Electrical

ELC 111 Introduction to Electricity 2 2 3

Prerequisites: DMA 030 or placement

Corequisites: None

This course introduces the fundamental concepts of electricity and test equipment to nonelectrical/electronic majors. Topics include basic DC and AC principles (voltage, resistance, current, impedance); components (resistors, inductors, and capacitors); power; and operation of test equipment. Upon completion, students should be able to construct and analyze simple DC and AC circuits using electrical test equipment.

ELC 112 DC/AC Electricity 3 6 5

Prerequisites: DMA 030 or placement

Corequisites: None

This course introduces the fundamental concepts of and computations related to DC/AC electricity. Emphasis is placed on DC/AC circuits, components, operation of test equipment; and other related topics. Upon completion, students should be able to construct, verify, troubleshoot, and repair DC/AC circuits.

ELC 113 Basic Wiring I 2 6 4

Prerequisites: None

Corequisites: None

This course introduces the care/usage of tools and materials used in electrical installations and the requirements of the National Electrical Code. Topics include NEC, electrical safety, and electrical blueprint reading; planning, layout; and installation of electrical distribution equipment; lighting; overcurrent protection; conductors; branch circuits; and conduits. Upon completion, students should be able to properly install conduits, wiring, and electrical distribution equipment associated with basic electrical installations.

ELC 115 Industrial Wiring 2 6 4

Prerequisites: ELC 113

Corequisites: None

This course covers layout, planning, and installation of wiring systems in industrial facilities. Emphasis is placed on industrial wiring methods and materials. Upon completion, students should be able to install industrial systems and equipment.

ELC 117 Motors and Controls 2 6 4

Prerequisites: Select one: AHR 111, ELC 111, ELC 112, ELC 131, ELC 138

Corequisites: None

This course introduces the fundamental concepts of motors and motor controls. Topics include ladder diagrams, pilot devices, contactors, motor starters, motors, and other control devices. Upon completion, students should be able to properly select, connect, and troubleshoot motors and control circuits.

ELC 118 National Electrical Code 1 2 2
 Prerequisites: ELC 113 or Department Chair Approval
 Corequisites: None

This course covers the use of the current National Electrical Code. Topics include the NEC history, wiring methods, overcurrent protection, materials, and other related topics. Upon completion, students should be able to effectively use the NEC.

ELC 128 Introduction to PLC 2 3 3
 Prerequisites: None
 Corequisites: None

This course introduces the programmable logic controller (PLC) and its associated applications. Topics include ladder logic diagrams, input/output modules, power supplies, surge protection, selection/installation of controllers, and interfacing of controllers with equipment. Upon completion, students should be able to install PLCs and create simple programs.

ELC 132 Electrical Drawings 1 3 2
 Prerequisites: None
 Corequisites: None

This course introduces the technical documentation that is typically found or used in the industrial environment. Topics include interpretation of service manuals, freehand sketching of lines, orthographic views and dimensions, and blueprint reading. Upon completion, students should be able to interpret technical documents and blueprints and use basic drafting skills to prepare usable field drawings.

ELC 133 Advanced Circuit Analysis 2 3 3
 Prerequisites: ELC 131 or ELC 139
 Corequisites: None

This course covers additional concepts of DC/AC electricity, the use of test equipment, and measurement techniques for electrical/electronics majors. Topics include the application of network theorems such as delta/wye transformations, Superposition Theorem, and other advanced circuit analysis principles. Upon completion, students should be able to construct and analyze DC/AC circuits and use advanced circuit analysis theorems, circuit simulators, and test equipment

ELC 138 DC Circuit Analysis 2 3 3
 Prerequisites: None
 Corequisites: RED 080 and DMA 040 or placement

This course introduces DC electricity with an emphasis on circuit analysis, measurements, and operation of test equipment. Topics include DC principles, circuit analysis laws and theorems, components, test equipment operation, circuit simulation, and other related topics. Upon completion, students should be able to interpret circuit schematics; design, construct, and analyze DC circuits; and properly use test equipment.

ELC 139 AC Circuit Analysis 2 3 3
 Prerequisites: ELC 138
 Corequisites: None

This course introduces AC electricity with an emphasis on circuit analysis, measurements, and operation of test equipment. Topics include AC voltages, circuit analysis laws and theorems, reactive components and circuits, transformers, test equipment operation, circuit simulation, and other related topics. Upon completion, students should be able to interpret AC circuit schematics; analyze and troubleshoot AC circuits; and properly use test equipment.

ELC 213 Instrumentation 3 2 4
 Prerequisites: Select one: AHR 111, ELC 111, ELC 112, ELC 131, ELC 138
 Corequisites: None

This course covers the fundamentals of instrumentation used in industry. Emphasis is placed on electric, electronic, and pneumatic instruments. Upon completion, students should be able to design, install, maintain, and calibrate instrumentation.

ELC 228 PLC Applications 2 6 4
 Prerequisites: ELC 128
 Corequisites: None

This course covers programming and applications of programmable logic controllers. Emphasis is placed on programming techniques, networking, specialty I/O modules, and system troubleshooting. Upon completion, students should be able to specify, implement, and maintain complex PLC controlled systems.

***ELC 229 Applications Project** 1 3 2
 Prerequisites: None
 Corequisites: None

This course provides an individual and/or integrated team approach to a practical project as approved by the instructor. Topics include project selection and planning, implementation and testing, and a final presentation. Upon completion, students should be able to plan and implement an applications-oriented project. Students must possess a working knowledge of electrical theory, circuits, and control in order to be successful in this course.

Electronics

ELN 133 Digital Electronics 3 3 4
 Prerequisites: Select one: ELC 111, ELC 112, ELC 131, ELC 138
 Corequisites: None

This course covers combinational and sequential logic circuits. Topics include number systems, Boolean algebra, logic families, MSI and LSI circuits, AC/DC converters, and other related topics. Upon completion, students should be able to construct, analyze, verify, and troubleshoot digital circuits using appropriate techniques and test equipment.

ELN 133A Digital Electronics Lab 0 3 1
 Prerequisites: None
 Corequisites: ELN 133

This course is laboratory to accompany ELN 133. Emphasis is placed on laboratory experiences which enhance the materials presented in ELN 133 and which provide practical experience. Upon completion, students should be able to demonstrate a general understanding of digital fundamentals.

ELN 137 Electronic Devices and Circuits 4 3 5
 Prerequisites: ELC 138
 Corequisites: None

This course covers diodes, transistors, linear integrated circuits, and IC voltage regulators. Topics include power supplies, switching circuits, amplifiers, oscillators, active filters, and other related topics. Upon completion, students should be able to analyze and troubleshoot circuits using schematic diagrams, appropriate test equipment, and manufacturer's data sheets

ELN 150 CAD for Electronics 1 3 2
 Prerequisites: None
 Corequisites: None

This course introduces computer-aided drafting (CAD) with an emphasis on applications in the electronics field. Topics

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

include electronics industry standards (symbols, schematic diagrams, layouts); drawing electronic circuit diagrams; and specialized electronic drafting practices and components such as resistors, capacitors, and ICs. Upon completion, students should be able to prepare electronic drawings with CAD software.

ELN 152 Fabrication Techniques 1 3 2

Prerequisites: None

Corequisites: None

This course covers the fabrication methods required to create a prototype product from the initial circuit design. Topics include CAD, layout, sheet metal working, component selection, wire wrapping, PC board layout and construction, reverse engineering, soldering, and other related topics. Upon completion, students should be able to design and construct an electronic product with all its associated documentation.

ELN 154 Introduction to Data Communication 2 3 3

Prerequisites: ELN 133 with ELN 132 or ELN 137

Corequisites: None

This course introduces the principal elements and theory (analog and digital techniques) of data communication systems and how they are integrated as a complete network. Topics include an overview of data communication, OSI model, transmission modes, serial and parallel interfaces, applications of ICs, protocols, network configurations, modems, and related applications. Upon completion, students should be able to demonstrate knowledge of the concepts associated with data communication systems and high speed networks.

ELN 232 Introduction to Microprocessors 3 3 4

Prerequisites: ELN 133

Corequisites: None

This course introduces microprocessor architecture and microcomputer systems including memory and input/output interfacing. Topics include assembly language programming, bus architecture, bus cycle types, I/O systems, memory systems, interrupts, and other related topics. Upon completion, students should be able to interpret, analyze, verify, and troubleshoot fundamental microprocessor circuits and programs using appropriate techniques and test equipment.

ELN 234 Communication Systems 3 3 4

Prerequisites: ELN 133 with ELN 132 or ELN 137

Corequisites: None

This course introduces the fundamentals of electronic communication systems. Topics include the frequency spectrum, electrical noise, modulation techniques, characteristics of transmitters and receivers, and digital communications. Upon completion, students should be able to interpret analog and digital communication circuit diagrams, analyze transmitter and receiver circuits, and use appropriate communication test equipment.

ELN 237 Local Area Networks 2 3 3

Prerequisites: Select One: CET 111, CIS 110, CIS 111

Corequisites: None

This course introduces the fundamentals of local area networks and their operation in business and computer environments. Topics include the characteristics of network topologies, system hardware (repeaters, bridges, routers, gateways), system configuration, and installation and administration of the LAN. Upon completion, students should be able to install, maintain, and manage a local area network.

ELN 238 Advanced LANs 2 3 3

Prerequisites: ELN 237

Corequisites: None

This course covers advanced concepts, tools, and techniques associated with servers, workstations, and overall local area network performance. Topics include network security and configuration, system performance and optimization, communication protocols and packet formats, troubleshooting techniques, multi-platform integration, and other related topics. Upon completion, students should be able to use advanced techniques to install, manage, and troubleshoot networks and optimize server and workstation performance.

Emergency Medical Science

EMS 110 EMT - Basic 5 6 0 7

Prerequisites: Enrollment in EMS program

Corequisites: None

This course introduces basic emergency medical care. Topics include preparatory, airway, patient assessment, medical emergencies, trauma, infants and children, and operations. Upon completion, students should be able to demonstrate the knowledge and skills necessary for the EMT-Basic certification.

EMS 111 Prehospital Environment 2 2 0 3

Prerequisites: Enrollment in EMS program

Corequisites: None

This course introduces the prehospital care environment and is required for all levels of EMT certification. Topics include roles, responsibilities, laws, ethics, communicable diseases, hazardous materials recognition, therapeutic communications, EMS systems, and defense tactics. Upon completion of EMS 110 and EMS 111, students should be able to demonstrate competencies and skills necessary to achieve EMT-Basic certification.

EMS 115 Defense Tactics for EMS 1 3 0 2

Prerequisites: Enrollment in EMS program

Corequisites: None

This course is designed to provide tactics that can be used for self-protection in dangerous and violent situations. Emphasis is placed on prediction, recognition, and response to dangerous and violent situations. Upon completion, students should be able to recognize potentially hostile situations and protect themselves during a confrontation.

EMS 120 Intermediate Interventions 2 3 0 3

Prerequisites: BIO 168 and EMS 110, EMS 111 or EMS 115, and enrollment in EMS program

Corequisites: EMS 121 or EMS 122, EMS 130, EMS 131, and BIO 169

This course is designed to provide the necessary information for interventions appropriate to the EMT-Intermediate, and is required for intermediate certification. Topics include automated external defibrillation, basic cardiac electrophysiology, intravenous therapy, venipuncture, acid-base balance, and fluids and electrolytes. Upon completion, students should be able to properly establish an IV line, obtain venous blood, utilize AEDs, and correctly interpret arterial blood gases. Current N.C. EMT certification is required for students enrolling in this course.

EMS 121 EMS Clinical Practicum I 0 0 6 2

Prerequisites: BIO 168, EMS 110, EMS 111 or EMS 115, and enrollment in EMS program

Corequisites: EMS 120, EMS 130, EMS 131, and BIO 169

This course is the initial hospital and field internship and is required for intermediate and paramedic certification. Emphasis is placed on intermediate-level care. Upon completion, students should be able to demonstrate competence with intermediate-level skills. Current N.C. EMT certification is required for students enrolling in this course.

EMS 125 EMS Instructor Methodology 1 2 0 2

Prerequisites: None

Corequisites: None

This course covers the information needed to develop and instruct EMS courses. Topics include instructional methods, lesson plan development, time management skills, and theories of adult learning. Upon completion, students should be able to teach EMS courses and meet the North Carolina EMS requirements for instructor methodology.

EMS 130 Pharmacology for EMS 1 3 0 2

Prerequisites: BIO 168, EMS 110, and enrollment in EMS program

Corequisites: BIO 169, EMS 120, and EMS 131

This course introduces the fundamental principles of pharmacology and medication administration and is required for intermediate and paramedic certification. Topics include terminology, pharmacokinetics, pharmacodynamics, weights, measures, drug calculations, legislation, and administration routes. Upon completion, students should be able to accurately calculate drug dosages, properly administer medications, and demonstrate general knowledge of pharmacology.

EMS 131 Advanced Airway Management 1 2 0 2

Prerequisites: BIO 168, EMS 110, and enrollment in EMS program

Corequisites: BIO 169, EMS 120, and EMS 130

This course is designed to provide advanced airway management techniques and is required for intermediate and paramedic certification. Topics include respiratory anatomy and physiology, airway, ventilation, adjuncts, surgical intervention, and rapid sequence intubation. Upon completion, students should be able to properly utilize all airway adjuncts and pharmacology associated with airway control and maintenance.

EMS 140 Rescue Scene Management 1 3 0 2

Prerequisites: Enrollment in EMS program

Corequisites: EMS 140A

This course introduces rescue scene management and is required for paramedic certification. Topics include response to hazardous material conditions, medical incident command, and extrication of patients from a variety of situations. Upon completion, students should be able to recognize and manage rescue operations based upon initial and follow-up scene assessment. Skills will include vehicle extrication, water rescue, rescue from heights, and confined space rescue.

EMS 140A Rescue Scene Skills Lab 0 3 0 1

Prerequisites: Enrollment in EMS Program

Corequisites: EMS 140

This course is designed to provide enhanced rescue scene skills for EMS providers. Emphasis is placed on advanced rescue scene evolutions including hazardous materials and major incident response. Upon completion, students should be able to demonstrate skills necessary to safely effect patients rescue in a variety of situations.

EMS 150 Emergency Vehicles & EMS Communication 1 3 0 2

Prerequisites: Enrollment in EMS program

Corequisites: None

This course examines the principles governing maintenance of emergency vehicles and EMS communication equipment and is required for paramedic certification. Topics include applicable motor vehicle laws affecting emergency vehicle operation, defensive driving, collision avoidance techniques, communication systems, and information management systems. Upon completion, students should have a basic knowledge of emergency vehicles, maintenance, and communication needs.

EMS 210 Advanced Patient Assessment 1 3 0 2

Prerequisites: EMS 120, EMS 130, EMS 131, and either EMS 121 or EMS 122

Corequisites: None

This course covers advanced patient assessment techniques and is required for paramedic certification. Topics include initial assessment, medical-trauma history, field impression, complete physical exam process, on-going assessment, and documentation skills. Upon completion, students should be able to utilize basic communication skills and record and report collected patient data.

EMS 220 Cardiology 2 6 0 4

Prerequisites: EMS 120, EMS 121, EMS 130, and EMS 131

Corequisites: EMS 210 and EMS 221

This course provides an in-depth study of cardiovascular emergencies and is required for paramedic certification. Topics include anatomy and physiology, pathophysiology, rhythm interpretation, cardiac pharmacology, and patient treatment. Upon completion, students should be able to certify at the Advanced Cardiac Life Support provider level utilizing American Heart Association Guidelines. In addition, the course provides instruction in the use of various cardiac monitoring devices.

EMS 221 EMS Clinical Practicum II 0 0 9 3

Prerequisites: EMS 121 or EMS 122 and COE 111, EMS 120, EMS 130 and EMS 131

Corequisites: EMS 210 and EMS 220

This course is a continuation of the hospital and field internship required for paramedic certification. Emphasis is placed on advanced-level care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care. Current N.C. EMT certification is required for students enrolling in this course.

EMS 230 Pharmacology II for EMS 1 3 0 2

Prerequisites: EMS 130

Corequisites: None

This course explores the fundamental classification and action of common pharmacologic agents. Emphasis is placed on the action and use of compounds most commonly encountered in the treatment of chronic and acutely ill patients. Upon completion, students should be able to demonstrate general knowledge of drugs covered during the course.

EMS 231 EMS Clinical Practicum III 0 0 9 3

Prerequisites: EMS 221 or EMS 222 and COE 121, EMS 210 and EMS 220

Corequisites: EMS 250 and EMS 260

This course is a continuation of the hospital and field internship required for paramedic certification. Emphasis is placed on advanced-level care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care. Current N.C. EMT certification is required for students enrolling in this course.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

EMS 240 Special Needs Patients 1 2 0 2

Prerequisites: EMS 120, EMS 121 or EMS 122, EMS 130, and EMS 131
Corequisites: EMS 241

This course includes concepts of crisis intervention and techniques of dealing with special needs patients and is required for paramedic certification. Topics include behavioral emergencies, abuse, assault, challenged patients, personal well-being, home care, and psychotherapeutic pharmacology. Upon completion, students should be able to recognize and manage frequently encountered special needs patients.

EMS 241 EMS Clinical Practicum IV 0 0 9 3

Prerequisites: EMS 231 or EMS 232 and COE 131, EMS 250, and EMS 260
Corequisites: EMS 240, EMS 270, and EMS 285

This course is a continuation of the hospital and field internship required for paramedic certification. Emphasis is placed on advanced-level care. Upon completion, students should be able to provide advanced-level patient care as an entry-level paramedic. Current N.C. EMT certification is required for students enrolling in this course.

EMS 250 Advanced Medical Emergencies 2 3 0 3

Prerequisites: EMS 120, EMS 130, EMS 131, and either EMS 121 or EMS 122, EMS 210, EMS 220, and EMS 221
Corequisites: EMS 231

This course presents an in-depth study of medical conditions frequently encountered in the pre-hospital setting and is required for paramedic certification. Topics include pulmonology, neurology, endocrinology, anaphylaxis, gastroenterology, toxicology, and environmental emergencies integrating case presentation and emphasizing pharmacotherapeutics. Upon completion, students should be able to recognize and manage frequently encountered medical conditions based upon initial patient impression.

EMS 260 Advanced Trauma Emergencies 1 3 0 2

Prerequisites: EMS 120, EMS 130, EMS 131, and either EMS 121 or EMS 122, EMS 210, EMS 220, and EMS 221
Corequisites: EMS 231

This course presents in-depth study of trauma including pharmacological interventions for conditions frequently encountered in the pre-hospital setting and is required for paramedic certification. Topics include hemorrhage control, shock, burns, and trauma to head, spine, soft tissue, thoracic, abdominal, and musculoskeletal areas with case presentations utilized for special problems situations. Upon completion, students should be able to recognize and manage trauma situations based upon patient impressions and should meet requirements of BTLS or PHTLS courses.

EMS 270 Life Span Emergencies 2 2 0 3

Prerequisites: EMS 120, EMS 130 and EMS 131, EMS 231, EMS 250 and EMS 260
Corequisites: EMS 241

This course, required for paramedic certification, covers medical/ethical/legal issues and the spectrum of age-specific emergencies from conception through death. Topics include gynecological, obstetrical, neonatal, pediatric, and geriatric emergencies and pharmacological therapeutics. Upon completion, students should be able to recognize and treat age-specific emergencies and certify at the Pediatric Advanced Life Support provider level.

EMS 280 EMS Bridging Course 2 2 0 3

Prerequisites: Enrollment in EMS Program
Corequisites: None

This course is designed to bridge the knowledge gained in a continuing education paramedic program with the knowledge gained in an EMS curriculum program. Topics include patient assessment, documentation, twelve-lead ECG analysis, thrombolytic agents, cardiac pacing, and advanced pharmacology. Upon completion, students should be able to perform advanced patient assessment documentation using the problem-oriented medical record format and manage complicated patients.

EMS 285 EMS Capstone 1 3 0 2

Prerequisites: EMS 220, EMS 231, EMS 250, and EMS 260
Corequisites: EMS 241

This course provides an opportunity to demonstrate problem-solving skills as a team leader in simulated patient scenarios and is required for paramedic certification. Emphasis is placed on critical thinking, integration of didactic and psychomotor skills, and effective performance in simulated emergency situations. Upon completion, students should be able to recognize and appropriately respond to a variety of EMS related events.

English**ENG 080 Writing Foundations 3 2 4**

Prerequisites: ENG 070 or ENG 075 or placement
Corequisites: None

This course introduces the writing process and stresses effective sentences. Emphasis is placed on applying the conventions of written English, reflecting standard usage and mechanics in structuring a variety of sentences. Upon completion, students should be able to write correct sentences and a unified, coherent paragraph. This course does not satisfy the developmental writing prerequisite for ENG 111.

ENG 090 Composition Strategies 3 0 3

Prerequisites: ENG 080 or ENG 085 or placement
Corequisites: ENG 090A

This course provides practice in the writing process and stresses effective paragraphs. Emphasis is placed on learning and applying the conventions of standard written English in developing paragraphs within the essay. Upon completion, students should be able to compose a variety of paragraphs and a unified, coherent essay. This course, with ENG 090A, satisfies the developmental writing prerequisite for ENG 111.

ENG 090A Composition Strategies Lab 0 2 1

Prerequisites: ENG 080 or ENG 085
Corequisites: ENG 090

This writing lab is designed to practice the skills introduced in ENG 090. Emphasis is placed on learning and applying the conventions of standard written English in developing paragraphs within the essay. Upon completion, students should be able to compose a variety of paragraphs and a unified, coherent essay.

ENG 102 Applied Communications II 3 0 3

Prerequisites: None
Corequisites: None

This course is designed to enhance writing and speaking skills for the workplace. Emphasis is placed on generating short writings such as job application documents, memoranda, and reports and developing interpersonal communication skills with employees and the public. Upon completion, students should be able to prepare effective, short, and job-related written and oral communications. This is a diploma-level course.

ENG 110 Freshman Composition**3 0 3**

Prerequisites: ENG 090 and RED 080

Corequisites: None

This course is designed to develop informative and business writing skills. Emphasis is placed on logical organization of writing, including effective introductions and conclusions, precise use of grammar, and appropriate selection and use of sources. Upon completion, students should be able to produce clear, concise, well-organized short papers. An oral component is also integrated with the course

ENG 111 Expository Writing**3 0 3**

Prerequisites: (ENG 090, ENG 090A and RED 090) or ENG 095, or placement test

Corequisites: None

This course is the required first course in a series of two designed to develop the ability to produce clear expository prose. Emphasis is placed on the writing process including audience analysis, topic selection, thesis support and development, editing, and revision. Upon completion, students should be able to produce unified, coherent, well-developed essays using standard written English. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in English Composition.

ENG 112 Argument-Based Research**3 0 3**

Prerequisites: ENG 111

Corequisites: None

This course, the second in a series of two, introduces research techniques, documentation styles, and argumentative strategies. Emphasis is placed on analyzing data and incorporating research findings into documented argumentative essays and research projects. Upon completion, students should be able to summarize, paraphrase, interpret, and synthesize information from primary and secondary sources using standard research format and style. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in English Composition.

ENG 113 Literature-Based Research**3 0 3**

Prerequisites: ENG 111

Corequisites: None

This course, the second in a series of two, expands the concepts developed in ENG 111 by focusing on writing that involves literature-based research and documentation. Emphasis is placed on critical reading and thinking and the analysis and interpretation of prose, poetry, and drama: plot, characterization, theme, cultural context, etc. Upon completion, students should be able to construct mechanically-sound, documented essays and research papers that analyze and respond to literary works. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in English Composition.

ENG 114 Professional Research and Reporting**3 0 3**

Prerequisites: ENG 111

Corequisites: Admission to a Major Program or English Department approval

This course, the second in a series of two, is designed to teach professional communication skills. Emphasis is placed on research, listening, critical reading and thinking, analysis, interpretation, and design used in oral and written presentations. Upon completion, students should be able to work individually and collaboratively to produce well-designed business and professional written and oral presentations. Students entering this course should be able to demonstrate

in-depth knowledge in a technical field and should anticipate interdepartmental evaluation of course projects. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in English Composition.

ENG 125 Creative Writing I**3 0 3**

Prerequisites: ENG 111

Corequisites: None

This course is designed to provide students with the opportunity to practice the art of creative writing. Emphasis is placed on writing fiction, poetry, and sketches. Upon completion, students should be able to craft and critique their own writing and critique the writing of others. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ENG 126 Creative Writing II**3 0 3**

Prerequisites: ENG 125

Corequisites: None

This course is designed as a workshop approach for advancing imaginative and literary skills. Emphasis is placed on the discussion of style, techniques, and challenges for first publications. Upon completion, students should be able to submit a piece of their writing for publication. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ENG 131 Introduction to Literature**3 0 3**

Prerequisites: ENG 111

Corequisites: Select one: ENG 112, ENG 113, ENG 114

This course introduces the principal genres of literature. Emphasis is placed on literary terminology, devices, structure, and interpretation. Upon completion, students should be able to analyze and respond to literature. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 133 Introduction to the Novel**3 0 3**

Prerequisites: ENG 111

Corequisites: Select one: ENG 112, ENG 113, ENG 114

This course provides intensive study of the novel as a literary form, based on close reading of representative texts. Emphasis is placed on the development and analysis of the novel. Upon completion, students should be able to interpret, analyze, and discuss the distinguishing features of the novel. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 134 Introduction to Poetry**3 0 3**

Prerequisites: ENG 111

Corequisites: Select one: ENG 112, ENG 113, ENG 114

This course provides intensive study of the poem as a literary form, based on close reading of representative texts. Emphasis is placed on the development and analysis of poetry. Upon completion, students should be able to interpret, analyze, and discuss the distinguishing features of poetry. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 135 Introduction to Short Fiction**3 0 3**

Prerequisites: ENG 111

Corequisites: Select one: ENG 112, ENG 113, ENG 114

This course provides intensive study of short fiction as a literary form, based on close reading of representative texts. Emphasis is placed on the development and analysis of short

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

fiction. Upon completion, students should be able to interpret, analyze, and discuss the distinguishing forms of short fiction. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 231 American Literature I 3 0 3

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course covers selected works in American literature from its beginnings to 1865. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts. This course requires a research paper. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 232 American Literature II 3 0 3

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course covers selected works in American literature from 1865 to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts. This course requires a research paper. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 233 Major American Writers 3 0 3

Prerequisites: ENG 112, ENG 113, or ENG 114

Corequisites: None

This course provides an intensive study of the works of several major American authors. Emphasis is placed on American history, culture, and the literary merits. Upon completion, students should be able to interpret, analyze, and evaluate the works studied. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 234 Modern American Poets 3 0 3

Prerequisites: ENG 112, ENG 113, or ENG 114

Corequisites: None

This course covers the works of selected major modern American poets. Topics include each poet's theory and practice of poetry and the historical and literary traditions which influenced or were influenced by the poets. Upon completion, students should be able to read poetry with more comprehension and explicate selected poems in light of technique, theory, and poetic traditions. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 235 Survey of Film as Literature 3 0 3

Prerequisites: ENG 113

Corequisites: None

This course provides a study of the medium of film with a focus on the historical impact and the various literary genres of movies. Emphasis is placed on an appreciation of film as a form of literature which demonstrates various elements of fiction (character, setting, theme, etc.). Upon completion, students should be able to analyze film critically in various literary contexts. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 241 British Literature I 3 0 3

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course covers selected works in British literature from its beginnings to the Romantic Period. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts. Reading an eighteenth century novel is required. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 242 British Literature II 3 0 3

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course covers selected works in British literature from the Romantic Period to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts. Reading a nineteenth century novel is required. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 243 Major British Writers 3 0 3

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course provides an intensive study of the works of several major British authors. Emphasis is placed on British history, culture, and the literary merits. Upon completion, students should be able to interpret, analyze, and evaluate the works studied. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 261 World Literature I 3 0 3

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course introduces selected works from the Pacific, Asia, Africa, Europe, and the Americas from their literary beginnings through the seventeenth century. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to selected works. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 262 World Literature II 3 0 3

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course introduces selected works from the Pacific, Asia, Africa, Europe, and the Americas from the eighteenth century to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to selected works. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

ENG 271 Contemporary Literature**3 0 3**

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course includes a study of contemporary literature. Emphasis is placed on literary and cultural trends of selected texts. Upon completion, students should be able to interpret, analyze, and respond to the literature. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 272 Southern Literature**3 0 3**

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course provides an analytical study of the works of several Southern authors. Emphasis is placed on the historical and cultural contexts, themes, aesthetic features of individual works, and biographical backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and discuss selected works. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 273 African-American Literature**3 0 3**

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course provides a survey of the development of African-American literature from its beginnings to the present. Emphasis is placed on historical and cultural context, themes, literary traditions, and backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and respond to selected texts. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

ENG 274 Literature by Women**3 0 3**

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course provides an analytical study of the works of several women authors. Emphasis is placed on the historical and cultural contexts, themes and aesthetic features of individual works, and biographical backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and discuss selected works. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

ENG 275 Science Fiction**3 0 3**

Prerequisites: Select one: ENG 112, ENG 113, ENG 114

Corequisites: None

This course covers the relationships between science and literature through analysis of short stories and novels. Emphasis is placed on scientific discoveries that shaped Western culture and our changing view of the universe as reflected in science fiction literature. Upon completion, students should be able to trace major themes and ideas and illustrate relationships between science, worldview, and science fiction literature. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

Environmental Science**ENV 110 Environmental Science****3 0 3**

Prerequisites: None

Corequisites: ENV 110A

This course covers the environmental problems facing society today. Topics include population, natural resources, air and water pollution, and waste disposal problems. Upon completion, students should be able to demonstrate insight into the role the individual plays in shaping the environment.

ENV 110A Environmental Science Lab**0 2 1**

Prerequisites: None

Corequisites: ENV 110

This course provides a laboratory component to complement ENV 110. Emphasis is placed on laboratory and field experience. Upon completion, students should be able to demonstrate a practical understanding of environmental relationships and of contemporary environmental issues.

Entrepreneurship**ETR 210 Intro to Entrepreneurship****3 0 3**

Prerequisites: None

Corequisites: None

This course provides a survey of the starting and operating of an entrepreneurial venture. Topics include new venture creation, the business plan, economics of the business, determining resource needs and acquiring resources, marketing, technology, leadership skills, and business ethics. Upon completion, students should be able to demonstrate an understanding of entrepreneurship concepts and how to use the entrepreneurial mindset to succeed in their careers.

ETR 215 Law for Entrepreneurs**3 0 3**

Prerequisites: None

Corequisites: None

This course introduces students to basic legal concepts specifically relevant to a business start-up venture. Topics include bailments and documents of title, nature and form of sales, risk and property rights, obligations and performance, business organizations, and agency and employment. Upon completion, students should be able to assess the legal responsibilities of a business start-up.

ETR 220 Innovation and Creativity**3 0 3**

Prerequisites: None

Corequisites: None

This course provides a study of developing and enhancing individual and organizational creativity and innovation. Topics include that innovation needs to be applied to products, services, and processes to increase competitive advantages and add value to businesses. Upon completion, students should be able to apply innovation and creativity principles in the work place.

