Associate in Science: Environmental Science Pathway

All Pathways are design to transfer to a four-year institution for eventual completion of a BA/BS or BFA degree.

Careers in Environmental Science are varied. Environmental scientists do deskwork, fieldwork, or some combination thereof. The focus could be mathematical, physical, or written. The majority of careers in Environmental Science are some blend of these. Those engaged in Environmental Policy, Planning, and Management usually work for a local government and are likely to be engaged in research-intensive work. To become an Environmental Lawyer, additional education is required.
