Associate in Science: Pre-Physician's Assistant Pathway

All Pathways are design to transfer to a four-year institution for eventual completion of a BA/BS or BFA degree.

Physician assistants work on teams with physicians or surgeons and other healthcare workers. Their specific duties and the extent to which they must be supervised by physicians or surgeons differ from state to state.

Physician assistants work in all areas of medicine, including primary care and family medicine, emergency medicine, surgery, and psychiatry. The work of physician assistants depends in large part on their specialty or the type of medical practice where they work. In some areas, especially rural and medically underserved communities, physician assistants may be the primary care providers at clinics where a physician is present only 1 or 2 days per week. In these locations, physician assistants collaborate with the physician as needed and as required by law.

In addition to earning a bachelor's degree, additional years earning a master's degree is required.

AA and AS degrees require completion of a minimum of 60 semester hours of credit, but pathways may include extra hours to meet university baccalaureate degree plans. Completion of hours beyond 60 may not be required to meet AA or AS graduation requirements but is recommended based on programs offered by intended transfer institutions.