ETR 230 Entrepreneur Marketing**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the techniques to correctly research and define the target market to increase sales for start up businesses or to expand current businesses. Topics include how to target market and meet customers' needs with a limited budget in the early stages of the life of a start up business. Upon completion, students should be able to demonstrate an understanding of how to correctly target market for a start up business with limited resources.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

ETR 240 Funding for Entrepreneurs 3 0 3
 Prerequisites: ACC 120
 Corequisites: None
 This course provides a focus on the financial issues and needs confronting entrepreneurs attempting to grow their businesses by attracting startup and growth capital. Topics include sources of funding, including: angel investors, venture capital, IPOs, private placement, banks, suppliers, buyers, partners, and the government. Upon completion, students should be able to demonstrate an understanding of how to effectively finance a business venture.

ETR 270 Entrepreneurship Issues 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces current and emerging entrepreneurship issues and opportunities. Topics include franchising, import/export, small business taxes, legal structures, negotiations, contract management, and time management. Upon completion, students should be able to apply a variety of analytical and decision-making requirements to start a new business.

Fire Protection Technology

FIP 120 Introduction to Fire Protection 3 0 3
 Prerequisites: None
 Corequisites: None
 This course provides an overview of the history, development, methods, systems, and regulations as they apply to the fire protection field. Topics include history, evolution, statistics, suppression, organizations, careers, curriculum, and other related topics. Upon completion, students should be able to demonstrate a broad understanding of the fire protection field.

FIP 124 Fire Prevention & Public Education 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces fire prevention concepts as they relate to community and industrial operations. Topics include the development and maintenance of fire prevention programs, educational programs, and inspection programs. Upon completion, students should be able to research, develop, and present a fire safety program to a citizens or industrial group.

FIP 128 Detection and Investigation 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers procedures for determining the origin and cause of accidental and incendiary fires. Topics include collection and preservation of evidence, detection and determination of accelerants, courtroom procedure and testimony, and documentation of the fire scene. Upon completion, students should be able to conduct a competent fire investigation and present those findings to appropriate officials or equivalent.

FIP 132 Building Construction 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers the principles and practices related to various types of building construction, including residential and commercial, as impacted by fire conditions. Topics include types of construction and related elements, fire resistive aspects of construction materials, building codes, collapse, and other related topics. Upon completion, students should be able to understand and recognize various types of construction and their positive or negative aspects as related to fire conditions.

FIP 136 Inspections & Codes 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers the fundamentals of fire and building codes and procedures to conduct an inspection. Topics include review of fire and building codes, writing inspection reports, identifying hazards, plan reviews, site sketches, and other related topics. Upon completion, students should be able to conduct a fire code compliance inspection and produce a written report.

FIP 140 Industrial Fire Protection 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers fire protection systems in industrial facilities. Topics include applicable health and safety standards, insurance carrier regulations, other regulatory agencies, hazards of local industries, fire brigade operation, and loss prevention programs. Upon completion, students should be able to prepare a procedure to plan, organize, and evaluate an industrial facility's fire protection.

FIP 152 Fire Protection Law 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers fire protection law. Topics include torts, legal terms, contracts, liability, review of case histories, and other related topics. Upon completion, students should be able to discuss laws, codes, and ordinances as they relate to fire protection.

FIP 220 Fire Fighting Strategies 3 0 3
 Prerequisites: None
 Corequisites: None
 This course provides preparation for command of initial incident operations involving emergencies within both the public and private sector. Topics include incident management, fire-ground tactics and strategies, incident safety, and command/control of emergency operations. Upon completion, students should be able to describe the initial incident system as it relates to operations involving various emergencies in fire and non-fire situations.

FIP 224 Instructional Methodology 4 0 4
 Prerequisites: None
 Corequisites: None
 This course covers the knowledge, skills, and abilities needed to train others in fire service operations. Topics include planning, presenting, and evaluating lesson plans, learning styles, use of media, communication, and other related topics. Upon completion, students should be able to meet all requirements of NFPA 1041 Fire Service Instructor Level Two.

FIP 228 Local Government Finance 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces local governmental financial principles and practices. Topics include budget preparation and justification, revenue policies, statutory requirements, taxation, audits, and the economic climate. Upon completion, students should be able to comprehend the importance of finance as it applies to the operation of a department.

FIP 230 Chemistry of Hazardous Materials I 5 0 5
 Prerequisites: None
 Corequisites: None
 This course covers the evaluation of hazardous materials. Topics include use of the periodic table, hydrocarbon derivatives, placards and labels, parameters of combustion, and spill and leak mitigation. Upon completion, students should be able to demonstrate knowledge of the chemical behavior of hazardous materials.

FIP 232 Hydraulics & Water Distribution 2 2 3

Prerequisites: MAT 115, MAT 120, MAT 121, MAT 140, MAT 151, MAT 161, MAT 171, or MAT 175

Corequisites: None

This course covers the flow of fluids through fire hoses, nozzles, appliances, pumps, standpipes, water mains, and other devices. Emphasis is placed on supply and delivery systems, fire flow testing, hydraulic calculations, and other related topics. Upon completion, students should be able to perform hydraulic calculations, conduct water availability tests, and demonstrate knowledge of water distribution systems.

FIP 236 Emergency Management 3 0 3

Prerequisites: None

Corequisites: None

This course covers the four phases of emergency management: mitigation, preparedness, response, and recovery. Topics include organizing for emergency management, coordinating for community resources, public sector liability, and the roles of government agencies at all levels. Upon completion, students should be able to demonstrate an understanding of comprehensive emergency management and the integrated emergency management system.

FIP 240 Fire Service Supervision 3 0 3

Prerequisites: None

Corequisites: None

This course covers supervisory skills and practices in the fire protection field. Topics include the supervisor's job, supervision skills, the changing work environment, managing change, organizing for results, discipline and grievances, and loss control. Upon completion, students should be able to demonstrate an understanding of the roles and responsibilities of the effective fire service supervisor.

FIP 260 Fire Protection Planning 3 0 3

Prerequisites: None

Corequisites: None

This course covers the need for a comprehensive approach to fire protection planning. Topics include the planning process, using an advisory committee, establishing goals and objectives, and techniques used to approve and implement a plan. Upon completion, students should be able to demonstrate a working knowledge of the concepts and principles of planning as it relates to fire protection.

FIP 276 Managing Fire Services 3 0 3

Prerequisites: None

Corequisites: None

This course provides an overview of fire department operative services. Topics include finance, staffing, equipment, code enforcement, management information, specialized services, legal issues, planning, and other related topics. Upon completion, students should be able to understand concepts and apply fire department management and operations principles.

French

FRE 111 Elementary French I 3 0 3

Prerequisites: None

Corequisites: FRE 181

This course introduces the fundamental elements of the French language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written

French and demonstrate cultural awareness. Lab practice is expected of students. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

FRE 112 Elementary French II 3 0 3

Prerequisites: FRE 111

Corequisites: FRE 182

This course is a continuation of FRE 111 focusing on the fundamental elements of the French language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written French and demonstrate further cultural awareness. Lab practice is expected of students. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

FRE 181 French Lab 1 0 2 1

Prerequisites: None

Corequisites: FRE 111

This course provides an opportunity to enhance acquisition of the fundamental elements of the French language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written French and demonstrate cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

FRE 182 French Lab 2 0 2 1

Prerequisites: FRE 181

Corequisites: FRE 112

This course provides an opportunity to enhance acquisition of the fundamental elements of the French language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written French and demonstrate cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

FRE 211 Intermediate French I 3 0 3

Prerequisites: FRE 112

Corequisites: None

This course provides a review and expansion of the essential skills of the French language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future. Lab practice is expected of students. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

FRE 212 Intermediate French II 3 0 3

Prerequisites: FRE 211

Corequisites: None

This course is a continuation of FRE 211. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Upon completion, students should be able

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively.

When only three numbers are listed, the middle number always designates lab hours.

to communicate spontaneously and accurately with increasing complexity and sophistication. Lab practice is expected of students. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

Film and Video Production

FVP 250 Production Specialties I 1 6 3

Prerequisites: None

Corequisites: None

This course provides education and training through contextual learning in the film production areas of art department, camera, sound, grip, electric, locations, script, and continuity. Emphasis is placed on successful professional level interaction with other students and industry professionals through pre-production and initial production of an actual film/video project. Upon completion, students should demonstrate an understanding of the film/video pre-production and initial production process, and the relationship among the departments in these areas. Students will complete projects from the pre-production through post-production phase.

Geology

GEL 111 Introductory Geology 3 2 4

Prerequisites: None

Corequisites: None

This course introduces basic landforms and geological processes. Topics include rocks, minerals, volcanoes, fluvial processes, geological history, plate tectonics, glaciers, and coastal dynamics. Upon completion, students should be able to describe basic geological processes that shape the earth. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural sciences/mathematics.

GEL 113 Historical Geology 3 2 4

Prerequisites: GEL 111 or GEL 120

Corequisites: None

This course covers the geological history of the earth and its life forms. Emphasis is placed on the study of rock strata, fossil groups, and geological time. Upon completion, students should be able to identify major fossil groups and associated rock strata and approximate ages of geological formations. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural sciences/mathematics.

GEL 230 Environmental Geology 3 2 4

Prerequisites: GEL 111, GEL 120 or PHS 130

Corequisites: None

This course provides insights into geologic forces that cause environmental changes influencing man's activities. Emphasis is placed on natural hazards and disasters caused by geologic forces. Upon completion, students should be able to relate major hazards and disasters to the geologic forces responsible for their occurrence. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural sciences/mathematics.

Geography

GEO 111 World Regional Geography 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the regional concept which emphasizes the spatial association of people and their environment. Emphasis is placed on the physical, cultural, and economic systems that interact to produce the distinct regions of the earth. Upon completion, students should be able to describe variations in physical and cultural features of a region and demonstrate an understanding of their functional relationships. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

*GEO 112 Cultural Geography 3 0 3

Prerequisites: None

Corequisites: None

This course is designed to explore the diversity of human cultures and to describe their shared characteristics. Emphasis is placed on the characteristics, distribution, and complexity of earth's cultural patterns. Upon completion, students should be able to demonstrate an understanding of the differences and similarities in human cultural groups. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

Geographic Information Systems

GIS 111 Introduction to GIS 2 2 3

Prerequisites: None

Corequisites: None

This course introduces the hardware and software components of a Geographic Information System and reviews GIS applications. Topics include data structures and basic functions, methods of data capture and sources of data, and the nature and characteristics of spatial data and objects. Upon completion, students should be able to identify GIS hardware components, typical operations, products/applications, and differences between database models and between raster and vector systems. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

GIS 112 Introduction to GPS 2 2 3

Prerequisites: SRV 110

Corequisites: None

This course provides an overview of Global Positioning Systems (GPS). Topics include the theory, implementation, and operations of GPS, as well as alternate data source remote sensing. Upon completion, students should be able to demonstrate an understanding of the fundamentals of GPS.

GIS 120 Introduction to Geodesy 2 2 3

Prerequisites: GIS 111

Corequisites: None

This course introduces the fundamental concepts behind map projections, datums, and coordinate systems. Topics include the theory of how the earth's shape is defined and how geographic features are positioned using spherical coordinate systems. Upon completion, students should be able to demonstrate an understanding of the fundamentals of geodesy as it relates to the measurement and representation of the earth.

GIS 121 Georeferencing and Mapping 2 2 3
 Prerequisites: GIS 111
 Corequisites: None
 This course introduces coordinate systems, fundamentals of surveying, and cartography. Topics include the theory, acquisition, and use of locational data using both continuous and discrete georeferencing methods. Upon completion, students should be able to identify appropriate coordinate systems for a situation and translate data into correct map form.

GIS 125 CAD for GIS 2 2 3
 Prerequisites: None
 Corequisites: None
 This course introduces the concepts of Computer Aided Drafting (CAD) as well as software that is used for building geographic data for a GIS. Emphasis is placed on the learning of basic commands used in building spatial data. Upon completion, students will be able to operate within a CAD environment.

GIS 215 GIS Data Models 2 2 3
 Prerequisites: GIS 111
 Corequisites: None
 This course covers interpreting and understanding of a variety of data formats available in GIS. Topics include the similarities and differences between data models as well as how data is treated differently within each format, to include the conversion of data between different environments. Upon completion, students should be able to demonstrate an understanding of the fundamentals of GIS data storage and interoperability.

GIS 222 Internet Mapping GIS 2 2 3
 Prerequisites: WEB 115 and GIS 111
 Corequisites: None
 This course is designed as an introduction to multimedia, interactive, animated, and Web cartography. Topics include the principles of effective cartographic communication, and stressing the new and important roles digital cartography is coming to play in cyberspace. Upon completion, students should be able to demonstrate the ability to evaluate digital cartographic information and create effective internet maps.

GIS 232 Spatial Databases 2 2 3
 Prerequisites: DBA 110 and GIS 111
 Corequisites: None
 This course covers various stages of spatial database design and implementation, including conceptual models and query languages. Topics include spatial networks, spatial data mining, indexing, and query processing. Upon completion, students should be able to demonstrate a comprehensive knowledge of spatial database management systems.

GIS 240 Air Photo Interpretation 2 2 3
 Prerequisites: GIS 111
 Corequisites: None
 This course is designed to introduce the student to remote sensing, photogrammetry and various components of land use mapping. Emphasis is placed on the art and science of aerial photo interpretation. Upon completion, students will be able to review, gather and analyze data from diverse forms of image maps.

GIS 262 GIS Programming Trends 2 2 3
 Prerequisites: GIS 111
 Corequisites: None
 This course introduces non-proprietary and innovative software used in geospatial technology. Topics will include an overview of open source and/or emerging software used in geographic information systems. Upon completion, students should be able to demonstrate current trends and issues in new technologies as they relate to the geospatial information.

Health

HEA 110 Personal Health/Wellness 3 0 3
 Prerequisites: None
 Corequisites: None
 This course provides an introduction to basic personal health and wellness. Emphasis is placed on current health issues such as nutrition, mental health, and fitness. Upon completion, students should be able to demonstrate an understanding of the factors necessary to the maintenance of health and wellness. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

HEA 112 First Aid and CPR 1 2 2
 Prerequisites: None
 Corequisites: None
 This course introduces the basics of emergency first aid treatment. Topics include rescue breathing, CPR, first aid for choking and bleeding, and other first aid procedures. Upon completion, students should be able to demonstrate skills in providing emergency care for the sick and injured until medical help can be obtained. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

HEA 120 Community Health 3 0 3
 Prerequisites: None
 Corequisites: None
 This course provides information about contemporary community health and school hygiene issues. Topics include health education and current information about health trends. Upon completion, students should be able to recognize and devise strategies to prevent today's community health problems. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

Healthcare Business Informatics

HB1 110 Issues and Trends in HBI 3 0 3
 Prerequisites: None
 Corequisites: None
 This course is a survey of current and emerging technology applications and data standards in the healthcare industry. Topics include the history, implementation, use, management, and impact of information technology in healthcare settings. Upon completion, students should have an understanding of the current trends and issues in healthcare informatics.

HB1 113 Survey of Med Insurance 3 0 3
 Prerequisites: None
 Corequisites: None
 This course is a survey of the healthcare insurance system. Emphasis is placed on the foundation necessary for understanding the healthcare delivery system, terminology

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

and practices of healthcare insurance, and provider reimbursement. Upon completion, students should have an understanding of healthcare insurance and how outcomes are addressed through healthcare informatics.

HBI 250 Data Mgmt and Utilization 2 2 3

Prerequisites: DBA 110, DBA 120, or DBA 210

Corequisites: None

This course covers the management and usage of data in healthcare settings according to current practices in healthcare informatics. Topics include data warehousing, data integrity, data security, data mining, and report generating in healthcare settings. Upon completion, students should be able to demonstrate an understanding of using healthcare data to support reporting and decision making in healthcare settings.

HBI 289 HBI Project 1 4 3

Prerequisites: HBI 250

Corequisites: None

This course provides an opportunity to complete a significant healthcare business informatics project with minimal instructor assistance. Emphasis is placed on written and oral communication skills, project definition, documentation, installation, testing, presentation, and user training. Upon completion, students should be able to complete a healthcare informatics project from the definition phase through implementation.

Heavy Equipment and Transport Technology

***HET 110 Diesel Engines 3 9 6**

Prerequisites: None

Corequisites: None

This course introduces theory, design, terminology, and operating adjustments for diesel engines. Emphasis is placed on safety, theory of operation, inspection, measuring, and rebuilding diesel engines according to factory specifications. Upon completion, students should be able to measure, diagnose problems, and repair diesel engines.

***HET 112 Diesel Electrical Systems 3 6 5**

Prerequisites: None

Corequisites: None

This course introduces electrical theory and applications as they relate to diesel powered equipment. Topics include lighting, accessories, safety, starting, charging, instrumentation, and gauges. Upon completion, students should be able to follow schematics to identify, repair, and test electrical circuits and components.

***HET 114 Power Trains 3 6 5**

Prerequisites: None

Corequisites: None

This course introduces power transmission devices. Topics include function and operation of gears, chains, clutches, planetary gears, drive lines, differentials, and transmissions. Upon completion, students should be able to identify, research specifications, repair, and adjust power train components.

***HET 115 Electronic Engines 2 3 3**

Prerequisites: None

Corequisites: HET 112

This course introduces the principles of electronically controlled diesel engines. Emphasis is placed on testing and adjusting diesel engines in accordance with manufacturers' specifications. Upon completion, students should be able to diagnose, test, and calibrate electronically controlled diesel engines.

***HET 116 Air Conditioning/Diesel Equipment 1 2 2**

Prerequisites: None

Corequisites: None

This course provides a study of the design, theory, and operation of heating and air conditioning systems in newer models of medium and heavy duty vehicles. Topics include component function, refrigerant recovery, and environmental regulations. Upon completion, students should be able to use proper techniques and equipment to diagnose and repair heating/air conditioning systems according to industry standards.

***HET 118 Mechanical Orientation 2 0 2**

Prerequisites: None

Corequisites: None

This course introduces the care and safe use of power and hand tools. Topics include micrometers, dial indicators, torque wrenches, drills, taps, dies, screw extractors, thread restorers, and fasteners. Upon completion, students should be able to select and properly use tools for various operations.

***HET 119 Mechanical Transmissions 2 2 3**

Prerequisites: None

Corequisites: None

This course introduces the operating principles of mechanical medium and heavy duty truck transmissions. Topics include multiple counter shafts, power take-offs, sliding idler clutches, and friction clutches. Upon completion, students should be able to diagnose, inspect, and repair mechanical transmissions.

***HET 125 Preventive Maintenance 1 3 2**

Prerequisites: None

Corequisites: None

This course introduces preventive maintenance practices used on medium and heavy duty vehicles and rolling assemblies. Topics include preventive maintenance schedules, services, DOT rules and regulations, and roadability. Upon completion, students should be able to set up and follow a preventive maintenance schedule as directed by manufacturers.

***HET 128 Medium/Heavy Duty Tune-Up 1 2 2**

Prerequisites: None

Corequisites: None

This course introduces tune-up and troubleshooting according to manufacturers' specifications. Topics include troubleshooting engine systems, tune-up procedures, and use and care of special test tools and equipment. Upon completion, students should be able to troubleshoot, diagnose, and repair engines and components using appropriate diagnostic equipment.

***HET 231 Medium/Heavy Duty Brake Systems 1 3 2**

Prerequisites: None

Corequisites: None

This course covers the theory and repair of braking systems used in medium and heavy duty vehicles. Topics include air, hydraulic, and ABS system diagnosis and repair. Upon completion, students should be able to troubleshoot, adjust, and repair braking systems on medium and heavy duty vehicles.

***HET 233 Suspension and Steering** 2 4 4
 Prerequisites: None
 Corequisites: None
 This course introduces the theory and principles of medium and heavy duty steering and suspension systems. Topics include wheel and tire problems, frame members, fifth wheel, bearings, and coupling systems. Upon completion, students should be able to troubleshoot, adjust, and repair suspension and steering components on medium and heavy duty vehicles.

History

HIS 111 World Civilizations I 3 0 3
 Prerequisites: RED 090, ENG 090
 Corequisites: None
 This course introduces world history from the dawn of civilization to the early modern era. Topics include Eurasian, African, American, and Greco-Roman civilizations and Christian, Islamic and Byzantine cultures. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in pre-modern world civilizations. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

HIS 112 World Civilizations II 3 0 3
 Prerequisites: RED 090, ENG 090
 Corequisites: None
 This course introduces world history from the early modern era to the present. Topics include the cultures of Africa, Europe, India, China, Japan, and the Americas. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in modern world civilizations. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

HIS 115 Introduction to Global History 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the study of global history. Emphasis is placed on topics such as colonialism, industrialism, and nationalism. Upon completion, students should be able to analyze significant global historical issues. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

HIS 131 American History I 3 0 3
 Prerequisites: RED 090, ENG 090
 Corequisites: None
 This course is a survey of American history from pre-history through the Civil War era. Topics include the migrations to the Americas, the colonial and revolutionary periods, the development of the Republic, and the Civil War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in early American history. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

HIS 132 American History II 3 0 3
 Prerequisites: RED 090, ENG 090
 Corequisites: None
 This course is a survey of American history from the Civil War era to the present. Topics include industrialization, immigration, the Great Depression, the major wars, the Cold

War, and social conflict. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in American history since the Civil War. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

HIS 162 Women and History 3 0 3
 Prerequisites: None
 Corequisites: None
 This course surveys the experience of women in historical perspective. Topics include the experiences and contributions of women in culture, politics, economics, science, and religion. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural contributions of women in history. This course covers American women from colonial times to the present. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

HIS 212 Medieval History 3 0 3
 Prerequisites: None
 Corequisites: None
 This course traces the cultural, political, economic, social, religious, and intellectual history of Europe during the Middle Ages. Topics include the decline of the Roman Empire, the Frankish Kingdoms, the medieval church, feudalism, the rise of national monarchies, urbanization, and the rise of universities. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in medieval Europe. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

HIS 221 African-American History 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers African-American history from the Colonial period to the present. Topics include African origins, the slave trade, the Civil War, Reconstruction, the Jim Crow era, the civil rights movement, and contributions of African Americans. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the history of African Americans. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

HIS 226 The Civil War 3 0 3
 Prerequisites: None
 Corequisites: None
 This course examines the social, political, economic, and ideological forces that led to the Civil War and Reconstruction. Topics include regional conflicts and sectionalism, dissolution of the Union, military campaigns, and the War's socioeconomic impact, aftermath, and consequences. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the United States during the era of the Civil War. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

HIS 227 Native American History 3 0 3

Prerequisites: None

Corequisites: None

This course surveys the history and cultures of Native Americans from pre-history to the present. Topics include Native American civilizations, relations with Europeans, and the continuing evolution of Native American cultures. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments among Native Americans. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

HIS 236 North Carolina History 3 0 3

Prerequisites: None

Corequisites: None

This course is a study of geographical, political, economic, and social conditions existing in North Carolina from America's discovery to the present. Topics include native and immigrant backgrounds; colonial, antebellum, and Reconstruction periods; party politics; race relations; and the transition from an agrarian to an industrial economy. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in North Carolina. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

Hospitality Management

HRM 110 Intro to Hosp & Tourism 3 0 3

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: None

This course covers the growth and progress of the hospitality industry. Topics include tourism, lodging, resorts, gaming, restaurants, foodservice and clubs. Upon completion, students should be able to demonstrate an understanding of the background, context, and career opportunities that exist within the hospitality industry.

***HRM 120 Front Office Procedures 3 0 3**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: HRM 120A

This course introduces a systematic approach to lodging front office procedures. Topics include reservations, registration, guest satisfaction, occupancy and revenue management, security, interdepartmental communications, and related guest services. Upon completion, students should be able to demonstrate a basic understanding of current front office operating systems, including efficient and courteous guest service. This course will also examine the management of bed and breakfast facilities and the housekeeping requirements for lodging, its operation and management, and its working relationship with the front office.

***HRM 120A Front Office Procedures Lab 0 2 1**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: HRM 120

This course provides a laboratory experience for enhancing student skills in lodging front office procedures. Emphasis is placed on practical computer applications of reservations, registration, guest satisfaction, occupancy and revenue management, security, interdepartmental communications,

and related guest services. Upon completion, students should be able to demonstrate a basic proficiency in computer-based, front office applications. This course will also examine computer applications associated with bed and breakfast facilities.

HRM 124 Guest Service Management 2 2 3

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: CUL 142

This course is designed to provide an introduction to the culture of dining room service management. Emphasis is placed on the dignity and psychology of service work, dining room organization/infrastructure, service delivery and modeling management roles in a dining room environment. Upon completion, students should be able to demonstrate an understanding of the guest/server dynamic and apply these principles in a dining room setting.

***HRM 135 Facilities Management 3 0 3**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: None

This course introduces the basic elements of planning and designing hospitality facilities, including environmental impacts, maintenance and upkeep. Topics include equipment and plant preventive maintenance, engineering, interior design, space utilization, remodeling and expansion, and traffic and workflow patterns. Upon completion, students should be able to demonstrate an understanding of the planning, design, national certification and maintenance of hospitality physical plants and equipment. This course will also examine facility requirements unique to bed and breakfast and other alternative lodging experiences.

***HRM 140 Legal Issues – Hospitality 3 0 3**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: None

This course covers the rights and responsibilities that the law grants to or imposes upon the hospitality industry. Topics include federal and state regulations, historical and current practices, safety and security, risk management, loss prevention, relevant torts, and contracts. Upon completion, students should be able to demonstrate an understanding of the legal system and the concepts necessary to prevent or minimize organizational liability.

***HRM 210 Meetings & Event Planning 3 0 3**

Prerequisites: DMA 030, ENG 080, RED 090 or placement

Corequisites: None

This course introduces concepts related to the planning and operation of conventions, trade shows, professional meetings, and foodservice events. Emphasis is placed on methods of marketing, selling, organizing and producing conventions, events and trade shows that will increase financial and environmental value. Upon completion, students should be able to demonstrate an understanding of management principles for multi-function, multi-day conferences and events.

***HRM 215 Restaurant Management 3 0 3**

Prerequisites: CUL 135, CUL 135A and HRM 124

Corequisites: HRM 215A

This course provides an overview of responsibilities and activities encountered in managing food and beverage operation. Topics include planning, organization, accounting, marketing trends, and human resources from an integrated managerial viewpoint. Upon completion, students should be able to demonstrate an understanding of the operation of a restaurant. Students will also examine menu design, layout, marketing, concept development, target consumers and trends.

***HRM 215A Restaurant Management Lab** 0 2 1
 Prerequisites: CUL 135, CUL 135A and HRM 124
 Corequisites: HRM 215

This course provides a laboratory experience for enhancing student skills in the responsibilities and activities encountered in managing a food and beverage operation. Emphasis is placed on practical applications of planning, organization, accounting, marketing, trends, and human resources from an integrated managerial viewpoint. Upon completion, students should be able to demonstrate a basic proficiency in restaurant management operations which may include overseeing and execution of production and service. Students will analyze menu mix and guest feedback as it relates to the overall success of foodservice operations.

***HRM 220 Cost Control – Food & Bev** 3 0 3
 Prerequisites: DMA 030, ENG 080, RED 090 or placement
 Corequisites: None

This course introduces controls and accounting procedures as applied to costs in the hospitality industry. Topics include reports, cost control, planning and forecasting, control systems, financial statements, operational efficiencies, labor controls and scheduling. Upon completion, students should be able to demonstrate an understanding of food, beverage, and labor cost control systems for operational troubleshooting and problem solving.

HRM 225 Beverage Management 3 0 3
 Prerequisites: ENG 080, RED 090 or placement
 Corequisites: None

This course introduces the management of beverages served in hospitality operations. Topics include history and trends; service, procurement, and storage; knowledge and control of wines and fermented/distilled beverages; and non-alcoholic beverages, coffees, and teas. Upon completion, students should be able to demonstrate an understanding of responsible alcohol service and the knowledge of beverages consumed in a hospitality operation.

***HRM 240 Marketing for Hospitality** 3 0 3
 Prerequisites: ENG 080, RED 090 or placement
 Corequisites: None

This course covers planning, organizing, directing, and analyzing the results of marketing programs for the hospitality industry. Emphasis is placed on target marketing, marketing mix, analysis, product and image development, use of current media, sales planning, advertising, public relations, and collateral materials. Upon completion, students should be able to apply the marketing process as it relates to the hospitality industry.

***HRM 245 Human Resource Mgmt-Hosp** 3 0 3
 Prerequisites: ENG 080, RED 090 or placement
 Corequisites: None

This course introduces a systematic approach to human resource management in the hospitality industry. Topics include training/development, staffing, selection, hiring, recruitment, evaluation, benefit administration, employee relations, labor regulations/laws, discipline, motivation, productivity, shift management, contract employees and organizational culture. Upon completion, students should be able to apply human resource management skills for the hospitality industry.

HRM 260 Procurement for Hosp 3 0 3
 Prerequisites: ENG 080, RED 090 or placement
 Corequisites: None

This course provides information for management decisions regarding needs analysis and fulfillment for hospitality operations. Emphasis is placed on supply chain sourcing, environmental impacts, procurement technologies, and packaging of products such as food, beverage, supplies, furniture, and equipment. Upon completion, students should be able to demonstrate competence in planning and executing the procurement function.

***HRM 275 Leadership – Hospitality** 3 0 3
 Prerequisites: HRM 245
 Corequisites: None

This course introduces leadership traits, styles, and the roles and responsibilities of successful hospitality leaders while developing the student's personal leadership skills. Topics include formal and informal hospitality leadership; defining effective and ineffective leadership behavior; and leadership organizational change and planning within the hospitality industry. Upon completion, students will be able to apply appropriate leadership actions in real-world situations ranging from local to global hospitality environments.

***HRM 280 Mgmt Problems – Hospitality** 3 0 3
 Prerequisites: ACC 120, CIS 110, COE 112, CUL 142, HRM 110, HRM 120, HRM 210, HRM 215, HRM 220, HRM 225, HRM 240, HRM 245
 Corequisites: HRM 135 or HRM 275

This course is designed to introduce students to timely issues within the hospitality industry and is intended to move students into a managerial mindset. Emphasis is placed on problem-solving skills using currently available resources. Upon completion, students should be able to demonstrate knowledge of how hospitality management principles may be applied to real challenges facing industry managers.

