Associate in Arts: Information Systems Pathway

All Pathways are design to transfer to a four-year institution for eventual completion of a BA/BS or BFA degree.

Information Systems is a dynamic career field focused on the employment of various information technologies in ways that help achieve the strategic goals and operational objectives of businesses or other organizations. Information systems are increasingly creating a demand for skilled individuals who can think in terms of the company's business, technology, and organizational or "people" strategies in a way that ensures each is aligned with and reinforcing of the other two. Organizations depend on good information and information systems.

Opportunities for employment in the information systems career field are many and varied. Positions include software developer, human resources analyst, database administrator, business analyst, systems analyst, web developer, or computer programmer.

AA and AS degrees require completion of a minimum of 60 semester hours of credit, but pathways may include extra hours to meet university baccalaureate degree plans. Completion of hours beyond 60 may not be required to meet AA or AS graduation requirements but is recommended based on programs offered by intended transfer institutions.