Human Services

***HSE 110 Introduction to Human Services** 2 2 0 3
 Prerequisites: None
 Corequisites: None

This course introduces the human services field, including the history, agencies, roles, and careers. Topics include personal/professional characteristics, diverse populations, community resources, disciplines in the field, systems, ethical standards, and major theoretical and treatment approaches. Upon completion, students should be able to identify the knowledge, skills, and roles of the human services worker. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

***HSE 112 Group Process I** 1 2 0 2
 Prerequisites: None
 Corequisites: None

This course introduces interpersonal concepts and group dynamics. Emphasis is placed on self-awareness facilitated by experiential learning in small groups with analysis of personal experiences and the behavior of others. Upon completion, students should be able to show competence in identifying and explaining how people are influenced by their interactions in group settings. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

HSE 123 Interviewing Techniques*2 2 0 3**

Prerequisites: None

Corequisites: None

This course covers the purpose, structure, focus, and techniques employed in effective interviewing. Emphasis is placed on observing, attending, listening, responding, recording, and summarizing of personal histories with instructor supervision. Upon completion, students should be able to perform the basic interviewing skills needed to function in the helping relationship. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

HSE 125 Counseling*2 2 0 3**

Prerequisites: None

Corequisites: None

This course covers the major approaches to psychotherapy and counseling, including theory, characteristics, and techniques. Emphasis is placed on facilitation of self-exploration, problem-solving, decision-making, and personal growth. Upon completion, students should be able to understand various theories of counseling and demonstrate counseling techniques. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

HSE 210 Human Services Issues*2 0 0 2**

Prerequisites: None

Corequisites: None

This course covers current issues and trends in the field of human services. Emphasis is placed on contemporary topics with relevance to special issues in a multifaceted field. Upon completion, students should be able to integrate the knowledge, skills, and experiences gained in classroom and clinical experiences with emerging trends in the field. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

HSE 220 Case Management*2 2 0 3**

Prerequisites: HSE 110

Corequisites: None

This course covers the variety of tasks associated with professional case management. Topics include treatment planning, needs assessment, referral procedures, and follow-up and integration of services. Upon completion, students should be able to effectively manage the care of the whole person from initial contact through termination of services. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

HSE 225 Crisis Intervention*3 0 0 3**

Prerequisites: None

Corequisites: None

This course introduces the basic theories and principles of crisis intervention. Emphasis is placed on identifying and demonstrating appropriate and differential techniques for intervening in various crisis situations. Upon completion, students should be able to assess crisis situations and respond appropriately. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

HSE 240 Issues in Client Services**3 0 0 3**

Prerequisites: None

Corequisites: None

This course introduces systems of professional standards, values, and issues in the helping professions. Topics include confidentiality, assessment of personal values, professional responsibilities, competencies, and ethics relative to multicultural counseling and research. Upon completion, students should be able to understand and discuss multiple ethical issues applicable to counseling and apply various decision-making models to current issues. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

HSE 242 Family Systems**3 0 0 3**

Prerequisites: PSY 150 or SOC 210

Corequisites: None

This course introduces the concepts of family structure as a system and includes the impact of contemporary society on the family. Topics include systems theory, family structure, blended families, divorce, adoption, and the elderly. Upon completion, students should be able to demonstrate an understanding of families as a system and the impact of change on family structure. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

Humanities**HUM 110 Technology and Society****3 0 3**

Prerequisites: None

Corequisites: None

This course considers technological change from historical, artistic, and philosophical perspectives and its effect on human needs and concerns. Emphasis is placed on the causes and consequences of technological change. Upon completion, students should be able to critically evaluate the implications of technology. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 115 Critical Thinking**3 0 3**

Prerequisites: ENG 095 or ENG 090 and RED 090

Corequisites: None

This course introduces the use of critical thinking skills in the context of human conflict. Emphasis is placed on evaluating information, problem solving, approaching cross-cultural perspectives, and resolving controversies and dilemmas. Upon completion, students should be able to demonstrate orally and in writing the use of critical thinking skills in the analysis of appropriate texts. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 121 The Nature of America**3 0 3**

Prerequisites: None

Corequisites: None

This course provides an interdisciplinary survey of the American cultural, social, and political experience. Emphasis is placed on the multicultural character of American society, distinctive qualities of various regions, and the American political system. Upon completion, students should be able to analyze significant cultural, social, and political aspects of American life. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 122 Southern Culture 3 0 3

Prerequisites: None

Corequisites: None

This course explores the major qualities that make the South a distinct region. Topics include music, politics, literature, art, religion, race relations, and the role of social class in historical and contemporary contexts. Upon completion, students should be able to identify the characteristics that distinguish Southern culture. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 123 Appalachian Culture 3 0 3

Prerequisites: None

Corequisites: None

This course provides an interdisciplinary study of the unique features of Appalachian culture. Topics include historical, political, sociological, psychological, and artistic features which distinguish this region. Upon completion, students should be able to demonstrate a broad-based awareness and appreciation of Appalachian culture. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

HUM 130 Myth in Human Culture 3 0 3

Prerequisites: None

Corequisites: None

This course provides an in-depth study of myths and legends. Topics include the varied sources of myths and their influence on the individual and society within diverse cultural contexts. Upon completion, students should be able to demonstrate a general familiarity with myths and a broad-based understanding of the influence of myths and legends on modern culture. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 150 American Women's Studies 3 0 3

Prerequisites: None

Corequisites: None

This course provides an inter-disciplinary study of the history, literature, and social roles of American women from Colonial times to the present. Emphasis is placed on women's roles as reflected in American language usage, education, law, the workplace, and mainstream culture. Upon completion, students should be able to identify and analyze the roles of women as reflected in various cultural forms. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 160 Introduction to Film 2 2 3

Prerequisites: None

Corequisites: None

This course introduces the fundamental elements of film artistry and production. Topics include film styles, history, and production techniques, as well as the social values reflected in film art. Attendance at five film showings and an in-depth written analysis of one film are required. Upon completion, students should be able to critically analyze the elements covered in relation to selected films. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 211 Humanities I 3 0 3

Prerequisites: ENG 111

Corequisites: None

This course introduces the humanities as a record in literature, music, art, history, religion, and philosophy of humankind's answers to the fundamental questions of existence. Emphasis is placed on the interconnectedness of various aspects of cultures from ancient through early modern times. Upon completion, students should be able to identify significant figures and cultural contributions of the periods studied. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 212 Humanities II 3 0 3

Prerequisites: ENG 111

Corequisites: None

This course introduces the humanities as a record in literature, music, art, history, religion, and philosophy of humankind's answers to the fundamental questions of existence. Emphasis is placed on the interconnectedness of various aspects of cultures from early modern times to the present. Upon completion, students should be able to identify significant figures and cultural contributions of the periods studied. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 220 Human Values and Meaning 3 0 3

Prerequisites: ENG 111

Corequisites: None

This course presents some major dimensions of human experience as reflected in art, music, literature, philosophy, and history. Topics include the search for identity, the quest for knowledge, the need for love, the individual and society, and the meaning of life. Upon completion, students should be able to recognize interdisciplinary connections and distinguish between open and closed questions and between narrative and scientific models of understanding. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

HUM 230 Leadership Development 3 0 3

Prerequisites: ENG 111

Corequisites: None

This course explores the theories and techniques of leadership and group process. Emphasis is placed on leadership styles, theories of group dynamics, and the moral and ethical responsibilities of leadership. Upon completion, students should be able to identify and analyze a personal philosophy and style of leadership and integrate these concepts in various practical situations. This course has been approved for transfer under the CAA as a pre-major and/or elective course requirement.

Hydraulics***HYD 110 Hydraulics/Pneumatics I 2 3 3**

Prerequisites: DMA 050 or placement

Corequisites: None

This course introduces the basic components and functions of hydraulic and pneumatic systems. Topics include standard symbols, pumps, control valves, control assemblies, actuators, FRL, maintenance procedures, and switching and control devices. Upon completion, students should be able to understand the operation of a fluid power system, including design, application, and troubleshooting.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

HYD 112 Hydraulics/Medium/Heavy Duty 1 2 2
 Prerequisites: None
 Corequisites: None

This course introduces hydraulic theory and applications as applied to mobile equipment. Topics include component studies such as pumps, motors, valves, cylinders, filters, reservoirs, lines, and fittings. Upon completion, students should be able to identify, diagnose, test, and repair hydraulic systems using schematics and technical manuals.

***HYD 210 Advanced Hydraulics** 1 3 2
 Prerequisites: Take One Course: HYD-110, HYD-111, or HYD-112
 Corequisites: None

This course covers advanced hydraulic systems. Emphasis is placed on advanced hydraulic systems and components, troubleshooting, and other related topics. Upon completion, students should be able to demonstrate an understanding of the installation, application, operation, and maintenance of hydraulic components and systems.

Industrial Science

***ISC 121 Environmental Health and Safety** 3 0 3
 Prerequisites: None
 Corequisites: None

This course covers workplace environmental health and safety concepts. Emphasis is placed on managing the implementation and enforcement of environmental health and safety regulations and on preventing accidents, injuries, and illnesses. Upon completion, students should be able to demonstrate an understanding of basic concepts of environmental health and safety.

***ISC 132 Mfg Quality Control** 2 3 3
 Prerequisites: None
 Corequisites: None

This course introduces quality concepts and techniques used in industry. Topics include elementary statistics and probability, process control, process capability, and quality improvement tools. Upon completion, students should be able to demonstrate an understanding of the concepts and principles of quality and apply them to the work environment. Proficiency using spreadsheet software required for success in this course.

***ISC 222 Project Planning/Control** 1 2 2
 Prerequisites: None
 Corequisites: None

This course covers how to plan, schedule and control projects typical in manufacturing and service industries. Topics include fundamental project management concepts and hands-on computer application experience with process flow charting and PERT/CPM project managers. Upon completion, students should be able to plan, schedule and control projects using state-of-the-art computer application programs.

***ISC 255 Engineering Economy** 2 2 3
 Prerequisite: DMA 040 or Placement, and EGR 125
 Corequisites: None

This course covers the process of economic evaluation of manufacturing industrial alternatives such as equipment selection, replacement studies, and cost reduction proposals. Topics include discounted cash flows, time value of money, income tax considerations, internal rates of return, and comparison of alternatives using computer programs. Upon completion, students should be able to analyze complex manufacturing alternatives based on engineering economy principles.

***ISC 278 cGMP Quality Systems** 2 0 2
 Prerequisites: None
 Corequisites: None

This course focuses on the development, implementation, and on-going maintenance of a quality system in a cGMP environment. Topics include the cGMP standard, components of cGMP quality systems, quality function roles and training, development of documentation such as SOPs, and system review procedures. Upon completion, the student should be able to identify the components of a quality system and develop a quality system manual utilizing the cGMP standard.

***ISC 279 Auditing for cGMP** 2 2 3
 Prerequisites: None
 Corequisites: None

This course provides basic knowledge in internal audit planning, implementation, and reporting utilizing cGMP as the standard. Topics include auditing basics and types, phases of the audit process, regulatory requirements, auditing tools, auditor qualifications and skills, and behaviors while being audited. Upon completion, students should be able to identify the components of an audit program, develop a plan based on cGMP standards, and demonstrate reporting techniques.

***ISC 280 Validation Fundamentals** 1 2 2
 Prerequisites: None
 Corequisites: None

This course covers the fundamental concepts and components of a validation program in a cGMP environment. Emphasis is placed on FDA requirements concerning validation, types of validation, documentation, procedures, and the QA role. Upon completion, students should be able to discuss the purpose of validation, identify the steps in the validation process and effectively utilize sample documentation.

Landscape Architecture

LAR 210 Prin of Landscape Arch 1 3 2
 Prerequisites: DFT 151
 Corequisites: None

This course introduces the overall principles of landscape design. Topics include principles of landscape design; installation, maintenance, and cost estimates; landscape plans, elevations, and sections; plant selection/lists; and other related topics. Upon completion, students should be able to prepare a simple set of landscape working drawings which are within accepted architectural standards.

LAR 230 Prin of Exterior Planting 3 3 4
 Prerequisites: None
 Corequisites: None

This course introduces the identification, selection, and installation of landscape plants. Topics include ornamental plant selection, sun and shade plants, fertilization, pruning, pest and disease control, and other related topics. Upon completion, students should be able to select plants for different landscape situations.

LAR 242 Planning and Environment 2 2 3
 Prerequisites: None
 Corequisites: None

This course covers the historical development of urban and rural environmental problems and issues. Emphasis is placed on governmental response to environmental issues, built and natural environments, historical conflicts, and attempts to produce planning compatibility. Upon completion, students should be able to demonstrate an understanding of the importance of considering natural resources when making political and planning decisions; and when designing buildings and landscapes.

Machining

MAC 111 Machining Technology I

2 12 6

Prerequisites: None

Corequisites: None

This course introduces machining operations as they relate to the metalworking industry. Topics include machine shop safety, measuring tools, lathes, drilling machines, saws, milling machines, bench grinders, and layout instruments. Upon completion, students should be able to safely perform the basic operations of measuring, layout, drilling, sawing, turning, and milling.

MAC 112 Machining Technology II

2 12 6

Prerequisites: MAC 111

Corequisites: None

This course provides additional instruction and practice in the use of precision measuring tools, lathes, milling machines, and grinders. Emphasis is placed on setup and operation of machine tools including the selection and use of work holding devices, speeds, feeds, cutting tools, and coolants. Upon completion, students should be able to perform basic procedures on precision grinders and advanced operations of measuring, layout, drilling, sawing, turning, and milling.

MAC 114 Intro to Metrology

2 0 2

Prerequisites: None

Corequisites: None

This course introduces the care and use of precision measuring instruments. Emphasis is placed on the inspection of machine parts and use of a wide variety of measuring instruments. Upon completion, students should be able to demonstrate the correct use of measuring instruments.

MAC 121 Introduction to CNC

2 0 2

Prerequisites: None

Corequisites: None

This course introduces the concepts and capabilities of computer numerical control machine tools. Topics include setup, operation, and basic applications. Students will learn computer skills necessary for machinists. Upon completion, students should be able to explain operator safety, machine protection, data input, program preparation, and program storage.

MAC 122 CNC Turning

1 3 2

Prerequisites: BPR 111

Corequisites: None

This course introduces the programming, setup, and operation of CNC turning centers. Topics include programming formats, control functions, program editing, part production, and inspection. Upon completion, students should be able to manufacture simple parts using CNC turning centers.

MAC 124 CNC Milling

1 3 2

Prerequisites: BPR 111

Corequisites: None

This course introduces the manual programming, setup, and operation of CNC machining centers. Topics include programming formats, control functions, program editing, part production, and inspection. Upon completion, students should be able to manufacture simple parts using CNC machining centers.

MAC 151 Machining Calculations

1 2 2

Prerequisites: None

Corequisites: None

This course introduces basic calculations as they relate to machining occupations. Emphasis is placed on basic calculations and their applications in the machine shop. Upon completion, students should be able to perform basic shop calculations.

MAC 152 Advanced Machining Calculations

1 2 2

Prerequisites: None

Corequisites: None

This course combines mathematical functions with practical machine shop applications and problems. Emphasis is placed on gear ratios, lead screws, indexing problems, and their applications in the machine shop. Upon completion, students should be able to calculate solutions to machining problems.

MAC 222 Advanced CNC Turning

1 3 2

Prerequisites: MAC 122

Corequisites: None

This course covers advanced methods in setup and operation of CNC turning centers. Emphasis is placed on programming and production of complex parts. Upon completion, students should be able to demonstrate skills in programming, operations, and setup of CNC turning centers.

MAC 224 Advanced CNC Milling

1 3 2

Prerequisites: MAC 124

Corequisites: None

This course covers advanced methods in setup and operation of CNC machining centers. Emphasis is placed on programming and production of complex parts. Upon completion, students should be able to demonstrate skills in programming, operations, and setup of CNC machining centers.

MAC 226 CNC EDM Machining

1 3 2

Prerequisites: None

Corequisites: None

This course introduces the programming, setup, and operation of CNC electrical discharge machines. Topics include programming formats, control functions, program editing, production of parts, and inspection. Upon completion, students should be able to manufacture simple parts using CNC electrical discharge machines.

MAC 228 Advanced CNC Processes

2 3 3

Prerequisites: None

Corequisites: None

This course covers advanced programming, setup, and operation of CNC turning centers and CNC milling centers. Topics include advanced programming formats, control functions, program editing, and part production and inspection. Upon completion, students should be able to manufacture complex parts using CNC turning and milling centers.

MAC 231 CAM: CNC Turning

1 4 3

Prerequisites: MAC 121 or MAC 122

Corequisites: None

This course introduces Computer Numerical Control graphics programming and concepts for turning center applications. Emphasis is placed on the interaction of menus to develop a shape file in a graphics CAM system and to develop tool path geometry and part geometry. Upon completion, students should be able to develop a job plan using CAM software, include machine selection, tool selection, operational sequence, speed, feed, and cutting depth.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

MAC 232 CAM: CNC Milling 1 4 3
 Prerequisites: None
 Corequisites: None
 This course introduces Computer Numerical Control graphics programming and concepts for machining center applications. Emphasis is placed on developing a shape file in a graphics CAM system and transferring coded information from CAM graphics to the CNC milling center. Upon completion, students should be able to develop a complete job plan using CAM software to create a multi-axis CNC program.

MAC 234 Adv Multi-Axis Machining 2 3 3
 Prerequisites: None
 Corequisites: None
 This course includes multi-axis machining using machining centers with multi-axis capabilities. Emphasis is placed on generation of machining center input with a CAM system and setup of pallet changer and rotary system for multi-axis machining fixtures. Upon completion, students should be able to convert CAD to output for multi-axis machining centers, including tooling, setup, and debugging processes.

MAC 241 Jigs and Fixtures I 2 6 4
 Prerequisites: MAC 112
 Corequisites: None
 This course introduces the application and use of jigs and fixtures. Emphasis is placed on design and manufacture of simple jigs and fixtures. Upon completion, students should be able to design and build simple jigs and fixtures.

MAC 245 Mold Construction I 2 6 4
 Prerequisites: MAC 112
 Corequisites: None
 This course introduces the principles of mold making. Topics include types, construction, and application of molds. Upon completion, students should be able to design and build simple molds.

MAC 247 Production Tooling 2 0 2
 Prerequisites: MAC 111
 Corequisites: None
 Available: Fall, Summer
 This course provides advanced study in tooling currently utilized in the production of metal parts. Emphasis is placed on the proper use of tooling used on CNC and other production machine tools. Upon completion, students should be able to choose proper tool grades based on manufacturing requirements and troubleshoot carbide tooling problems.

Mathematics

MAT 110 Mathematical Measurement 2 2 3
 Prerequisites: DMA 030 or placement, MAT 120, MAT 121, MAT 161, MAT 171, or MAT 175
 Corequisites: None
 This course provides an activity-based approach to utilizing, interpreting, and communicating data in a variety of measurement systems. Topics include accuracy, precision, conversion, and estimation within metric, apothecary, and avoirdupois systems; ratio and proportion; measures of central tendency and dispersion; and charting of data. Upon completion, students should be able to apply proper techniques to gathering, recording, manipulating, analyzing, and communicating data.

MAT 115 Mathematical Models 2 2 3
 Prerequisites: Select one: MAT 070, MAT 080, MAT 090, MAT 095, MAT 120, MAT 121, MAT 161, MAT 171, MAT 175
 Corequisites: None
 This course develops the ability to utilize mathematical skills and technology to solve problems at a level found in non-mathematics-intensive programs. Topics include applications to percent, ratio and proportion, formulas, statistics, functional notation, linear functions, probability, sampling techniques, scatter plots, and modeling. Upon completion, students should be able to solve practical problems, reason and communicate with mathematics, and work confidently, collaboratively, and independently.

MAT 121 Algebra/Trigonometry I 2 2 3
 Prerequisites: DMA 050 or placement
 Corequisites: None
 This course provides an integrated approach to technology and the skills required to manipulate, display, and interpret mathematical functions and formulas used in problem solving. Topics include simplification, evaluation, and solving of algebraic and radical functions; complex numbers; right triangle trigonometry; systems of equation; and the use of technology. Upon completion, students should be able to demonstrate an understanding of the use of mathematics and technology to solve problems and analyze and communicate results.

MAT 122 Algebra/Trigonometry II 2 2 3
 Prerequisites: Select one: MAT 121, MAT 161, MAT 171, MAT 175
 Corequisites: None
 This course extends the concepts covered in MAT 121 to include additional topics in algebra, function analysis, and trigonometry. Topics include exponential and logarithmic functions, translation and scaling of functions, Sine Law, Cosine Law, vectors, and statistics. Upon completion, students should be able to demonstrate an understanding of the use of technology to solve problems and to analyze and communicate results.

MAT 140 Survey of Mathematics 3 0 3
 Prerequisites: Select one: DMA 040 or placement, MAT 120, MAT 121, MAT 161, MAT 171, MAT 175
 Corequisites: None
 This course provides an introduction in a non-technical setting to selected topics in mathematics. Topics may include, but are not limited to, sets, logic, probability, statistics, matrices, mathematical systems, geometry, topology, mathematics of finance, and modeling. Upon completion, students should be able to understand a variety of mathematical applications, think logically, and be able to work collaboratively and independently. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

MAT 151 Statistics I 3 0 3
 Prerequisites: Select one: DMA 050 or placement, MAT 120, MAT 121, MAT 161, MAT 171, MAT 175
 Corequisites: MAT 151A
 This course provides a project-based approach to the study of basic probability, descriptive and inferential statistics, and decision making. Emphasis is placed on measures of central tendency and dispersion, correlation, regression, discrete and continuous probability distributions, quality control, population parameter estimation, and hypothesis testing. Upon completion, students should be able to describe important characteristics of a set of data and draw inferences about a population from sample data. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics (Quantitative option).

MAT 151A Statistics I Lab 0 2 1
 Prerequisites: Select one: DMA 050 or placement, MAT 120, MAT 121, MAT 161, MAT 171, MAT 175
 Corequisites: MAT 151

This course is a laboratory for MAT 151. Emphasis is placed on experiences that enhance the materials presented in the class. Upon completion, students should be able to solve problems, apply critical thinking, work in teams, and communicate effectively. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

MAT 161 College Algebra 3 0 3
 Prerequisites: DMA 080 or placement
 Corequisites: MAT 161A

This course provides an integrated technological approach to algebraic topics used in problem solving. Emphasis is placed on applications involving equations and inequalities; polynomials, rational, exponential and logarithmic functions; and graphing and data analysis/modeling. Upon completion, students should be able to choose an appropriate model to fit a data set and use the model for analysis and prediction. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics for the A.A. degree.

MAT 161A College Algebra Lab 0 2 1
 Prerequisites: DMA 080 or placement
 Corequisites: MAT 161

This course is a laboratory for MAT 161. Emphasis is placed on experiences that enhance the materials presented in the class. Upon completion, students should be able to solve problems, apply critical thinking, work in teams, and communicate effectively. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

MAT 167 Discrete Mathematics 3 0 3
 Prerequisites: Select one: MAT 121, MAT 161, MAT 171, MAT 280
 Corequisites: None

This course is a study of discrete mathematics with emphasis on applications. Topics include number systems, combinations/permutations, mathematical logic/proofs, sets/counting, Boolean algebra, mathematical induction, trees/graphs, and algorithms. Upon completion, students should be able to demonstrate competence in the topics covered. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

MAT 171 Precalculus Algebra 3 0 3
 Prerequisites: Select one: DMA 080, MAT 161 or placement
 Corequisites: MAT 171A

This is the first of two courses designed to emphasize topics which are fundamental to the study of calculus. Emphasis is placed on equations and inequalities, functions (linear, polynomial, rational), systems of equations and inequalities, and parametric equations. Upon completion, students should be able to solve practical problems and use appropriate models for analysis and predictions. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

MAT 171A Precalculus Algebra Lab 0 2 1
 Prerequisites: Select one: DMA 080, MAT 161 or placement
 Corequisites: MAT 171

This course is a laboratory for MAT 171. Emphasis is placed on experiences that enhance the materials presented in the class. Upon completion, students should be able to solve problems, apply critical thinking, work in teams, and communicate effectively. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

MAT 172 Precalculus Trigonometry 3 0 3
 Prerequisites: MAT 171
 Corequisites: MAT 172A

This is the second of two courses designed to emphasize topics which are fundamental to the study of calculus. Emphasis is placed on properties and applications of transcendental functions and their graphs, right and oblique triangle trigonometry, conic sections, vectors, and polar coordinates. Upon completion, students should be able to solve practical problems and use appropriate models for analysis and prediction. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

MAT 172A Precalculus Trigonometry Lab 0 2 1
 Prerequisites: MAT 171
 Corequisites: MAT 172

This course is a laboratory for MAT 172. Emphasis is placed on experiences that enhance the materials presented in the class. Upon completion, students should be able to solve problems, apply critical thinking, work in teams, and communicate effectively. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

MAT 175 Precalculus 4 0 4
 Prerequisites: Select one: MAT 161 or placement
 Corequisites: None

This course provides an intense study of the topics which are fundamental to the study of calculus. Emphasis is placed on functions and their graphs with special attention to polynomial, rational, exponential, logarithmic and trigonometric functions, and analytic trigonometry. Upon completion, students should be able to solve practical problems and use appropriate models for analysis and prediction. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

MAT 271 Calculus I 3 2 4
 Prerequisites: MAT 172 or MAT 175
 Corequisites: None

This course covers in depth the differential calculus portion of a three-course calculus sequence. Topics include limits, continuity, derivatives, and integrals of algebraic and transcendental functions of one variable, with applications. Upon completion, students should be able to apply differentiation and integration techniques to algebraic and transcendental functions. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | | |
|---|--------------|---|--------------|
| MAT 272 Calculus II | 3 2 4 | *MEC 111 Machine Processes I | 1 4 3 |
| Prerequisites: MAT 271 | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course provides a rigorous treatment of integration and is the second calculus course in a three-course sequence. Topics include applications of definite integrals, techniques of integration, indeterminate forms, improper integrals, infinite series, conic sections, parametric equations, polar coordinates, and differential equations. Upon completion, students should be able to use integration and approximation techniques to solve application problems. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics. | | This course introduces shop safety, hand tools, machine processes, measuring instruments, and the operation of machine shop equipment. Topics include use and care of tools, safety, measuring tools, and the basic setup and operation of common machine tools. Upon completion, students should be able to safely machine simple parts to specified tolerances. | |
| MAT 273 Calculus III | 3 2 4 | *MEC 155 Env Benign Manufacturing | 2 2 3 |
| Prerequisites: MAT 272 | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course covers the calculus of several variables and is third calculus course in a three-course sequence. Topics include functions of several variables, partial derivatives, multiple integrals, solid analytical geometry, vector-valued functions, and line and surface integrals. Upon completion, students should be able to solve problems involving vectors and functions of several variables. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics. | | This course introduces environmental issues involving the generation and management of hazardous materials and wastes in manufacturing operations. Topics include the analysis of manufacturing trends, pollution minimization strategies, and the advantages of incorporating a sustainable approach to manufacturing. Upon completion, students should be able to discuss analysis and modification of industrial processes in manufacturing facilities toward a sustainable end. | |
| MAT 280 Linear Algebra | 3 0 3 | *MEC 161 Manufacturing Processes I | 3 0 3 |
| Prerequisites: MAT 271 | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course provides a study of linear algebra topics with emphasis on the development of both abstract concepts and applications. Topics include vectors, systems of equations, matrices, determinants, vector spaces, linear transformations in two or three dimensions, eigenvectors, eigenvalues, diagonalization and orthogonality. Upon completion, students should be able to demonstrate both an understanding of the theoretical concepts and appropriate use of linear algebra models to solve application problems. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. | | This course provides the fundamental principles of value-added processing of materials into usable forms for the customer. Topics include material properties and traditional and non-traditional manufacturing processes. Upon completion, students should be able to specify appropriate manufacturing processing for common engineering materials. | |
| MAT 285 Differential Equations | 3 0 3 | *MEC 180 Engineering Materials | 2 3 3 |
| Prerequisites: MAT 272 | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course provides an introduction to ordinary differential equations with an emphasis on applications. Topics include first order, linear higher-order, and systems of differential equations; numerical methods; series solutions; eigenvalues and eigenvectors; Laplace transforms; and Fourier series. Upon completion, students should be able to use differential equations to model physical phenomena, solve the equations, and use the solutions to analyze the phenomena. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | | This course covers the physical and mechanical properties of materials. Topics include testing, heat treating, ferrous and non-ferrous metals, plastics, composites, and material selection. Upon completion, students should be able to specify basic tests and properties and select appropriate materials on the basis of specific properties. | |
| | | *MEC 181 Introduction to CIM | 2 0 2 |
| | | Prerequisites: None | |
| | | Corequisites: None | |
| | | This course introduces the elements of computer-integrated manufacturing (CIM). Topics include statistical process control, computer-aided design and manufacturing, numeric control, and flexible systems. Upon completion, students should be able to explain the major components of computer-integrated manufacturing. | |
| | | *MEC 231 Computer-Aided Manufacturing I | 1 4 3 |
| | | Prerequisites: None | |
| | | Corequisites: None | |
| | | This course introduces computer-aided manufacturing (CAM) applications and concepts. Emphasis is placed on developing/defining part geometry and the processing information needed to manufacture parts. Upon completion, students should be able to demonstrate skills in defining part geometry, program development, and code generation using CAM software. | |
| | | *MEC 232 Computer-Aided Manufacturing II | 1 4 3 |
| | | Prerequisites: MEC 231 | |
| | | Corequisites: None | |
| | | This course provides an in-depth study of CAM applications and concepts. Emphasis is placed on the manufacturing of complex parts using computer-aided manufacturing software. Upon completion, students should be able to manufacture complex parts using CAM software. | |

Mechanical

| | |
|---|--------------|
| MEC 110 Introduction to CAD/CAM | 1 2 2 |
| Prerequisites: None | |
| Corequisites: None | |
| This course introduces CAD/CAM. Emphasis is placed on transferring part geometry from CAD to CAM for the development of a CNC-ready program. Upon completion, students should be able to use CAD/CAM software to produce a CNC program. | |

***MEC 260 Fundamentals of Machine Design** 2 3 3
 Prerequisites: CIV 110
 Corequisites: None
 This course introduces the fundamental principles of machine design. Topics include simple analysis of forces, moments, stresses, strains, friction, kinematics, and other considerations for designing machine elements. Upon completion, students should be able to analyze machine components and make component selections from manufacturers' catalogs.

Medical Assisting

MED 110 Orientation to Med Assist 1 0 0 1
 Prerequisites: None
 Corequisites: None
 This course covers the history of medicine and the role of the medical assistant in the health care setting. Emphasis is placed on professionalism, communication, attitude, behaviors, and duties in the medical environment. Upon completion, students should be able to project a positive attitude and promote the profession of medical assisting.

MED 118 Medical Law and Ethics 2 0 0 2
 Prerequisites: None
 Corequisites: None
 This course covers legal relationships of physicians and patients, contractual agreements, professional liability, malpractice, medical practice acts, informed, consent, and bioethical issues. Emphasis is placed on legal terms, professional attitudes, and the principles and basic concepts of ethics and laws involved in providing medical services. Upon completion, students should be able to meet the legal and ethical responsibilities of a multi-skilled health professional.

MED 120 Survey of Medical Terminology 2 0 0 2
 Prerequisites: None
 Corequisites: None
 This course introduces the vocabulary, abbreviations, and symbols used in the language of medicine. Emphasis is placed on building medical terms using prefixes, suffixes, and word roots. Upon completion, students should be able to pronounce, spell, and define accepted medical terms.

MED 121 Medical Terminology I 3 0 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces prefixes, suffixes, and word roots used in the language of medicine. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders.

MED 122 Medical Terminology II 3 0 0 3
 Prerequisites: MED 121
 Corequisites: None
 This course is the second in a series of medical terminology courses. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders.

MED 130 Admin Office Proc I 1 2 0 2
 Prerequisites: Enrollment in Medical Assisting program.
 Corequisites: None
 This course introduces medical office administrative procedures. Topics include appointment processing, written and oral communications, medical records, patient orientation, and safety. Upon completion, students should be able to perform basic administrative skills within the medical environment.

MED 131 Admin Office Proc II 1 2 0 2
 Prerequisites: MED 130
 Corequisites: None
 This course provides medical office procedures in both economic and management skills. Topics include physical plant maintenance, equipment and supplies, liability coverage, medical economics, and introductory insurance procedures. Upon completion, students should be able to manage the economics of the medical office and supervise personnel.

MED 138 Infection/Hazard Control 2 0 0 2
 Prerequisites: None
 Corequisites: None
 This course introduces the student to infection and hazard control procedures necessary for the healthcare worker. Topics include introduction to microbiology, practical infection control, sterilization and monitoring, chemical disinfectants, aseptic technique, infectious diseases, OSH standards, and applicable North Carolina laws. Upon completion, students should be able to: understand infectious diseases, disease transmission, infection control procedures, biohazard management, OSHA standards, and applicable North Carolina laws.

MED 140 Exam Room Procedures I 3 4 0 5
 Prerequisites: Enrollment in the Medical Assisting program, MED 110, MED 138
 Corequisites: None
 This course provides instruction in clinical examining room procedures. Topics include asepsis, infection control, assisting with exams and treatment, patient education, preparation and administration of medications, EKG, vital signs, and medical emergencies. Upon completion, students should be able to demonstrate competence in exam room procedures.

MED 150 Laboratory Procedures I 3 4 0 5
 Prerequisites: Enrollment in the Medical Assisting program, MED 122, MED 138
 Corequisites: None
 This course provides instruction in basic lab techniques used by the medical assistant. Topics include lab safety, quality control, collecting and processing specimens, performing selective tests, phlebotomy, screening and follow-up of test results, and OSHA/CLIA regulations. Upon completion, students should be able to perform basic lab tests/skills based on course topics.

MED 240 Exam Room Procedures II 3 4 0 5
 Prerequisites: MED 140
 Corequisites: None
 This course is designed to expand and build upon skills presented in MED 140. Emphasis is placed on advanced exam room procedures. Upon completion, students should be able to demonstrate enhanced competence in selected exam room procedures.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

MED 260 MED Clinical Externship 0 1 5 5
Prerequisites: MED 150 and MED 240
Corequisites: None

This course provides the opportunity to apply clinical, laboratory, and administrative skills in a medical facility. Emphasis is placed on enhancing competence in clinical and administrative skills necessary for comprehensive patient care and strengthening professional communications and interactions. Upon completion, students should be able to function as an entry-level health care professional.

MED 262 Clinical Perspectives 1 0 0 1
Prerequisites: None
Corequisites: MED 260

This course is designed to explore personal and occupational responsibilities of the practicing medical assistant. Emphasis is placed on problems encountered during externships and development of problem-solving skills. Upon completion, students should be able to demonstrate courteous and diplomatic behavior when solving problems in the medical facility.

MED 264 Med Assisting Overview 2 0 0 2
Prerequisites: None
Corequisites: None

This course provides an overview of the complete medical assisting curriculum. Emphasis is placed on all facets of medical assisting pertinent to administrative, laboratory, and clinical procedures performed in the medical environment. Upon completion, students should be able to demonstrate competence in the areas covered on the national certification examination for medical assistants.

MED 270 Symptomatology 2 2 0 3
Prerequisites: None
Corequisites: MED 131 and MED 140

This course covers the study of disease symptoms and the appropriate actions taken by medical assistants in a medical facility in relation to these symptoms. Emphasis is placed on interviewing skills and appropriate triage, preparing patients for procedures, and screening test results. Upon completion, students should be able to recognize how certain symptoms relate to specific diseases, recognize emergency situations, and take appropriate actions.

MED 272 Drug Therapy 3 0 0 3
Prerequisites: MED 131 and MED 140
Corequisites: None

This course focuses on major drug groups, including their side effects, interactions, methods of administration, and proper documentation. Emphasis is placed on the theory of drug administration. Upon completion, students should be able to identify, spell, recognize side effects of, and document the most commonly used medications in a physician's office.

MED 274 Diet Therapy/Nutrition 3 0 0 3
Prerequisites: Enrollment in the Medical Assisting program
Corequisites: None

This course introduces the basic principles of nutrition as they relate to health and disease. Topics include basic nutrients, physiology, dietary deficiencies, weight management, and therapeutic nutrition in wellness and disease. Upon completion, students should be able to interpret clinical and dietary data and provide patient counseling and education.

MED 276 Patient Education 1 2 0 2
Prerequisites: MED 150 and MED 240
Corequisites: None

This course is designed to provide communication skills, basic education principles, and knowledge of available community resources and to apply this knowledge to the clinical setting. Emphasis is placed on identifying appropriate community resources, developing patient education materials, and perfecting written and oral communication skills. Upon completion, students should be able to instruct, communicate effectively, and act as a liaison between the patient and community agencies.

Mental Health

MHA 238 Psychopathology 3 0 0 3
Prerequisites: PSY 281
Corequisites: None

This course examines the development and use of the DSM/ICD in the mental health setting to establish a common language. Emphasis is placed on history, terminology, and assessment practices associated with the DSMIV/ICD in the treatment of psychological disorders. Upon completion, students should be able to explain the core vocabulary of treatment approaches and their applications. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

Marketing and Retailing

MKT 120 Principles of Marketing 3 0 3
Prerequisites: None
Corequisites: None

This course introduces principles and problems of marketing goods and services. Topics include promotion, placement, and pricing strategies for products. Upon completion, students should be able to apply marketing principles in organizational decision making.

MKT 121 Retailing 3 0 3
Prerequisites: None
Corequisites: None

This course examines the role of retailing in the economy. Topics include the development of present retail structure, functions performed, effective operations, and managerial problems resulting from current economic and social trends. Upon completion, students should be able to demonstrate an understanding of the basic principles of retailing.

MKT 122 Visual Merchandising 3 0 3
Prerequisites: None
Corequisites: None

This course introduces basic layout design and commercial display in retail and service organizations. Topics include an analysis of display as a visual merchandising medium and an examination of the principles and applications of display and design. Upon completion, students should be able to plan, build, and evaluate designs and displays. This course is a unique concentration requirement of the Marketing and Retailing concentration in the Business Administration program.

MKT 123 Fundamentals of Selling 3 0 3
Prerequisites: None
Corequisites: None

This course is designed to emphasize the necessity of selling skills in a modern business environment. Emphasis is placed on sales techniques involved in various types of selling situations. Upon completion, students should be able to demonstrate an understanding of the techniques covered.

MKT 220 Advertising and Sales Promotion**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the elements of advertising and sales promotion in the business environment. Topics include advertising and sales promotion appeals, selection of media, use of advertising and sales promotion as a marketing tool, and means of testing effectiveness. Upon completion, students should be able to demonstrate an understanding of the concepts covered through application.

MKT 221 Consumer Behavior**3 0 3**

Prerequisites: None

Corequisites: None

This course is designed to describe consumer behavior as applied to the exchange processes involved in acquiring, consuming, and disposing of goods and services. Topics include an analysis of basic and environmental determinants of consumer behavior with emphasis on the decision-making process. Upon completion, students should be able to analyze concepts related to the study of the individual consumer.

MKT 224 International Marketing**3 0 3**

Prerequisites: None

Corequisites: None

This course covers the basic concepts of international marketing activity and theory. Topics include product promotion, placement, and pricing strategies in the international marketing environment. Upon completion, students should be able to demonstrate a basic understanding of the concepts covered.

MKT 225 Marketing Research**3 0 3**

Prerequisites: MKT 120

Corequisites: None

This course provides information for decision making by providing guidance in developing, analyzing, and using data. Emphasis is placed on marketing research as a tool in decision making. Upon completion, students should be able to design and conduct a marketing research project and interpret the results. This course is a unique concentration requirement of the Marketing and Retailing concentration in the Business Administration program.

MKT 227 Marketing Applications**3 0 3**

Prerequisites: MKT 120 and MKT 123

Corequisites: None

This course extends the study of diverse marketing strategies. Emphasis is placed on case studies and small group projects involving research or planning. Upon completion, students should be able to effectively participate in the formulation of a marketing strategy. This course is a unique concentration requirement of the Marketing and Retailing concentration in the Business Administration program.

MKT 229 Special Events Production**2 0 2**

Prerequisites: None

Corequisites: None

This course introduces the different objectives of various special events and the procedures and elements necessary for successful promotional activity. Emphasis is placed on planning, budgeting, promoting, and coordinating activities. Upon completion, students should be able to utilize the elements studied in the production of special events.

Medical Laboratory Technology**MLT 110 Introduction to MLT****2 3 0 3**

Prerequisites: Enrollment in the Medical Laboratory Technology program

Corequisites: None

This course is designed to introduce all aspects of the medical laboratory profession. Topics include health care/laboratory organization, professional ethics, basic laboratory techniques, safety, quality assurance, and specimen collection. Upon completion, students should be able to demonstrate a basic understanding of laboratory operations and be able to perform basic laboratory skills.

MLT 111 Urinalysis & Body Fluids**1 3 0 2**

Prerequisites: Enrollment in the Medical Laboratory Technology program, MLT 110

Corequisites: BIO 163

This course introduces the laboratory analysis of urine and body fluids. Topics include physical, chemical, and microscopic examination of the urine and body fluids. Upon completion, students should be able to demonstrate theoretical comprehension in performing and interpreting urinalysis and body fluid tests.

MLT 120 Hematology/Hemostasis**3 3 0 4**

Prerequisites: Enrollment in the Medical Laboratory Technology program, MLT 110 and BIO 163

Corequisites: None

This course introduces the theory and technology used in analyzing blood cells and the study of hemostasis. Topics include hematology, hemostasis, and related laboratory testing. Upon completion, students should be able to demonstrate theoretical comprehension of hematology/hemostasis, perform diagnostic techniques, and correlate laboratory findings with disorders.

MLT 126 Immunology and Serology**1 2 0 2**

Prerequisites: Enrollment in the Medical Laboratory Technology program, MLT 110 and BIO 163

Corequisites: None

This course introduces the immune system and response and basic concepts of antigens, antibodies, and their reactions. Emphasis is placed on basic principles of immunologic and serodiagnostic techniques and concepts of cellular and humoral immunity in health and disease. Upon completion, students should be able to demonstrate theoretical comprehension and application in performing and interpreting routine immunologic and serodiagnostic procedures.

MLT 127 Transfusion Medicine**2 3 0 3**

Prerequisites: Enrollment in the Medical Laboratory Technology program and MLT 126

Corequisites: None

This course introduces the blood group systems and their applications in transfusion medicine. Emphasis is placed on blood bank techniques including blood grouping and typing, pre-transfusion testing, donor selection and processing, and blood component preparation and therapy. Upon completion, students should be able to demonstrate theoretical comprehension and application in performing/interpreting routine blood bank procedures and recognizing/resolving common problems.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | |
|---|-----------------|
| MLT 130 Clinical Chemistry | 3 3 0 4 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program, CHM 130, and CHM 130A Corequisites: None This course introduces the quantitative analysis of blood and body fluids and their variations in health and disease. Topics include clinical biochemistry, methodologies, instrumentation, and quality control. Upon completion, students should be able to demonstrate theoretical comprehension of clinical chemistry, perform diagnostic techniques, and correlate laboratory findings with disorders. | |
| MLT 140 Introduction to Microbiology | 2 3 0 3 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program Corequisites: None This course is designed to introduce basic techniques and safety procedures in clinical microbiology. Emphasis is placed on the morphology and identification of common pathogenic organisms, aseptic technique, staining techniques, and usage of common media. Upon completion, students should be able to demonstrate theoretical comprehension in performing and interpreting basic clinical microbiology procedures. | |
| MLT 215 Professional Issues | 1 0 0 1 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program Corequisites: None This course surveys professional issues in preparation for career entry. Emphasis is placed on work readiness and theoretical concepts in microbiology, immunohematology, hematology, and clinical chemistry. Upon completion, students should be able to demonstrate competence in career entry-level areas and be prepared for the national certification examination. | |
| MLT 240 Special Clinic Microbiology | 2 3 0 3 |
| Prerequisites: MLT 140 Corequisites: None This course is designed to introduce special techniques in clinical microbiology. Emphasis is placed on advanced areas in microbiology. Upon completion, students should be able to demonstrate theoretical comprehension in performing and interpreting specialized clinical microbiology procedures. | |
| *MLT 252 MLT Practicum I** | 0 0 6 2 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program, MLT 120, MLT 126, MLT 130, MLT 240, BIO 163, CHM 130, and CHM 130A Corequisites: MLT 111 and MLT 127 This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. Concentration will be in the area of Phlebotomy. | |
| *MLT 254 MLT Practicum I** | 0 0 12 4 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program and MLT 252 Corequisites: None This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. Concentration will be in the area of blood banking. | |
| *MLT 255 MLT Practicum I** | 0 0 15 5 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program and MLT 252 Corequisites: None This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. Concentration will be in the area of microbiology. | |

| | |
|---|-----------------|
| *MLT 261 MLT Practicum II** | 0 0 3 1 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program and MLT 252 Corequisites: None This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. Concentration will be in the area of donors and component therapy. | |
| *MLT 265 MLT Practicum II** | 0 0 15 5 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program and MLT 252 Corequisites: None This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. Concentration will be in the area of hematology. | |
| *MLT 275 MLT Practicum III** | 0 0 15 5 |
| Prerequisites: Enrollment in the Medical Laboratory Technology program and MLT 252 Corequisites: None This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. Concentration will be in the area of clinical chemistry. ** MLT 252, 254, 255, 261, 265, 275 Because of clinical space restrictions, students will have individual schedules for MLT Practicums. Students will register for these courses as assigned by the department chairperson. During each student's first clinical experience course, general hospital orientation will be covered. | |

Maintenance

| | |
|--|--------------|
| *MNT 110 Intro to Maint Procedures | 1 3 2 |
| Prerequisites: None Corequisites: None This course covers basic maintenance fundamentals for power transmission equipment. Topics include equipment inspection, lubrication, alignment, and other scheduled maintenance procedures. Upon completion, students should be able to demonstrate knowledge of accepted maintenance procedures and practices according to current industry standards. | |
| *MNT 111 Maintenance Practices | 2 2 3 |
| Prerequisites: None Corequisites: None This course provides in-depth theory and practical applications relating to predictive and preventive maintenance programs. Emphasis is placed on equipment failure analysis, maintenance management software, and techniques such as vibration and infrared analysis. Upon completion, students should be able to demonstrate an understanding of modern analytical and documentation methods. | |
| *MNT 120 Industrial Wiring Methods | 1 3 2 |
| Prerequisite: None Corequisites: None This course is designed to prepare the student to install wiring systems in accordance with the NEC and industry practices. Emphasis is placed on the use and installation of raceways, conductors, enclosures, and other devices typically used in industry. Upon completion, students should be able to safely install simple industrial branch and feeder circuits. | |

Therapeutic Massage

MTH 110 Fundamentals of Massage

6 9 3 10

Prerequisites: None

Corequisites: None

This course introduces concepts basic to the role of the massage therapist in a variety of clinical settings. Emphasis is placed on beginning theory and techniques of body work as well as skill in therapeutic touch. Upon completion of the course, the student should be able to apply basic practical massage therapy skills.

MTH 120 Therapeutic Massage Applications

6 9 3 10

Prerequisites: MTH 110

Corequisites: None

This course provides an expanded knowledge and skill base for the massage therapist in a variety of clinical settings. Emphasis is placed on selected therapeutic approaches throughout the lifespan. Upon completion, students should be able to perform entry level therapeutic massage on various populations.

MTH 121 Clinical Supplement I

0 0 3 1

Prerequisites: None

Corequisites: MTH 110, MTH 120, MTH 125, MTH 210 or MTH 220

This course is designed to introduce the student to a variety of clinical experiences. Emphasis is placed on applying the therapeutic massage process across the lifespan. Upon completion, students should be able to demonstrate delivery of massage techniques in a clinical setting.

MTH 125 Ethics of Massage

2 0 0 2

Prerequisites: None

Corequisites: None

This course is designed to explore issues related to the practice of massage therapy. Emphasis is placed on ethical, legal, professional, and political issues. Upon completion students should be able to discuss issues relating to the practice of massage therapy, client/therapist relationships as well as ethical issues.

MTH 210 Advanced Skills of Massage

4 9 3 8

Prerequisites: MTH 120 or MTH 121

Corequisites: None

This course provides knowledge and skills in diverse body work modalities in a variety of clinical settings. Emphasis is placed on selected techniques such as Neuromuscular Therapy, Sports Massage, Soft Tissue Release, Spa Approaches, Oriental Therapies, and energy techniques. Upon completion, students should be able to perform basic skills in techniques covered.

MTH 220 Outcome-Based Massage

4 6 3 7

Prerequisites: MTH 120, MTH 121, or MTH 221

Corequisites: None

This course provides knowledge and skills in more complex body works modalities in a variety of clinical settings. Emphasis is placed on developing advanced skills in outcome-based Massage. Upon completion, students should be able to perform basic skills in techniques covered.

MTH 221 Clinical Supplement II

0 0 6 2

Prerequisites: MTH 110

Corequisites: MTH 120, MTH 125, MTH 210, or MTH 220

This course is designed to be offered as an advanced clinical experience. Emphasis is placed on applying an advanced therapeutic massage process across the lifespan. Upon completion, students should be able to demonstrate delivery of massage at an advanced level in a clinical setting.

Music

MUS 110 Music Appreciation

3 0 3

Prerequisites: None

Corequisites: None

This course is a basic survey of the music of the Western world. Emphasis is placed on the elements of music, terminology, composers, form, and style within a historical perspective. Upon completion, students should be able to demonstrate skills in basic listening and understanding of the art of music. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

MUS 112 Introduction to Jazz

3 0 3

Prerequisites: None

Corequisites: None

This course introduces the origins and musical components of jazz and the contributions of its major artists. Emphasis is placed on the development of discriminating listening habits, as well as the investigation of the styles and structural forms of the jazz idiom. Upon completion, students should be able to demonstrate skills in listening and understanding this form of American music. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts

MUS 113 American Music

3 0 3

Prerequisites: None

Corequisites: None

This course introduces various musical styles, influences, and composers of the United States from pre-Colonial times to the present. Emphasis is placed on the broad variety of music particular to American culture. Upon completion, students should be able to demonstrate skills in basic listening and understanding of American music. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

MUS 114 Non-Western Music

3 0 3

Prerequisites: None

Corequisites: None

This course provides a basic survey of the music of the non-Western world. Emphasis is placed on nontraditional instruments, sources, and performing practices. Upon completion, students should be able to demonstrate skills in basic listening and understanding of the art of non-Western music. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

MUS 121 Music Theory I

3 2 4

Prerequisites: None

Corequisites: None

This course provides an in-depth introduction to melody, rhythm, and harmony. Emphasis is placed on fundamental melodic, rhythmic, and harmonic analysis, introduction to part writing, ear-training, and sight-singing. Upon completion, students should be able to demonstrate proficiency in the recognition and application of the above. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

MUS 122 Music Theory II 3 2 4
 Prerequisites: MUS 121
 Corequisites: None
 This course is a continuation of studies begun in MUS 121. Emphasis is placed on advanced melodic, rhythmic, and harmonic analysis and continued studies in part-writing, ear-training, and sight-singing. Upon completion, students should be able to demonstrate proficiency in the recognition and application of the above. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

MUS 131 Chorus I 0 2 1
 Prerequisites: None
 Corequisites: None
 This course provides an opportunity to gain experience singing in a chorus. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

MUS 132 Chorus II 0 2 1
 Prerequisites: MUS 131
 Corequisites: None
 This course provides a continuation of studies begun in MUS 131. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

MUS 210 History of Rock Music 3 0 3
 Prerequisites: None
 Corequisites: None
 This course is a survey of Rock music from the early 1950's to the present. Emphasis is placed on musical groups, soloists, and styles related to the evolution of this idiom and on related historical and social events. Upon completion, students should be able to identify specific styles and to explain the influence of selected performers within their respective eras. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

MUS 231 Chorus III 0 2 1
 Prerequisites: MUS 132
 Corequisites: None
 This course is a continuation of MUS 132. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

MUS 232 Chorus IV 0 2 1
 Prerequisites: MUS 231
 Corequisites: None
 This course is a continuation of MUS 231. Emphasis is placed on vocal techniques and the study of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

Networking Technology

NET 110 Networking Concepts 2 2 3
 Prerequisites: None
 Corequisites: None
 This course introduces students to the networking field. Topics include network terminology and protocols, local-area networks, wide-area networks, OSI model, cabling, router programming, Ethernet, IP addressing, and network standards. Upon completion, students should be able to perform tasks related to networking mathematics, terminology, and models, media, Ethernet, subnetting, and TCP/IP Protocols. This course is also available through the Virtual Learning Community (VLC).

NET 125 Networking Basics 1 4 3
 Prerequisites: None
 Corequisites: None
 This course introduces the networking field. Emphasis is placed on network terminology and protocols, local-area networks, wide-area networks, OSI model, cabling, router programming, Ethernet, IP addressing, and network standards. Upon completion, students should be able to perform tasks related to networking mathematics, terminology, and models, media, Ethernet, subnetting, and TCP/IP Protocols. This is the first course in the Cisco Networking Academy's CCNA sequence and this course has been certified by the National Security Agency, National Information Assurance Education and Training Program as meeting NSTISSI No. 4011, National Training Standard for Information Systems Security (INFOSEC) Professionals and CNSSI No. 4013 Entry Level System Administrators (SA).

NET 126 Routing Basics 1 4 3
 Prerequisites: NET 125
 Corequisites: None
 This course focuses on initial router configuration, router software management, routing protocol configuration, TCP/IP, and access control lists (ACLs). Emphasis will be placed on the fundamentals of router configuration, managing router software, routing protocol, and access lists. Upon completion, students should have an understanding of routers and their role in WANs, router configuration, routing protocols, TCP/IP, troubleshooting, and ACLs. This is the second course in the Cisco Networking Academy's CCNA sequence.

NET 175 Wireless Technology 2 2 3
 Prerequisites: NET 110 or NET 125 and NET 126
 Corequisites: None
 This course introduces the student to wireless technology and interoperability with different communication protocols. Topics include Wireless Application Protocol (WAP), Wireless Mark-up language (WML), link manager, service discovery protocol, transport layer and frequency band. Upon completion, students should be able to discuss in written and oral form protocols and procedures required for different wireless applications.

NET 225 Routing and Switching I**1 4 3**

Prerequisites: NET 126

Corequisites: None

This course focuses on advanced IP addressing techniques, intermediate routing protocols, command-line interface configuration of switches, Ethernet switching, VLANs, STP, and VTP. Emphasis will be placed on application and demonstration of skills acquired in pre-requisite courses. Upon completion, students should be able to perform tasks related to VLSM, routing protocols, switching concepts and configuration, STP, VLANs, and VTP. This is the third course in the Cisco Networking Academy's CCNA sequence.

NET 226 Routing and Switching II**1 4 3**

Prerequisites: NET 225

Corequisites: None

This course introduces WAN theory and design, WAN technology, PPP, Frame Relay, ISDN, and additional case studies. Topics include network congestion problems, TCP/IP transport and network layer protocols, advanced routing and switching configuration, ISDN protocols, PPP encapsulation operations on a router. Upon completion, students should be able to provide solutions for network routing problems, identify ISDN protocols, and describe the Spanning Tree protocol. This is the fourth course in the Cisco Networking Academy's CCNA sequence.

NET 289 Networking Project**1 4 3**

Prerequisites: NOS 220 and NOS 230

Corequisites: NET 226

This course provides an opportunity to complete a significant networking project from the design phase through implementation with minimal instructor support. Emphasis is placed on project definition, documentation, installation, testing, presentation, and training. Upon completion, students should be able to complete a project from the definition phase through implementation.

Networking Operating Systems**NOS 110 Operating Systems Concepts****2 3 3**

Prerequisites: None

Corequisites: None

This course introduces students to a broad range of operating system concepts, including installation and maintenance. Emphasis is placed on operating system concepts, management, maintenance, and resources required. Upon completion of this course, students will have an understanding of OS concepts, installation, management, maintenance, using a variety of operating systems. The course will include file management and simple user creation under at least two operating systems.

NOS 120 Linux/UNIX Single User**2 2 3**

Prerequisites: NOS 110

Corequisites: None

This course develops the necessary skills for students to develop both GUI and command line skills for using and customizing a Linux workstation. Topics include Linux file system and access permissions, GNOME Interface, VI editor, X Window System expression pattern matching, I/O redirection, network and printing utilities. Upon completion, students should be able to customize and use Linux systems for command line requirements and desktop productivity roles.

NOS 130 Windows Single User**2 2 3**

Prerequisites: NOS 110

Corequisites: None

This course introduces operating system concepts for single-user systems. Topics include hardware management, file and memory management, system configuration/optimization, and utilities. Upon completion, students should be able to perform operating systems functions at the support level in a single-user environment.

NOS 220 Linux/UNIX Admin I**2 2 3**

Prerequisites: NOS 120

Corequisites: None

This course introduces the Linux file system, group administration, and system hardware controls. Topics include installation, creation and maintaining file systems, NIS client and DHCP client configuration, NFS, SMB/Samba, Configure X, Gnome, KDE, basic memory, processes, and security. Upon completion, students should be able to perform system administration tasks including installation, configuring and attaching a new Linux workstation to an existing network.

NOS 230 Windows Admin I**2 2 3**

Prerequisites: NOS 130

Corequisites: None

This course covers the installation and administration of a Windows Server network operating system. Topics include managing and maintaining physical and logical devices, access to resources, the server environment, managing users, computers, and groups, and Managing/Implementing Disaster Recovery. Upon completion, students should be able to manage and maintain a Windows Server environment.

Nursing***NUR 101 Practical Nursing I****7 6 6 11**

Prerequisites: Admission into the Practical Nursing program

Corequisites: BIO 168 and PSY 150

This course introduces concepts as related to the practical nurse's care-giver and discipline-specific roles. Emphasis is placed on the nursing process, legal/ethical/professional issues, wellness/illness patterns, and basic nursing skills. Upon completion, students should be able to demonstrate beginning understanding of nursing process to promote/maintain/restore optimum health for diverse clients throughout the life span. This is a diploma-level course.

NUR 102 Practical Nursing II*8 0 12 12**

Prerequisites: BIO 168 and NUR 101

Corequisites: ENG 111 and BIO 169

This course includes more advanced concepts as related to the practical nurse's care-giver and discipline-specific roles. Emphasis is placed on the nursing process, delegation, cost effectiveness, legal/ethical/professional issues, and wellness/illness patterns. Upon completion, students should be able to begin participating in the nursing process to promote/maintain/restore optimum health for diverse clients throughout the life span. This is a diploma-level course.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

***NUR 103 Practical Nursing III 6 0 12 10**

Prerequisites: BIO 169, PSY 150, ENG 111, and NUR 102

Corequisites: None

This course focuses on use of nursing/related concepts by practical nurses as providers of care/members of discipline in collaboration with health team members. Emphasis is placed on the nursing process, wellness/illness patterns, entry level issues, accountability, advocacy, professional development, evolving technology, and changing health care delivery systems. Upon completion, students should be able to use the nursing process to promote/maintain/restore optimum health for diverse clients throughout the life span. This is a diploma-level course.

***NUR 111 Intro to Health Concepts 4 6 6 8**

Prerequisites: Admission into the Associate Degree Nursing Program

Corequisites: BIO 168

This course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including medication administration, assessment, nutrition, ethics, interdisciplinary teams, informatics, evidence-based practice, individual-centered care, and quality improvement. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

***NUR 112 Health-Illness Concepts 3 0 6 5**

Prerequisites: NUR 111, BIO 168

Corequisites: BIO 169

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of acid-base, metabolism, cellular regulation, oxygenation, infection, stress/coping, health-wellness-illness, communication, caring interventions, managing care, safety, quality improvement, and informatics. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

***NUR 113 Family Health Concepts 3 0 6 5**

Prerequisites: NUR 111, NUR 112, NUR 114, NUR 212, BIO 169

Corequisites: PSY 241

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of oxygenation, sexuality, reproduction, grief/loss, mood/affect, behaviors, development, family, health-wellness-illness, communication, caring interventions, managing care, safety, and advocacy. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

***NUR 114 Holistic Health Concepts 3 0 6 5**

Prerequisites: NUR 111, BIO 168

Corequisites: BIO 169

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of cellular regulation, perfusion, inflammation, sensory perception, stress/coping, mood/affect, cognition, self, violence, health-wellness-illness, professional behaviors, caring interventions, and safety. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

***NUR 211 Health Care Concepts 3 0 6 5**

Prerequisites: NUR 111, NUR 112, NUR 114, NUR 212, BIO 169

Corequisites: None

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of cellular regulation,

perfusion, infection, immunity, mobility, comfort, behaviors, health-wellness-illness, clinical decision-making, caring interventions, managing care, and safety. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

***NUR 212 Health System Concepts 3 0 6 5**

Prerequisites: NUR 111, NUR 112, NUR 114, BIO 169

Corequisites: None

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of grief/loss, violence, health-wellness-illness, collaboration, managing care, safety, advocacy, legal issues, policy, healthcare systems, ethics, accountability, and evidence-based practice. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

***NUR 213 Complex Health Concepts 4 3 15 10**

Prerequisites: NUR 111, NUR 112, NUR 113, NUR 114, NUR 211, and NUR 212

Corequisites: None

This course is designed to assimilate the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of fluid/electrolytes, metabolism, perfusion, mobility, stress/coping, violence, health-wellness-illness, professional behaviors, caring interventions, managing care, healthcare systems, and quality improvement. Upon completion, students should be able to demonstrate the knowledge, skills, and attitudes necessary to provide quality, individualized, entry level nursing care.

Office Administration**OST 131 Keyboarding 1 2 2**

Prerequisites: None

Corequisites: None

This course covers basic keyboarding skills. Emphasis is placed on the touch system, correct techniques, and development of speed and accuracy. Upon completion, students should be able to key at an acceptable speed and accuracy level using the touch system. Students should be able to complete timed writing competencies consisting of three timed writings at 25 nwm for three minutes with three or fewer errors and 160 keystrokes per minute for two minutes with two or less errors on the numeric keypad using the touch system.

OST 132 Keyboard Skill Building 1 2 2

Prerequisites: OST 134

Corequisites: None

This course is designed to increase speed and improve accuracy in keyboarding. Emphasis is placed on diagnostic tests to identify accuracy and speed deficiencies followed by corrective drills. Upon completion, students should be able to keyboard rhythmically with greater accuracy and speed. Students should be able to complete timed writing competencies consisting of three timed writings at 50 nwm for five minutes with five or fewer errors using the touch system.

OST 134 Text Entry and Formatting 2 2 3

Prerequisites: None

Corequisites: None

This course is designed to provide skills needed to increase speed, improve accuracy, and format documents. Topics include letters, memos, tables, and business reports. Upon completion, students should be able to produce documents and key timed writings at speeds commensurate with employability. Students should be able to complete timed writing competencies consisting of three timed writings at 40 nwm for five minutes with five or fewer errors using the touch system.

| | | | |
|--|--------------|--|--------------|
| OST 136 Word Processing | 2 2 3 | OST 164 Text Editing Applications | 3 0 3 |
| Prerequisites: None Corequisites: None This course is designed to introduce word processing concepts and applications. Topics include preparation of a variety of documents and mastery of specialized software functions. Upon completion, students should be able to work effectively in a computerized word processing environment. Upon course entrance, a keyboarding proficiency test requiring 25 gwam at 98 percent accuracy using the touch system will be administered. | | Prerequisites: None Corequisites: None This course provides a comprehensive study of editing skills needed in the workplace. Emphasis is placed on grammar, punctuation, sentence structure, proofreading, and editing. Upon completion, students should be able to use reference materials to compose and edit text. | |
| OST 137 Office Software Applications | 2 2 3 | OST 184 Records Management | 2 2 3 |
| Prerequisites: None Corequisites: None This course introduces the concepts and functions of software that meets the changing needs of the community. Emphasis is placed on the terminology and use of software through a hands-on approach. Upon completion, students should be able to use software in a business environment. | | Prerequisites: None Corequisites: None This course includes the creation, maintenance, protection, security, and disposition of records stored in a variety of media forms. Topics include alphabetic, geographic, subject, and numeric filing methods. Upon completion, students should be able to set up and maintain a records management system. | |
| OST 141 Med Terms I-Med Office | 3 0 3 | OST 201 Medical Transcription I | 3 2 4 |
| Prerequisites: None Corequisites: None This course uses a language-structure approach to present the terminology and vocabulary that will be encountered in medical office settings. Topics include word parts that relate to systemic components, conditions, pathology, and disorder remediation in approximately one-half of the systems of the human body. Upon completion, students should be able to relate words to systems, pluralize, define, pronounce, and construct sentences with the included terms. | | Prerequisites: OST 136 and OST 164 Corequisites: MED 122 or OST 142; and OST 164 This course introduces dictating equipment and typical medical dictation. Emphasis is placed on efficient use of equipment, dictionaries, PDRs, and other reference materials. Upon completion, students should be able to efficiently operate dictating equipment and to accurately transcribe a variety of medical documents in a specified time. | |
| OST 142 Med Terms II-Med Office | 3 0 3 | *OST 202 Medical Transcription II | 3 2 4 |
| Prerequisites: OST 141 Corequisites: None This course is a continuation of OST 141 and continues the study, using a language-structure approach, of medical office terminology and vocabulary. Topics include word parts that relate to systemic components, conditions, pathology, and disorder remediation in the remaining systems of the human body. Upon completion, students should be able to relate words to systems, pluralize, define, pronounce, and construct sentences with the included terms. | | Prerequisites: OST 201 Corequisites: None This course provides additional practice in transcribing documents from various medical specialties. Emphasis is placed on increasing transcription speed and accuracy and understanding medical procedures and terminology. Upon completion, students should be able to accurately transcribe a variety of medical documents in a specified time. | |
| OST 148 Med Coding Billing & Insu | 3 0 3 | OST 233 Office Publications Design | 2 2 3 |
| Prerequisites: CIS 110 and MED 121 or OST 141 Corequisites: None This course introduces fundamentals of medical coding, billing, and insurance. Emphasis is placed on the medical billing cycle to include third party payers, coding concepts, and form preparation. Upon completion, students should be able to explain the life cycle of and accurately complete a medical insurance claim. | | Prerequisites: OST 136 Corequisites: None This course provides entry-level skills in using software with desktop publishing capabilities. Topics include principles of page layout, desktop publishing terminology and applications, and legal and ethical considerations of software use. Upon completion, students should be able to design and produce professional business documents and publications. | |
| *OST 149 Medical Legal Issues | 3 0 3 | OST 243 Med Office Simulation | 2 2 3 |
| Prerequisites: None Corequisites: None This course introduces the complex legal, moral, and ethical issues involved in providing healthcare services. Emphasis is placed on the legal requirements of medical practices; the relationship of physician, patient, and office personnel; professional liabilities; and medical practice liability. Upon completion, students should be able to demonstrate a working knowledge of current medical law and accepted ethical behavior. | | Prerequisites: OST 148 Corequisites: None This course introduces medical systems used to process information in the automated office. Topics include traditional and electronic information resources, storing and retrieving information, and the billing cycle. Upon completion, students should be able to use the computer accurately to schedule, bill, update, and make corrections. | |
| | | OST 247 Procedure Coding | 1 2 2 |
| | | Prerequisites: MED 121 or OST 141 Corequisites: None This course provides in-depth coverage of procedural coding. Emphasis is placed on CPT and HCPCS coding systems. Upon completion, students should be able to properly code procedures and services performed in a medical facility. | |

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

OST 248 Diagnostic Coding 1 2 2
 Prerequisites: MED 121 or OST 141
 Corequisites: None
 This course provides an in-depth study of diagnostic coding. Emphasis is placed on ICD coding system. Upon completion, students should be able to properly code diagnoses in a medical facility.

***OST 286 Professional Development** 3 0 3
 Prerequisites: None
 Corequisites: None
 This course covers the personal competencies and qualities needed to project a professional image in the office. Topics include interpersonal skills, healthy life-styles, appearance, attitude, personal and professional growth, multicultural awareness, and professional etiquette. Upon completion, students should be able to demonstrate these attributes in the classroom, office, and society.

***OST 289 Administrative Office Mgt** 2 2 3
 Prerequisites: OST 136 and OST 164
 Corequisites: None
 This course is designed to be a capstone course for the office professional and provides a working knowledge of modern office procedures. Emphasis is placed on scheduling, telephone procedures, travel arrangements, event planning, office design, and ergonomics. Upon completion, students should be able to adapt in an office environment.

Phlebotomy

***PBT 100 Phlebotomy Technology** 5 2 0 6
 Prerequisites: Enrollment in the Phlebotomy Technology program and RED 090
 Corequisites: PBT 101
 This course provides instruction in the skills needed for the proper collection of blood and other specimens used for diagnostic testing. Emphasis is placed on ethics, legalities, medical terminology, safety and universal precautions, health care delivery systems, patient relations, anatomy and physiology, and specimen collection. Upon completion, students should be able to demonstrate competence in the theoretical comprehension of phlebotomy techniques. This is a certificate-level course.

***PBT 101 Phlebotomy Practicum** 0 0 9 3
 Prerequisites: Enrollment in the Phlebotomy Technology program
 Corequisites: PBT 100
 This course provides supervised experience in the performance of venipuncture and microcollection techniques in a clinical facility. Emphasis is placed on patient interaction and application of universal precautions, proper collection techniques, special procedures, specimen handling, and data management. Upon completion, students should be able to safely perform procedures necessary for specimen collections on patients in various health care settings. This is a certificate-level course.

Physical Education

PED 110 Fit and Well for Life 1 2 2
 Prerequisites: None
 Corequisites: None
 This course is designed to investigate and apply the basic concepts and principles of lifetime physical fitness and other health-related factors. Emphasis is placed on wellness through the study of nutrition, weight control, stress management, and consumer facts on exercise and fitness. Upon completion,

students should be able to plan a personal, lifelong fitness program based on individual needs, abilities, and interests. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

PED 113 Aerobics I 0 3 1
 Prerequisites: None
 Corequisites: None

This course introduces a program of cardiovascular fitness involving continuous, rhythmic exercise. Emphasis is placed on developing cardiovascular efficiency, strength, and flexibility and on safety precautions. Upon completion, students should be able to select and implement a rhythmic aerobic exercise program. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

PED 114 Aerobics II 0 3 1
 Prerequisites: PED 113
 Corequisites: None

This course provides a continuation of a program of cardiovascular fitness involving rhythmic exercise. Emphasis is placed on a wide variety of aerobic activities which include cardiovascular efficiency, strength, and flexibility. Upon completion, students should be able to participate in and design a rhythmic aerobic exercise routine. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

PED 117 Weight Training I 0 3 1
 Prerequisites: None
 Corequisites: None

This course introduces the basics of weight training. Emphasis is placed on developing muscular strength, muscular endurance, and muscle tone. Upon completion, students should be able to establish and implement a personal weight training program. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

PED 118 Weight Training II 0 3 1
 Prerequisites: PED 117
 Corequisites: None

This course covers advanced levels of weight training. Emphasis is placed on meeting individual training goals and addressing weight training needs and interests. Upon completion, students should be able to establish and implement an individualized advanced weight training program. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

PED 119 Circuit Training 0 3 1
 Prerequisites: None
 Corequisites: None

This course covers the skills necessary to participate in a developmental fitness program. Emphasis is placed on the circuit training method which involves a series of conditioning timed stations arranged for maximum benefit and variety. Upon completion, students should be able to understand and appreciate the role of circuit training as a means to develop fitness. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

| | | | |
|---|--------------|---|--------------|
| PED 120 Walking for Fitness | 0 3 1 | PED 130 Tennis - Beginning | 0 2 1 |
| Prerequisites: None Corequisites: None This course introduces fitness through walking. Emphasis is placed on stretching, conditioning exercises, proper clothing, fluid needs, and injury prevention. Upon completion, students should be able to participate in a recreational walking program. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | | Prerequisites: None Corequisites: None This course emphasizes the fundamentals of tennis. Topics include basic strokes, rules, etiquette, and court play. Upon completion, students should be able to play recreational tennis. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | |
| PED 122 Yoga I | 0 2 1 | PED 142 Lifetime Sports | 0 2 1 |
| Prerequisites: None Corequisites: None This course introduces the basic discipline of yoga. Topics include proper breathing, relaxation techniques, and correct body positions. Upon completion, students should be able to demonstrate the procedures of yoga. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | | Prerequisites: None Corequisites: None This course is designed to give an overview of a variety of sports activities. Emphasis is placed on the skills and rules necessary to participate in a variety of lifetime sports. Upon completion, students should be able to demonstrate an awareness of the importance of participating in lifetime sports activities. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | |
| PED 123 Yoga II | 0 2 1 | PED 143 Volleyball - Beginning | 0 2 1 |
| Prerequisites: PED 122 Corequisites: None This course introduces more detailed aspects of the discipline of yoga. Topics include breathing and physical postures, relaxation, and mental concentration. Upon completion, students should be able to demonstrate advanced procedures of yoga. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | | Prerequisites: None Corequisites: None This course covers the fundamentals of volleyball. Emphasis is placed on the basics of serving, passing, setting, spiking, blocking, and the rules and etiquette of volleyball. Upon completion, students should be able to participate in recreational volleyball. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | |
| PED 125 Self-Defense - Beginning | 0 2 1 | PED 145 Basketball - Beginning | 0 2 1 |
| Prerequisites: None Corequisites: None This course is designed to aid students in developing rudimentary skills in self-defense. Emphasis is placed on stances, blocks, punches, and kicks as well as non-physical means of self-defense. Upon completion, students should be able to demonstrate basic self-defense techniques of a physical and non-physical nature. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | | Prerequisites: None Corequisites: None This course covers the fundamentals of basketball. Emphasis is placed on skill development, knowledge of the rules, and basic game strategy. Upon completion, students should be able to participate in recreational basketball. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | |
| PED 126 Self-Defense - Intermediate | 0 2 1 | PED 170 Backpacking | 0 2 1 |
| Prerequisites: PED 125 Corequisites: None This course is designed to aid students in building on the techniques and skills developed in PED 125. Emphasis is placed on the appropriate psychological and physiological responses to various encounters. Upon completion, students should be able to demonstrate intermediate skills in self-defense stances, blocks, punches, and kick combinations. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. | | Prerequisites: None Corequisites: None This course covers the proper techniques for establishing a campsite, navigating in the wilderness, and planning for an overnight trip. Topics include planning for meals, proper use of maps and compass, and packing and dressing for extended periods in the outdoors. Upon completion, students should be able to identify quality backpacking equipment, identify the principles of no-trace camping, and successfully complete a backpacking experience. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | |
| PED 128 Golf - Beginning | 0 2 1 | PED 171 Nature Hiking | 0 2 1 |
| Prerequisites: None Corequisites: None This course emphasizes the fundamentals of golf. Topics include the proper grips, stance, alignment, swings for the short and long game, putting, and the rules and etiquette of golf. Upon completion, students should be able to perform the basic golf shots and demonstrate a knowledge of the rules and etiquette of golf. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | | Prerequisites: None Corequisites: None This course provides instruction on how to equip and care for oneself on the trail. Topics include clothing, hygiene, trail ethics, and necessary equipment. Upon completion, students should be able to successfully participate in nature trail hikes. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | |

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively.
When only three numbers are listed, the middle number always designates lab hours.

| | |
|---|--|
| PED 186 Dancing for Fitness 0 2 1 Prerequisites: None Corequisites: None This course is designed to develop movement and recreational dance skills, safety, fitness, coordination, and techniques used to teach various groups. Emphasis is placed on participation and practice with adapting dances for ages and ability levels. Upon completion, students should be able to demonstrate knowledge of fitness through social, folk, and square dance participation and instruction. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. | PED 230 Shotokan Karate 0 3 1 Prerequisites: None Corequisites: None This course introduces martial arts using the Shotokan Karate form. Topics include proper conditioning exercises, proper terminology, historical foundations, etiquette and drills. Upon completion, students should be able to perform skills and techniques related to this form of martial arts. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. |
| PED 215 Outdoor Cycling 0 2 1 Prerequisites: None Corequisites: None This course is designed to promote physical fitness through cycling. Emphasis is placed on selection and maintenance of the bicycle, gear shifting, pedaling techniques, safety procedures, and conditioning exercises necessary for cycling. Upon completion, students should be able to demonstrate safe handling of a bicycle for recreational use. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. | PED 235 Tai Chi 0 3 1 Prerequisites: None Corequisites: None This course introduces martial arts using the Tai Chi form. Topics include proper conditioning exercises, proper terminology, historical foundations, etiquette, and drills. Upon completion, students should be able to perform skills and techniques related to this form of martial arts. This course has been approved for transfer under the Comprehensive Articulation Agreement as a pre-major and/or elective course requirement. |
| PED 217 Pilates I 0 2 1 Prerequisites: None Corequisites: None This course provides an introduction to the Pilates method of body conditioning exercise. Topics include instruction in beginning and intermediate Pilates exercises using a mat or equipment, history of the Pilates method, and relevant anatomy and physiology. Upon completion, students should be able to perform beginning and intermediate exercises, and possess an understanding of the benefits of conditioning the body's core muscles. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. | PED 236 Kempo 0 3 1 Prerequisites: None Corequisites: None This course introduces martial arts using the Kempo form. Topics include proper conditioning exercises, proper terminology, historical foundations, etiquette, and drills. Upon completion, students should be able to perform skills and techniques related to this form of martial arts. This course has been approved for transfer under the Comprehensive Articulation Agreement as a pre-major and/or elective course requirement. |
| PED 218 Pilates II 0 2 1 Prerequisites: PED 217 Corequisites: None This course provides continued instruction to the Pilates method of body conditioning exercise. Topics include instruction in intermediate and advanced Pilates exercises using a mat or equipment, relevant anatomy and physiology, and further discussion of related concepts. Upon completion, students should be able to perform intermediate and advanced exercises, and possess the autonomy to maintain their own personal Pilates practice. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. | PED 240 Advanced PE Skills 0 2 1 Prerequisites: Instructor Consent Required Corequisites: None This course provides those who have mastered skills in a particular physical education area the opportunity to assist with instruction. Emphasis is placed on methods of instruction, class organization, and progressive skill development. Upon completion, students should be able to design, develop, and implement a unit lesson plan for a skill they have mastered. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement. |
| PED 220 Exercise for Physically Challenged 0 2 1 Prerequisites: None Corequisites: None This course is designed to improve physical strength, endurance, and range of motion while focusing on individual needs. Emphasis is placed on exercises which are designed and adapted to serve those with special needs. Upon completion, students should be able to show improved physical fitness, body awareness, and an appreciation for their physical well-being. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. | Philosophy PHI 215 Philosophical Issues 3 0 3 Prerequisites: ENG 111 Corequisites: None This course introduces fundamental issues in philosophy considering the views of classical and contemporary philosophers. Emphasis is placed on knowledge and belief, appearance and reality, determinism and free will, faith and reason, and justice and inequality. Upon completion, students should be able to identify, analyze, and critique the philosophical components of an issue. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts. |

PHI 230 Introduction to Logic 3 0 3
 Prerequisites: ENG 111
 Corequisites: None
 This course introduces basic concepts and techniques for distinguishing between good and bad reasoning. Emphasis is placed on deduction, induction, validity, soundness, syllogisms, truth functions, predicate logic, analogical inference, common fallacies, and scientific methods. Upon completion, students should be able to analyze arguments, distinguish between deductive and inductive arguments, test validity, and appraise inductive reasoning. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

PHI 240 Introduction to Ethics 3 0 3
 Prerequisites: ENG 111
 Corequisites: None
 This course introduces theories about the nature and foundations of moral judgments and applications to contemporary moral issues. Emphasis is placed on utilitarianism, rule-based ethics, existentialism, relativism versus objectivism, and egoism. Upon completion, students should be able to apply various ethical theories to individual moral issues such as euthanasia, abortion, crime and punishment, and justice. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

Pharmacy

PHM 110 Introduction to Pharmacy 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces pharmacy practice and the technician's role in a variety of pharmacy settings. Topics include medical terminology and abbreviations, drug delivery systems, law and ethics, prescription and medication orders, and the health care system. Upon completion, students should be able to explain the role of pharmacy technicians, read and interpret drug orders, describe quality assurance, and utilize pharmacy references.

PHM 111 Pharmacy Practice I 3 3 4
 Prerequisites: None
 Corequisites: PHM 110, PHM 115
 This course provides instruction in the technical procedures for preparing and dispensing drugs in the hospital and retail settings under supervision of a registered pharmacist. Topics include drug packaging and labeling, out-patient dispensing, hospital dispensing procedures, controlled substance procedures, inventory control, and non-sterile compounding. Upon completion, students should be able to perform basic supervised dispensing techniques in a variety of pharmacy settings.

PHM 115 Pharmacy Calculations 3 0 3
 Prerequisites: None
 Corequisites: None
 This course provides an introduction to the metric, avoirdupois, and apothecary systems of measurement and the calculations used in pharmacy practice. Topics include ratio and proportion, dosage determinations, percentage preparations, reducing and enlarging formulas, dilution and concentration, aliquots, specific gravity and density, and flow rates. Upon completion, students should be able to correctly perform calculations required to properly prepare a medication order.

PHM 115 A Pharmacy Calculations Lab 0 2 1
 Prerequisites: None
 Corequisites: None
 This course provides an opportunity to practice and perform calculations encountered in pharmacy practice. Emphasis is placed on ratio and proportion, dosage calculations, percentage, reduction/enlargement formulas, aliquots, flow rates, and specific gravity/density. Upon completion, students should be able to perform the calculations required to properly prepare a medication order.

PHM 118 Sterile Products 3 3 4
 Prerequisites: PHM 110, PHM 111
 Corequisites: None
 This course provides an introduction to intravenous admixture preparation and other sterile products, including total parenteral nutrition and chemotherapy. Topics include aseptic techniques; facilities, equipment, and supplies utilized in admixture preparation; incompatibility and stability; laminar flow hoods; immunizations and irrigation solutions; and quality assurance. Upon completion, students should be able to describe and demonstrate the steps involved in preparation of intermittent and continuous infusions, total parenteral nutrition, and chemotherapy.

PHM 120 Pharmacology I 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the study of the properties, effects, and therapeutic value of the primary agents in the major drug categories. Topics include nutritional products, blood modifiers, hormones, diuretics, cardiovascular agents, respiratory drugs, and gastrointestinal agents. Upon completion, students should be able to place major drugs into correct therapeutic categories and identify indications, side effects, and trade and generic names.

PHM 125 Pharmacology II 3 0 3
 Prerequisites: PHM 120
 Corequisites: None
 This course provides a continuation of the study of the properties, effects, and therapeutic value of the primary agents in the major drug categories. Topics include autonomic and central nervous system agents, anti-inflammatory agents, and anti-infective drugs. Upon completion, students should be able to place major drugs into correct therapeutic categories and identify indications, side effects, and trade and generic names.

PHM 132 Pharmacy Clinical 0 6 2
 Prerequisites: None
 Corequisites: None
 This course provides an opportunity to work in pharmacy settings under a pharmacist's supervision. Emphasis is placed on effective communication with personnel, developing proper employee attitude, and dispensing of medications. Upon completion, students should be able to demonstrate an understanding of pharmacy operations, utilize references, dispense medications, prepare patient charges, and efficiently operate computers.

PHM 134 Pharmacy Clinical 0 12 4
 Prerequisites: None
 Corequisites: None
 This course provides an opportunity to work in pharmacy settings under a pharmacist's supervision. Emphasis is placed on effective communication with personnel, developing proper employee attitude, and dispensing of medications.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

Upon completion, students should be able to demonstrate an understanding of pharmacy operations, utilize references, dispense medications, prepare patient charges, and efficiently operate computers.

PHM 138 Pharmacy Clinical 0 24 8

Prerequisites: None

Corequisites: None

This course provides an opportunity to work in pharmacy settings under a pharmacist's supervision. Emphasis is placed on effective communication with personnel, developing proper employee attitude, and dispensing of medications. Upon completion, students should be able to demonstrate an understanding of pharmacy operations, utilize references, dispense medications, prepare patient charges, and efficiently operate computers.

PHM 140 Trends in Pharmacy 2 0 2

Prerequisites: None

Corequisites: None

This course covers the major issues, trends, and concepts in contemporary pharmacy practice. Topics include professional ethics, continuing education, job placement, and the latest developments in pharmacy technician practice. Upon completion, students should be able to demonstrate a basic knowledge of the topics discussed.

PHM 150 Hospital Pharmacy 3 3 4

Prerequisites: None

Corequisites: PHM 118

This course provides an in-depth study of hospital pharmacy practice. Topics include hospital organizational structure, committee functions, utilization of reference works, purchasing and inventory control, drug delivery systems, and intravenous admixture preparation. Upon completion, students should be able to explain hospital organization/committee functions, interpret and enter patient orders, fill unit-dose cassettes, and prepare intravenous admixtures.

PHM 155 Community Pharmacy 2 2 3

Prerequisites: None

Corequisites: None

This course covers the operational procedures relating to retail pharmacy. Emphasis is placed on a general knowledge of over-the-counter products, prescription processing, business/inventory management, and specialty patient services. Upon completion, students should be able to provide technical assistance and support to the retail pharmacist.

PHM 160 Pharm Dosage Forms 3 0 3

Prerequisites: None

Corequisites: None

This course is a study of pharmaceutical dosage forms and considerations in their manufacture. Topics include bioavailability, routes of administration, tablets, capsules, solutions, syrups, suspensions, elixirs, aerosols, transdermals, topicals, ophthalmics, otics, and other dosage forms. Upon completion, students should be able to describe the characteristics of the major dosage forms and explain how these characteristics affect the action of the drug.

PHM 165 Pharmacy Prof Practice 2 0 2

Prerequisites: None

Corequisites: None

This course provides a general overview of all aspects of pharmacy technician practice. Emphasis is placed on pharmacy law, calculations, compounding, pharmacology, and pharmacy operations. Upon completion, students should be able to demonstrate competence in the areas required for the Pharmacy Technician Certification Examination.

Physical Science

PHS 140 Weather and Climate 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the nature, origin, processes, and dynamics of the earth's atmospheric environment. Topics include general weather patterns, climate, and ecological influences on the atmosphere. Upon completion, students should be able to demonstrate an understanding of weather formation, precipitation, storm patterns, and processes of atmospheric pollution. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

Physics

PHY 110 Conceptual Physics 3 0 3

Prerequisites: None

Corequisites: PHY 110A

This course provides a conceptually-based exposure to the fundamental principles and processes of the physical world. Topics include basic concepts of motion, forces, energy, heat, electricity, magnetism, and the structure of matter and the universe. Upon completion, students should be able to describe examples and applications of the principles studied. Nonmathematical discussions of concepts and practical applications will be stressed. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

PHY 110A Conceptual Physics Lab 0 2 1

Prerequisites: None

Corequisites: PHY 110

This course is a laboratory for PHY 110. Emphasis is placed on laboratory experiences that enhance materials presented in PHY 110. Upon completion, students should be able to apply the laboratory experiences to the concepts presented in PHY 110. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

PHY 121 Applied Physics I 3 2 4

Prerequisites: None

Corequisites: None

This algebra-based course introduces fundamental physical concepts as applied to industrial and service technology fields. Topics include systems of units, problem-solving methods, graphical analyses, vectors, motion, forces, Newton's laws of motion, work, energy, power, momentum, and properties of matter. Upon completion, students should be able to demonstrate an understanding of the principles studied as applied in industrial and service fields.

PHY 125 Health Sciences Physics 3 2 4

Prerequisites: None

Corequisites: None

This course introduces fundamental physical principles as they apply to health technologies. Topics include motion, force, work, power, simple machines, and other topics as required by the student's area of study. Upon completion, students should be able to demonstrate an understanding of the fundamental principles covered as they relate to practical applications in the health sciences.

PHY 131 Physics - Mechanics 3 2 4

Prerequisites: MAT 121, MAT 161, MAT 171, or MAT 175

Corequisites: None

This algebra/trigonometry-based course introduces fundamental physical concepts as applied to engineering technology fields. Topics include systems of units, problem-solving methods, graphical analysis, vectors, motion, forces, Newton's laws of motion, work, energy, power, momentum, and properties of matter. Upon completion, students should be able to apply the principles studied to applications in engineering technology fields.

PHY 151 College Physics I 3 2 4

Prerequisites: MAT 161 or MAT 171

Corequisites: None

This course uses algebra/trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include units and measurement, vectors, linear kinematics and dynamics, energy, power, momentum, fluid mechanics, and heat. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

PHY 152 College Physics II 3 2 4

Prerequisites: PHY 151

Corequisites: None

This course uses algebra/trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include electrostatic forces, electric fields, electric potentials, direct-current circuits, magnetostatic forces, magnetic fields, electromagnetic induction, alternating-current circuits, and light. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

***PHY 251 General Physics I 3 3 4**

Prerequisites: MAT 271

Corequisites: MAT 272

This course uses calculus-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include units and measurement, vector operations, linear kinematics and dynamics, energy, power, momentum, rotational mechanics, periodic motion, fluid mechanics, and heat. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

***PHY 252 General Physics II 3 3 4**

Prerequisites: MAT 272 and PHY 251

Corequisites: None

This course uses calculus-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include electrostatic forces, electric fields, electric potentials, direct-current circuits, magnetostatic forces, magnetic fields, electromagnetic induction, alternating-current circuits, and light. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for

the topics covered. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in natural science/mathematics.

Plastics***PLA 110 Introduction to Plastics 2 0 2**

Prerequisites: None

Corequisites: None

This course introduces the plastics processing industry, including thermoplastics and thermosets. Emphasis is placed on the description, classification, and properties of common plastics and processes and current trends in the industry. Upon completion, students should be able to describe the differences between thermoplastics and thermosets and recognize the basics of the different plastic processes.

***PLA 120 Injection Molding 2 3 3**

Prerequisites: None

Corequisites: None

This course provides theory and processing experience with the injection molding process. Topics include machine type, molds, controls, machine-polymer part relationship, molding factors, troubleshooting, and molding problems/solutions. Upon completion, students should be able to demonstrate an understanding of machine setup and operation and be able to optimize common injection molding machines.

Political Science**POL 110 Introduction to Political Science 3 0 3**

Prerequisites: None

Corequisites: None

This course introduces basic political concepts used by governments and addresses a wide range of political issues. Topics include political theory, ideologies, legitimacy, and sovereignty in democratic and non-democratic systems. Upon completion, students should be able to discuss a variety of issues inherent in all political systems and draw logical conclusions in evaluating these systems. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

POL 120 American Government 3 0 3

Prerequisites: None

Corequisites: None

This course is a study of the origins, development, structure, and functions of American national government. Topics include the constitutional framework, federalism, the three branches of government including the bureaucracy, civil rights and liberties, political participation and behavior, and policy formation. Upon completion, students should be able to demonstrate an understanding of the basic concepts and participatory processes of the American political system. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

POL 130 State & Local Government 3 0 3

Prerequisites: None

Corequisites: None

This course includes state and local political institutions and practices in the context of American federalism. Emphasis is placed on procedural and policy differences as well as political issues in state, regional, and local governments of North Carolina. Upon completion, students should be able

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively.

When only three numbers are listed, the middle number always designates lab hours.

to identify and discuss various problems associated with intergovernmental politics and their effect on the community and the individual. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

POL 210 Comparative Government 3 0 3

Prerequisites: None

Corequisites: None

This course provides a cross-national perspective on the government and politics of contemporary nations such as Great Britain, France, Germany, and Russia. Topics include each country's historical uniqueness, key institutions, attitudes and ideologies, patterns of interaction, and current political problems. Upon completion, students should be able to identify and compare various nations' governmental structures, processes, ideologies, and capacity to resolve major problems. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

POL 220 International Relations 3 0 3

Prerequisites: None

Corequisites: None

This course provides a study of the effects of ideologies, trade, armaments, and alliances on relations among nation-states. Emphasis is placed on regional and global cooperation and conflict, economic development, trade, non-governmental organizations, and international institutions such as the World Court and UN. Upon completion, students should be able to identify and discuss major international relationships, institutions, and problems. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

Psychology

PSY 118 Interpersonal Psychology 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the basic principles of psychology as they relate to personal and professional development. Emphasis is placed on personality traits, communication/leadership styles, effective problem solving, and cultural diversity as they apply to personal and work environments. Upon completion, students should be able to demonstrate an understanding of these principles of psychology as they apply to personal and professional development. This course is intended for certificate, diploma, and A.A.S. degree programs.

PSY 150 General Psychology 3 0 3

Prerequisites: None

Corequisites: None

This course provides an overview of the scientific study of human behavior. Topics include history, methodology, biopsychology, sensation, perception, learning, motivation, cognition, abnormal behavior, personality theory, social psychology, and other relevant topics. Upon completion, students should be able to demonstrate a basic knowledge of the science of psychology. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

PSY 215 Positive Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course is an overview of the scientific study of human strengths. Topics include resilience, optimism, vital engagement (flow), positive relationships, creativity, wisdom, happiness, empathy, emotional intelligence, and other relevant topics.

Upon completion, students should be able to demonstrate an understanding of the psychological factors relevant to enhancing well being. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PSY 231 Forensic Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course introduces students to concepts which unite psychology and the legal system. Topics include defining competency, insanity, involuntary commitment as well as introducing forensic assessment techniques, such as interviewing process, specialized assessments, and collecting collateral information. Upon completion, students should be able to demonstrate knowledge in areas of forensic psychology: risk assessment, criminal competencies, insanity, psychopathology, and mentally disordered offenders. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective

PSY 237 Social Psychology 3 0 3

Prerequisites: PSY 150 or SOC 210

Corequisites: None

This course introduces the study of individual behavior within social contexts. Topics include affiliation, attitude formation and change, conformity, altruism, aggression, attribution, interpersonal attraction, and group behavior. Upon completion, students should be able to demonstrate an understanding of the basic principles of social influences on behavior. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

PSY 239 Psychology of Personality 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course covers major personality theories and personality research methods. Topics include psychoanalytic, behavioristic, social learning, cognitive, humanistic, and trait theories including supporting research. Upon completion, students should be able to compare and contrast traditional and contemporary approaches to the understanding of individual differences in human behavior. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences.

PSY 241 Developmental Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course is a study of human growth and development. Emphasis is placed on major theories and perspectives as they relate to the physical, cognitive, and psychosocial aspects of development from conception to death. Upon completion, students should be able to demonstrate knowledge of development across the life span. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

PSY 243 Child Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course provides an overview of physical, cognitive, and psychosocial development from conception through adolescence. Topics include theories and research, interaction of biological and environmental factors, language development, learning and cognitive processes, social relations, and moral development. Upon completion, students should be able to identify typical and atypical childhood behavior patterns as well as appropriate strategies for interacting with children. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

PSY 246 Adolescent Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course provides an overview of the behavior patterns, life changes, and social issues that accompany the developmental stage of adolescence. Topics include developmental theories; physical, cognitive and psychosocial growth; transitions to young adulthood; and sociocultural factors that influence adolescent roles in home, school and community. Upon completion, students should be able to identify typical and atypical adolescent behavior patterns as well as appropriate strategies for interacting with adolescents. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PSY 259 Human Sexuality 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course provides the biological, psychological, and sociocultural aspects of human sexuality and related research. Topics include reproductive biology, sexual and psychosexual development, sexual orientation, contraception, sexually transmitted diseases, sexual disorders, theories of sexuality, and related issues. Upon completion, students should be able to demonstrate an overall knowledge and understanding of human sexuality. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PSY 271 Sports Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course provides an overview of the field of sports and exercise psychology. Topics include concentration, goal setting, arousal level, exercise psychology, mental imagery, confidence, and other issues related to sport and exercise performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PSY 275 Health Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course covers the biopsychological dynamics of stress and the maintenance of good health. Topics include enhancing health and well-being, stress management, lifestyle choices and attitudes, the mind-body relationship, nutrition, exercise and fitness. Upon completion, students should be able to demonstrate an understanding of the psychological factors related to health and well-being. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PSY 281 Abnormal Psychology 3 0 3

Prerequisites: PSY 150

Corequisites: None

This course provides an examination of the various psychological disorders, as well as theoretical, clinical, and experimental perspectives of the study of psychopathology. Emphasis is placed on terminology, classification, etiology, assessment, and treatment of the major disorders. Upon completion, students should be able to distinguish between normal and abnormal behavior patterns as well as demonstrate knowledge of etiology, symptoms, and therapeutic techniques. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

Radiography**RAD 110 Radiography Intro & Patient Care 2 3 0 3**

Prerequisites: Enrollment in Radiography program

Corequisites: BIO 163, RAD 111, RAD 151, and RAD 182

This course provides an overview of the radiography profession and student responsibilities. Emphasis is placed on basic principles of patient care, radiation protection, technical factors, and medical terminology. Upon completion, students should be able to demonstrate basic skills in these areas.

RAD 111 RAD Procedures I 3 3 0 4

Prerequisites: Enrollment in the Radiography program

Corequisites: BIO 163, RAD 110, RAD 151, and RAD 182

This course provides the knowledge and skills necessary to perform standard radiographic procedures. Emphasis is placed on radiography of the chest, abdomen, extremities, spine, and pelvis. Upon completion, students should be able to demonstrate competence in these areas.

RAD 112 RAD Procedures II 3 3 0 4

Prerequisites: BIO 163, RAD 110, RAD 111, RAD 151, and RAD 182

Corequisites: RAD 121 and RAD 161

This course provides the knowledge and skills necessary to perform standard radiographic procedures. Emphasis is placed on radiography of the skull, bony thorax, and gastrointestinal, biliary, and urinary systems. Upon completion, students should be able to demonstrate competence in these areas.

RAD 121 Radiographic Imaging I 2 3 0 3

Prerequisites: RAD 110, RAD 111, and RAD 151

Corequisites: RAD 112 and RAD 161

This course provides the principles of conventional film-screen radiography. Emphasis is placed on the factors that impact density, contrast, recorded detail, and distortion. Upon completion, students should be able to demonstrate an understanding of conventional film-screen radiographic imaging.

RAD 122 Radiographic Imaging II 1 3 0 2

Prerequisites: RAD 112, RAD 121, and RAD 161

Corequisites: RAD 131 and RAD 171

This course provides advanced principles of imaging including digital radiography. Emphasis is placed on the factors that impact brightness, contrast, recorded detail, and distortion. Upon completion, students should be able to demonstrate an understanding of advanced principles of imaging.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

RAD 131 Radiographic Physics I 1 3 0 2

Prerequisites: RAD 112, RAD 121, and RAD 161

Corequisites: RAD 122 and RAD 171

This course introduces the principles of radiation characteristics and production. Emphasis is placed on imaging equipment. Upon completion, students should be able to demonstrate basic understanding of radiation characteristics and production.

***RAD 151 RAD Clinical Education I 0 0 6 2**

Prerequisites: Enrollment in the Radiography program

Corequisites: RAD 110, RAD 111, and RAD 182

This course introduces patient management and basic radiographic procedures in the clinical setting. Emphasis is placed on mastering positioning of the chest and extremities, manipulating equipment and applying principles of ALARA. Upon completion, students should be able to demonstrate successful completion of clinical objectives. This course is designed to be taken in conjunction with RAD 182, RAD Clinical Elective.

***RAD 161 RAD Clinical Education II 0 0 15 5**

Prerequisites: RAD 110, RAD 111, RAD 151, and RAD 182

Corequisites: RAD 112 and RAD 121

This course provides additional experience in patient management and in more complex radiographic procedures. Emphasis is placed on mastering positioning of the spine, pelvis, head and neck, and thorax, and adapting procedures to meet patient variations. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

***RAD 171 RAD Clinical Education III 0 0 12 4**

Prerequisites: RAD 112, RAD 121, and RAD 161

Corequisites: RAD 122 and RAD 131

This course provides experience in patient management specific to fluoroscopic and advanced radiographic procedures. Emphasis is placed on applying appropriate technical factors to all studies and mastering positioning of gastrointestinal and urological studies. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

***RAD 182 RAD Clinical Elective 0 0 6 2**

Prerequisites: Enrollment in the Radiography program

Corequisites: RAD 110, RAD 111, and RAD 151

This course provides advanced knowledge of clinical applications. Emphasis is placed on enhancing clinical skills. Upon completion, students should be able to successfully complete the clinical course objectives. This course is designed to be taken in conjunction with RAD 151, RAD Clinical Education I.

RAD 211 RAD Procedures III 2 3 0 3

Prerequisites: RAD 112 and RAD 122

Corequisites: RAD 231, RAD 241, and RAD 251

This course provides the knowledge and skills necessary to perform standard and specialty radiographic procedures. Emphasis is placed on radiographic specialty procedures, sectional anatomy and advanced imaging. Upon completion, students should be able to demonstrate an understanding of these areas.

RAD 231 Radiographic Physics II 1 3 0 2

Prerequisites: RAD 122, RAD 131, and RAD 171

Corequisites: RAD 211, RAD 241, and RAD 251

This course provides advanced principles of radiation characteristics and production including digital imaging and Computed Tomography (CT). Emphasis is placed on imaging equipment. Upon completion, students should be able to demonstrate an understanding of radiation characteristics and production.

RAD 241 Radiobiology/Protection 2 0 0 2

Prerequisites: RAD 122, RAD 131, and RAD 171

Corequisites: RAD 211, RAD 231, and RAD 251

This course covers the principles of radiation protection and radiobiology. Topics include the effects of ionizing radiation on body tissues, protective measures for limiting exposure to the patient and personnel, and radiation monitoring devices. Upon completion, students should be able to demonstrate an understanding of the effects and uses of radiation in diagnostic radiology.

RAD 245 Image Analysis 1 3 0 2

Prerequisites: RAD 211, RAD 231, RAD 241, and RAD 251

Corequisites: RAD 261

This course provides an overview of image analysis and introduces methods of quality management. Topics include image evaluation, pathology, quality control and quality assurance. Upon completion, students should be able to demonstrate a basic knowledge of image analysis and quality management of images.

***RAD 251 RAD Clinical Education IV 0 0 21 7**

Prerequisites: RAD 122, RAD 131, and RAD 171

Corequisites: RAD 211, RAD 231, and RAD 241

This course provides the opportunity to continue mastering all basic radiographic procedures and to attain experience in advanced areas. Emphasis is placed on equipment operation, pathological recognition, pediatric and geriatric variations, and a further awareness of radiation protection requirements. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

***RAD 261 RAD Clinical Education V 0 0 21 7**

Prerequisites: RAD 211, RAD 231, RAD 241, and RAD 251

Corequisites: RAD 245 and RAD 271

This course is designed to enhance expertise in all radiographic procedures, patient management, radiation protection, and image production and evaluation. Emphasis is placed on developing an autonomous approach to the diversity of clinical situations and successfully adapting to those procedures. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

RAD 271 Radiography Capstone 0 3 0 1

Prerequisites: RAD 211, RAD 231, RAD 241, RAD 251

Corequisites: RAD 245 and RAD 261

This course provides an opportunity to exhibit problem-solving skills required for certification. Emphasis is placed on critical thinking and integration of didactic and clinical components. Upon completion, students should be able to demonstrate the knowledge required of any entry-level radiographer.

Reading**RED 080 Introduction to College Reading 3 2 4**

Prerequisites: ENG 075 or RED 070 or placement

Corequisites: None

This course introduces effective reading and inferential thinking skills in preparation for RED 090. Emphasis is placed on vocabulary, comprehension, and reading strategies. Upon completion, students should be able to determine main ideas and supporting details, recognize basic patterns of organization, draw conclusions, and understand vocabulary in context. This course does not satisfy the developmental reading prerequisite for ENG 111.

RED 090 Improved College Reading 3 2 4
 Prerequisites: ENG 085 or RED 080 or placement
 Corequisites: None
 This course is designed to improve reading and critical thinking skills. Topics include vocabulary enhancement; extracting implied meaning; analyzing author's purpose, tone, and style; and drawing conclusions and responding to written material. Upon completion, students should be able to comprehend and analyze college-level reading material. This course satisfies the developmental reading prerequisite for ENG 111.

Religion

REL 110 World Religions 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the world's major religious traditions. Topics include Primal religions, Hinduism, Buddhism, Islam, Judaism, and Christianity. Upon completion, students should be able to identify the origins, history, beliefs, and practices of the religions studied. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

REL 111 Eastern Religions 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the major Asian religious traditions. Topics include Hinduism, Buddhism, Taoism, Confucianism, and Shinto. Upon completion, students should be able to identify the origins, history, beliefs, and practices of the religions studied. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

REL 112 Western Religions 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces the major western religious traditions. Topics include Zoroastrianism, Islam, Judaism, and Christianity. Upon completion, students should be able to identify the origins, history, beliefs, and practices of the religions studied. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

REL 211 Intro to Old Testament 3 0 3
 Prerequisites: None
 Corequisites: None
 This course is a survey of the literature of the Hebrews with readings from the law, prophets, and other writings. Emphasis is placed on the use of literary, historical, archeological, and cultural analysis. Upon completion, students should be able to use the tools of critical analysis to read and understand Old Testament literature. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

REL 212 Intro to New Testament 3 0 3
 Prerequisites: None
 Corequisites: None
 This course is a survey of the literature of first-century Christianity with readings from the gospels, Acts, and the Pauline and pastoral letters. Topics include the literary structure, audience, and religious perspective of the writings, as well as the historical and cultural context of the early Christian community. Upon completion, students should be able to use the tools of critical analysis to read and understand New Testament literature. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

Substance Abuse

***SAB 110 Substance Abuse Overview** 3 0 0 3
 Prerequisites: None
 Corequisites: None
 This course provides an overview of the core concepts in substance abuse and dependence. Topics include the history of drug use/abuse, effects on societal members, treatment of addiction, and preventative measures. Upon completion, students should be able to demonstrate knowledge of the etiology of drug abuse, addiction, prevention, and treatment. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

***SAB 140 Pharmacology** 3 0 0 3
 Prerequisites: None
 Corequisites: None
 This course covers the pharmacology of psychoactive drugs and abused chemicals and treatment options. Emphasis is placed on the use of psychoactive drugs and related psychological and social complexities, including models for prevention and treatment. Upon completion, students should be able to understand and identify theories of addiction, major classes of drugs, treatment alternatives, and social repercussions. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

***SAB 210 Substance Abuse Counseling** 2 2 0 3
 Prerequisites: None
 Corequisites: None
 This course provides theory and skills acquisition by utilizing intervention strategies designed to obtain therapeutic information, support recovery, and prevent relapse. Topics include counseling individuals and dysfunctional families, screening instruments, counseling techniques and approaches, recovery and relapse, and special populations. Upon completion, students should be able to discuss issues critical to recovery, identify intervention models, and initiate a procedure culminating in cognitive/behavioral change. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

Information Systems Security

SEC 110 Security Concepts 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the concepts and issues related to securing information systems and the development of policies to implement information security controls. Topics include the historical view of networking and security, security issues, trends, security resources, and the role of policy, people, and processes in information security. Upon completion, students should be able to identify information security risks, create an information security policy, and identify processes to implement and enforce policy. This course has been certified by the National Security Agency, National Information Assurance Education and Training Program as meeting NSTISSI No. 4011, National Training Standard for Information Systems Security (INFOSEC) Professionals and CNSSI No. 4013 Entry Level System Administrators (SA).

SEC 150 Secure Communications 2 2 3

Prerequisites: SEC 110 and NET 125

Corequisites: None

This course provides an overview of current technologies used to provide secure transport of information across networks. Topics include data integrity through encryption, Virtual Private Networks, SSL, SSH, and IPSec. Upon completion, students should be able to implement secure data transmission technologies. This is a Cisco Networking Academy course.

SEC 160 Secure Admin I 2 2 3

Prerequisites: SEC 110 and NET 125

Corequisites: None

This course provides an overview of security administration and fundamentals of designing security architectures. Topics include networking technologies, TCP/IP concepts, protocols, network traffic analysis, monitoring, and security best practices. Upon completion, students should be able to identify normal network traffic using network analysis tools and design basic security defenses. This course has been certified by the National Security Agency, National Information Assurance Education and Training Program as meeting NSTISSI No. 4011, National Training Standard for Information Systems Security (INFOSEC) Professionals and CNSSI No. 4013 Entry Level System Administrators (SA).

SEC 210 Intrusion Detection 2 2 3

Prerequisites: SEC 160

Corequisites: None

This course introduces the student to intrusion detection methods in use today. Topics include the types of intrusion detection products, traffic analysis, and planning and placement of intrusion detection solutions. Upon completion, students should be able to plan and implement intrusion detection solutions for networks and host based systems.

SEC 220 Defense-In-Depth 2 2 3

Prerequisites: None

Corequisites: SEC 160

This course introduces students to the concepts of defense in-depth, a security industry best practice. Topics include firewalls, backup systems, redundant systems, disaster recovery, and incident handling. Upon completion, students should be able to plan effective information security defenses, backup systems, and disaster recovery procedures. This course has been certified by the National Security Agency, National Information Assurance Education and Training Program as meeting National Training Standard CNSSI No. 4013 Entry Level System Administrators (SA).

SEC 289 Security Capstone Project 1 4 3

Prerequisites: SEC 220

Corequisites: None

This course provides the student the opportunity to put into practice all the skills learned to this point. Emphasis is placed on security policy, process planning, procedure definition, business continuity, and systems security architecture. Upon completion, students should be able to design and implement comprehensive information security architecture from the planning and design phase through implementation.

Simulation & Game Development

SGD 168 Wireless SG Programming 2 3 3

Prerequisites: CIS 115 and WEB 115

Corequisites: None

This course introduces the mobile simulation and game programming process. Topics include mobile simulation/game programming, performance tuning, animation, sound effects, music, and mobile networks. Upon completion, students should be able to apply simulation/game programming concepts to the creation of mobile simulations and games.

SGD 268 Mobile SG Programming II 2 3 3

Prerequisites: SGD 168

Corequisites: None

This course introduces advanced mobile simulation and game programming processes. Topics include advanced mobile simulation/game platforms, performance tuning, animation, sound effects, music, and mobile networks. Upon completion, students should be able to apply advanced simulation/game programming concepts to the creation of mobile simulations and games.

Sociology

SOC 210 Introduction to Sociology 3 0 3

Prerequisites: None

Corequisites: None

This course introduces the scientific study of human society, culture, and social interactions. Topics include socialization, research methods, diversity and inequality, cooperation and conflict, social change, social institutions, and organizations. Upon completion, students should be able to demonstrate knowledge of sociological concepts as they apply to the interplay among individuals, groups, and societies. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

SOC 213 Sociology of the Family 3 0 3

Prerequisites: None

Corequisites: None

This course covers the institution of the family and other intimate relationships. Emphasis is placed on mate selection, gender roles, sexuality, communication, power and conflict, parenthood, diverse life-styles, divorce and remarriage, and economic issues. Upon completion, students should be able to analyze the family as a social institution and the social forces which influence its development and change. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

SOC 215 Group Processes 3 0 3

Prerequisites: None

Corequisites: None

This course introduces group processes and dynamics. Emphasis is placed on small group experiences, roles and relationships within groups, communication, cooperation and conflict resolution, and managing diversity within and among groups. Upon completion, students should be able to demonstrate the knowledge and skills essential to analyze group interaction and to work effectively in a group context. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

SOC 220 Social Problems 3 0 3

Prerequisites: None

Corequisites: None

This course provides an in-depth study of current social problems. Emphasis is placed on causes, consequences, and possible solutions to problems associated with families, schools, workplaces, communities, and the environment. Upon completion, students should be able to recognize, define, analyze, and propose solutions to these problems. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

SOC 225 Social Diversity 3 0 3

Prerequisites: None

Corequisites: None

This course provides a comparison of diverse roles, interests, opportunities, contributions, and experiences in social life. Topics include race, ethnicity, gender, sexual orientation, class, and religion. Upon completion, students should be able to analyze how cultural and ethnic differences evolve and how they affect personality development, values, and tolerance. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

SOC 232 Social Context of Aging 3 0 3

Prerequisites: None

Corequisites: None

This course provides an overview of the social implications of the aging process. Emphasis is placed on the roles of older adults within families, work and economics, politics, religion, education, and health care. Upon completion, students should be able to identify and analyze changing perceptions, diverse lifestyles, and social and cultural realities of older adults. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

SOC 234 Sociology of Gender 3 0 3

Prerequisites: None

Corequisites: None

This course examines contemporary roles in society with special emphasis on recent changes. Topics include sex role specialization, myths and stereotypes, gender issues related to family, work, and power. Upon completion, students should be able to analyze modern relationships between men and women. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

SOC 240 Social Psychology 3 0 3

Prerequisites: None

Corequisites: None

This course examines the influence of culture and social groups on individual behavior and personality. Emphasis is placed on the process of socialization, communication, conformity, deviance, interpersonal attraction, intimacy, race and ethnicity, small group experiences, and social movements. Upon completion, students should be able to identify and analyze cultural and social forces that influence the individual in a society. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral science.

SOC 244 Sociology of Death & Dying 3 0 3

Prerequisites: None

Corequisites: None

This course presents sociological perspectives on death and dying. Emphasis is placed on analyzing the different death rates among various groups, races, and societies, as well as various types of death. Upon completion, students should be able to discuss the rituals of death, both cultural and religious, and examine current issues relating to death and dying. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

SOC 254 Rural and Urban Sociology 3 0 3

Prerequisites: None

Corequisites: None

This course applies sociological concepts to a comparative study of major social issues facing contemporary rural and urban America. Emphasis is placed on growth and development patterns, ecological factors, social organizations, social controls, and processes of change. Upon completion, students should be able to illustrate the differences and similarities that exist between urban and rural environments as they resolve contemporary issues. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement.

Medical Sonography**SON 110 Introduction to Sonography 1 3 3 3**

Prerequisites: Enrollment in Sonography Program

Corequisites: SON 130

This course provides an introduction to medical sonography. Topics include applications, sonographic terminology, history, patient care, ethics, and basic skills. Upon completion, students should be able to define professionalism and sonographic applications and perform basic patient care skills and preliminary scanning techniques.

SON 111 Sonographic Physics 3 3 0 4

Prerequisites: CVS 163 or SON 110

Corequisites: None

This course introduces ultrasound physical principles, bioeffects, and sonographic instrumentation. Topics include sound wave mechanics, transducers, sonographic equipment, Doppler physics, bioeffects, and safety. Upon completion, students should be able to demonstrate knowledge of sound wave mechanics, transducers, sonography equipment, the Doppler effect, bioeffects, and safety.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | | |
|--|-----------------|--|----------------|
| SON 120 SON Clinical Ed I | 0 0 15 5 | SON 225 Case Studies | 0 3 0 1 |
| Prerequisites: SON 110 Corequisites: None This course provides active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. | | Prerequisites: SON 110 or CVS 163 Corequisites: None This course offers the opportunity to present interesting cases found during clinical education. Emphasis is placed on presentation methods which integrate patient history, laboratory results, and sonographic findings with reference to current literature. Upon completion, students should be able to correlate information necessary for complete presentation of case studies. | |
| SON 121 SON Clinical Ed II | 0 0 15 5 | SON 241 Obstetrical Sonography I | 2 0 0 2 |
| Prerequisites: SON 120 Corequisites: None This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. | | Prerequisites: SON 110 Corequisites: None This course covers normal obstetrical sonography techniques, the normal fetal environment, and abnormal first trimester pregnancy states. Topics include gestational dating, fetal anatomy, uterine environment, and first trimester complications. Upon completion, students should be able to produce gestational sonograms which document age, evaluate the uterine environment, and recognize first trimester complications. | |
| SON 130 Abdominal Sonography I | 2 3 0 3 | SON 242 Obstetrical Sonography II | 2 0 0 2 |
| Prerequisites: Enrollment in Sonography Program Corequisites: SON 110 This course introduces abdominal and small parts sonography. Emphasis is placed on the sonographic anatomy of the abdomen and small parts with correlated laboratory exercises. Upon completion, students should be able to recognize and acquire basic abdominal and small parts images. | | Prerequisites: SON 241 Corequisites: None This course covers second and third trimester obstetrical complications and fetal anomalies. Topics include abnormal fetal anatomy and physiology and complications in the uterine environment. Upon completion, students should be able to identify fetal anomalies, fetal distress states, and uterine pathologies. | |
| SON 131 Abdominal Sonography II | 1 3 0 2 | SON 250 Vascular Sonography | 1 3 0 2 |
| Prerequisites: SON 130 Corequisites: None This course covers abdominal and small parts pathology recognizable on sonograms. Emphasis is placed on abnormal sonograms of the abdomen and small parts with correlated sonographic cases. Upon completion, students should be able to recognize abnormal pathological processes in the abdomen and on small parts sonographic examinations. | | Prerequisites: SON 111 Corequisites: None This course provides an in-depth study of the anatomy and pathology of the vascular system. Topics include peripheral arterial, peripheral venous, and cerebrovascular disease testing. Upon completion, students should be able to identify normal vascular anatomy and recognize pathology of the vascular system. | |
| SON 140 Gynecological Sonography | 2 0 0 2 | SON 289 Sonographic Topics | 2 0 0 2 |
| Prerequisites: SON 110 Corequisites: None This course is designed to relate gynecological anatomy and pathology to sonography. Emphasis is placed on gynecological relational anatomy, endovaginal anatomy, and gynecological pathology. Upon completion, students should be able to recognize normal and abnormal gynecological sonograms. | | Prerequisites: SON 110 and SON 220 Corequisites: SON 221 This course provides an overview of sonographic topics in preparation for certification examinations. Emphasis is placed on registry preparation. Upon completion, students should be able to demonstrate a comprehensive knowledge of sonography and be prepared for the registry examinations. | |
| SON 220 SON Clinical Ed III | 0 0 24 8 | Spanish | |
| Prerequisites: SON 121 Corequisites: None This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. | | SPA 110 Introduction to Spanish | 2 0 0 2 |
| SON 221 SON Clinical Ed IV | 0 0 24 8 | Prerequisites: None Corequisites: None This course provides an introduction to understanding, speaking, reading, and writing Spanish. Emphasis is placed on pronunciation, parts of speech, communicative phrases, culture, and skills for language acquisition. Upon completion, students should be able to identify and apply basic grammar concepts, display cultural awareness, and communicate in simple phrases in Spanish. | |
| Prerequisites: SON 220 Corequisites: None This course provides continued active participation off campus in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. | | | |

SPA 111 Elementary Spanish I**3 0 3**

Prerequisites: RED 090

Corequisites: SPA 181

This course introduces the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Lab practice is expected of students. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written Spanish and demonstrate cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

SPA 112 Elementary Spanish II**3 0 3**

Prerequisites: SPA 111

Corequisites: SPA 182

This course is a continuation of SPA 111 focusing on the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Lab practice is expected of students. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written Spanish and demonstrate further cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

SPA 120 Spanish for the Workplace**3 0 3**

Prerequisites: None

Corequisites: None

This course offers applied Spanish for the workplace to facilitate basic communication with people whose native language is Spanish. Emphasis is placed on oral communication and career-specific vocabulary that targets health, business, and/or public service professions. Upon completion, students should be able to communicate at a functional level with native speakers and demonstrate cultural sensitivity.

SPA 141 Culture and Civilization**3 0 3**

Prerequisites: None

Corequisites: None

This course provides an opportunity to explore issues related to the Hispanic world. Topics include historical and current events, geography, and customs. Upon completion, students should be able to identify and discuss selected topics and cultural differences related to the Hispanic world. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

SPA 181 Spanish Lab I**0 2 1**

Prerequisites: None

Corequisites: SPA 111

This course provides an opportunity to enhance acquisition of the fundamental elements of the Spanish language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of various supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written Spanish and demonstrate cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

SPA 182 Spanish Lab II**0 2 1**

Prerequisites: SPA 181

Corequisites: SPA 112

This course provides an opportunity to enhance acquisition of the fundamental elements of the Spanish language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of various supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written Spanish and demonstrate cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

SPA 211 Intermediate Spanish I**3 0 3**

Prerequisites: SPA 112

Corequisites: None

This course provides a review and expansion of the essential skills of the Spanish language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Lab practice is expected of students. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

SPA 212 Intermediate Spanish II**3 0 3**

Prerequisites: SPA 211

Corequisites: None

This course provides a continuation of SPA 211. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Lab practice is expected of students. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts.

SPA 221 Spanish Conversation**3 0 3**

Prerequisites: SPA 212

Corequisites: None

This course provides an opportunity for intensive communication in spoken Spanish. Emphasis is placed on vocabulary acquisition and interactive communication through the discussion of media materials and authentic texts. Upon completion, students should be able to discuss selected topics, express ideas and opinions clearly, and engage in formal and informal conversations. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

Surveying**SRV 110 Surveying I****2 6 4**

Prerequisites: EGR 115 and MAT 121, MAT 161, MAT 171 or MAT 175

Corequisites: None

This course introduces the theory and practice of plane surveying. Topics include measuring distances and angles, differential and profile leveling, compass applications, topography, and mapping. Upon completion, students should be able to use/care for surveying instruments, demonstrate field note techniques, and apply the theory and practice of plane surveying.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively.

When only three numbers are listed, the middle number always designates lab hours.

SRV 111 Surveying II**2 6 4**

Prerequisites: SRV 110

Corequisites: None

This course introduces route surveying and roadway planning and layout. Topics include simple, compound, reverse, spiral, and vertical curves; geometric design and layout; planning of cross-section and grade line; drainage; earthwork calculations; and mass diagrams. Upon completion, students should be able to calculate and lay out highway curves; prepare roadway plans, profiles, and sections; and perform slope staking.

SRV 210 Surveying III**2 6 4**

Prerequisites: SRV 110

Corequisites: None

This course introduces boundary surveying, land partitioning, and calculations of areas. Topics include advanced traverses and adjustments, preparation of survey documents, and other related topics. Upon completion, students should be able to research, survey, and map a boundary.

SRV 220 Surveying Law**2 2 3**

Prerequisites: SRV 110

Corequisites: None

This course introduces the law as related to the practice of surveying. Topics include surveyors' responsibilities, deed descriptions, title searches, eminent domain, easements, weight of evidence, riparian rights, and other related topics. Upon completion, students should be able to identify and apply the basic legal aspects associated with the practice of land surveying.

SRV 230 Subdivision Planning**1 6 3**

Prerequisites: SRV 111, SRV 210, and CIV 211

Corequisites: None

This course covers the planning aspects of residential subdivisions from analysis of owner and municipal requirements to plat layout and design. Topics include municipal codes, lot sizing, roads, incidental drainage, esthetic considerations, and other related topics. Upon completion, students should be able to prepare a set of subdivision plans.

SRV 240 Topographic/Site Surveying**2 6 4**

Prerequisites: SRV 110

Corequisites: SRV 210

This course covers topographic, site, and construction surveying. Topics include topographic mapping, earthwork, site planning, construction staking, and other related topics. Upon completion, students should be able to prepare topographic maps and site plans and locate and stake out construction projects.

SRV 250 Advanced Surveying**2 6 4**

Prerequisites: SRV 111

Corequisites: None

This course covers advanced topics in surveying. Topics include photogrammetry, astronomical observations, coordinate systems, error theory, GPS, GIS, Public Land System, and other related topics. Upon completion, students should be able to apply advanced techniques to the solution of complex surveying problems.

Surgical Technology**SUR 110 Introduction to Surgical Technology 3 0 0 3**

Prerequisites: Enrollment in the Surgical Technology program

Corequisites: BIO 163 and SUR 111

This course provides a comprehensive study of peri-operative care, patient care concepts, and professional practice concepts within the profession of surgical technology. Topics include: introductory concepts, organizational structure and relationships, legal, ethical and moral issues, medical terminology, pharmacology, anesthesia, wound healing management concepts, and technological sciences. Upon completion, students should be able to apply theoretical knowledge of the course topics to the practice of surgical technology.

SUR 111 Periop Patient Care 5 6 0 7

Prerequisites: Enrollment in the Surgical Technology program

Corequisites: BIO 163 and SUR 110

This course provides the surgical technology student the theoretical knowledge required to function in the pre-operative, intra-operative, and post-operative role. Topics include asepsis, disinfection and sterilization, physical environment, instrumentation, equipment, peri-operative patient care, and peri-operative case management. Upon completion, students should be able to apply the principles and practice of the peri-operative team member to the operative environment.

SUR 122 Surgical Procedures I 5 3 0 6

Prerequisites: SUR 110 and SUR 111

Corequisites: SUR 123 or STP 101

This course provides an introduction to selected basic and intermediate surgical specialties that students are exposed to the first clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment.

SUR 123 SUR Clinical Practice I 0 0 21 7

Prerequisites: BIO 163, or BIO 168 and BIO 169, SUR 110 and SUR 111

Corequisites: BIO 175 and SUR 122

This course provides clinical experience with a variety of perioperative assignments to build upon skills learned in SUR 111. Emphasis is placed on the scrub and circulating roles of the surgical technologist including aseptic technique and basic case preparation for selected surgical procedures. Upon completion, students should be able to prepare, assist with, and dismantle basic surgical cases in both the scrub and circulating roles.

SUR 134 Surgical Procedures II 5 0 0 5

Prerequisites: SUR 123 or STP 101

Corequisites: SUR 135 and SUR 137

This course provides a comprehensive study of intermediate and advanced surgical specialties that students are exposed to in the second clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies, and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment.

SUR 135 SUR Clinical Practice II 0 0 12 4
 Prerequisites: SUR 122 and SUR 123
 Corequisites: SUR 134 and SUR 137
 This course provides clinical experience with a variety of perioperative assignments to build skills required for complex perioperative patient care. Emphasis is placed on greater technical skills, critical thinking, speed, efficiency, and autonomy in the operative setting. Upon completion, students should be able to function in the role of an entry-level surgical technologist.

SUR 137 Prof Success Prep 1 0 0 1
 Prerequisites: SUR 122 and SUR 123
 Corequisites: SUR 134 and SUR 135
 This course provides employability skills and an overview of theoretical knowledge in preparation for certification. Topics include risk-taking strategies, resume preparation, interviewing strategies, communication skills, and teamwork concepts. Upon completion, students should be able to prepare a resume, demonstrate appropriate interview techniques, and identify strengths and weaknesses in preparation for certification.

SUR 210 Adv SUR Clinical Practice 0 0 6 2
 Prerequisites: SUR 137
 Corequisites: None
 This course is designed to provide individualized experience in advanced practice, education, circulating, and managerial skills. Emphasis is placed on developing and demonstrating proficiency in skills necessary for advanced practice. Upon completion, students should be able to assume leadership roles in a chosen specialty area. Current national certification in surgical technology from the NBSTSA, is required by students enrolling in this course.

SUR 211 Adv Theoretical Concepts 2 0 0 2
 Prerequisites: SUR 137
 Corequisites: None
 This course covers theoretical knowledge required for extension of the surgical technologist role. Emphasis is placed on advanced practice in complex surgical specialties, educational methodologies, and managerial skills. Upon completion, students should be able to assume leadership roles in a chosen specialty area.

Sustainability Technologies

SST 110 Intro to Sustainability 3 0 3
 Prerequisites: None
 Corequisites: None
 This course introduces sustainability issues and individual contributions toward environmental sustainability. Topics include management processes needed to maximize renewable/non-renewable energy resources, economics of sustainability, and reduction of environmental impacts. Upon completion, students should be able to discuss sustainability practices and demonstrate an understanding of their effectiveness and impacts.

SST 120 Energy Use Analysis 2 2 3
 Prerequisites: DMA 050 or placement
 Corequisites: None
 This course introduces the principles of analyzing energy use, energy auditing tools and techniques, conservation techniques, and calculating energy savings. Topics include building system control theory, calibrating digital controls, energy loss calculations, and applicable conservation techniques. Upon completion, students should be able to demonstrate an understanding of energy use, audits, and controls in the analysis of energy consumption.

SST 130 Modeling Renewable Energy 2 2 3
 Prerequisites: EGR 125, CIS 111, CIS 113, or CIS 110
 Corequisites: None
 This course introduces software and other technologies used for modeling renewable energy systems. Topics include renewable energy modeling software applications, data analysis, renewable energy sources, and cost of renewable energy systems. Upon completion, students should be able to use appropriate technology to model the effectiveness of renewable energy systems.

SST 140 Green Building Concepts 1 3 2
 Prerequisites: None
 Corequisites: None
 This course introduces green building design, LEED (Leadership in Energy and Environmental Design) and comparable certifications, and their significance in modern building construction. Topics include LEED certification or similar rating systems, energy efficiency, indoor environmental quality, and sustainable building materials. Upon completion, students should be able to incorporate ecological awareness and sustainable principles within the context of design and construction.

SST 210 Issues in Sustainability 3 0 3
 Prerequisites: SST 110
 Corequisites: None
 This course introduces the long-term impacts and difficulties of applying sustainability concepts in an organization, business, or society. Topics include the application of sustainable technologies and the analysis of affordability, efficiencies, recycling, and small and large-scale design. Upon completion, students should be able to recognize the possible limitations of sustainable technologies and be prepared to reconcile such conflicts.

Social Work

***SWK 110 Introduction to Social Work** 3 0 0 3
 Prerequisites: None
 Corequisites: None
 This course examines the historical development, values, orientation, and professional standards of social work and focuses on the terminology and broader systems of social welfare. Emphasis is placed on the various fields of practice including those agencies whose primary function is financial assistance, corrections, mental health, and protective services. Upon completion, students should be able to demonstrate an understanding of the knowledge, values, and skills of the social work professional. This course has been approved by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) for training/education credit for substance abuse certification/recertification.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

Veterinary Medical Technology

VET 110 Animal Breeds and Husbandry

2 2 0 3

Prerequisites: Enrollment in the VMT program

Corequisites: None

This course provides a study of the individual breed characteristics and management techniques of the canine, feline, equine, bovine, porcine, ovine, caprine, and laboratory animals. Topics include physiological data, animal health management, and basic care and handling of animals. Upon completion, students should be able to identify breeds of domestic and laboratory animals, list physiological data, and outline basic care, handling, and management techniques.

VET 120 Veterinary Anatomy and Physiology

3 3 0 4

Prerequisites: Enrollment in the VMT program

Corequisites: None

This course covers the structure and function of the animal body with emphasis on the similarities and differences among domestic animals. Emphasis is placed on the structure and function of the major physiological systems of domestic, laboratory, and zoo animals. Upon completion, students should be able to identify relevant anatomical structure and describe basic physiological processes for the major body systems.

VET 121 Veterinary Medical Terminology

3 0 0 3

Prerequisites: Enrollment in the VMT program

Corequisites: None

This course covers the basic medical terminology required for veterinary technicians. Topics include the pronunciation, spelling and definition of word parts and vocabulary terms unique to the anatomy, clinical pathology, and treatment of animals. Upon completion, students should be able to demonstrate knowledge and understanding of basic medical terms as they relate to veterinary medicine. It is highly recommended that this course be taken in the first semester of the Veterinary Technology program.

VET 123 Veterinary Parasitology

2 3 0 3

Prerequisites: VET 110, VET 120 and VET 121

Corequisites: None

This course covers the common internal and external parasites of companion animals, livestock, selected zoo animals, and wild animals. Emphasis is placed on laboratory diagnosis of the most common forms of the parasite through fecal, urine, skin and blood exams. Upon completion, students should be able to identify common parasites and discuss life-cycles, treatment and prevention strategies, and public health aspects of veterinary parasitology.

VET 125 Veterinary Diseases I

2 0 0 2

Prerequisites: VET 110, VET 120 and VET 121

Corequisites: None

This course introduces basic immunology, fundamentals of disease processes including inflammation, and common infectious diseases of animals and their prevention through immunization. Topics include fundamental disease processes, principles of medical therapy, immunologic processes, infections and zoonotic diseases of domestic animals, and prevention of disease. Upon completion, students should be able to describe basic disease and immunological processes, recognize infections and zoonotic diseases, and discuss prevention strategies.

VET 126 Veterinary Diseases II

1 3 0 2

Prerequisites: VET 125

Corequisites: VET 211, VET 213, and VET 215

This course includes the study of basic disease processes, fundamentals of pathology and other selected topics of veterinary medicine. Topics include histopathology, pathologic changes associated with common diseases of animals, necropsy procedures, specimen handling, and other selected material. Upon completion, students should be able to describe basic pathological changes associated with disease, recognize histopathologic changes, and properly perform collection and submission of necropsy specimens.

VET 131 Veterinary Lab Techniques I

2 3 0 3

Prerequisites: VET 110, VET 114, VET 123 and VET 125

Corequisites: VET 133

This course includes the fundamental study of hematology, hemostasis, and urinalysis. Emphasis is placed on basic hematology and urinalysis techniques, manual skill development, instrumentation, quality control, and applications to veterinary science. Upon completion, students should be able to perform manual and automated CBCs, hemostatic assays, and complete urinalyses and maintain laboratory equipment and quality control.

VET 133 Veterinary Clinical Practices I

2 3 0 3

Prerequisites: VET 110, VET 114, VET 123 and VET 125

Corequisites: VET 131, VET 120

This course introduces basic practices and techniques of the veterinary clinic and biomedical research fields for dogs, cats, and laboratory animals. Topics include physical exam, husbandry, housing, sanitation, restraint and handling, administration of medications, anesthesia and euthanasia techniques, grooming and dentistry. Upon completion, students should be able to properly restrain, medicate, examine, groom, and maintain each of the species studied.

VET 137 Veterinary Office Practices

1 2 0 2

Prerequisites: Enrollment in the VMT program

Corequisites: VET 121

This course is designed to teach basic administrative techniques, client communication skills, and regulations pertaining to veterinary medicine. Topics include record keeping, telephone techniques, professional liability, office procedures, state and national regulatory laws, human relations, and animal welfare. Upon completion, students should be able to demonstrate effective communication techniques, office procedures, and knowledge of regulatory laws and issues relating to animal welfare.

VET 211 Veterinary Lab Techniques II

2 3 0 3

Prerequisites: VET 131

Corequisites: VET 213

This course covers advanced hematology, serology, immunology, and clinical chemistry. Topics include advanced hematologic, serologic, and immunologic test procedures, manual and automated clinical chemistry procedures, laboratory safety, and quality control. Upon completion, students should be able to collect, prepare, and analyze serum and plasma samples and outline quality control and safety procedures.

VET 212 Veterinary Lab Techniques III 2 3 0 3

Prerequisites: VET 211

Corequisites: VET 214

This course introduces the basic principles of microbiology, histology and cytology. Emphasis is placed on collection of microbiological samples for culture and sensitivity and collection and preparation of samples for histological and cytological examination. Upon completion, students should be able to perform microbiological culture and sensitivity and evaluate cytology and histology specimens.

VET 213 Veterinary Clinical Practice II 1 9 0 4

Prerequisites: VET 133

Corequisites: VET 126, VET 211, and VET 215

This course covers basic radiography, anesthesia techniques, dentistry, sample collection and handling, surgical assistance and instrumentation, sterile techniques, and patient record keeping. Topics include basic radiology, injectable and gas anesthesia, dentistry, instrument identification and care, sterile surgical technique, specimen collection and processing, and maintenance of patient records. Upon completion, students should be able to take and process radiographs, administer and monitor anesthesia, assist in surgical procedures, collect specimens, and maintain surgical records.

VET 214 Veterinary Clinical Practice III 1 9 0 4

Prerequisites: VET 126, VET 211, VET 213, VET 215

Corequisites: VET 212

The course covers advanced anesthetic techniques, special radiographic techniques, advanced dentistry, sample collection and processing, bandaging, and emergency and critical care procedures. Topics include induction and maintenance of anesthesia, radiographic contrast studies, advanced dentistry, external coaptation, intensive care procedures, and advanced sample collection techniques. Upon completion, students should be able to demonstrate proficiency in sample collection, radiology, anesthesia, critical care and emergency procedures, and dentistry.

VET 215 Veterinary Pharmacology 3 0 0 3

Prerequisites: CHM 130 and CHM 130A, or CHM 151, VET 125

Corequisites: VET 213

This course introduces drugs and other substances utilized in veterinary medicine. Emphasis is placed on drug classification and methods of action, administration, effects and side effects, storing and handling of drugs and dosage calculations. Upon completion, students should be able to properly calculate and administer medications, recognize adverse reactions, and maintain pharmaceutical inventory and administration records.

VET 217 Large Animal Clinical Practice 2 3 0 3

Prerequisites: VET 110, VET 120, and VET 125

Corequisites: VET 214, VET 213

This course covers the topics relevant to the medical and surgical techniques for the common domestic large animal species. Topics include physical exam, restraint, sample collection, bandaging, emergency treatment, surgical and obstetrical procedures and instruments, herd health, and lameness topics. Upon completion, students should be able to safely perform restraint, examination, and sample collection; assist surgical, obstetrical, and emergency procedures; and discuss herd health.

VET 237 Animal Nutrition 3 0 0 3

Prerequisites: CHM 130 and CHM 130A

Corequisites: None

This course covers the principles of nutrition and their application to feeding practices of domestic, farm, and companion animals. Topics include basic nutrients and nutritional needs of individual species, proximate analysis, interpretation of food and feed labels, types of animal foods, and ration formulation. Upon completion, students should be able to select appropriate diets for animals in various stages of health and disease, analyze nutrition labels, and identify foods.

Water and Wastewater Treatment**WAT 161 Solid Waste Management 2 0 2**

Prerequisite: None

Corequisites: None

This course covers the theory, practice, and regulation of solid waste management. Topics include generation, characteristics, and disposal options for management of solid wastes and sludges. Upon completion, students should be able to identify the sources and characteristics of solid wastes and sludges and describe the alternatives available for their disposal.

Web Technologies**WEB 110 Internet/Web Fundamentals 2 2 3**

Prerequisite: None

Corequisites: None

This course introduces World Wide Web Consortium (W3C) standard markup language and services of the Internet. Topics include creating web pages, search engines, FTP, and other related topics. Upon completion, students should be able to deploy a hand-coded website created with mark-up language, and effectively use and understand the function of search engines.

WEB 115 Web Markup and Scripting 2 2 3

Prerequisite: Basic computer literacy including file management skills is necessary. (CTS 060 will provide students the foundation for this course.)

Corequisites: None

This course introduces Worldwide Web Consortium (W3C) standard client-side Internet programming using industry-established practices. Topics include JavaScript, markup elements, stylesheets, validation, accessibility, standards, and browsers. Upon completion, students should be able to develop hand-coded web pages using current markup standards. Emphasis is placed on XHTML, 1.0 Transitional, SCC-1 and CSS-2 markup.

WEB 120 Intro Internet Multimedia 2 2 3

Prerequisites: WEB 115

Corequisites: None

This is the first of two courses covering the creation of Internet Multimedia. Topics include multimedia file types, file type conversion, acquisition of digital audio/video, streaming audio/video and graphics animation plug-in programs and other related topics. Upon completion, students should be able to create Internet multimedia presentations utilizing a variety of methods and applications.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | | | | |
|--|--------------|--|--|--------------|--|
| WEB 125 Mobile Web Design | 2 2 3 | Prerequisites: DME 115, WEB 110, and WEB 115 Corequisites: None | WEB 210 Web Design | 2 2 3 | Prerequisite: WEB 115 Corequisites: None This course introduces intermediate to advanced web design techniques. Topics include customer expectations, advanced markup language, multimedia technologies, usability and accessibility practices, and techniques for the evaluation of web design. Upon completion, students should be able to employ advanced design techniques to create high impact and highly functional web sites. Emphasis is placed on CSS layout techniques. |
| WEB 140 Web Development Tools | 2 2 3 | Prerequisites: CIS 110 Corequisites: None This course provides an introduction to web development software suites. Topics include the creation of web sites and applets using web development software. Upon completion, students should be able to create entire web sites and supporting applets. Emphasis is placed on design theory using appropriate software and manual techniques. | WEB 215 Adv Markup and Scripting | 2 2 3 | Prerequisite: WEB 115 and WEB 182 Corequisites: None This course covers advanced programming skills required to design Internet applications. Emphasis is placed on programming techniques required to support Internet applications. Upon completion, students should be able to design, code, debug, and document Internet-based programming solutions to various real-world problems using an appropriate programming language. Major emphasis is placed on JavaScript, DOM scripting, and JavaScript frameworks. |
| WEB 141 Mobile Interface Design | 2 2 3 | Prerequisites: WEB 125 Corequisites: None This course covers current design standards and emerging approaches related to the design and development of user interfaces for mobile devices. Emphasis is placed on research and evaluation of standard and emerging practices for effective interface and user experience design. Upon completion, students should be able to design effective and usable interfaces for mobile devices. | WEB 225 Content Management Sys | 2 2 3 | Prerequisites: WEB110 Corequisites: None This course introduces students to Content Management Systems (CMS) designed for the publication of Web content to Web sites. Topics include individual user accounts, administration menus, RSS-feeds, customizable layout, flexible account privileges, logging, blogging systems, creating online forums, and modules. Upon completion, students should be able to register and maintain individual user accounts and create a business website and/or an interactive community website. |
| WEB 151 Mobile Applications Dev I | 2 2 3 | Prerequisites: SGD 268 Corequisites: None This course introduces students to programming technologies, design and development related to mobile applications. Topics include accessing device capabilities, industry standards, operating systems, and programming for mobile applications using an OS Software Development Kit (SDK). Upon completion, students should be able to create basic applications for mobile devices. | WEB 230 Implementing Web Serv | 2 2 3 | Prerequisites: NET 110 or NET 125 and NOS 120 Corequisites: None This course covers website and web server architecture. Topics include installation, configuration, administration, and security of web servers, services and sites. Upon completion, students should be able to effectively manage the web services deployment lifecycle according to industry standards. |
| WEB 182 PHP Programming | 2 2 3 | Prerequisite: CIS 115 and WEB 115 Corequisites: None This course introduces students to the server-side, HTML-embedded scripting language PHP. Emphasis is placed on programming techniques required to create dynamic web pages using PHP scripting language features. Upon completion, students should be able to design, code, test, debug, and create a dynamic web site using the PHP scripting language. | WEB 250 Database Driven Websites | 2 2 3 | Prerequisites: DBA 110, DBA 120, WEB 182 and WEB 210 Corequisites: None This course introduces dynamic (database-driven) website development. Topics include the use of basic database CRUD statements (create, read, update and delete) incorporated into web applications, as well as in software architecture principles. Upon completion, students should be able to design and develop database driven web applications according to industry standards. |
| WEB 186 XML Technology | 2 2 3 | Prerequisites: CIS 115 and DBA 110 Corequisites: None This course is designed to introduce student to XML and related internet technologies. Topics include extendible style language (XSL), document object model (DOM), extendible style sheet language transformation (XSLT), and simple object access protocol (SOAP). Upon completion, students should be able to create a complex XML document. Oxygen XML Editor will be used in this course. | WEB 251 Mobile Application Dev II | 2 2 3 | Prerequisite: WEB 151 Corequisites: None This course covers advanced applications and custom programming to develop applications for mobile devices. Topics include device capabilities, OS specific Software Development Kits (SDK), scripting for functionality and designing interactivity. Upon completion, students should be able to demonstrate effective programming techniques to develop advanced mobile applications. |

WEB 289 Internet Technologies Project*1 4 3**

Prerequisites: WEB 110, WEB 120, WEB 140, WEB 230 and WEB 250

Corequisites: None

This course provides an opportunity to complete a significant Web technologies project from the design phase through implementation with minimal instructor support. Emphasis is placed on project definition, documentation, installation, testing, presentation, and training. Upon completion, students should be able to complete an Internet project from the definition phase through implementation.

Welding**WLD 111 Oxy-Fuel Welding****1 3 2**

Prerequisites: None

Corequisites: None

This course introduces the oxy-fuel welding process. Topics include safety, proper equipment setup, and operation of oxy-fuel welding equipment with emphasis on bead application, profile, and discontinuities. Upon completion, students should be able to oxy-fuel weld fillets and grooves on plate and pipe in various positions.

WLD 112 Basic Welding Processes**1 3 2**

Prerequisites: None

Corequisites: None

This course introduces basic welding and cutting. Emphasis is placed on beads applied with gases, mild steel fillers, and electrodes and the capillary action of solder. Upon completion, students should be able to set up welding and oxy-fuel equipment and perform welding, brazing, and soldering processes.

WLD 113 Soldering and Brazing**1 2 2**

Prerequisites: None

Corequisites: None

This course covers procedures for cutting, soldering and brazing of pipe and tubing. Topics includes safety, proper equipment setup, and operation of soldering and brazing equipment. Upon completion, students should be able to solder and braze pipe, tubing, and fittings in various positions.

WLD 115 SMAW (Stick) Plate**2 9 5**

Prerequisites: None

Corequisites: None

This course introduces the shielded metal arc (stick) welding process. Emphasis is placed on padding, fillet, and groove welds in various positions with SMAW electrodes. Upon completion, students should be able to perform SMAW fillet and groove welds on carbon plate with prescribed electrodes.

WLD 116 SMAW (Stick) Plate/Pipe**1 9 4**

Prerequisites: WLD 115

Corequisites: None

This course is designed to enhance skills with the shielded metal arc (stick) welding process. Emphasis is placed on advancing manipulative skills with SMAW electrodes on varying joint geometry. Upon completion, students should be able to perform groove welds on carbon steel with prescribed electrodes in the flat, horizontal, vertical, and overhead positions.

WLD 121 GMAW (MIG) FCAW/Plate**2 6 4**

Prerequisites: None

Corequisites: None

This course introduces metal arc welding and flux core arc welding processes. Topics include equipment setup and fillet and groove welds with emphasis on application of GMAW and FCAW electrodes on carbon steel plate. Upon completion, students should be able to perform fillet welds on carbon steel with prescribed electrodes in the flat, horizontal, and overhead positions.

WLD 122 GMAW (MIG) Plate/Pipe**1 6 3**

Prerequisites: WLD 121

Corequisites: None

This course is designed to enhance skills with the gas metal arc (MIG) welding process. Emphasis is placed on advancing skills with the GMAW process making groove welds on carbon steel plate and pipe in various positions. Upon completion, students should be able to perform groove welds with prescribed electrodes on various joint geometry.

WLD 131 GTAW (TIG) Plate**2 6 4**

Prerequisites: None

Corequisites: None

This course introduces the gas tungsten arc (TIG) welding process. Topics include correct selection of tungsten, polarity, gas, and proper filler rod with emphasis placed on safety, equipment setup, and welding techniques. Upon completion, students should be able to perform GTAW fillet and groove welds with various electrodes and filler materials.

WLD 132 GTAW (TIG) Plate/Pipe**1 6 3**

Prerequisites: WLD 131

Corequisites: None

This course is designed to enhance skills with the gas tungsten arc (TIG) welding process. Topics include setup, joint preparation, and electrode selection with emphasis on manipulative skills in all welding positions on plate and pipe. Upon completion, students should be able to perform GTAW welds with prescribed electrodes and filler materials on various joint geometry.

WLD 141 Symbols and Specifications**2 2 3**

Prerequisites: None

Corequisites: None

This course introduces the basic symbols and specifications used in welding. Emphasis is placed on interpretation of lines, notes, welding symbols, and specifications. Upon completion, students should be able to read and interpret symbols and specifications commonly used in welding.

WLD 145 Thermoplastic Welding**1 3 2**

Prerequisite: None

Corequisites: None

This course introduces the thermoplastic welding processes and materials identification. Topics include filler material selection, identification, joint design, and equipment setup with emphasis on bead types and applications. Upon completion, students should be able to perform fillet and groove welds using thermoplastic materials.

The numbers following course titles indicate **class**, **lab**, **clinic/co-op/shop**, and **credit** hours, respectively. When only three numbers are listed, the middle number always designates lab hours.

| | | | |
|---|--------------|---|--------------|
| WLD 151 Fabrication I | 2 6 4 | WLD 261 Certification Practices | 1 3 2 |
| Prerequisites: WLD 110, WLD 115, WLD 116, and WLD 131 | | Prerequisites: WLD 115, WLD 121, and WLD 131 | |
| Corequisites: None | | Corequisites: None | |
| This course introduces the basic principles of fabrication. Emphasis is placed on safety, measurement, layout techniques, and the use of fabrication tools and equipment. Upon completion, students should be able to perform layout activities and operate various fabrication and material handling equipment. | | This course covers certification requirements for industrial welding processes. Topics include techniques and certification requirements for pre-qualified joint geometry. Upon completion, students should be able to perform welds on carbon steel plate and/or pipe according to applicable codes. | |
| WLD 212 Inert Gas Welding | 1 3 2 | WLD 262 Inspection and Testing | 2 2 3 |
| Prerequisites: None | | Prerequisites: None | |
| Corequisites: None | | Corequisites: None | |
| This course introduces inert gas-shielded welding methods (MIG/TIG). Topics include correct selection of consumable and non-consumable electrodes, equipment setup, safety, and welding techniques. Upon completion, students should be able to perform inert gas welding in flat, horizontal, and overhead positions. | | This course introduces destructive and nondestructive testing methods. Emphasis is placed on safety, types and methods of testing, and the use of testing equipment and materials. Upon completion, students should be able to understand and/or perform a variety of destructive and nondestructive testing processes. | |
| WLD 215 SMAW (Stick) Pipe | 1 9 4 | | |
| Prerequisites: WLD 115 or WLD 116 | | | |
| Corequisites: None | | | |
| This course covers the knowledge and skills that apply to welding pipe. Topics include pipe positions, joint geometry, and preparation with emphasis placed on bead application, profile, and discontinuities. Upon completion, students should be able to perform SMAW welds to applicable codes on carbon steel pipe with prescribed electrodes in various positions. | | | |
| WLD 231 GTAW (TIG) Pipe | 1 6 3 | | |
| Prerequisites: WLD 132 | | | |
| Corequisites: None | | | |
| This course covers gas tungsten arc welding on pipe. Topics include joint preparation and fit up with emphasis placed on safety, GTAW welding technique, bead application, and joint geometry. Upon completion, students should be able to perform GTAW welds to applicable codes on pipe with prescribed electrodes and filler materials in various pipe positions. | | | |
| WLD 251 Fabrication II | 1 6 3 | | |
| Prerequisites: WLD 151 | | | |
| Corequisites: None | | | |
| This course covers advanced fabrication skills. Topics include advanced layout and assembly methods with emphasis on the safe and correct use of fabrication tools and equipment. Upon completion, students should be able to fabricate projects from working drawings. | | | |

Board of Trustees

OFFICERS OF THE BOARD

David Wyatt, Chair
Mandy Stone, Vice Chair
Martha Shanks, Board Secretary

Appointing Agency:

Class of 2012

Joe Brumit. Buncombe County Commissioners
Brumit Restaurant Group
Mary Ruth Fowler. Madison County Commissioners
Retired, Public School Administrator
Richard B. Hurley. Boards of Education
Retired, Square D Company
Kaye A. Myers. The Governor
Tourism Development Officer – Mountain Region,
NC Department of Cultural Resources

Class of 2013

Tom Alexander. The Governor
Taylor & Murphy Construction Company
Bobby Capps. Madison County Commissioners
Co-Owner, Blue Ridge Funeral Service
John Parham Jr., MD. Boards of Education
Physician
Carol Peterson. Buncombe County Commissioners
Buncombe County Commissioner

Class of 2014

Troy Ball. The Governor
President, Ball Properties
Don C. Locke. Boards of Education
Retired, NCSU Distinguished Professor Emeritus
Mandy Stone. Buncombe County Commissioners
Assistant County Manager/Department of Social Services Director

Class of 2015

William A. Hart, Jr. Boards of Education
Retired, WCI, Inc.
Ray Spells. Buncombe County Commissioners
Senior Vice President, Wells Fargo Bank, N.A.
David Wyatt. The Governor
Retired Superintendent, Madison County Schools

Ex-Officio

Lin Orndorf. Student Government
Association President

Administrative Offices

OFFICE OF THE PRESIDENT

Dr. Hank Dunn. President
A.A., Indian River Community College; B.A., University of Florida;
M.Ed., Florida Atlantic University; Ed.D., University of Florida

Dr. Dennis King. Special Assistant to the President
for Accreditation
B.A., Rutgers University; M.A.T., Jacksonville University;
Ed.D., University of Florida

Sara Smith. Special Assistant to the President
B.S., M.S., Indiana University

Kathleen Pfluger. Administrative Assistant, Accreditation
B.S., Northern Michigan University

Martha L. Shanks. Executive Administrative Assistant
B.S., Southeast Missouri State University

Mona L. Cornwell. Director, Community Relations & Marketing
B.A., University of North Carolina Asheville

Martha G. Ball. Specialist, Communications
B.A., University of North Carolina Asheville

Linda Mack. Clerk, Print Center

Shaana Norton. Administrative Assistant,
Community Relations and Marketing
A.A., Asheville-Buncombe Technical Community College; B.S., Montreat College

Dr. David B. White. Director, Research and Planning
B.A., State University of New York at Geneseo;
M.A., Trinity International University; Ph.D., University of Iowa

Phyllis C. Pack. Technician, Research
A.A., Brevard College; B.S., University of North Carolina Asheville

Jun Wen. Analyst, Institutional Research
B.S., Xiangtan University; M.S., South China University of Technology;
M.S., North Dakota State University

Vacant. Grant Writer

Vacant. Graphic Designer/Web Designer/
Print Shop Manager

HUMAN RESOURCES

Kaye N. Waugh. Vice President, Human Resources and
Organizational Development
B.S., University of North Carolina Asheville;
M.S., Western Carolina University

Alexa M. Bazley. Director, Human Resources
B.A., Wake Forest University; M.S., Portland State University

Dr. Copper M. Coggins. Director, Organizational and
Professional Development
B.A., Wellesley College; M.A., Goddard College;
M.S., Ph.D., North Carolina State University

Darryl S. Rhymes Specialist, Employment
A.A.S., Asheville-Buncombe Technical Community College;
B.S., University of North Carolina Asheville

Connie Snipes Assistant, Human Resources
A.A.S., Blue Ridge Community College

Christy G. Thompson Benefits Administrator
B.S., Wingate University

Vacant Specialist, HR Data Management

INSTRUCTIONAL SERVICES

Melissa P. Quinley Vice President, Instructional Services
B.A., University of Pacific; M.Ed., University of Georgia;
Ed.S, Appalachian State University

William E. Loflin Associate Vice President/SACS Liaison,
Instructional Services
B.A., Mars Hill College; M.A., Appalachian State University;
Ph.D., Florida State University

Barbara Browning Instructional Designer
B.A., Miami University, Oxford; M.S. Western Carolina University

C. Barbara Brownsmith-Campbell Associate Director
Faculty Development and Assessment
B.S., University of Nebraska; M.S., Ohio State University

Dr. Connie S. Buckner Director, Madison Campus
A.A.S., Asheville-Buncombe Technical Community College; B.S.B.A., M.A.Ed.,
Western Carolina University; Ed.D., East Tennessee State University

Charmaine Colosimo Assistant, Adjunct Faculty Support
A.A.S., Harrisburg Community College

Sherri J. Davis Administrative Assistant, Madison Campus
A.A.S., Asheville-Buncombe Technical Community College

Annie Dowdell Coordinator, Academic Reporting &
Compliance/Master Scheduler, Instructional Services
A.A.S., Asheville-Buncombe Technical Community College

Bethany Emory Associate Director, Instructional Support
and Online Learning
B.A. (two degrees), Central University of Iowa; M.A., Marymount University

Kathryn Hast Coordinator, Adjunct Faculty Support
B.A., Pennsylvania State University; M.F.A., Emerson College

Patricia A. Horlick Instructional Designer
B.A., University of Central Florida; M.A., University of South Florida

Sherrye Perry Intake Specialist,
JobLink Career Center, Madison Campus
B.A., Lipscomb University

David Rogers. Coordinator, JobLink Career Center,
Madison Campus
B.A., Appalachian State University

Daniel Rosenthal Instructional Designer
B.S., University of North Carolina Asheville;
M.Ed., North Carolina State University

Vera Williams Executive Assistant, VP of Instructional Services
A.A.S., Asheville-Buncombe Technical Community College

ECONOMIC & WORKFORCE DEVELOPMENT/
CONTINUING EDUCATION

Shelley Y. White Senior Executive Director,
Economic & Workforce Development/Continuing Education
A.S., Isothermal Community College; B.S., Appalachian State University;
M.S., Western Carolina University

Caroline B. Brigmon. Director, Workforce Programs
B.B.A., Montreat College; M.A.Ed., East Carolina University

Brinda Caldwell-Ramsey Director,
Community Enrichment Programs
University of North Carolina Asheville;
Asheville-Buncombe Technical Community College

Stuart G. Chason Coordinator, Workforce Training
B.S., Mars Hill College; M.S., University of Tennessee at Knoxville

Wanda Covert. Specialist, Data Management
B.A., Columbia College

Sherry Cordell. Coordinator, Records and Registration
A.A.S., Asheville-Buncombe Technical Community College

Alma E. Fisher Instructor, Job Developer
B.A., King College; graduate study: Appalachian State University,
Western Carolina University, and University of North Carolina Asheville

Lynne Gabai Executive Assistant,
Economic & Workforce Development and IST
Diploma, Cecil’s Business College;
A.A.S., Asheville-Buncombe Technical Community College

Joan L. Gilmore. Administrative Assistant,
Human Resources Development
A.A.S., Asheville-Buncombe Technical Community College

Sara J. Gresko Coordinator, Business Solutions
and Computer Training
B.A., North Carolina State University

Cynthia “Cindy” Hamilton Director, Economic &
Workforce Development
B.S., University of Maryland; M.B.A., Johns Hopkins

Deborah A. Henderson Administrative Assistant,
Records & Registration
B.A., Salem College

Christina L. Lang. Program Coordinator and
Instructor Health Occupations
Diploma, Milwaukee County General School of Nursing

James Lee. Coordinator, Workforce Outreach
A.A.B.A, B.B.A., M.B.A., American InterContinental University;
further study: M.Div., Liberty University

Janet F. McDonald. Specialist, Continuing Education
Reporting & Compliance
A.A.A., Wake Technical Community College

Anita Rhodarmer Specialist, Community Enrichment Programs
Data Management
A.A.S. (two degrees), Asheville-Buncombe Technical Community College

Dotty “Gea” L. Skeens. Coordinator,
Human Resources Development
B.S., University of North Carolina Asheville

Nancy A. Troxler . . . Coordinator, Occupational and Skilled Trades
B.A., Queens College; M.S., Western Carolina University

Vacant Instructor, Facility Maintenance, Craggy Prison

BUSINESS AND FINANCE

Scott McKinney, CPA . . . Vice President, Business and Finance/CFO
B.S., Mars Hill College; M.B.A., Appalachian State University;
Ed.S., Liberty University; Ed.D. in progress, Liberty University

Duane Adams Coordinator, Small Business Center Programs
A.A.S., Asheville-Buncombe Technical Community College;
B.B.A., Montreat College

Brent Altland Technician, HVAC

Susan A. Arnsperger Accountant, Payroll
A.A.S., Asheville-Buncombe Technical Community College

Melissa Aschenbrenner Early Education Teacher's Assistant

Joe Bace Executive Director, Facilities and Operations
B.A., New Jersey City University; M.Arch., New Jersey Institute of Technology

Vanette S. Baldwin Communications Dispatcher

Tommy Biddix Coordinator, Equipment
A.A.S. Asheville-Buncombe Technical Community College;
A.A.S., Cochise College; B.A., University of North Carolina Asheville

Melissa Bowditch Early Education Teacher's Assistant

Shelby Burnett Executive Assistant, Business & Finance
A.A.S., Asheville-Buncombe Technical Community College

Jenifer A. Burns Administrative Assistant, Plant Operations
B.S., University of North Carolina Asheville

David Carter Lead Technician, HVAC

Anita E. Chambers Security Officer, Enka Site

Bridgett Crawford Technician, Accounting/Cash Receipts
A.A.S., Asheville-Buncombe Technical Community College

Kevin Crompton Groundskeeper

Tracy Crompton Courier

Calven Davidson Coordinator, Operations Services

Eddie Davis Coordinator, Plant Operations, Enka Site

Paul Decoteau Lead Painter

Melissa Edwards Courier

Tina Elliott Groundskeeper, Enka Site

Joyce Dover Evans Clerk, Accounting/Student Accounts

Lisa Evans Executive Director, Business Services
B.S., North Carolina State University

Paul Evington Police Officer
Law Enforcement Certification, Blue Ridge Community College

Elizabeth B. Gentry Accountant
B.S., Montreat College; M.A.C.C., Gardener-Webb University

Norma Grivich Coordinator, Drug Treatment Court
B.A., University of North Carolina Asheville

Robin S. Grooms Coordinator, Student Accounts
A.A.S., Asheville-Buncombe Technical Community College

Haven Hanford Assistant, Global Institute for Sustainability
Technologies (GIST) Program
B.S., East Carolina University

Mary A. Harper Associate, Bookstore Sales and Inventory
A.A.S., Asheville-Buncombe Technical Community College

Ivory Mann Hunter Groundskeeper

Donald Keener Lead Groundskeeper

Kara Keller Chief, Police and Security
Law Enforcement Certification,
A.A.S., Asheville-Buncombe Technical Community College

Ken Kendrick Technician, Moves and Setups

Lisa H. Lankford Associate Director, Business Services
B.S., University of North Carolina at Greensboro; M.B.A., Montreat College

Don Kent Coordinator, Moves and Setups
& Custodial Quality Assurance

Igor Kirilin Painter

Peter Kolodich Auto and Equipment Mechanic

Ivan Kukharets Groundskeeper

Henry Ledford Carpenter

Rickie Little Groundskeeper

Marilyn McDonald Strategic Business Development Officer
B.S., East Carolina University

Therese L. McGannon, CPA Accountant, Grants and
College Foundation
B.A., West Chester University; further studies: Thomas College,
University of Maine, California State University

Amanda McLoughlin Early Education Teacher's Assistant
B.A., University of North Carolina Asheville

Dennis Messer Technician, General Maintenance, Enka Site

Lindsay Parker Early Education Teacher's Assistant
A.A., Asheville-Buncombe Technical Community College

John Moland Groundskeeper, Enka Site

Eric Noblett Technician, Moves and Setups

Lee R. Pack, Jr. Coordinator, Maintenance Operations
Diploma, Asheville-Buncombe Technical Community College;
Diploma, Haywood Community College

Stephen Poland Director, Technology Commercialization
B.S., Purdue University

Marty Rice Technician, General Maintenance

Jason Robinson Groundskeeper

Nick Romanenko Groundskeeper

Randal K. Rose Associate Director, Plant Operations
Technical Diploma, Asheville-Buncombe Technical Community College;
N.C. Licensed Heating and Air Conditioning, Refrigeration

Will Rucker Technician, Moves and Setups

Ellen Ryan Coordinator, Facilities &
Account Manager, Enka Site
B.S., Marist College

J.R. Shelton Assistant Chief, Police and Security
Law Enforcement Certification,
Asheville-Buncombe Technical Community College

Donna Shumolis Early Education Teacher II
B.S., Appalachian State University; Certification, Western Carolina University

Benny R. Smith Director, Plant Operations

Mark Snelson Carpenter

Dr. Jon Snover Director, Global Institute for
Sustainability Technologies (GIST)
B.A., Middlebury College; Ph.D., Princeton University;
Post Doctorate, North Carolina State University

Jill M. Sparks Executive Director, Small Business Center
B.A., B.S., M.B.A., Appalachian State University

Timothy D. Stafford Coordinator, Material Services/Mail Clerk
A.A.S., Forsyth Technical Community College

Donald Stout Supervisor, Police Officer
Law Enforcement Certification, Wilkes Community College;
B.A., Appalachian State University

Michael J. Sumner Communications Dispatcher
Technical Diploma, Elkins Institute of Radio

Aaron Surret Technician, General Maintenance

Donna Sampson Taylor Associate, Bookstore Sales
and Inventory
A.A.S., Asheville-Buncombe Technical Community College

Angela C. Tucker Supervisor, Accounting
A.A.S., Asheville-Buncombe Technical Community College;
B.S., University of North Carolina Asheville

Tawnya Vess Technician, Purchasing
A.A.S., Asheville-Buncombe Technical Community College

Marissa Vignola Early Education Teacher
B.S., Appalachian State University

Tammy Ward Administrative Assistant,
Plant Operations & Police
A.A.S., Asheville-Buncombe Technical Community College

Billy Warren Groundskeeper

Rebecca R. Watkins Purchasing Agent
A.A.S., Asheville-Buncombe Technical Community College

Beth Westmoreland Director, Early Education Center
B.A., Montreat College

Suzanne Wilkie Technician, Payroll/Payables
A.A.S., Asheville-Buncombe Technical Community College;
B.A., University of North Carolina Asheville

Daniel Williams Police Officer
Law Enforcement Certification,
Asheville-Buncombe Technical Community College

Traci Wright Clerk, Accounts Payable
A.A.S., Asheville-Buncombe Technical Community College;
B.A., Montreat College, M.S., Strayer University

Vacant Early Education Teacher

Vacant Groundskeeper, Enka Site

Vacant Manager, Bookstore

Vacant Specialist, Small Business Center

INFORMATION SYSTEMS TECHNOLOGY

Brian Willis . . . Vice President, Information Systems Technology/CIO
B.S., Appalachian State University;
M.B.A., University of North Carolina – Wilmington

Arlen E. Rauschkolb Associate Vice President,
Information Systems Technology
B.A., Stony Brook University;
M.S. (two degrees), University of Wisconsin – Milwaukee

Inez O. Alexander Specialist, Computer Center
A.A.S., Asheville-Buncombe Technical Community College

Spencer Black Technician, Audio Visual Services
B.S., Appalachian State University

Joshua Davis Analyst, Customer Support
A.A.S., Asheville-Buncombe Technical Community College

Thomas K. Edmondson Coordinator, Computer Lab
B.S., North Carolina State University;
A.A.S., Asheville-Buncombe Technical Community College

Lynne Gabai Executive Assistant,
Economic & Workforce Development and IST
Diploma, Cecil's Business College;
A.A.S., Asheville-Buncombe Technical Community College

Cris B. Harshman Manager, Technology Support Group
B.A., Elon University; J.D., Temple University School of Law

Flip Hayner SharePoint Administrator/Developer
B.A., Piedmont College

Thomas Hilbert Analyst, Technical Support
B.A., James Madison University

Sterling W. Lawrence Technician, Educational
Technology Services
A.A.S., Asheville-Buncombe Technical Community College;
B.B.A., Georgia Southern University

Mark Locklear Administrator, Systems/Web
A.A., Columbia College; B.S., University of North Carolina at Pembroke;
M.S., North Carolina Central University

Laurie A. Manley Specialist, Computer Center
A.A.S., Asheville-Buncombe Technical Community College;
B.M., Mars Hill College; graduate study: Rice University

Brian S. McCall Specialist II, Technical Support
A.A.S. (two degrees), Southwestern Community College;
B.S., Western Carolina University; Certification: CompTIA A+

David C. McKinney Director, Administrative Applications
A.A.S. (two degrees), Asheville-Buncombe Technical Community College

Benson L. Metcalf Specialist I, Technical Support
A.A.S., Asheville-Buncombe Technical Community College;
Certification: CompTIA A+

Eugene E. Pressley, II, M.C.P., M.C.S.E. Network Administrator
A.A.S. (two degrees), Asheville-Buncombe Technical Community College

Harold Thomas Technician, Computer Information
Systems Support
B.S., Appalachian State University

John R. Tucker Specialist II, Technical Support
A.A.S., Aiken Technical College;
Certification: AutoCAD 2000 Technical Competency

Elizabeth K. Williams Coordinator, Technology Training
A.A.S. (two degrees), Asheville-Buncombe Technical Community College

STUDENT SERVICES

Dr. Deborah L. Harmon Interim Vice President,
Student Services
B.A., Michigan State University; M.A., Northern Arizona University;
Ed.D., North Carolina State University; NCC

Mary Albert Coordinator, Veterans' Services
A.S., College of Lake County; B.A., Barat College

Shelley Arford Administrative Assistant,
Enrollment Operations
B.S., Houghton College

Ashley E. Bledsoe Administrative Assistant,
Enrollment Operations
B.A., University of North Carolina at Chapel Hill

Karen Braswell Administrative Assistant,
Enrollment Operations
B.A., Mars Hill College

Peggy Bulla Counselor, Career
B.A., University of North Carolina at Charlotte;
M.A., Western Carolina University; NCC; LPC

Linda Burke Academic Advisor
B.A., M.Ed., University of Florida

Lisa F. Bush Director, Enrollment Services
B.A., Stetson University; M.S., Rensselaer Polytechnic Institute

Rebecca Chambers Administrative Assistant,
Student Advising and Student Support Services
B.A., Flagler College

Michael M. Dempsey Director, Recruitment and
High School Partnerships
B.A., College of Charleston; M.A., University of Charleston

Julia Dennis Interim Coordinator, One Stop Center
B.A., University of North Carolina, Chapel Hill; M.A., The Citadel

Scott C. Douglas Registrar & Director, Enrollment Operations
B.A., University of Tennessee; M.S., M.B.A., Colorado State University

Karen Edwards Assessment Specialist
B.S., Appalachian State University

Pamela Ellis Associate Director, Financial Aid
B.A., Western Carolina University

Kimberly England Executive Assistant, VP of Student Services
A.A.S., Asheville-Buncombe Technical Community College

Lee Fisher Assistant, One Stop Center
B.S., Western Carolina University

Jonathan Grunder Specialist, Financial Aid
A.A., Santa Fe Community College;
B.S., University of North Carolina Asheville

Judith Harris Associate Director, Support Services
B.A., West Virginia Wesleyan; M.S., West Virginia University, CRC

Michele Hathcock Director, Student Life & Development
B.S., Western Carolina University

Karleen Howard Assistant, Financial Aid
B.A., Saint Leo University

Rebecca B. Howell Interim Director, Student Advising
& Support Services
B.S., University of North Carolina Asheville; M.S., Western Carolina University

Shanna Hough Academic Advisor, Disability Services Specialist
B.A., Coastal Carolina University; M.A., Troy University

Mona Shope Assistant, Records
A.A.S., Asheville-Buncombe Technical Community College

Alyson R. Laudenslayer Coordinator, Admissions
B.S., University of North Carolina Asheville

Helen Linkous Academic Advisor
B.S., University of North Carolina at Chapel Hill

Joseph Loughmiller Assistant, Financial Aid
A.A., Asheville-Buncombe Technical Community College

Stephen Maag Recruiter, College Liaison for
High School Programs
B.S., Winthrop University; M.A.Ed., Western Carolina University

Marc McKinnis Counselor
B.A., Denison University; M.A., Lewis & Clark Graduate School
of Education and Counseling

Jill R. McNabb Associate Registrar
B.A., University of California at Los Angeles

Joyce M. Moncada Administrative Assistant, Admissions
A.A.S., Asheville-Buncombe Technical Community College

Nancy B. Moore Recruiter
B.A., Michigan State University; M.S.Ed., Northern Illinois University

| | |
|------------------|--|
| Todd Oldenberg | Recruiter, College Liaison for High School Programs B.A., Davidson College; M.Ed., Oregon State University |
| Melinda Peterson | Administrative Assistant, Admissions A.A., Lake Sumter Community College |
| Alicia Plath | Academic Advisor, Transfer Advising Center B.A., University of Minnesota; M.Ed., University of South Carolina |
| Alikhan Saleh | Academic Advisor, Transfer Advising Center B.A., University of North Carolina Asheville |
| Kirsty Schenkel | Assistant, One Stop Center B.A., Jacksonville University; M.A., University of Tennessee at Knoxville |

Vacant Coordinator, Academic Learning Center

Vacant Director, Basic Skills

ALLIED HEALTH & PUBLIC SERVICE EDUCATION

Dolly Horton, CMA (AAMA), M.Ed. Dean, Allied Health
A.A.S., Western Piedmont Community College; B.S., Western Carolina University;
M.S., Regent University; further doctoral study: Walden University

J. Tisha Anderson, C.D.A. Instructor, Allied Dental Programs
Diploma, Asheville-Buncombe Technical Community College
B.H.S., Nova Southeastern University

Christy C. Andrews, R.N. Instructor, Nursing
B.S.N., Western Carolina University;
M.S.N., University of North Carolina at Charlotte

Deborah J. Bakken, R.N. Instructor, Nursing
A.A.S., Nursing, George C. Wallace State Community College;
B.S.N., George Mason University; M.S.H.S., Touro University

Judy Brauer, R.N., M.P.H., R.M.A. Chair, Medical Assisting
A.S., Loma Linda University; B.S., Andrews University;
M.P.H., Loma Linda University

Laura L. Brown, R.N., C.P.N., C.A.P.A., C.N.E. Instructor, Nursing
Diploma in Nursing, Peter Bent Brigham Hospital School of Nursing;
B.S.N., Winston Salem State University; M.S.N., Gardner Webb University

Marilee Bush, R.D.H. Instructor, Allied Dental Program
A.A., Cerritos Community College; B.S.D.H., University of Southern California

Chastity L. Case, R.T.(R), R.D.M.S., R.V.T. Instructor,
Medical Sonography
A.A.S., Asheville-Buncombe Technical Community College; Certificate, School of
Diagnostic Medical Sonography, Grady Memorial Hospital, Atlanta, GA;
B.S., Oregon Institute of Technology

Dr. Ozzy Cocarelli Instructor, Allied Dental Programs
D.D.S., University of San Paulo; M.Div., Gardner Webb University

Cathy B. Cody Chair, Early Childhood Education
B.S., M.S., Western Carolina University

Angela Dunagin-Sellers, R.N., C.C.I.T. Instructor, Nursing
A.A, A.D.N., Hinds Community College; C.C.I.T., Drexel University;
B.S.N., University of Mississippi; M.S.N., Drexel University

Brent Evans, R.N. Instructor, Nursing
A.A.S., Asheville-Buncombe Technical Community College;
B.S., University of North Carolina, Charlotte; University of Georgia

Brenda H. Fisher, R.D.H. Instructor, Allied Dental Programs
A.A.S., Asheville-Buncombe Technical Community College;
B.S.D.H., East Tennessee State University

Debbie Ann Freeman, R.N. Instructor, Nursing
A.A.S., Asheville-Buncombe Technical Community College;
B.S.N., Lees-McRae College

Megan A. Getty-Odom, M.S.W., L.C.S.W., HS-BCP Chair,
Human Services Technology
B.A., M.S.W., University of South Carolina

Angela D. Goodwin, R.T.(R) Instructor, Radiography
A.A.S., Asheville-Buncombe Technical Community College;
B.S., Mars Hill College

Glenna P. Gunter. Administrative Assistant,
Allied Health and Public Service Education
A.A.S., Asheville-Buncombe Technical Community College;
B.S.B.A., Franklin University

Christine A. Halvorson, C.D.A., R.D.H. Coordinator, Dental Clinic
A.A.S., St. Phillips College; B.S., Regents College

Denise M. Hansen, R.N., F.N.P. Instructor, Nursing
A.A.S., Miami-Dade Community College; B.S.N., Barry University;
M.S.N., Western Carolina University

Barbara B. Harrison, M.T. (ASCP) S.M. Instructor,
Medical Laboratory Technology
B.S., Aurora University; M.S., University of South Carolina

Jane H. Headland, R.N. Instructor, Nursing
B.S., Grove City College; M.S., Virginia Polytechnic Institute and State University;
M.S.N., University of Tennessee

Dianne B. Hughes Instructor, Early Childhood Education
B.A., Mars Hill College; M.A. Ed., Western Carolina University

Melissa Hyatt, M.T. (ASCP) Chair,
Medical Laboratory Technology
A.A.S., Asheville-Buncombe Technical Community College;
B.S., M.H.S., Western Carolina University

Zachary Jordan, C.Ph.T. Chair, Pharmacy Technologies
B.A., Mars Hill College

Robin B. Keith, C.S.T., R.N., C.N.O.R. Chair,
Surgical Technology
LPN Diploma, Guilford Technical Community College; A.D.N., Mount Hood
Community College; B.S.N., Western Carolina University; Surgical Technology
Diploma, Fayetteville Technical Community College

Pamela N. Kirby Instructor, Early Childhood Education
B.S., Radford University; M.A.Ed, Western Carolina University

Nita Kirkpatrick, R.N. Clinical Liaison, Nursing
B.S.N., Berea College; M.S.N., East Carolina University

Carol W. Little, C.D.A., R.D.H. Chair,
Allied Dental Programs
Certificate, University of North Carolina at Chapel Hill;
A.A.S., Asheville-Buncombe Technical Community College;
B.S. Mars Hill College; M.H.S., Western Carolina University

Sheryl E. Lussier, R.N. Instructor, Nursing
Diploma, Seton School of Nursing; B.S.N., University of Phoenix

Nancy G. Markhoff. Administrative Assistant, Nursing
B.S.Ed., Ohio State University

Kristi Miller, R.N. Associate Chair, Nursing
A.A.S., Asheville-Buncombe Technical Community College;
B.S., M.S., Western Carolina University

Susan Mitchell, R.N. Instructor, Nursing
A.A.S., Sinclair Community College; B.S., M.S., Westen Carolina University

JoEtta Newman. Chair, Veterinary Medical Technology
A.A.S., B.S., Morehead State University

Brenda Phillips, R.T. (R) Instructor, Radiography
A.A.S., Asheville-Buncombe Technical Community College; B.A., Berea College

Karen Pruett Manager, Dental Office
C.D.A., C.D.P.M.A., Asheville-Buncombe Technical Community College

Debra Reese, R.T. (R) Chair, Medical Imaging
A.A.S., Asheville-Buncombe Technical Community College;
B.S., Mars Hill College; M.P.H., University of North Carolina at Chapel Hill

Daniel Stokoe, C.S.T. Clinical Coordinator,
Surgical Technology
Surgical Technology Diploma, Asheville-Buncombe Technical Community College;
A.A.S., Fayetteville Technical Community College

Dr. Anne P. Symonds, D.V.M. Instructor,
Veterinarian Medical Technology
B.S., D.V.M., Ohio State University

Dr. Lori A. Tapp, D.V.M. Instructor,
Veterinary Medical Technology
M.S.; D.V.M., University of Florida

LeAnna D. Valentine, R.N. Interim Chair, Nursing
A.D.N., Asheville-Buncombe Technical Community College;
B.S.N., Western Carolina University; M.S.N., East Carolina University

Tamara Wells, C.D.A., R.D.H. Instructor,
Allied Dental Programs
A.A.S., Asheville-Buncombe Technical Community College;
B.S., Mars Hill College; M.A.Ed., Western Carolina University

EMERGENCY SERVICES

K. Skye Myrick Dean, Emergency Services
B.S.B.A./B.S., Appalachian State University; M.S., Western Carolina University;
further graduate study: Duke University

Eve Bennett. Coordinator, EMS, Continuing Education
B.S., Western Carolina University

Thomas Brooks. Coordinator, Fire Service Technology
A.A.S., Asheville-Buncombe Technical Community College

Dianne L. Davis Director, Basic Law Enforcement Training
A.A.S., Southwestern Technical Community College;
B.S., Western Carolina University; M.S., Boston University

Darin Jackson. Instructor, Emergency Medical Science
A.A.S. Asheville-Buncombe Technical Community College;
B.A., Southwestern University, Kansas; M.A.R., Liberty University

Dara A. Narsiff Administrative Assistant, Emergency Services
A.A.S., Asheville-Buncombe Technical Community College

Elizabeth Nealon, J.D. Interim Chair,
Criminal Justice Technology
A.A., Palm Beach Community College;
B.A., University of North Carolina at Chapel Hill; J.D., University of Georgia

R. Keith Owens, E.M.T.-P Chair,
Emergency Medical Science
A.A.S., Guilford Technical Community College; B.A., John Wesley College;
M.A. Ed., American InterContinental University

Amanda Soule, R.N., E.M.T.-P Instructor, Clinical EMS
A.S., Asheville-Buncombe Technical Community College;
B.S., University of North Carolina Asheville

John C. Witherspoon. Chair, Fire Protection Technology
A.S., Montreat College; A.A.S., Asheville-Buncombe Technical Community College;
B.S., Fayetteville State University

ARTS AND SCIENCES

Dr. Beth R. Stewart Dean, Arts and Sciences
B.A., Henderson State University; M.A., Stephen F. Austin State University;
Ed.D., Vanderbilt University

Dr. Jon R. Wiener Associate Dean, Math & Science
B.S., M.S., University of Maryland; Ph.D., University of Virginia

Joseph G. Allawos Instructor, Biology
B.S., College of Charleston; M.S., University of Tennessee

Jerry L. Ashe. Instructor, Mathematics
A.A., Daytona Beach Community College;
B.S., M.S., further graduate study: University of Central Florida

Yesho Y. Atil. Instructor, English
B.A., M.F.A., University of Alabama

Tamala S. Barnett. . . . Administrative Assistant, Arts and Sciences
A.A.S., Asheville-Buncombe Technical Community College; PSP (State)

April D. Birchfield. Instructor, History
B.A., University of North Carolina Asheville; M.A., Wake Forest University

Benjamin Blake Instructor, Mathematics
B.S., M.B.A., Clemson University

Jennifer L. Browning. Instructor, English
B.A., University of North Carolina Asheville;
M.A., further graduate study: Georgia State University

Kathryn Bove Instructor, Spanish
B.A., University of North Carolina Asheville;
M.A., North Carolina State University

John G. Bultman. Instructor, Geology
B.S., University of Southern Mississippi; M.S., University of Tennessee

- Helen L. Burrell Instructor, Biology
B.S., Manchester Metropolitan University; M.S., Appalachian State University
- Jacqueline Caldwell Instructor, Mathematics
B.S., North Carolina State University; M.A., Western Carolina University
- Janet H. Caldwell Instructor, Communications
B.A., M.S., Murray State University; M.A.Ed., Northwestern University
- Peter J. Carver Instructor, Drama
B.A., Stetson University; M.A., Texas Woman's University;
M.F.A., University of New Orleans
- Tim Cox Manager, Biology Lab
B.S., Mars Hill College
- Karma Crouch Instructor, Mathematics
B.S., Appalachian State University; M.A.Ed., Western Carolina University
- Dr. Charles P. Cummings Instructor, Psychology
B.A., State University of New York at Buffalo;
M.A., Ph.D., Georgia State University

Kelly C. Randolph, C.P.A. Instructor, Business Administration
B.S.B.A., M.S., Appalachian State University

Walter A. Rapetski, Jr. Instructor, Culinary Arts
and Hospitality Education
A.A.S., B.S., M.S., Rochester Institute of Technology

Marlene Roden Instructor, Business Computer Technologies
B.S., Western Carolina University; M.A., Appalachian State University

Jonathan S. Ross Instructor, Business Computer Technologies
B.M., James Madison University; M.M., Binghamton University

Marek B. Sawicki Instructor, Spa Therapies and Operations
B.A., University of Massachusetts, Amherst; Asheville School of Healing Arts,
Nippon Shiatsu Diagaka; Diploma, Guild of Structural Integration, Boulder, CO;
further study: Ayurvedic, Albuquerque, N.M.

Misty L. Shuler, R.H.I.A. Chair, Administrative Medical
Systems Technologies
B.S., Western Carolina University

Pamela J. Silvers Chair, Business Computer Technologies
B.S., University of North Carolina Asheville;
M.A.Ed., Western Carolina University

Frederick L. Snyder Instructor, Culinary Arts and
Hospitality Education
A.A.S., Culinary Institute of America

Lee Sokol Administrative Assistant, Culinary Arts
and Hospitality Education
B.A., University of Florida; M.A., American University

Charles K. Wallin Instructor, Business Computer Technologies
B.F.A., Michigan State University; M.S., University of St. Thomas

Asher Webb Instructor, Business Computer Technologies
(Mobile Development)
B.A., Bard College at Simon's Rock

William L. Wolfe Instructor, Networking Technologies
A.A.S., Asheville-Buncombe Technical Community College;
B.S., University of North Carolina Asheville

ENGINEERING AND APPLIED TECHNOLOGY

Vernon D. Daugherty, Jr. Dean, Engineering and
Applied Technology
B.S., Western Carolina University; M.S., North Carolina A&T State University;
N.C. Licensed Heating, Air Conditioning, Refrigeration,
Plumbing, and Electrical Contractor

Larry S. Boyd Chair, Machining and Welding Technology
A.A.S., Asheville-Buncombe Technical Community College;
B.S.M.E.T., Western Carolina University;
further study: University of North Carolina Asheville

Kenneth R. Cooper, P.E., R.L.S. Instructor, Civil Engineering/
Surveying Technology
A.A.S., Suffolk County Community College; B.S. University of Arizona

Charles P. Farmer Instructor, Welding Technology
A.A.S., Diploma, Asheville-Buncombe Technical Community College;
B.S., Mars Hill College

M. Kevin Fletcher Instructor, Transportation Technologies
A.A.S., Asheville-Buncombe Technical Community College;
Master A.S.E. Certified Automobile Technician, Heavy Truck Technician

Carlos Ford Instructor, CAD Technology
A.A.S., Asheville-Buncombe Technical Community College;
B.S., Western Carolina University

Lisa Hale, CPS/CAP Administrative Assistant,
Engineering and Applied Technology
A.A.S., Lorain County Community College

James B. Houston Instructor, Electronics
Engineering Technology
A.A.S., Asheville-Buncombe Technical Community College; A.A.S. Community
College of The Air Force; B.A., University of North Carolina at Chapel Hill;
M.C.S.E., CompTIA A+, CompTIA Network+, M.C.P+I

Sherian D. Howard Chair, CAD Technology
A.A.S., Asheville-Buncombe Technical Community College;
B.S.M.E.T., Western Carolina University; M.S., Western Carolina University;
further study: University of North Carolina Asheville

Kevin Kiser Instructor, Mechanical Engineering
Technology and Industrial Systems Technology
B.S., North Carolina State University

C. Edwin Knies Instructor, Transportation Technologies
A.A.S., Asheville-Buncombe Technical Community College;
B.S., University of Evansville; ASE Master Certified Automobile Technician

Stephen Lemmons Instructor, Transportation Technologies
A.A.S., Asheville-Buncombe Technical Community College

Frank Miceli Chair, Electronics Engineering Technology
A.A.S., State University of New York at Farmingdale;
B.S.E.E., Ohio State University; M.S., Western Carolina University;
further graduate study: Polytechnic Institute of New York

B. Heath Moody Interim Chair, Construction and Sustainability Technologies
B.S., M.S., Appalachian State University

Jared Ownbey, PLS Instructor, Civil Engineering/ Surveying Technology
A.A.S., Asheville-Buncombe Technical Community College, Professional Land Surveyor

S.T. (Tom) Sharar II. Instructor, Electrical/ Electronics Technology
A.A.S., Asheville-Buncombe Technical Community College; B.A., Pennsylvania State University; B.S., M.S.E.T., Western Carolina University

Mitchel Sorin, AIA LEED AP. Instructor, Sustainability Technologies
B.S., Miami University; B.S., Pratt Institute

Sharon Suess Chair, Mechanical Engineering Technology
B.S., University of North Carolina Asheville; M.S., North Carolina State University

James A. Sullivan, PE Chair, Civil Engineering/ Surveying Technology
A.A., Santa Fe Community College; B.S., University of Florida; M.P.M., Western Carolina University

David W. Walker.Chair, Transportation Technologies
Diplomas, A.A.S., Asheville-Buncombe Technical Community College; Master A.S.E. Certified Automobile Technician; Master A.S.E. Certified Heavy Truck Technician

William W. Wells Chair, Air Conditioning, Heating and Refrigeration
Technical Diploma, Asheville-Buncombe Technical Community College; B.A., University of North Carolina at Asheville; graduate study: Western Carolina University; N.C. Licensed Heating, Air Conditioning, Refrigeration, and Electrical Contractor
